#### ABSTRACT

TITLE:	VILLAGE OF COLOMA COMPREHENSIVE PLAN 2030
AUTHORS:	Kathy Thunes, Principal Planner Tom Baron, Planner Todd Verboomen, Planner Trish Nau, GIS Coordinator Mike Patza, GIS/Planning Assistant
SUBJECT:	Comprehensive plan for the Village of Coloma Waushara County
DATE:	November 19, 2009
LOCAL PLANNING AGENCY:	East Central Wisconsin Regional Planning Commission
SOURCE OF COPIES:	East Central Wisconsin Regional Planning Commission 400 Ahnaip Street, Suite 100 Menasha, WI 54952-3100 920-751-4770 dhaney@eastcentralrpc.org www.eastcentralrpc.org

This report describes existing conditions, projects future growth and offers recommendations to guide future development in the Village of Coloma, Waushara County.

#### **TABLE OF CONTENTS**

Chapter 1: Introduction	1-1
A brief description of the location of the Village of Coloma, the background of	
the planning effort and the planning process.	

- **Chapter 3: Housing** 3-1 *A compilation of objectives, polices, goals, maps and programs to provide an adequate housing supply that meets existing and forecasted housing demand. This shall include an assessment of the age, structural, value and occupancy characteristics of existing housing stock; identification of polices and programs that promote the development of housing and provides a range of housing choices that meets the needs of persons of all income levels, age groups and special needs; promotes the availability of land for development or redevelopment of low and moderate income housing; and maintains or rehabilitates the existing housing stock.*
- 4-1 *A compilation of objectives, polices, goals, maps and programs to guide the future development of the various modes of transportation, including highways, transit, transportation systems for persons with disabilities, bicycles, walking, railroads, air transportation, trucking and water transportation.*
- **Chapter 5: Utilities and Community Facilities** 5-1 *A compilation of objectives, policies, goals, maps and programs to guide the future development of utilities and community facilities such as sanitary sewer, storm water management, water supply, solid waste disposal, on-site wastewater treatment technologies, recycling facilities, parks, telecommunication facilities, power-generating plants and transmission lines, cemeteries, health and child care facilities, police, fire and rescue facilities, libraries, schools and other governmental facilities.*
- **Chapter 6: Agricultural, Natural, Cultural Resources** 6-1 *A compilation of objectives, polices, goals, maps and programs for the conservation, and promotion of the effective management of natural resources such as groundwater, forests, productive agricultural areas, environmentally sensitive areas, threatened and endangered species, stream corridors, surface water, floodplains, wetlands, wildlife habitat, metallic and nonmetallic mineral resources, parks, open spaces, historical and cultural resources, community design, recreational resources and other natural resources.*

Chapter 7: Economic Development	7-1
A compilation of objectives, polices, goals, maps and programs to promote the	
stabilization, retention or expansion of the economic base and quality employment	
opportunities, including an analysis of the labor force and economic base. This	
shall include an assessment of categories or particular types of new businesses	
and industries that are desired, along with the strengths and weaknesses with	
respect to attracting and retaining these businesses and industries.	

**Chapter 10: Implementation** 10-1 *A compilation of programs and specific actions to be completed in a stated sequence, including proposed changes to any applicable zoning ordinances, official maps, sign regulations, erosion and storm water control ordinances, historic preservation ordinances, site plan regulations, design review ordinances, building codes, mechanical codes, property maintenance and housing codes, sanitary codes or subdivision ordinances, to implement the objectives, policies, plans and programs contained in the other elements.* 

Appendices

- A Citizens Questionnaire Summary
- B Issues and Opportunities
- C Housing
- D Transportation
- E Agricultural, Natural, and Cultural Resources
- F Economic Development
- G Meetings and Summary of Proceedings
- H Resolution and Ordinance
- I Land Protection Options
- J The Code of Country Living

#### CHAPTER 1: INTRODUCTION

#### Location

Waushara County is located in central Wisconsin and is surrounded by the counties of Portage and Waupaca to the north, Winnebago to the east, Green Lake and Marquette to the south and Adams County to the west. The county is essentially six towns in width and three towns in height. The Village of Coloma is located in the southwest corner of the county and is surrounded by the Town of Coloma. It is approximately 939 acres in size. I-39 runs diagonally (north-south) through the Village of Coloma and offers access to Westfield, Portage, Madison, Stevens Point, Wausau and southern and northern Wisconsin, while STH 21 enters the Village at the northeast corner and exits on the west side of I-39. STH 21 connects Oshkosh to Tomah and is a popular truck route.

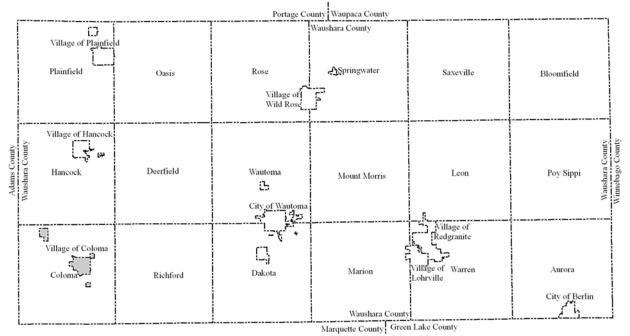

Figure 1-1. Village of Coloma, Waushara County Wisconsin

The Village of Coloma offers residents a small town atmosphere while providing nearby access to many services and amenities (schools, libraries, post offices, etc.) offered in urban areas. Woodlands cover about 26 percent of the Village, while residential land uses make up another 16 percent.

# **Planning History**

In 1993, East Central Wisconsin Regional Planning Commission assisted the Village of Coloma in the preparation of a Land Use Plan and Open Space and Recreation Plan. The following year, Waushara County created the Waushara County Land Use Committee. This committee, comprised of elected officials and local citizens, includes representation from each community in Waushara County. Similar to the Community/Land Management Plans that was adopted by the Town of Coloma in 2003, many of the earlier planning efforts in the county were started before

or immediately after the state implemented its current comprehensive planning laws and consequently do not conform to the "smart growth" legislation.

The Village of Coloma, along with the Town of Coloma, sharing similar issues decided to enter into a contract with East Central Wisconsin Regional Planning Commission in 2008 to jointly meet to develop individual comprehensive plans. The Village and Town, along with the communities of Deerfield, Hancock (Village and Town), Leon, Mount Morris, Oasis, Plainfield (Village and Town), Richford, Saxeville, Springwater, and Lohrville worked concurrently on the development of their individual plans. A countywide plan was created that combined the plans of the various municipalities.

The current Village of Coloma Comprehensive Plan was prepared in compliance with *Wisconsin State Statutes 66.1001* and utilized a comprehensive planning grant obtained through the Department of Administration.

#### Planning Purpose

A comprehensive plan is created for the general purpose of guiding a coordinated development pattern. This results in land use decisions that are harmonious with both the overall vision of the community's future and will ensure the future sustainability of the local natural resource base. Developing a comprehensive plan is a proactive attempt to delineate the ground rules and guidelines for future development. Comprehensive planning decisions evaluate existing facilities and future needs; promote public health, safety, community aesthetics, orderly development, and preferred land use patterns; and foster economic prosperity and general welfare in the process of development.

The comprehensive plan is a guideline for future development. The plan evaluates what development will best benefit the community's interests, while at the same time, provides flexibility for land owners and protects private property rights.

# Enabling Legislation

This plan was developed under the authority granted by s. 66.1001 of the *Wisconsin State Statutes* and meets the requirements of 1999 Wisconsin Act 9 which states "Beginning on January 1, 2010, any program or action of a local governmental unit that affects land use shall be consistent with that local governmental unit's comprehensive plan".<sup>1</sup>

The Village of Coloma should consult this plan when making decisions relative to land use and other issues including:

- Official mapping established or amended under s. 62.23 (6).
- Local subdivision regulation under s. 236.45 or s. 236.46. (If applicable)
- Village zoning ordinances enacted or amended s. 61.35.
- Zoning of shorelands or wetlands in shorelands under s. 59.692, 61.351, or 62.231.

<sup>&</sup>lt;sup>1</sup> Wisconsin Legislative Reference Bureau. 1997. *Budget Brief 97-6*.

#### Planning Process

The planning process was completed in six stages. These stages included visioning; inventory, analysis and issue identification; plan alternative development; intergovernmental communication; implementation; and adoption.

Initially, a community vision session was held in Coloma. As part of the vision exercise, people were asked to evaluate the strengths, weaknesses, opportunities, and threats to existing and future development in the Village. A citizen's questionnaire was distributed to all utility customers; additional questionnaires were available at key locations throughout the Village for people who did not receive a questionnaire in another manner.

The second stage, inventory, analysis and issue identification began with the collection of data on existing conditions within the community. This data was analyzed to identify existing and potential problem areas. Using results from the community-wide vision session, questionnaire, as well as background data compiled during the inventory stage, the planning committee developed vision statements and goals, strategies and recommendations for each of the nine elements required in the comprehensive plan under "Smart Growth."

The third stage was the development of the Future Land Use Map. The first two stages were combined to create a recommended land use plan to guide future growth and development over the next twenty years. A preliminary future land use map and draft goals, strategies and recommendations were presented at a community-wide open house and comments were solicited.

During the fourth stage, intergovernmental cooperation, nearby municipalities, government agencies, county department heads and others were invited to a meeting of the Village Smart Growth Committee. A preliminary future land use map, draft goals, strategies and recommendations were presented and the intergovernmental cooperation element was discussed.

The fifth stage, plan implementation, established the tools necessary for implementation of the plan. Recommendations for regulatory techniques including zoning and an action plan with an accompanying timeline were established to ensure that the intent of the plan will be achieved.

The final stage, adoption, included a meeting with the Village Board, Plan Commission and Smart Growth Committee to distribute copies of the draft plan and discuss steps that must be taken to adopt the plan. The final stage concluded with the adoption of the plan by the Village Board.

# Public Participation

A major element of the comprehensive planning process is public participation. In accordance with s. 66.1001 (4), which defines "Procedures for Adopting Comprehensive Plans," the Village of Coloma actively sought public participation from its citizens.<sup>2</sup> To gain citizen understanding and support throughout the planning process, the public was provided with a variety of

<sup>&</sup>lt;sup>2</sup> *Wisconsin State Statutes.* 2004. *s. 66.10001.* 

meaningful opportunities to become involved in the process. The first step in the planning process was the development and adoption of a *Public Participation Plan for Comprehensive Planning*. This plan laid out the goals of the public participation plan; public participation strategy, methods and plan adoption procedures.

Public input was encouraged through meetings and activities. ECWRPC staff conducted approximately nine (9) public meetings with the Village of Coloma Smart Growth Committee, as well as, an initial community-wide vision session and a later public meeting in the middle of the planning effort. All meetings were open to the general public; notices were posted at predetermined public areas. Periodically, articles were included in the Village newsletter as well as the local paper. A public hearing was held to present the final draft version of the plans to the general public and neighboring municipalities and to solicit further input. Meeting notices were sent to the local newspaper. The draft plans were available for review at local libraries, the community center and the internet. A website specific to the planning effort was maintained throughout the planning effort.

# Visioning Process

To identify community issues and opportunities and create a vision for each of the nine elements, a three-step process was employed. The process included a community questionnaire, a SWOT analysis, and element vision development.

# Community Questionnaire Results

In the fall of 2008, a questionnaire was conducted for the Village of Coloma to gather opinions from residents and landowners regarding land use and development issues. Questionnaires were sent out to all utility customers. Additional questionnaires were available at key locations throughout the Village for people who did not receive a questionnaire by mail. Each household was asked to complete one questionnaire. A total of 247 questionnaires were sent out with the Village of Coloma utility bill. Thirty-seven of those were returned resulting in an overall response rate of 15 percent.

The questionnaire contained 15 questions. Two open-ended questions encouraged respondents to provide written input. The statistical analysis and written comments from the questionnaire provided valuable insight to the Village Smart Growth Committee in the preparation of the comprehensive plan. Since the plan and its components are citizen-driven, the added perspective from questionnaire respondents helped ensure that the goals, strategies, and recommendations were consistent with the desires of the community at large.

# Community-wide Vision Session (SWOT Analysis)

A SWOT analysis is a planning exercise in which citizens identify those aspects of their community which are desirable and ones which need improvement. Citizens were asked to provide a brief inventory of the strengths, weaknesses, opportunities, and threats of their community and the overall area. Strengths are classified as physical assets, a program, or an environmental feature which positively influenced the quality of life within the community. Weaknesses are correctable problems which need to be addressed or amended. Opportunities are defined as underutilized features which could positively affect the quality of life within the

community. A threat is an internal or external feature that could jeopardize the future success of a community.

A Community-wide Vision Session, which included a SWOT exercise, was conducted jointly with the Town of Coloma in the fall of 2008. The overall purpose of the exercise was to collect information on how residents felt about their community and the overall area. Each participant was asked to write what they considered to be the strengths, weaknesses, opportunities, and threats to the community. These items could include their opinions on physical features such as roads, utilities, natural resources, etc. and quality of life issues.

After making a list of all the ideas, a brief discussion was held about how each of the items could affect the community. Participants rated their top issues in each of the four groups. The discussions and rankings were not limited to their specific community. The compiled lists were then utilized as a starting point in the remainder of the planning process.

#### Vision Development

According to Wisconsin's "Smart Growth" Law, individual communities are required to develop a vision statement that describes what the community will look like in twenty years, as well as, a description of the policies and procedures that will achieve this vision. The visioning process identified core values, emphasized regional and local assets, and provided a guiding purpose for the comprehensive planning effort.

To ease concerns and establish a focus for the planning program, the vision development was held at the beginning of the planning process. The Village of Coloma Smart Growth Committee crafted vision statements for each of the nine elements based on their perceptions of what they would like to see preserved, changed, or created in their communities. The vision statements are presented at the beginning of each corresponding element. The overall vision statement is presented as the Issues and Opportunities vision statement.

# Plan Contents

The 20-year comprehensive plan contains four major components:

- A profile of the demographic, economic, and housing characteristics;
- An inventory and assessment of the environment; community facilities; and agricultural, natural, and cultural resources;
- Visions, goals, objectives, and implementation strategies; and
- A series of land use maps that depict existing and future land use patterns.

The comprehensive plan contains nine elements that are required by s. 66.1001:

- 1) Issues and Opportunities
- 2) Economic Development
- 3) Housing
- 4) Transportation
- 5) Utilities and Community Facilities
- 6) Agricultural, Natural, and Cultural Resources

- 7) Land Use
- 8) Intergovernmental Cooperation
- 9) Implementation

Each element consists of a vision statement, background information, and goals, strategies and recommendations for the specific vision. The vision statement expresses the community's expectations for the future. These statements provide a framework and context to consider when making future land use decisions. The Issues and Opportunities vision statement serves as the overall vision statement for the entire plan.

Goals, strategies and recommendations each have a distinct and different purpose within the planning process. Goals are broad, long range statements which describe a desired future condition. Goals usually address only one specific aspect of the vision. Strategies are statements which describe specific conditions which will help attain the stated goals. Recommendations can include new ordinances, amendments to existing ordinances, new programs, and other tasks. Recommendations are specific actions which must be performed to implement the goals and strategies of the comprehensive plan. Often, recommendations are delineated with a specific timeline to ensure timely implementation of the plan. To be effective, strategies and recommendations must be reviewed and updated periodically.

Each element discusses specific information pertinent to the overall land use plan. The Issues and Opportunities Element summarizes demographic information. The Economic Development Element inventories the labor force, analyzes the community's economic base, and provides a development strategy regarding existing and future economic conditions within the community. The Housing Element presents an inventory of the existing housing stock as well as an analysis of future housing needs based on population and household projections. The Transportation Element provides an inventory of the existing transportation system and an overview of The Utilities and Community Facilities Element inventories existing transportation needs. utilities and community facilities including schools, recreational facilities, cemeteries, communications, gas, electric, public safety and emergency response services. It also addresses how population projections will affect the efficiency and adequacy of these services. The Agricultural, Natural, and Cultural Resources Element describes the physical setting and cultural resources of the planning area and evaluates how they will affect or will be affected by Specific natural areas and cultural/historical landmarks are identified for future growth. protection and preservation. The Land Use Element inventories and describes existing land use patterns and includes a projection of future land use demands and a Future Land Use map for the community. The Intergovernmental Cooperation Element addresses programs and policies for joint planning and decision-making efforts with other jurisdictions including school districts, adjacent local governmental units, and state and federal agencies. The Implementation Element contains a recommendation and action plan to assist implementation efforts of the comprehensive plan.

In addition, the state requires that Wisconsin's 14 goals for local planning be considered as communities develop their goals, objectives, and strategies. These goals are:

1) Promotion of the redevelopment of lands with existing infrastructure and public services and the maintenance and rehabilitation of existing residential, commercial, and industrial structures.

2) Encouragement of neighborhood designs that support a range of transportation choices.

1-7

- 3) Protection of natural features, including wetlands, wildlife habitats, lakes, woodlands, open spaces, and groundwater resources.
- 4) Protection of economically productive farmlands and forests.
- 5) Encouragement of land uses, densities, and regulations that promote efficient development patterns and relatively low municipal, state governmental, and utility costs.
- 6) Preservation of cultural, historic, and archeological sites.
- 7) Encouragement of coordination and cooperation among nearby units of government.
- 8) Building of community identity by revitalizing main streets and enforcing design standards.
- 9) Providing an adequate supply of affordable housing for individuals of all income levels throughout each community.
- 10) Providing adequate infrastructure and public services and an adequate supply of developable land to meet existing and future market demand for residential, commercial, and industrial uses.
- 11) Promoting the expansion or stabilization of the current economic base and the creation of a range of employment opportunities at the state, regional, and local levels.
- 12) Balancing individual property rights with community interests and goals.
- 13) Planning and development of land uses that create or preserve varied and unique urban and rural communities.
- 14) Providing an integrated, efficient, and economical transportation system that affords mobility, convenience, and safety and that meets the needs of all citizens, including transit-dependent and disabled citizens.

#### CHAPTER 2: ISSUES AND OPPORTUNITIES

#### INTRODUCTION

Socioeconomic conditions and growth patterns have implications for the future health and vitality of communities. They help define existing problems and identify available socioeconomic resources. They also represent the current and future demands for services and resources. Changes in population and households combined with existing development patterns and policy choices will determine how well the Village of Coloma will be able to meet the future needs of its residents.

#### *Issues and Opportunities Vision for 2030*

In 2030, the Village of Coloma is a small vibrant rural community offering a range of retail and business services. Attraction of commercial and industrial businesses to the two business/industrial parks has provided employment to local workers at a competitive wage. This in turn has enabled the area's retail base to expand and become more diverse. As a result, the downtown area is thriving with many unique one-of-a kind businesses. Active citizen groups (Coloma Lions Club, Friends of the Park, Friends of the Library and the local snowmobile clubs) have volunteered numerous hours to make certain that local amenities and resources are preserved. Consequently, the Coloma Community Park continues to be a showcase that provides hours of recreation for area youth and adults. Volunteers, supporting the Coloma Library, have ensured the success of the library as an educational resource and local gathering place.

#### **INVENTORY AND ANALYSIS**

This section of the chapter provides a brief summary of historic population growth, followed by more detailed information regarding current population and household characteristics of the area. Population and socioeconomic trends are identified and potential future growth and development patterns are discussed. Characteristics examined include age, race, ethnicity, educational attainment, income and household types. Current and potential population and socioeconomic issues are noted. Their potential impacts and policy implications will be discussed in the remaining comprehensive plan element chapters. The remainder of this chapter will briefly describe the policy context, discuss the need for intergovernmental cooperation, assess current and future trends and identify issues that need to be addressed.

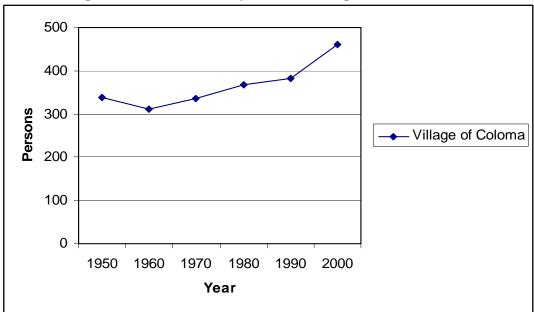

#### Demographic Trends

#### Historic Population<sup>1</sup>

Over the past fifty years, the population of the Village of Coloma has generally increased steadily since 1960. Following a low of 312 in 1960, the population increased by about 48 percent to 461 in year 2000. (Figure 2-1, Appendix B, Table B–1).

<sup>&</sup>lt;sup>1</sup> U.S. Census: 1950, 1960, 1970, 1980, 1990, 2000; WI DOA 2001-2005.

Between 1950 and 2000, population growth in the Village of Coloma lagged behind Waushara County, the East Central Region<sup>2</sup>, and Wisconsin. The Village of Coloma's population increased by 36.4 percent during this time period. Population increases at the county, region and state level exceeded 55 percent, with the region experiencing the largest increase, 66.1 percent. 2005 population estimates from the Wisconsin DOA indicate that recent growth trends in the Village of Coloma continue to lag behind regional, county and state growth patterns. Since 2000, Coloma's population has increased by 1.7 percent, compared to 8.0 percent at the county level, 4.8 percent at the regional level and 4.0 percent at the state level.

Source: U.S. Census: 1950, 1960, 1970, 1980, 1990, and 2000

# Components of Population Change

The two components of population change are natural increase and net migration. Natural increase is calculated by subtracting deaths from births during a specific time period. Net migration is, in theory, the number of people leaving an area (out-migrants) subtracted from the number of people coming into an area (in-migrants). However, since no convenient way of determining the movement of people on a regular basis exists, net migration must be estimated. Net migration can be estimated based on survey data, information from census questions, IRS data or calculated by subtracting natural increase from total population change. Net migration estimates may vary depending on which methodology is used. Data from the University of Wisconsin-Extension Applied Population Laboratory (APL) and the Wisconsin DOA, for example, show similar trends, but their net migration estimates vary.

An examination of the data provided by the University of Wisconsin-Extension APL and the Wisconsin DOA indicate that since 1950, *migration has played a greater role in population change in Waushara County than natural increase.* With the exception of

<sup>&</sup>lt;sup>2</sup> East Central Region includes the counties of Calumet, Fond du Lac, Green Lake, Marquette, Menominee, Outagamie, Shawano, Waupaca, Waushara and Winnebago.

the 1950s, Waushara County has experienced a positive net migration rate (Tables 2-1 and 2-2). Furthermore, the rate of net migration in Waushara County has exceeded the overall Wisconsin net migration rates each decade since 1980, which indicates that Waushara County is attracting residents from other parts of Wisconsin.

	Waushar	a County	Wisconsin		
	Net	Total	Net	Total	
	Migration	Change	Migration	Change	
1950 to 1960	-8.6%	-3.0%	-1.4%	15.1%	
1960 to 1970	6.4%	9.6%	0.2%	11.8%	
1970 to 1980	17.7%	25.2%	0.2%	6.5%	
1980 to 1990	7.3%	4.6%	2.7%	4.0%	

Table 2-1. Net Migration Estimates, 1950 to 1990

Source: UWEX Applied Population Laboratory, "Net Migration by Age for Wisconsin Counties, 1950-1990".

The role of migration in the county's population growth became more important in the 1990s and early 2000s, when the rate of natural increase fell below zero. *Since natural increase rates were negative, the entire increase in population in Waushara County since 1990 can be attributed to in-migration* (Table 2-2).

 Table 2-2.
 Components of Population Change, Waushara County

	Nu	meric Char	nge	Percent Change		
	Natural Net Total			Natural	Net	Total
	Increase	Migration	Change	Increase	Migration	Change
1970-1980	215	3,516	3,731	1.5%	23.8%	25.2%
1980-1990	448	411	859	2.4%	2.2%	4.6%
1990-2000	-23	3,792	3,769	-0.1%	19.6%	19.4%
2000-2005 est.	-131	1,983	1,852	-0.6%	8.6%	8.0%

Source: Population Trends in Wisconsin: 1970-2000, WI DOA, 2001; WI DOA, 2005.

Waushara County migration patterns also varied by age<sup>3</sup> (Appendix B, Table B-2). Between 1990 and 2000, young families (age 30 to 44 yrs) and baby boomers (age 45 to 64) moved to Waushara County. During this time period, Waushara County lost population in two other age groups, as many individuals ages 20 to 29 and individuals age 75 and older migrated out of the county. The net loss of young adults is likely attributable to two factors. First, many students leave the county to attend college. Others may have relocated in search of affordable housing and better employment opportunities. The out-migration of elderly individuals likely resulted from a need or desire for additional services. As people age, many eventually need or desire a wider variety of housing, healthcare, support services and transportation options than are available in rural communities.

<sup>&</sup>lt;sup>3</sup> WI DOA, 2005.

#### *Population Density*<sup>4</sup>

Population density reflects the degree of urbanization and impacts the demand and cost effectiveness of urban service provision. Over time, urban growth and suburbanization within Waushara County has expanded, and settlement patterns have increased in density. In 2000, population densities for Waushara County villages ranged from 334 to 692 persons per square mile. *Population density in the Village of Coloma was less than the county average for villages, with an average of 435 persons per square mile* (Appendix B, Table B-3). The average population density for villages in Waushara County was 489 persons per square mile, which was considerably more than the state average of 82 persons per square mile. Overall, Waushara County had an average population density of 37 in 2000.

#### Age Distribution

The age structure of a population impacts the service, housing and transportation needs of a community. Communities with growing school age populations may need to expand school facilities. Communities with growing elderly populations may need to expand healthcare, housing options and transportation services. Currently, the largest age cohort within the region and the state is the "baby-boom" generation, which includes those individuals born between 1945 and 1965. These individuals have had, and will continue to have, a significant impact on service and infrastructure needs within the Village.

The change in population by age cohort between 1990 and 2000 indicates that the area's population is aging<sup>5</sup> (Appendix B, Tables B-4 and B-5). The Village of Coloma experienced an increase in the share of persons in the less than 5, 20 to 24, and 45 to 64 age cohorts and a decline in the 5 to 19, 25 to 44 and 65 and older age cohorts. The largest increases for the Village occurred in the less than 5 years old age cohort. Between 1990 and 2000, the number of individuals less than 5 years increased by 147 percent or from 15 to 37 people in the Village of Coloma.

The relative increase in population under age 5 can be attributed to the in-migration of individuals age 20 to 29 and the high proportion of residents age 25 to 44, as most individuals age 45 and under are within child bearing. The increase in the number of working age individuals can be attributed to in-migration of individuals age 30 and older and the aging of the baby-boomers. The Village of Coloma experienced almost no change in the number of residents age 65 and older which could indicate that some Coloma residents are choosing to age in place.

Median age divides the age distribution of the population in half. One half of the population is younger than the median age, while the other half of the population is older than the median age. As a result, the median age of the population provides some insight to the overall population structure within a community. Median age can and does vary over space and time. Changes in population compositions resulted in most Waushara County communities experiencing an increase in median age between 1990 and 2000<sup>6</sup> (Appendix B, Tables B-4 and B-5).

<sup>&</sup>lt;sup>4</sup> U.S. Census, 2000.

<sup>&</sup>lt;sup>5</sup> U.S. Census; 1990, 2000.

<sup>&</sup>lt;sup>6</sup> U.S. Census; 1990, 2000.

In 1990, the median age in the Village of Coloma was slightly higher than the median age in Waushara County at 39.7 years. Waushara County had a median age of 38.6 years. Between 1990 and 2000, the median age decreased by 0.6 years in the Village of Coloma. As a result, the Village at a median age of 39.1 years had the fifth youngest median age in the county. The Village of Coloma had a higher median age than the state in both 1990 and 2000. In Waushara County, the median age rose from 38.6 years in 1990 to 36.0 years in 2000.

#### Household Structure

#### Household Size

Household size and changes in household structure help define the demand for different types and sizes of housing units. The composition of a household coupled with the level of education, training, and age also impact the income potential for that household. It also helps define the need for services such as child care, transportation, and other personal services. Decreases in household size create a need for additional housing units and accompanying infrastructure, even if no increase in population occurs.

*Household size for Waushara County has been decreasing since* 1970<sup>7</sup>, *while the household size in the Village of Coloma has been remaining stable since 1990* (Appendix B, Table B-21). Historically, the Village of Coloma has retained the lowest average household size. *The Village of Coloma had an average household size of 2.41 in 1990, and 2.42 in 2000*. This decline is from a decrease of one, four, and five person households, and an increase in two, three and six person household size of 2.52 and 2.43, respectively in 1990 and 2000. In 1990 (61.0%) and 2000 (61.6%), about 61 percent of persons in the Village of Coloma lived in 1 or 2 person households.

# Household Composition<sup>8</sup>

*In 1990 and 2000, the majority of households for the Village of Coloma were family households, and the majority of family households were married couple families* (Appendix B, Tables B-8 and B-9). Between 1990 and 2000, the Village experienced an increase in the share of family households and married couple families. In 1990, the share of family households ranged from 73.1 percent of all households in Waushara County to 64.8 percent of all households in the Village of Coloma. By 2000, the share of family households in Waushara County to 64.8 percent of all households in the Village of Coloma. By 2000, the share of family households in Waushara County (Figure 2-2). The share of family households in the Village of Coloma increased to 69.2 during this time period. The share of single parent family households in creased in all jurisdictions, but still remained a relatively small share of total family households. The state had the largest share of single parent family households in both years, while the Village had the highest share of non-family households in 1990 (Appendix B, Table B-8 and B-9).

<sup>&</sup>lt;sup>7</sup> U.S. Census; 1970, 1980, 1990, 2000.

<sup>&</sup>lt;sup>8</sup> U.S. Census; 1990, 2000.

In 1990, householders age 65 or older and living alone ranged from 18.2 percent in the Village of Coloma to 10.5 percent in Wisconsin. Between 1990 and 2000, the share of elderly householders living alone decreased in the Village of Coloma, Waushara County and the state. By 2000, elderly householders living alone ranged from 9.9 percent of all households in Wisconsin to 15.7 percent in the Village of Coloma.

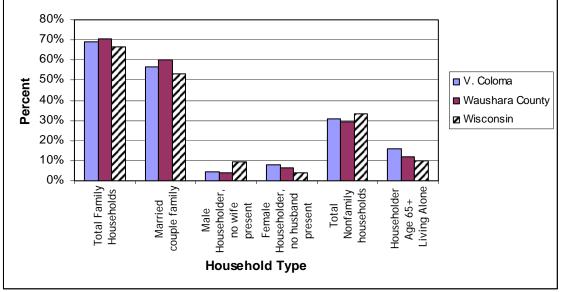

Figure 2-2. Percent of Households by Type, 2000

While householders age 65 or older and living alone comprises a very small share of the total households, their numbers are increasing in Waushara County (1,049 in 1990 to 1,109 in 2000). Between 1990 and 2000, the combined number of householders age 65 or older and living alone in the Village of Coloma remained the same at 29. While this may be a satisfactory living situation for some, for others it may be a challenge. As costs rise and health declines, elderly singles may have difficulty maintaining their housing unit, especially if they own a larger home. Homes may need special modifications or additional equipment if the elderly or disabled are to live independently. Assistance may also be needed with housekeeping, transportation or meal preparation, etc. Social isolation may also become an issue if these individuals have limited mobility options.

# Race

Population by race provides information regarding the social and cultural characteristics of an area. It also provides information regarding population dynamics. Access to education and economic opportunities differ by race. Differences also exist in age structure, language barriers and risks for various diseases and health conditions.

Since new immigrants are more likely to settle in areas with existing populations from their countries of origin, race and ethnicity, existing populations may also influence migration patterns. National population trends indicate that persons of color (includes African Americans, Native Americans, Alaskan Natives, Pacific Islanders, Asians and persons declaring two or more

Source: U.S. Census; 2000, STF IA.

races) and persons of Hispanic Origin are growing faster than non-Hispanic whites<sup>9</sup>. As the population of Waushara County, and Wisconsin continue to grow, it is likely that the minority proportion of the population (persons of color and whites of Hispanic Origin) will also continue to grow. If this occurs, communities may need to compensate for the changing demographic composition. It is important that these individuals participate in the planning process so that these individuals not only understand local cultural norms, but also have a positive stake in local communities. Communities may also find it beneficial to promote opportunities for positive interaction between cultures. An increase in understanding of differences and similarities in expectations and cultural values may help reduce friction between groups.

# **Racial Distribution**<sup>10</sup>

The Village of Coloma experienced a very slight increase in minority population between 1990 and 2000 (Appendix B, Tables B-10 and B-11). However, the number of persons of non-White race remained small. Only three individuals in the Village of Coloma identified themselves as non-White in 2000, up from one individual in 1990. Whites continued to comprise an overwhelming majority of the population. The 2000 Census was the first Census which allowed persons of mixed race to identify themselves as belonging to two or more races. Less than two percent of state residents and less than one percent of Village of Coloma and Waushara County residents declared they were of two or more races.

# The population in the Village and Waushara County are less diverse than that of the state. In 2000, whites comprised 99.3 percent of the Village of Coloma's population and 96.8 percent of the county's population compared to 88.9 percent of the state's population.

Although Hispanics are the fastest growing ethnic group in the United States, they currently comprise less than four percent of the county's and state's population (Appendix B, Table B-12). However, like the nation, this segment of the population is one of the fastest growing in the area. Between 1990 and 2000, the Hispanic population within Waushara County and Wisconsin just about doubled. At the county level, the Hispanic population increased from 2.0 percent of the county's population to 3.7 percent. At the state level, the Hispanic population increased from 1.9 percent of the state's population in 1990 to 3.6 percent of the state's population in 2000.

The number and share of Hispanics decreased in the Village of Coloma between 1990 and 2000. *In 2000, Hispanics comprised 3.0 percent of the Village of Coloma's population, down from 4.2 percent in 1990.* If the Village is going to continue to grow through migration, it is likely that the number and percentage of Hispanics in the area will also increase as Hispanics are becoming a larger share of the national, state and county population.

# Income Levels

Income includes both earned and unearned income. Earned income includes money earned through wages, salaries and net self-employment income (including farm income). Unearned income includes money from interest, dividends, rent, social security, retirement income, and

<sup>&</sup>lt;sup>9</sup> U.S. Census.

<sup>&</sup>lt;sup>10</sup> U.S. Census; 1990, 2000, STF IA.

disability income and welfare payments<sup>11</sup>. Traditionally, earned income is geographically dependent, as the quality of local jobs determines the earning potential and quality of life for local residents dependent on earned income. Unearned income is not geographically dependent. Retirement pensions, for example, may come from a company which is located several states away. As a result, a retiree's quality of life is not as dependent on the health of the local economy and quality of jobs in the area as someone who derives the majority of their income from earnings. As telecommuting increases and becomes more mainstream, earned income may become more geographically independent. However, at this point in time, little telecommuting occurs in Waushara County.

# Impact of Earnings on Household Income<sup>12</sup>

An examination of 1999 income data indicates that the majority of household income within the Village of Coloma, Waushara County and the state is derived from earnings. As a result, *access to earning opportunities is a strong determinant in meeting the income needs of residents in all three jurisdictions* (Appendix B, Table B-13). Seventy-two percent (71.8%) of income in Village of Coloma was derived from earnings, which is very comparable to the 71.4 percent of earned income in Waushara County. At the state level, 80.6 percent of income was derived from earnings, which indicates that the county and village are less dependent on employment and job creation than the state.

In all three jurisdictions, the average income per household was higher than the average earnings per household, which indicates that all three jurisdictions also benefit from unearned income (Appendix B, Table B-13). In the three jurisdictions, the percent of households with earnings ranged from 81.8 percent in Wisconsin to 74.3 percent in the Village of Coloma. Seventy-six percent (75.7 %) of households in Waushara County have earnings.

# Income Comparisons<sup>13</sup>

Three commonly used income measures are median household income, median family income and per capita income. Median income is derived by examining the entire income distribution and calculating the point where one-half of incomes fall below that point, the median, and onehalf above that point. Per capita income measures income per person, and is calculated by dividing the total income of a particular group by the total population of that particular group, including all men, women and children, regardless of age and earning potential.

A comparison of median family, median household and per capita income values between 1989 and 1999 indicate the Village of Coloma, Waushara County, and Wisconsin experienced an increase in all income measures during this time period (Appendix B, Table B-14). The Village of Coloma experienced the largest increase of all three jurisdictions in median household income, while the county experienced the largest increase in median family and per capita incomes.

The income gap between the state and the Village of Coloma appears to be narrowing in median household income but widening in the other income measures.

<sup>&</sup>lt;sup>11</sup> U.S. Census Bureau.

<sup>&</sup>lt;sup>12</sup> U.S. Census, 2000, STF 3A.

<sup>&</sup>lt;sup>13</sup> U.S. Census, 2000

In spite of these gains, *the State of Wisconsin maintained higher median household, family and per capita incomes than Waushara County and the Village of Coloma for both years* (Appendix A, Table A-14). The Village of Coloma maintained a lower income measure than the state and the county, in all income measures in both years.

2-9

# Household Income by Range<sup>14</sup>

Median and per capita income figures are often used to compare incomes across communities. Household income by range, however, provides a clearer picture of the distribution of income within a community. This allows communities to target policies, programs, housing and economic development opportunities to better meet the needs of their residents. Table B-15 in Appendix B identifies the number of households in income categories ranging from those with incomes of less than \$10,000 through those with incomes of \$150,000 or more. Figure 2-3 shows the distribution of those households. 2000 Census information indicates that in 1999 the Village of Coloma had 21 households with incomes below \$10,000. The income range with the largest number and share of households was between \$10,000 to \$19,999 with 34 households or 18.2 percent. There were two households with incomes of \$150,000 or more.

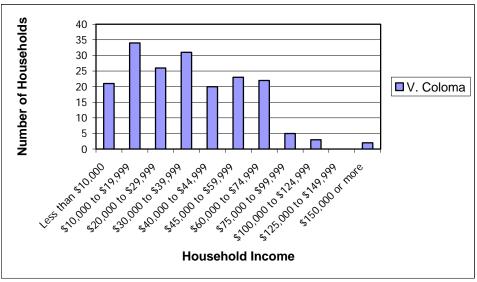

Figure 2-3. Distribution of Households by Income Range, 1999

Source: U.S. Census, 2000

For additional comparison and analysis, the eleven income categories in Appendix B, Table B-15 have been consolidated into five broader income categories and presented in Figure 2-4 as a share of total households with income. *Over ninety-four percent (94.7%) of households in the Village of Coloma reported incomes below \$75,000 in 1999.* Approximately 60 percent of Village of Coloma households reported income at or below the county median income (\$37,000), which means that many households in the area are likely eligible for programs such as housing rehabilitation grants and loans, guaranteed loans for first time home buyers and job training programs designed to help increase skills which should result in increased earnings potential. Some families may also be eligible for school lunch programs.

<sup>&</sup>lt;sup>14</sup> U.S. Census, 2000

The percentage of households with incomes below \$20,000 comprised 29.4 percent of all households in the Village of Coloma. In comparison, 23.1 percent of county households and 19.1 percent of Wisconsin households had incomes less than \$20,000. At the other end of the spectrum, 11.7 percent of county households and 20.3 percent of Wisconsin households had incomes of \$75,000 or more. While the percentage of households with incomes of \$75,000 or more was 5.3 percent for the Village of Coloma.

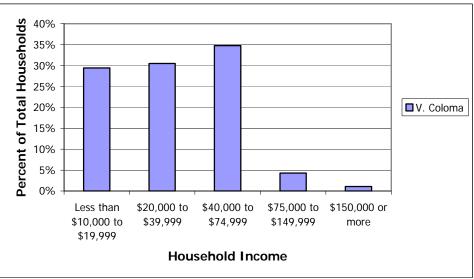

Figure 2-4. Household Income by Range, 1999

Source: U.S. Census, 2000, STF 3A

# **Poverty Status**<sup>15</sup>

The poverty level is determined by the U.S. Census Bureau and based on current cost of living estimates, as adjusted for household size. In 1990, the poverty threshold for a family of four with two children was a household income of \$12,674. By 2000, the poverty threshold for a family of four with two children had risen to \$17,463.

Between 1989 and 1999, both the number and percentage of persons living below the poverty threshold increased in the Village of Coloma, but decreased in the county and the state (Appendix B, Tables B-16 and B-18). In 1999, 16.7 percent of Village of Coloma residents lived below the poverty line compared to 15.6 percent in 1989. In contrast, nine percent (9.0%) of Waushara County residents and 8.4 percent of Wisconsin residents continued to live in poverty in 1999 (Appendix B, Table B-18). This indicates that poverty is more common in the Village than at the county or state level.

Poverty by age trends varied. Children were more likely to live below poverty than elderly residents during both time periods in Waushara County and Wisconsin. Not only were children more likely to live below poverty, they comprised a greater number and share of total persons in poverty than elderly residents. For example, at the county level, 584 children lived in poverty in 1999 compared to 462 persons 65 and older. The ratio of children to elderly below poverty

<sup>&</sup>lt;sup>15</sup> U.S. Census, 1990; U.S. Census, 2000, STF 3A

was even greater at the state level, where 150,166 children lived below poverty compared to 49,245 persons age 65 and older (Appendix B, Table B-19).

#### In 1989, 11.7 percent of children in the Village of Coloma lived in poverty, compared to 19.2 percent of the elderly. By 1999, the share of children living in poverty in the Village of Coloma had increased to 24.5 percent, while the share of elderly living in poverty had decreased to 18.2 percent (Appendix B, Table B-17 and B-19).

Of the three jurisdictions, Waushara County had the highest share of children in poverty in 1989, 20.1 percent, while the Village of Coloma had the lowest, 11.7 percent. Between 1989 and 1999, the Village of Coloma experienced an increase in the share of children in poverty, while the county and state saw a decrease. As a result, in 1999 the Village of Coloma had the largest share of children in poverty of all three jurisdictions, 24.5 percent. In Waushara County, 10.9 percent of children lived in poverty in 1999, while 11.2 percent of children in the state also lived in poverty.

In 1989, the Village of Coloma had 19.2 percent of elderly residents living in poverty. Nine percent (9.1%) of state residents and 13.9 percent of Waushara County residents lived in poverty in 1989. By 1999, the share of elderly residents living in poverty had decreased to 7.4 percent in the state, 10.8 percent in Waushara County and 18.2 percent in the Village of Coloma (Appendix B, Table B-17 and B-19).

Between 1989 and 1999, the number and share of families in poverty increased in the Village of Coloma, and declined in the county and the state. In 1989, the share of families living in poverty ranged from 10.1 percent in Waushara County to 3.7 percent in the Village of Coloma. By 1999, the share of families living in poverty in the Village of Coloma had more than tripled to 12.5 percent (Appendix B, Table B-16 and Table B-18). In the Village of Coloma, Waushara County and Wisconsin, the share of families living below poverty was less than the share of total persons living below poverty for both years.

Most discussions regarding poverty tend to focus on children and elderly, as they are considered dependent populations which have little to no ability to change their circumstances. As a result, they are the populations most in need of assistance. However, as the U.S. economy moves from a manufacturing based economy to a service based economy, many individuals find themselves falling into a category called the working poor. These are individuals who are working, but their wages are too low to move them out of poverty.

# Population Forecasts<sup>16</sup>

Population projections can provide extremely valuable information for community planning; but by nature, projections have limitations which must be recognized. First, population projections are not predictions. Population projections are typically based on historical growth patterns and the composition of the current population base. Their reliability depends to a large extent on the continuation of those past growth trends. Second, population projections for small communities are especially difficult and subject to more error, as even minor changes in birth, death or migration rates can significantly impact community growth rates. Third, population growth is also difficult to predict in areas which are heavily dependent on migration, as

<sup>&</sup>lt;sup>16</sup> Source: U.S. Census, 1970, 1980, 1990, 2000; WI DOA, 2004; ECWRPC

migration rates may vary considerably based on various "push" and "pull" factors both within and outside of the area.

Since migration has played such an important role in Waushara County population growth, migration rates are expected to significantly impact future population growth. An examination of past growth trends in the Village of Coloma indicate that decades of growth occurred during periods of high net in-migration and periods of population decline occurred during periods of low net in-migration. These historic population fluctuations are carried forward in the population forecasts for the Village (Table 2-1 and 2-2, Appendix B Table B-20).

Population growth in the Village will result in an increase in demand for services and land consumption. The density of settlement, coupled with the amount and location of land consumed for housing, commercial and industrial uses will impact service costs. Additional development will decrease the amount of open space. Development choices will also impact the economic vitality of the agricultural and forestry sectors.

Table B-20, Appendix B presents population estimates for Waushara County through 2030. These population projections are based on a combination of average growth trends over the last four decades, anticipated growth patterns developed by DOA, and anticipated impacts from the new Redgranite Correctional Facility. It is assumed that the largest population gains will occur during the first decade and will taper off during the second decade. However, as noted earlier, growth rates can shift quickly in smaller communities and migration can vary substantially based on factors within and outside of communities. As a result, it is recommended that the Village of Coloma review their population growth every five years to determine if their population change is following anticipated trends or if growth trends are shifting.

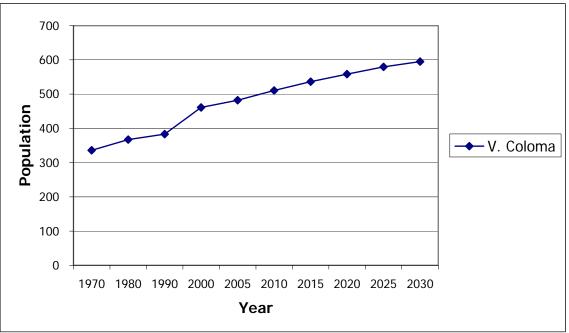

Figure 2-5. Population Estimates, 1970 to 2030

*Source: U. S. Census, 1970, 1980, 1990, 2000; WI DOA, 2004; ECWRPC.* Note: Population estimates include anticipated impact of the Redgranite prison. Includes correction to 2000 Census.

*The Village of Coloma is expected to grow by 29.1 percent between 2000 and 2030 or from 461 people to 595 people (Figure 2-5).* This change is greater than Waushara County's expected growth of 21.6 percent between this same time period.

# Population Projections by Age Cohort

Reliable age cohort projections at the community level are not available for the Village of Coloma. Past trends and anticipated national, state and county trends indicate that population growth has not occurred uniformly in all age groups due to fluctuations in fertility rates and differences in migration patterns by age. These variations in growth rates, coupled with the aging of the baby boom population, will impact the population and age distribution within the Village of Coloma.

Wisconsin migration patterns by age indicate that as individuals approach retirement age, many relocate to rural communities. As elderly persons in rural areas age and their health begins to deteriorate, many relocate to urban communities for access to better services and healthcare. However, increases in technology and healthcare have contributed to longer life spans and allowed the elderly to remain more independent. It is unclear at this point how these changes will impact future migration patterns by age. *Waushara County population projections by age cohort*<sup>17</sup> *indicate that the number of county residents age 65 and older may almost double between 2000 and 2030, while the number of children may decline by 21 percent.* In the future, the Village of Coloma may find themselves balancing the needs of school age children with the needs of their elderly residents.

### Household Forecasts

In previous household forecasts, East Central relied on county and minor civil division (MCD) persons per household (pphh) projections from DOA to adjust future household growth to reflect modifications to population forecasts. During this update, MCD level pphh information was not formally released. As a result, staff found it necessary to develop an alternative methodology for forecasting households at the MCD level. After reviewing a number of potential methodologies, staff selected the two methodologies which provide the best fit for the largest number of communities within the region.

While both household forecasts are available for communities and counties to use for planning purposes, ECWRPC uses the methodology which generates the largest number of projected year-round households for sewer service area and long range transportation/land use planning purposes. In instances where neither methodology consistently generates the highest number of households for communities within those sewer service and long range transportation plan study areas, a combination of both methodologies is used. This allows communities to develop the infrastructure to handle the largest anticipated amount of growth. Communities which experience seasonal fluctuations in populations will need to make adjustments to these numbers in the appropriate sections of this planning document.

The actual growth rate and amount of future growth communities experience will be determined by local policies which can affect the rate of growth within the context of county, state and national population growth trends. Since migration plays such a large role in

<sup>&</sup>lt;sup>17</sup> WI DOA, 2004

Waushara County growth patterns, growth rates and trends outside of the county will influence the pool of potential residents the county can attract. If communities prefer a slower growth option which puts less pressure on their natural resources and lessens the impact on their community character, communities are welcome to use the lower estimates. Regardless of whether communities prefer a no growth, low growth or high growth option, it is recommended they adequately prepare for future growth/changes to provide the most cost-effective services possible. Furthermore, individual communities can maximize the net benefits of public infrastructure and services by encouraging denser, efficient growth patterns which maximize the use of land resources while minimizing the impact on the natural resource base.

Based on projected growth patterns and smallest average household size assumptions, the number of households in Waushara County is expected to increase by 28.9 percent between 2000 and 2030<sup>18</sup>. It is anticipated that the number of households in the Village of Coloma may increase by 36.2 percent during the same time period from 185 to 252 (Table 2-3; Appendix B, Table B-22).

Village of Coloma	2000	2005	2010	2015	2020	2025	2030
No. Households	185	195	209	222	234	244	252
Persons per HH	2.4	2.4	2.37	2.34	2.32	2.3	2.29

Table 2-3. Estimated Households, 2000 to 2030

Source: U.S. Census, 2000; ECWRPC.

The increase in the number of households is expected to result from in-migration of new households and a continued decrease in household size. Since new households are formed within an existing population when households split into two or more households, the number of households can increase even if the population does not. One major factor contributing to an increase in households nationwide will be the aging of the echo-boom generation. As these children of the baby-boomers move out of their parent's home and form their own household, the increase in the number of new households is expected to be large compared to actual population growth.

# Key Findings

# Demographic Trends

- Over the past fifty years, the population of the Village of Coloma has generally increased steadily since 1960. Following a low of 312 in 1960, the population increased by about 48 percent to 461 in year 2000.
- Migration has played a greater role in population change in Waushara County than natural increase between 1950 and 2005.
- Since natural increase rates were negative, the entire increase in population in Waushara County since 1990 can be attributed to in-migration.
- Population density in the Village of Coloma was less than the county average for villages, with an average of 435 persons per square mile.
- In 1990, the median age in the Village of Coloma was slightly higher than the median age in Waushara County at 39.7 years.

<sup>18</sup> U.S. Census, 2000; ECWRPC

• The Village of Coloma at a median age of 39.1 years had the fifth youngest median age in Waushara County in 2000.

#### Household Structure

- Household size for Waushara County has been decreasing since 1970<sup>19</sup>, while the household size in the Village of Coloma has been remaining stable since 1990.
- The Village of Coloma had an average household size of 2.41 in 1990, and 2.42 in 2000.
- In 1990 and 2000, the majority of households for the Village of Coloma were family households, and the majority of family households were married couple families.

#### Race

- The population in the Village and Waushara County are less diverse than that of the state. In 2000, whites comprised 99.3 percent of the Village of Coloma's population and 96.8 percent of the county's population compared to 88.9 percent of the state's population.
- In 2000, Hispanics comprised 3.0 percent of the Village of Coloma's population, down from 4.2 percent in 1990.

#### Income Levels

- Access to earning opportunities is a strong determinant in meeting the income needs of residents in the Village of Coloma, Waushara County and Wisconsin.
- The State of Wisconsin maintained higher median household, family and per capita incomes than Waushara County and the Village of Coloma for both 1989 and 1999.
- Over ninety-four percent (94.7%) of households in the Village of Coloma reported incomes below \$75,000 in 1999.
- Between 1989 and 1999, both the number and percentage of persons living below the poverty threshold increased in the Village of Coloma, but decreased in the county and the state. In 1999, 16.7 percent of Village of Coloma residents lived below the poverty line compared to 15.6 percent in 1989.
- In 1989, 11.7 percent of children in the Village of Coloma lived in poverty, compared to 19.2 percent of the elderly. By 1999, the share of children living in poverty in the Village of Coloma had increased to 24.5 percent, while the share of elderly living in poverty had decreased to 18.2 percent.

# Population Forecasts

- The Village of Coloma is expected to grow by 29.1 percent between 2000 and 2030 or from 461 people to 595 people.
- Waushara County population projections by age cohort indicate that the number of county residents age 65 and older may almost double between 2000 and 2030, while the number of children may decline by 21 percent.

<sup>&</sup>lt;sup>19</sup> U.S. Census; 1970, 1980, 1990, 2000.

#### Household Forecasts

Based on projected growth patterns and smallest average household size assumptions, the number of households in Waushara County is expected to increase by 28.9 percent between 2000 and 2030<sup>20</sup>. It is anticipated that the number of households in the Village of Coloma may increase by 36.2 percent during the same time period from 185 to 252.

### INTERRELATIONSHIPS WITH OTHER COMPREHENSIVE PLAN ELEMENTS

#### **Economic Development**

An aging population creates opportunities and challenges. If current migration trends hold true, the Village of Coloma will likely continue to attract baby-boomers. Many of these individuals may have personal wealth and/or good retirement incomes. At the same time, the Village will likely continue to have persons age 65 and older living in poverty.

A larger population will likely drive the need for additional goods and services. Local companies and communities may need to find creative ways to attract younger working individuals (25 to 45 years old) to live and work in the planning area to meet workforce needs. At the same time, recruiters should allow elderly who seek employment to continue to remain in the work force.

As people are living longer, many are choosing to work into their traditional retirement years. These individuals often desire more flexibility or part-time employment. Other older individuals may need to earn extra income to afford the basic necessities and/or cover healthcare costs. Some retirees may not be interested in continuing in the workforce, but have the skills, knowledge and desire to serve as mentors and teachers. These individuals may, upon request, desire to volunteer to help communities address housing, literacy, financial education or other local needs. Some may wish to provide expertise to emerging businesses through a SCORE chapter. Since growing local businesses can be as important as attracting outside firms to locate in the area, new entrepreneurs should be encouraged to develop new industries so that job opportunities are available to all residents. Data indicates that earnings are an important component of household income in the Village. As a result, communities in the area should work together to build and attract living wage employment opportunities.

#### Housing

Additional housing will be needed to meet the anticipated increase in the number of households, the needs of seasonal residents and changing demographic trends within communities. The type, tenure and quantity of housing needed will vary based on the age structure, physical needs, income levels and preferred housing choices of the overall population. In all likelihood, communities will need a mixture of housing types, styles and price ranges. If current income structures remain in place, quality housing for low income workers and elderly will be important. New single family as well as multi-family homes will be needed. Some conversion of seasonal to year-round residences is anticipated. Existing homes may need to be remodeled or rehabilitated to meet changing needs. Communities will likely need housing for singles, young families and their workforce. A variety of housing will be needed for the elderly

<sup>&</sup>lt;sup>20</sup> U.S. Census, 2000; ECWRPC

and disabled as well. Remodeling or rehabilitation may help elderly or disabled individuals who wish to stay in their existing home to remain in their homes for a longer period. Other individuals may desire other alternatives or need assisted living or skilled nursing facilities. Condominiums, efficiency apartments or community based residential facilities may be best suited for this segment of the population. The Village may need to determine if they wish to provide these alternatives or if these individuals should be served elsewhere.

# Transportation

As communities grow, roads and other infrastructure may be needed to access additional housing, commercial, public and industrial buildings that may be constructed to accommodate the increasing population base. Transportation systems should be monitored for adequacy in meeting increased demands for local and through traffic. Potential changes could include additional lanes or other upgrades to existing roads. Local governments should also consider alternative transportation needs and desires. Increased access to bicycle and pedestrian facilities could provide viable, cost-effective transportation options for residents and increase recreational opportunities. As the elderly population's ability to drive decreases, the need for specialized transportation will increase. If these individuals are to remain in the area, increased access to affordable bus, shared ride taxi service or other transportation alternatives will be necessary to ensure that the elderly can visit healthcare professionals, shop for groceries, and meet other basic needs.

# Utilities and Community Facilities

As population demographics change, the overall needs of the community also change. A growing elderly population, for example, may increase the need for additional healthcare or adult daycare facilities. School facilities may need to be upgraded or modified to meet changing educational expectations or to help increase the earnings potential of local residents. An increase in residences may increase the need for police or fire protection. In the future, the Village will likely need to increase the number and availability of services targeted towards the elderly while maintaining a balance with services for working age persons and school age children. Communities will also need to balance the demands and needs of year-round and seasonal populations with the costs of those facilities and services. Ideally, improvements and expansions of utilities and community facilities and services should be coordinated with While some national recommendations are provided to help fluctuations in population. communities determine appropriate levels of service for fire, libraries, schools, open space, recreation and other public services, local governments should tailor services to local conditions to ensure that the basic needs of their citizens are meet.

# Agricultural Resources

Traditionally many of the farms within Waushara County are small family owned operations. Throughout Wisconsin the numbers of agricultural operations, especially dairy farms, are declining significantly as existing farmers reach retirement age. Currently, few younger individuals are entering the farming profession due to increased operational costs and more stringent regulations. As the population in Waushara County increases, more pressure will be placed on landowners to convert land from farmland to residential, commercial and industrial development, which will further exacerbate these trends. Since agriculture is important to the economy of the Village of Coloma, the Village should work with Waushara Count to identify ways to reverse the decline in agriculture. Increased reliance on locally produced agricultural products would support the local agriculture and food products sectors and help ensure their continued operation, affordability and access. Alternative farming methods, programs and land use regulations could help meet anticipated increase in food demands.

# Natural Resources

The critical question with respect to natural resources is how an expanding population base will affect the protection and preservation of natural resources. The increased demand for housing, commercial and industrial development will consume additional land throughout Waushara County. The abundance of natural resources, including wetlands, lakes, streams and forests sustains a portion of local economy. As development occurs, issues regarding open and natural space preservation/enhancement, water quality protection, wildlife habitat management, floodplain management and others will need to be addressed. Increased road construction will also require gravel, sand, and other non-metallic minerals. Deposits throughout the planning area will need to be identified so that transportation and construction costs can be minimized.

# **Cultural Resources**

Waushara County is rich in historical, archeological, and cultural sites. These sites provide information about early Native Americans, European settlement and the development of the area. Many buildings and areas have significant religious or cultural meaning. Efforts should be made to inventory and map historical, archeological, and cultural sites so that their significance is not destroyed or altered. These sites provide a link with the county's cultural and ethnic heritage. Preserving them would help document the changing demographics and socioeconomic characteristics of the area. Historical sites, heritage corridors and museums may also provide economic development opportunities. Moreover, a concerted effort should be made to incorporate historical architectural styles into modern construction to enhance local cultural features and preserve community character.

The latest Census data indicates that the population of Waushara County and Wisconsin is becoming more diverse. As the area's population changes, language barriers and a lack of awareness and understanding between races, cultures, classes and generations can lead to conflict. Positive opportunities for cross-cultural, cross-class and multi-generational interaction can help resolve any issues that may arise as the area's population changes.

# Land Use

Additional land will be converted to residential, commercial/industrial and public/institutional uses to accommodate anticipated population and household changes. These changes could alter the pattern of existing development and community character and place additional pressure on natural, cultural and agricultural resources. By recognizing the relationship between the density of settlement and amount and location of land consumed, local governments could minimize conflicts and protect natural and agricultural resources, amenities and community character. Two basic options for locating new development are within areas of existing infrastructure and development or converting farm, forest or open space lands to other

uses. Either option will impact local communities. The Village of Coloma will need to make choices that help achieve the envisioned future.

# Intergovernmental Cooperation

Although larger populations will result in an increased tax base, the offsetting costs for infrastructure, maintenance and services will require local governments and organizations to identify ways to provide cost-effective services to their residents. Where feasible, local governments must cooperate not only to provide adequate infrastructure to meet increased demands, but also to encourage economic development and employ sufficient staff to handle the anticipated service usage increases. Furthermore, a well-informed staff is necessary for local governments to meet the growing needs of the general public. Through effective communication, training and education, local governments will avoid unnecessary duplication of services and provide more streamlined access to information and services.

# POLICIES AND PROGRAMS

Growth and development patterns do not occur in a vacuum. Over time, federal, state and local policies have directed the amount and location of development. Federal immigration policies determine the flow of immigrants into the United States, both in terms of numbers and countries of origin. Concepts such as Manifest Destiny combined with expansive federal housing, land and transportation legislation, policies and subsidies such as the Homestead and Railroad Acts, the interstate highway system and IRS codes, etc. have heavily influenced settlement patterns. Additional federal legislation such as the Civil Rights Act, Americans with Disabilities Act (ADA) and Affirmative Action legislation have increased access and opportunities for persons of color and persons with disabilities. Wisconsin has broadened federal Civil Rights and Affirmative Action laws to include additional protected classes. State transportation policies and state land use legislation such as NR121, farmland preservation, natural resource protection and real estate tax codes have influenced growth and settlement. Local attitudes towards growth and accompanying zoning legislation, transportation and utility investments and tax and land subsidies also influence the type and amount of growth and development which occurs in each community.

Policies which impact growth and development have been developed over time by different agencies and different levels of government with varying missions and objectives. The resulting policies and programs are sometimes complementary and sometimes contradictory. It is the interaction of these various policies and market influences that determine actual growth patterns. Although many current federal and state policies and subsidies still encourage expansion, other policies such as the 14 land use goals developed by the state also encourage communities to accommodate growth in perhaps a more efficient manner than they have in the past. The adopted comprehensive plan legislation encourages communities to develop comprehensive plans, but provides communities with the opportunity to determine their own growth patterns. As a result, the type of development which will occur in the future is still open to debate.

## Regional, County and Local Policies

**East Central Wisconsin Regional Planning Commission.** East Central Wisconsin Regional Planning Commission has developed a regional smart growth plan. As part of the planning process, East Central has identified several key issues:

- How do we plan for continued population growth, which will result in an increase in demand for services and land consumption in the region?
- How do we promote the recognition of the relationship between the density of settlement and amount and location of land consumed for housing, commercial, and industrial uses and the costs of services?
- How do we ensure the economic vitality of the agricultural and forestry sectors in the context of a decrease in the amount of open space?
- How do we address the conflicts that will arise given that the majority of future growth is expected to occur in the urban counties, which is where most of the region's more productive farmland is located? More specifically, how will we address the impact on the farm economy?
- How do we ensure that an increase in urbanization has a positive impact on rural communities?
- Urban counties in the region currently have greater social and economic capital, more government support due to a larger tax base, and greater access to nonprofit services than rural counties. Current trends show the educational and income gap between urban counties and rural counties widening. How do we plan to decrease this gap and promote a healthy, vibrant economy and quality of life for all residents throughout the region?

The core goal for the Issues and Opportunities Section is:

• To promote communities that are better places in which to live. That is, communities that are economically prosperous, have homes at an affordable price, respect the countryside, enjoy well designed and accessible living and working environments, and maintain a distinct sense of place and community.

The intent of this goal is to minimize the negative effects of sprawl development and provide a cost-effective variety of services and infrastructure that will meet the changing demographics of the overall population.

#### Federal, State and Regional Programs

This section includes information on federal, state and regional programs which were used to develop this chapter. Other programs which influence growth and may impact future socio-economic conditions will be described in pertinent chapters within this plan.

## Federal Agencies

## **United States Department of Commerce**

**Economics and Statistics Administration (ESA).** The Economics and Statistics Administration collects, disseminates and analyzes broad and targeted socio-economic data. It also develops domestic and international economic policy. One of the primary bureaus within the ESA is the U.S. Census Bureau. The majority of information analyzed in this chapter was collected and disseminated by the Census Bureau, which is the foremost data source for economic statistics and demographic information on the population of the United States. The Census Bureau conducts periodic surveys and Decennial Censuses that are used by federal, state, and local officials and by private stakeholders to make important policy decisions. The Bureau produces a variety of publications and special reports regarding the current and changing socio-economic conditions within the United States. It develops national, state and county level projections and also provides official measures of electronic commerce (e-commerce) and evaluates how this technology will affect future economic activity.

## State Agencies

#### Wisconsin Department of Administration (DOA)

**Demographic Services Center.** The Wisconsin Department of Administration (DOA) Demographic Services Center is responsible for developing annual population estimates for all counties and all minor civil divisions (MCD) in the state. They develop annual estimates of the voting age population by MCD and population estimates by zip code. The Demographic Services Center also produces annual county level housing unit and household estimates. The Demographic Services Center also develops population projections by age and sex for all Wisconsin counties, and produces population projections of total population for all municipalities.

**Wisconsin State Data Center (WSDC).** The Wisconsin State Data Center is a cooperative venture between the U.S. Bureau of the Census, DOA, the Applied Population Laboratory at the University of Wisconsin-Madison and 39 data center affiliates throughout the state. The U.S. Bureau of the Census provides Census publications, tapes, maps and other materials to the WSDC. In exchange, organizations within WSDC function as information and training resources. DOA is the lead data center and the Applied Population Laboratory functions as the coordinating agency throughout the state. Local data center affiliates, such as East Central, work more closely with communities and individuals within their region.

#### University of Wisconsin-Madison

**Applied Population Laboratory (APL).** The Applied Population Laboratory is located with the Department of Rural Sociology at the University of Wisconsin-Madison. They conduct socioeconomic research, give presentations and publish reports and chartbooks. They will contract to do specific studies or school district projections. APL also functions as the coordinating agency for the WSDC and the lead agency for the Wisconsin Business/Industry Data Center (BIDC).

#### Regional Programs

**East Central Wisconsin Regional Planning Agency.** As the state data center affiliate for the region, East Central receives Census materials and Demographic Service Center publications from DOA, plus additional information and reports from other state agencies. This information is maintained within its library, used for planning purposes and published within East Central reports. Information and technical assistance regarding this data is also provided to local governments, agencies, businesses and the public upon request.

While DOA provides base level population projections for the state, local conditions, such as zoning regulations, land-locked communities, and local decisions regarding land use development can influence the accuracy of these base line projections. As a result, East Central has the authority to produce official population projections for the region. East Central also estimates future household growth.

# CHAPTER 3: HOUSING

#### INTRODUCTION

A number of factors influence how well the housing stock meets the needs of the community. The design, placement and density of housing impacts the overall appearance and character of a community by defining a sense of place and encouraging or discouraging social interaction between residents. It influences the cost of housing and the cost and efficiency of other plan elements, such as roadways, school transportation and the provision of public utilities.

The quality and affordability of housing influences the economic health and well-being of the community. Well designed, decent, safe and affordable housing creates a sense of connection and ownership between residents and their neighborhood and community. Residents with decent, safe affordable housing have more resources available for food, clothing, transportation, health care, savings for college or retirement, and other expenses. They also have the resources necessary to maintain their housing, which contributes to the quality of the community's housing stock and appearance of the community.

## Housing Vision for 2030

In 2030, the Village of Coloma accommodates a variety of housing choices. Home ownership continues to be the preferred housing option. Valuing its elderly population, the Village has been doing well in encouraging housing options that allow its residents to remain in the community. Senior housing choices such as assisted living facilities, rental units and condominiums have been built in recent years to accommodate an aging population. The need for affordable rental and owner occupied housing is also being adequately addressed through the addition of new duplexes and multi-family units and the renovation and conversion of the existing housing stock. With the assistance of the Coloma Historical Society, a group of dedicate residents has been instrumental in assuring that many of the older historically significant homes in the Village have been successfully renovated.

#### **INVENTORY AND ANALYSIS<sup>1</sup>**

This section of the chapter provides a broad brush of housing characteristics for the Village of Coloma, plus identifies why a particular housing variable may be important. Characteristics which are unique to the Village are noted, as are characteristics that can help identify strengths or opportunities for improvement. Tables are provided in Appendix C for those who may be interested in more detail.

#### Age of Occupied Dwelling Units

The age of occupied dwelling units reflect the historic demand for additional or replacement housing units, thereby providing historic information regarding settlement patterns, household formation rates, migration trends and natural disaster impacts. The age of units by itself is not

<sup>&</sup>lt;sup>1</sup> U.S. Census, 1990 and 2000, unless otherwise noted.

an indication of the quality of the housing stock. However, the age of occupied units can provide limited information regarding building construction and material content, as construction techniques and materials change over time.

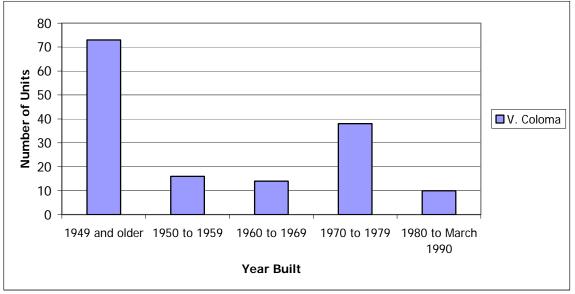

Figure 3-1. Occupied Dwelling Units by Year Built, 1990

Source: U.S. Census, 1990.

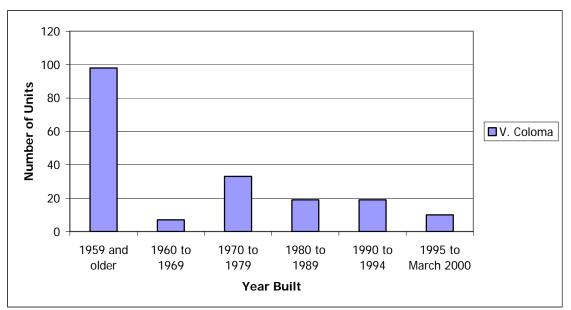

Figure 3-2. Occupied Dwelling Units by Year Built, 2000

*Census information regarding the age of owner-occupied units indicates that the Village of Coloma was well established by 1950* (Appendix C, Tables C-1 and C-2). The number of owner-occupied units remained stable through the 1950's and 1960's, increased through the 1970's, and then fell sharply in the 1980's (Figure 3-1). The number of owner-

Source: U.S. Census, 2000.

occupied units began rising again in the 1990's, particularly in the early half of that decade (Figure 3-2).

The Village of Coloma had a higher percentage of owner-occupied units built prior to 1960 than the state and the county. Fifty-three percent (52.7%) of Coloma's housing stock was built prior to 1960. At the state and county level, 38.70 percent of Waushara County's housing stock and 44.0 percent of Wisconsin's housing stock was built prior to 1960 (Appendix C, Table C-2).

Between 1990 and 2000, the Village of Coloma experienced a higher level of growth in owner-occupied units than was indicated in previous Census periods (1960 to 1990) based on the age of structure information provided in the 1990 and 2000 Censuses. The Village of Coloma gained 29 new occupied units between 1990 and 2000.<sup>2</sup>

# Change in Structural Type

Structural type is one indication of the degree of choice in the housing market. Housing choice by structural type includes the ability to choose to live in a single family home, duplex, multiunit building or mobile home. Availability of units by type is indicative not only of market demand, but also of zoning laws, developer preferences and access to public services. Current state sponsored local planning goals encourage communities to provide a wide range of choice in housing types, as housing is not a 'one size fits all' commodity.

A single person, for example, will have different housing needs than a couple with children. Housing needs also change as we age, lifestyles change, or in the event that one or more members of the household become disabled. Providing a range of housing choices which meets individual household needs and preferences is one way of encouraging individuals to stay in the community and to draw others to locate there.

*As with most rural communities, the dominant housing type in the Village of Coloma is single family housing.* In 1990, single family housing comprised 77.0 percent of the Village of Coloma's housing stock. About 17 percent (16.8%) of the village's housing stock was comprised of duplex and multi-family units. The remaining 6 percent (6.1%) was made up of mobile home, trailer or other (Appendix C, Table C-3).

During the 1990s, conversions, deletions and additions to the community's housing stock resulted in a slightly different composition of housing in 2000. *By 2000, the share of single family units had increased to 84.4 percent in the Village of Coloma, while the number and share of mobile home units increased to 19 units or 9.3 percent of the total housing units.* During this same time period, the number and share of two or more units fell to 6.3 percent in the Village of Coloma (Appendix C, Table C-3).

At the state and county level, the number and share of single family homes and larger multifamily buildings (those with greater than five units per building) increased between 1990 and 2000, while the number and share of two to four unit buildings and mobile home, trailer and other units decreased. In 2000, single family homes comprised 82.6 percent of Waushara County's housing stock and 69.3 percent of the state's housing stock. Mobile home, trailer and other units comprised the second largest housing category for Waushara County; 13.0 percent.

<sup>&</sup>lt;sup>2</sup> U.S. Census 2000.

Two or more unit housing comprised less than five percent (4.4%) of the County's housing stock. At the state level, the second largest housing category was two or more unit housing, which comprised 26.2 percent of Wisconsin's housing stock. Mobile home, trailer and other units comprised 4.5 percent of the State's housing stock.

## Occupancy Status

Occupancy status reflects the utilization of available housing stock. The total number of housing units includes renter-occupied, owner-occupied and various classes of vacant units. Vacant units include those which are available for sale or rent and those which are seasonal, migrant, held for occasional use or other units not regularly occupied on a year-round basis.

For a healthy housing market, communities should have a vacancy rate of 1.5 percent for owner-occupied units and 5 percent for year-round rentals. The number of migrant, seasonal and other vacant units will vary depending on the community's economic base.

## Tenure

Occupancy rates vary by community and over time. Total occupancy rates increased for Waushara County, the state and the Village between 1990 and 2000. In both time periods, jurisdictions with the lowest occupancy rates had the highest percentage of seasonal units (Table 3-1). All three jurisdictions experienced a decrease in the number and share of seasonal units between 1990 and 2000 and an increase in the number and share of occupied units and total units. The combination indicates that additional year-round units were built and seasonal units were likely converted to year-round residences (Appendix C, Tables C-5 and C-6).

	Total Occupied		Seas	onal
Jurisdiction	1990	2000	1990	2000
Village of Coloma	81.1%	93.9%	4.1%	3.0%
Waushara County	62.2%	68.3%	31.7%	27.0%
Wisconsin	88.6%	89.8%	7.3%	6.1%

Table 3-1. Occupied and Seasonal Units as a Share<br/>of Total Housing Units, 1990 and 2000

Source: U.S. Census, 1990 and 2000

*The majority of occupied units within the Village of Coloma are owner-occupied. Coloma had a higher owner-occupancy rate than Wisconsin and a lower owneroccupancy rate than Waushara County* (Table 3-2). Between 1990 and 2000, the share of owner-occupied units increased in all three jurisdictions. By 2000, the share of occupied units that were owner-occupied ranged from 83.5 percent in the Waushara County to 68.4 percent in Wisconsin. The share of owner-occupied units in the Village of Coloma was 71.9 percent. The share of renter occupied ranged from 16.5 percent in Waushara County to 31.6 percent in the state. Twenty-eight percent of the occupied units in the Village of Coloma were renter occupied in 2000.

	Owner C	Occupied	Renter Occupied		
Jurisdiction	1990	2000	1990	2000	
Village of Coloma	67.3%	71.9%	32.7%	28.1%	
Waushara County	80.3%	83.5%	19.7%	16.5%	
Wisconsin	66.7%	68.4%	33.3%	31.6%	

 Table 3-2. Tenure as a Percent of Occupied Units, 1990 and 2000

Source: U.S. Census, 1990 and 2000

## Vacancy Status

Vacant housing units are units that are livable, but not currently occupied. The vacancy status of units available for purchase or rent is considered to be a strong indicator of housing availability. Generally, when vacancy rates are below 1.5 percent for owner-occupied units and 5 percent for renter-occupied units, housing is considered to be in short supply and additional units are needed. If vacancy rates are at or above standard, the community may have an adequate number of units for rent or for sale. However, additional information, such as choice in housing and housing affordability is needed to determine if the units on the market meet the needs of potential buyers or renters. A higher vacancy rate may be appropriate, particularly for smaller communities, if the additional units provide needed choices within the housing market. If the existing vacancy rate is too high for existing market conditions, then property values may stagnate or decline.

## Owner-Occupied Housing

Homeowner vacancy rates indicate that the Village of Coloma and Waushara County had an adequate share of owner-occupied units for sale in 1990, while the state had a tight housing market. Between 1990 and 2000, homeowner vacancy rates fell in the Village and Waushara County, but remained stable at the state level (Appendix C, Tables C-7 and C-8). Countywide, the homeowner vacancy rate was 1.9 percent in 2000, which indicates that the county had an adequate number of homes on the market to meet demand. The homeowner vacancy rate for Wisconsin remained stable at 1.2 percent, which was just below the standard for both years. *In 2000, the Village of Coloma had a homeowner vacancy rate of 0.0 percent, which indicates that not only was there an inadequate number of homes for sale, but that in 2000 there were no homes for sale in the Village.* 

A drop in the vacancy rates is usually related to the increase in the number of owner-occupied units within a community. Since the vacancy rate is a measure of the number of units for sale compared to the number of owner-occupied units, the number of units for sale is expected to rise as the total number of owner-occupied units rise in order to accommodate the growth in households. However, this did not occur in the Village in the 1990's.

According to the Census, the Village of Coloma had four houses for sale in 1990 and zero in 2000. The Village of Coloma was below the accepted vacancy rate standard of 1.5 percent in 2000. With no units for sale, the Village had an inadequate number of units on the market to provide choice for prospective homebuyers.

## Rental Housing

In 1990, rental vacancy rates for the Village of Coloma (21.2%) was well above the vacancy standard of 5.0 percent, which would indicate that the community had more than an adequate supply of housing units for rent (Appendix C, Tables C-7 and C-8). In comparison, the rental vacancy rates for Wisconsin and Waushara County were 4.7% and 8.5%, respectively.

Between 1990 and 2000, the number of rentals for the Village of Coloma and Waushara County decreased, while the number of rentals increased for the state. In 2000, the state and county had vacancy rates above 5.0 percent. *At a vacancy rate of 3.9 percent in 2000, the Village of Coloma was below the rental vacancy standard of 5.0 percent.* The rental vacancy rate for Waushara County was 6.8 percent and the state's rental vacancy rate was 5.6 percent.

As with the number of homes for sale, the number of housing units for rent in the Village was also small. In 1990, the Village of Coloma had 11 housing units for rent. In 2000, the number of housing units for rent decreased to two units. With only two units to choose from, the likelihood that a rental unit will meet the needs of prospective renters is very small.

#### Seasonal Units

Seasonal units are units intended for use only in certain seasons or for weekend or other occasional use throughout the year. They include properties held for summer or winter sports or recreation such as summer cottages or hunting cabins. They also include time-share units and may include housing for loggers.

Between 1990 and 2000, the number of seasonal units decreased in the Village of Coloma, the county and state. The share of vacant units identified as seasonal showed mixed results. The share of vacant units identified as seasonal increased in the Village of Coloma and Waushara County, but decreased in Wisconsin (Appendix C, Tables C-7 and C-8). *Between 1990 and 2000, the number of vacant units identified as seasonal decreased from eight to six while the share of vacant units identified as seasonal increased from 21.6 percent in the Village of Coloma to 50.0 percent.* At the state level, the share of vacant units identified as seasonal increased from 21.6 percent in the village of coloma to 50.0 percent. At the state level, the share of vacant units identified as seasonal increased from 64.5 percent of all vacant units to 60.9 percent. The share of vacant units identified as seasonal increased in 1990 to 85.3 percent in 2000.

#### Other Vacant

Other vacant units include: migrant housing; units rented or sold, but not yet occupied; units held for occupancy by a caretaker or janitor; and units held for personal reasons of the owner, but not classified as seasonal. At the state and county level, units held for occupancy by a caretaker or janitor and units held for personal reasons of the owner, but not classified as seasonal comprised the largest segment of the other vacant unit category. At the local level migrant housing does not exist within the Village of Coloma.<sup>3</sup> The other vacant units listed

<sup>&</sup>lt;sup>3</sup> Status of Migrant Labor Camps, 2008. Wisconsin Department of Workforce Development Migrant, Refuge, and Labor Services.

were a mix of units rented or sold, but not yet occupied and units held for occupancy by a caretaker or janitor and units held for personal reason of the owner.

According to the Census, other vacant units comprised 37.8 percent of all vacant units for the Village of Coloma in 1990 (Appendix C, Tables C-7 and C-8). Between 1990 and 2000, the share of other vacant units fell in the Village. By 2000, other vacant units comprised 33.3 percent of all vacant units in the Village of Coloma. The Village of Coloma reported a total of 14 other vacant units in the Census 1990. Between 1990 and 2000, the number of other vacant units decreased to four in Coloma.

## Owner-Occupied Housing Stock Value

Owner-occupied housing stock values can provide information about trends in property values, housing demand and choice within the housing market. Housing stock values can also help provide prospective new businesses with information regarding how accessible housing will be for their employees.

## Median Housing Value Trends: A Broad Historical Perspective

State and county level information indicate that owner-occupied housing values have risen substantially since 1970.<sup>4</sup> The largest growth in median housing values occurred in the 1970's. Between 1970 and 1980, median housing prices more than doubled in response to inflationary pressures during the late 1970's and increased demand as baby-boomers entered the housing Housing prices continued to rise during the 1980's, but at a much slower rate. market. Housing prices again increased substantially in the 1990's. Lower interest rates and competitive loan products allowed home buyers the opportunity to purchase a higher value home, and the market responded by increasing the average home size for new construction.<sup>5</sup> The number of expected amenities in a home also increased. Communities contributed to the rise in housing prices by increasing minimum lot sizes and minimum square footage. Children of baby-boomers began entering the housing market during this decade, which put additional pressure on the housing market. The increased demand for starter homes and lack of supply drove the value of existing starter homes up substantially. By 2000, the median housing value for Waushara County had risen from \$10,600 in 1970 to \$85,100; and the median housing value for Wisconsin had risen from \$17,300 to \$112,200.

#### Current Median Housing Value Trends

Between 1990 and 2000, median housing values in the Village of Coloma nearly doubled. By 2000, the median housing value for the Village of Coloma was \$67,900, up from \$35,600 in 1990 (Appendix C, Table C-9).

#### Current Values by Price Range

Over 96 percent (96.6%) of the owner-occupied housing stock in the Village of Coloma was valued at less than \$150,000 in 2000. The largest share of owner-occupied

<sup>&</sup>lt;sup>4</sup> U.S. Census. 1970, 1980, 1990 and 2000.

<sup>&</sup>lt;sup>5</sup> In 1970, the average size of a new single family home in the U.S. was 1,500 sq. ft. By 2000, the average size of a new single family home in the U.S. was 2,266 sq.ft.

units by price range fell within the \$50,000 to \$99,999 range (Figure 3-3; Appendix C, Table C-9). Sixty-nine percent of the Village of Coloma's owner-occupied housing stock was valued at \$50,000 to \$99,999 compared to half of the county's housing stock and a third of the state's owner-occupied housing stock. According to the 2000 Census, the Village of Coloma did not have owner-occupied housing valued over \$200,000. In Waushara County and Wisconsin, 6.9 percent and 12.0 percent, respectively of the owner-occupied housing units were valued over \$200,000, respectively.

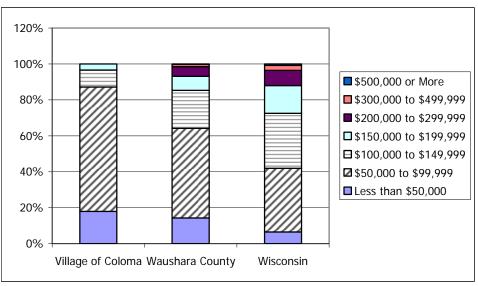

Figure 3-3. Housing Values by Range, 2000

# Housing Affordability

The relationship between housing costs and household income is an indicator of housing affordability, which is gauged by the proportion of household income expended for rent or home ownership costs. Rental costs include contract rent, plus the estimated average monthly cost of utilities and fuel. Owner costs include payments for mortgages, real estate taxes, fire hazard and flood insurance on the property, utilities and fuels. In 1989, the U.S. Department of Housing and Urban Development (HUD) raised the standard for determining whether rent or home ownership costs comprised a disproportionate share of income from 25 to 30 percent of gross household income. Households spending more than 30 percent of their income for housing may be at risk of losing their housing should they be confronted with unexpected bills or unemployment of one or more workers per household. Communities should be aware that maintenance and repair costs are excluded from this housing affordability formula, as are other outstanding debts, because these items will have policy impacts. Potential homeowners should be aware that these items are excluded from this housing affordability formula, as these items can impact their housing affordability and future financial stability.

Access to affordable housing is not only a quality of life consideration; it is also an integral part of a comprehensive economic development strategy. Communities need affordable housing for workers in order to retain existing companies and attract new companies to the area. Households which must spend a disproportionate amount of their income on housing will not

Village of Coloma Comprehensive Plan 2030

Source: U.S. Census, 2000.

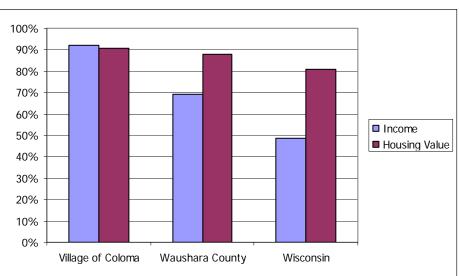

have the resources to properly maintain their housing, nor will they have adequate disposable income for other living expenses, such as transportation, childcare, healthcare, food, and clothing. This in turn not only has a negative impact on the overall economy, it may also heighten resistance to property tax increases, which is a major source of revenue for many Wisconsin communities.

For persons on the bottom end of the economic ladder, affordable housing is particularly important. A recent study by the Hudson Institute and the Wisconsin Housing Partnership<sup>6</sup> found that the most important factor for individuals to successfully move from welfare to work was their ability to find decent, stable affordable housing.

A review of housing stock values for the Village of Coloma indicated that housing values were on average lower than the state average. However, many of those units were not affordable for Village residents.

# Owner-Occupied Housing

In 1989, 15.1 percent of homeowners in the state and 17.7 percent of homeowners in Waushara County were paying a disproportionate amount of their income for housing (Appendix C, Table C-10). Residents in the Village of Coloma had an easier time finding affordable housing than the State and the County. In 1989, 13.8 percent of Coloma residents were spending more than 30 percent of their income on housing.

Source: U.S. Census, 1990 and 2000.

Between 1989 and 1999, housing affordability became a larger issue for homeowners in the state, Waushara County and the Village of Coloma. The percentage of homeowners paying a disproportionate share of their income for

<sup>&</sup>lt;sup>6</sup> Rebecca J. Swartz, Brian Miller with Joanna Balsamo-Lilien, Hilary Murrish, 2001. *Making Housing Work for Working Families: Building Bridges between the Labor Market and the Housing Market.* 

*housing in Coloma rose to 26.5 percent*. Almost twenty percent (19.7%) of County residents were paying a disproportionate share of their income for housing in 1999, compared to 17.8 percent of state residents. The change in housing affordability likely resulted from housing prices and values rising faster than incomes. The Village of Coloma was the only jurisdiction during this time period where the Median Household Income increased faster then the Median Price of Housing (Figure 3-4.). Even though household income grew at a faster rate it did not increase enough to offset the increase in the Median Housing Value.

## Renter-Occupied Housing

Census data indicates that renters usually have greater difficulty finding affordable housing than homeowners. In 1989, 36.0 percent of renters in the state and 34.6 percent of renters in the county paid a disproportionate share of their income for housing, compared to 15.1 percent and 17.7 percent of homeowners, respectively. *The share of renters paying a disproportionate amount of their income for housing was 37.5 percent in the Village of Coloma compared to 13.8 percent of homeowners in 1989* (Appendix C, Table C-10).

Between 1989 and 1999, the number and share of households paying a disproportionate share of their income for rental housing decreased in all three jurisdictions. This decrease was accompanied by a decrease in the total number of renters, which indicates that renters may have relocated in search of more affordable housing.

*By 1999, the share of renters paying more than 30 percent of their income for housing had decreased to 20.8 percent in the Village of Coloma* (Figure 3-5). Thirty-two percent (32.3%) of state residents were paying more than 30% of their income for rental housing, compared to 23.4 percent of Waushara County residents, which indicates that rent was more affordable for the renters who remained in Coloma than for renters at the state and county levels.

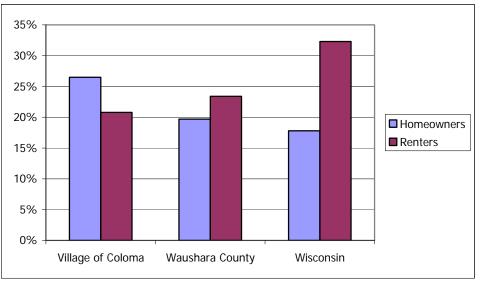

Figure 3-5. Percent of Households for which Housing is Not Affordable, 1999

Source: U.S. Census, 2000.

#### Housing Conditions

Two Census variables often used for determining housing conditions include units which lack complete plumbing facilities and overcrowded units. Complete plumbing facilities include hot and cold piped water, flush toilet and a bathtub or shower. If any of these three facilities is missing, the housing unit is classified as lacking complete plumbing facilities. The Census defines overcrowding as more than one person per room in a dwelling unit.

*By 2000, two occupied units without complete plumbing facilities existed in the Village of Coloma. Less than five percent (4.8%) of dwelling units within the Village were overcrowded* (Appendix C, Table C-11).<sup>7</sup> The actual number of overcrowded units listed was nine.

## Subsidized and Special Needs Housing

Subsidized and special needs housing should be available for individuals who, because of financial difficulties, domestic violence situations, disabilities, age, alcohol and drug abuse problems, and/or insufficient life skills, need housing assistance or housing designed to accommodate their needs. In some instances, extended family structures and finances may allow families or individuals to cope privately with special needs. Two such examples would be when a child cares for an elderly parent in their own home or when a parent cares for a disabled child in their own home. In most instances, however, some form of assistance is needed. The housing needs of these populations vary based on their circumstances, health, economic conditions and success of educational, training, treatment or counseling programs.

Table 3-3 shows the location of federally assisted rental units by type for Waushara County. *The closest access to subsidized housing for qualifying elderly, families and persons with disabilities for Village of Coloma residents is within the Village of Coloma or the City of Wautoma.* 

County	Jurisdiction	Elderly Units	Family Units	Other Units	Total Units
Waushara	C. Wautoma	32	14	2	48
	V. Coloma	0	12	0	12
	V. Redgranite	21	0	3	24
	V. Wild Rose	16	0	0	16
	T. Poy Sippi	0	20	0	20

 Table 3-3.
 Federally Assisted Rental Units, 2005

Source: WHEDA website, 2005.

Assisted living options are listed in Table 3-4. Some elderly housing options are located in nearby incorporated communities. This likely reflects the fact that funding agencies are more likely to provide resources and developers are more likely to build these facilities in areas with easy access to health care, transportation, other services and grocery stores. Since many residents in these facilities may have mobility limitations, they may also prefer to be located in an area with easy access to goods and services.

## Housing Needs Analysis

As part of the regional planning process, ECWRPC developed a matrix of housing conditions to measure housing stress within the region. This matrix uses a combination of ten Census variables to measure five housing characteristics: housing affordability, housing availability, the prevailing age of units compared to housing values, overcrowding and presence of plumbing facilities. A compilation of these variables show that the Village has some housing stress (Appendix C, Tables C-12 and C-13) which the Village should address. Based on inventory analysis, the largest housing issues facing the Village of Coloma is Owner Occupied housing affordability and vacancy index.

## Housing Affordability

Housing affordability is currently an issue in the Village of Coloma. Homeowners, in particular, have a difficult time affording housing costs. According to the 2000 Census, 31 homeowners or 26.5 percent of the households were paying a disproportionate share of their income on housing. The need for affordable housing can be addressed by building units which are affordable for residents, subsidizing the housing costs for existing units, and/or increasing incomes to make the existing housing more affordable.

#### Housing Available for Rent or Sale

The Village of Coloma did not have an adequate share of units for sale or rent in 2000. According to the U.S. Census in 2000, the Village of Coloma had two units for rent and zero units for sale. Given the small number of units available, the community may wish to evaluate the market demand to see if the units for sale and rent provide an adequate choice for those seeking to buy or rent. The lack of available units for sale and rent may discourage households from moving into the Village of Coloma.

## Age of Occupied Dwelling Units and Owner-Occupied Housing Values

This variable compares the percentage of housing stock that was over 40 years of age to the percentage of housing stock that is valued at less than \$50,000. Eighteen percent (17.9%) of the housing stock in Coloma is valued at less than \$50,000. So while 52.7 percent of the housing stock is over 40 years old, it is likely that most of these units are well maintained.

## Overcrowding

In 2000, overcrowding affected very few households in the Village of Coloma. However, overcrowding could increase if households choose to double up or move to smaller units in an effort to lower their housing costs.

## Plumbing

There were two units lacking complete plumbing facilities in 2000.

#### Community Input Regarding Housing Needs

Statistical information can only capture a portion of the information necessary to determine housing needs and a community's ability to meet those needs. Market demand and supply characteristics (capacity), socio-economic changes (fluidity) and personal desires and biases (individual choice/NIMBYism<sup>8</sup>) also influence housing needs.

#### Continuum of Care Needs Assessment

The Continuum of Care<sup>9</sup> Needs Assessment was a county-wide effort to identify housing resources and to identify and prioritize housing needs of homeless persons within the county. As such, it was a more focused assessment. A number of agencies and individuals were included in this information gathering process including: Waushara County's Department of Human Services, Community Programs, UW-Extension and Job Center; WI Department of Workforce Development Migrant, Refugee and Labor Services; Family Health Medical and Dental Center; All-Area Counseling; CAP Services; and Legal Action of Wisconsin. Individual participants included two homeless members, a representative from the Waushara County Coordinated Community Response Team for domestic violence issues, three persons of Hispanic Origin and 11 victims of domestic violence. A variety of needs were identified, including affordable housing, transportation, childcare, education, employment, medical care, counseling/case management, legal services, and others. When these needs were prioritized, affordable permanent housing ranked as the number one need in Waushara County. The need for permanent affordable housing was followed by affordable transitional housing, legal services, case management/assistance with linkage to other community resources, support groups and assistance obtaining employment or training. CAP Services submitted a grant application to request funds to help meet identified needs, and was awarded \$105,025, which will be used to provide affordable housing and support services to victims of domestic abuse in Portage, Waupaca, Waushara and Marquette Counties.

#### Homelessness

According to the U.S. Department of Housing and Urban Development (HUD) the term "homeless" or "homeless individual or homeless person" includes: (1) an individual who lacks a fixed, regular, and adequate nighttime residence and (2) an individual who has a primary

<sup>&</sup>lt;sup>8</sup> NIMBY: Not In My Back Yard

<sup>&</sup>lt;sup>9</sup> The Continuum of Care model is a coordinated effort between providers of housing and housing related services to move persons from homelessness into emergency shelter, through transitional housing to long-term affordable housing. The Continuum of Care also works to prevent persons at risk of homelessness from becoming homeless.

nighttime residence that is: a supervised publicly or privately operated shelter designed to provide temporary living accommodations (including welfare hotels, congregate shelters, and transitional housing for the mentally ill); or an institution that provides a temporary residence for individuals intended to be institutionalized; or a public or private place not designed for, or ordinarily used as, a regular sleeping accommodation for human beings.<sup>10</sup>

Even though very little information on homelessness is available for Waushara County, it does exist and should be discussed in the context of this plan. *There are no emergency shelters in Waushara County for the general public.* The general public must utilize shelters in Stevens Point, Oshkosh or the Fox Cities. However two shelters (Aurora Center and Naomi House) are present in the county. The Aurora Center is owned and operated by United Migrant Opportunity Services (UMOS) for seasonal migrant farm workers and their families. Naomi House is a new facility in Wautoma for pregnant women or women with children who are at risk of becoming homeless. It has a capacity for three families at a time. In 2008, they housed four women and five children.

Twice a year, a point in time survey is compiled by the Waushara County Department of Health and Human Services. *On January 28, 2009*, the last time a point in time survey was compiled, *four people were sheltered in an emergency shelter and six people were unsheltered.*<sup>11</sup> It should be noted that a point in time survey only includes information on that one day in time.

Foreclosure and eviction rates are an indication of potential homelessness or the need to double up on housing. It should be noted that the filing of an eviction action Summons and Complaint with a court date (in 7 days), meets HUD's definition of homelessness. The filing of a foreclosure case is not an immediate threat of homelessness because of Wisconsin's redemptive period which is either six or 12 months from when the judgment is granted. Additionally a filing does not indicate how many judgments were granted. *In 2008, there were 169 foreclosure actions filed in Waushara County, which was a 47 percent increase from the 115 that were filed in 2007.* Evictions also increased between 2007 and 2008. *In 2008 there were 48 eviction actions or a 41 percent increase from 2007 when a total of 34 eviction actions took place.*<sup>12</sup>

The school district homeless coordinator's report also indicates that more students in Waushara County are homeless. During the 2007/2008 school year, nine students were reported as being homeless. As of February 2009, a total of 12 students have been reported as homeless for the partial school year of 2008/2009.

Other homeless information that has been reported in the county includes: seven transient homeless individuals were served in 2008<sup>13</sup>; and four household lodging vouchers were issued by the county.

<sup>&</sup>lt;sup>10</sup> The United States Code contains the official federal definition of homeless. In Title 42, Chapter 119, Subchapter 1.

<sup>&</sup>lt;sup>11</sup> Wisconsin Point in Time Form, for Waushara County Department of Human Services, January 28, 2009.

<sup>&</sup>lt;sup>12</sup> HUD's Emergency Shelter Grant, Transitional Housing Program, Homelessness Prevention Program Grant Application for 2009/2010.

<sup>&</sup>lt;sup>13</sup> Waushara County DHS Report for Year 2008.

## Key Findings

## Age of Occupied Dwelling Units

- Census information regarding the age of owner-occupied units indicates that the Village of Coloma was well established by 1950.
- Between 1990 and 2000, the Village of Coloma experienced a higher level of growth in owner-occupied units than was indicated in previous Census periods (1960 to 1990) based on the age of structure information provided in the 1990 and 2000 Censuses.

## Change in Structural Type

- As with most rural communities, the dominant housing type in the Village of Coloma is single family housing.
- By 2000, the share of single family units had increased to 84.4 percent in the Village of Coloma, while the number and share of mobile home units increased to 19 units or 9.3 percent of the total housing units.

## Occupancy Status

• The majority of occupied units within the Village of Coloma are owner-occupied. Coloma had a higher owner-occupancy rate than Wisconsin and a lower owneroccupancy rate than Waushara County.

#### Vacancy Status

- In 2000, the Village of Coloma had a homeowner vacancy rate of 0.0 percent, which indicates that not only was there an inadequate number of homes for sale, but that in 2000 there were no homes for sale in the Village.
- At a vacancy rate of 3.9 percent in 2000, the Village of Coloma was below the rental vacancy standard of 5.0 percent.
- Between 1990 and 2000, the number of vacant units identified as seasonal decreased from eight to six while the share of vacant units identified as seasonal increased from 21.6 percent in the Village of Coloma to 50.0 percent.

#### **Owner-Occupied Housing Stock Value**

- Between 1990 and 2000, median housing values in the Village of Coloma nearly doubled. By 2000, the median housing value for the Village of Coloma was \$67,900, up from \$35,600 in 1990.
- Over 96 percent (96.6%) of the owner-occupied housing stock in the Village of Coloma was valued at less than \$150,000 in 2000.

## Housing Affordability

• Between 1989 and 1999, housing affordability became a larger issue for homeowners in the state, Waushara County and the Village of Coloma. The percentage of homeowners paying a disproportionate share of their income for housing in Coloma rose to 26.5 percent.

- The share of renters paying a disproportionate amount of their income for housing was 37.5 percent in the Village of Coloma compared to 13.8 percent of homeowners in 1989.
- By 1999, the share of renters paying more than 30 percent of their income for housing had decreased to 20.8 percent in the Village of Coloma.

# Housing Conditions

• By 2000, two occupied units without complete plumbing facilities existed in the Village of Coloma. Less than five percent (4.8%) of dwelling units within the Village were overcrowded.

# Subsidized and Special Needs Housing

• The closest access to subsidized housing for qualifying elderly, families and persons with disabilities for Village of Coloma residents is within the Village of Coloma or the City of Wautoma.

## Homelessness

- There are no emergency shelters in Waushara County for the general public.
- On January 28, 2009, four people were sheltered in an emergency shelter and six people were unsheltered.
- In 2008, there were 169 foreclosure actions filed in Waushara County, which was a 47 percent increase from the 115 that were filed in 2007.
- In 2008 there were 48 eviction actions or a 41 percent increase from 2007 when a total of 34 eviction actions took place.

# INTERRELATIONSHIPS WITH OTHER PLAN ELEMENTS

Housing cannot be considered in isolation from other elements. Meeting the housing needs of all Coloma's residents requires an adequate supply of reasonably priced land with the appropriate infrastructure, utilities and services, coupled with access to employment opportunities and dependable transportation options. Decisions regarding economic development, transportation, community and public facilities development, environmental quality and land use have an impact on housing choice, supply and affordability. Likewise, decisions made in the housing sector can influence the cost and efficiency of other plan elements.

## Economic Development

Affordable housing is an integral part of a comprehensive economic development strategy. Companies are reluctant to relocate to communities without affordable housing for their workers. Existing companies may move out of the area if they cannot attract an adequate labor force. Labor shortages and high turnover rates resulting from a lack of affordable housing reduce service and productivity, increase administration and training costs, thereby discouraging business development and expansion. In addition, households which must spend a disproportionate amount of their income on housing will not have the resources to properly maintain their housing, nor will they have adequate disposable income for other living expenses, such as transportation, childcare, healthcare, food, and clothing. All this in turn has a negative impact on the overall economy.

3-17

Redevelopment of vacant industrial or commercial properties could bring these properties back onto the tax rolls, increase revenue and improve the overall appearance of the community. In some instances, these buildings or locations may be more appropriate for commercial or industrial redevelopment. In other instances, or perhaps in combination with commercial redevelopment, the adaptive reuse of these properties may provide unique housing options and increase the supply of affordable housing, elderly housing and utilize space and structures which may no longer be appropriate for commercial or industrial uses. Apartments above stores can help retail and service establishments supplement their income. Appropriate home based businesses and/or owner-occupied units above or behind retail and service establishments can increase housing affordability, lower transportation costs and perhaps increase access to goods and services.

# Transportation

A mix of transportation options is critical to meet personal mobility needs and decrease social isolation for individuals and individual households, particularly for those unable or unwilling to drive. Sidewalks and pedestrian/bicycle trails can provide a healthy, low cost alternative to the automobile for small unincorporated areas where homes, schools, places of business, employment and recreational facilities are in close proximity. For the majority of the area, however, paratransit service or a volunteer driver pool may be needed for those who cannot drive.

A good road network and highway system helps provide access to greater economic opportunities beyond those in the immediate vicinity, which can contribute to housing affordability, provided transportation costs to those areas is not prohibitive. As transportation costs rise, carpooling and vans may be a more cost-effective means of traveling between homes and places of employment.

## Utilities and Community Facilities

Affordable housing and upscale employment are linked to education, experience and updating job skills. Financial literacy and life skills also help ensure households make good financial decisions and have the wherewithal to properly maintain their housing unit. As a result, a strong school system which adequately prepares students to meet the demands of the workplace is critical. Adult education, job training, retooling and programs to connect individuals with better economic opportunities also contribute to housing affordability. Programs/agencies which provide counseling, financial and investment literacy, life skills training and support groups/services contribute to household stability.

Good law enforcement, fire and EMS services are important to public and household safety. In turn, housing units and properties must be maintained, as poorly maintained housing may pose a health and/or fire hazard. Cluttered or overgrown drives may also limit emergency access to properties.

Accessible, reliable and affordable electrical and heating sources and services contribute to housing safety and affordability. Accessible, affordable and environmentally safe water and waste disposal sources and services are critical to public safety and housing affordability.

Other community and public facilities such as waste disposal options, recycling facilities, parks, libraries, childcare, eldercare, medical facilities and emergency shelters also contribute to an area's quality of life and the wellbeing of individual households. Communication, cooperation and coordination with the entities that provide these services are important to ensure Coloma residents have access to these services. New residents may appreciate information regarding the location and accessibility of these services.

## Agricultural Resources

As new households are formed, more land will be converted from farms, forests and open space to residential uses. The amount of land converted will vary depending on the choices made in terms of the density, design and placement of that development.

Choices must be made. Residential land uses have higher property values than farmland, so their expansion is seen as an opportunity to increase tax revenues. Little attention is paid to net tax gains, even though various Farmland Trust studies<sup>14</sup> have shown that the cost of services for other forms of development, particularly single family residential, typically exceeds tax revenues generated by that development, while taxes generated by farmland exceed the cost of services for farmland.

As farmers reach retirement age, many of these individuals see farmland conversion as a quick, easy retirement option, especially in the face of increased conflicts between the realities of farming and the expectation of exurban residents. Modern day industrial farming requires substantial monetary investments, which makes it difficult for young farmers to enter the field. Farming is also under considerable economic pressure, as production costs rise and profits from food sales shift away from farmers to food processing and sales.

Allowing a farmer to develop his land provides housing opportunities and cash benefits for that farmer. However, it also increases the need for additional public services which require additional tax revenues. Nonfarm development may also cause economic, land use and transportation conflicts for the farmer who wishes to maintain or expand his operation.

#### Natural Resources

Building materials, such as lumber and nonmetallic resources are needed for residential development. The density and location of residential development also impacts the amount of land consumed for development and can fragment ecosystems and place undue pressure on our natural resources. As humans consume more land, the amenities, such as the open space and farm and forest land that attracted initial settlement disappears. Human/animal interaction also increases. Communities must deal with a rising number of complaints about bird feces in parks and on lawns; deer and rabbits damaging trees, shrubs and gardens; and in some instances bears foraging through dumps and garbage cans. Pressure is also placed on fragile wildlife habitats, such as migration corridors.

Many communities have established large minimum lot sizes in an effort to preserve rural character. However, the demand for large lot subdivisions, scattered site housing and seasonal homes is, in reality, fragmenting wildlife habitats and changing the appearance and character of

<sup>&</sup>lt;sup>14</sup> American Farmland Trust, 2004. *Farmland Information Center Fact Sheet: Cost of Community Services Studies*.

the landscape. If communities have an interest in preserving natural resources and/or their rural character, other implementation tools may better serve that objective.

## Cultural Resources

The existing housing stock in the Village of Coloma is an important resource. It provides community character and reflects the historical development of the area. In some instances, the material in some of these units is no longer available. To lose these units is to reduce housing choices and to lose a part of the area's history, cultural and community identity.

Environmental regulations designed to protect the health and safety of individuals such as the lead base paint remediation and asbestos removal rules are extremely costly to implement. These regulations make it cost prohibitive to retain historical features on affordable properties, which are not on the historic register and/or eligible for the historic register, yet contain period features. However, removing these historical features destroys the home's character and lowers its potential market value.

## Land Use

An adequate supply of reasonably priced land is a critical component for affordable housing. How much land is required depends on the density, design and placement of residential development. Density, design and placement of residential development not only impacts the amount of land consumed for development, it also impacts the effectiveness and efficiency of public services (law enforcement, fire, roads, etc.), the cost of public and social services, the quality of the environment, the ease of access to goods and services and the mobility of those unable or unwilling to drive automobiles.

Residential, commercial and industrial demand for land increases the value of that land. As land prices rise, converting that land from farm, forest and open space becomes more attractive; and long term consequences such as farm and forest land shortages, loss of wildlife habitat, increased public costs, changes in community character and lack of open space are often not considered.

#### Intergovernmental Cooperation

All levels of government influence housing supply, availability, location, choice and access. Interaction between government, nonprofit and private sectors can facilitate or discourage housing affordability, choice and access.

## POLICIES AND PROGRAMS

#### **Regional, County and Local Policies**

East Central recently completed a regional comprehensive plan. Five core housing goals have been identified:

• To help ensure that an adequate supply of affordable housing in the region exists to support economic development efforts and ensure that every household has access to shelter.

- To work with others to increase housing options, so that housing choices better reflect the need of individual households.
- To support the preservation and rehabilitation of the existing housing stock within the region.
- To promote increased coordination and cooperation between governments, and between public, nonprofit and private sectors to increase housing affordability, choice and access within the region.

Housing is designed to foster community and neighborhood cohesion and available housing choices are integrated with community facilities and multimodal transportation.

In January 2004, East Central adopted the report, *Overcoming Barriers to Affordable Housing in the East Central Region.* This report is a compilation of input from urban and rural residents, who identified barriers to affordable housing in their communities and suggested potential solutions that local citizens, county and local governments, developers and other housing providers can use to address these issues. Some of the identified issues and potential solutions which are pertinent to residents in the Village of Coloma include senior housing issues, farm worker and migrant housing issues, absentee landlords, income and economic development barriers and access to funding, to name a few. This report is available online at: <u>www.eastcentralrpc.org</u> and through the ECWRPC office. Communities and agencies are encouraged to review the options presented and choose the best option or combination of options which best serve the needs of their residents and clients. Communities and individuals from the private and nonprofit sectors are encouraged to develop additional solutions and share those solutions with others to help improve the quality of life for all residents in our communities.

CAP Services is a regional community action program which aids low income persons in attaining economic and emotional self-sufficiency. They use a number of strategies to reach this goal, including advocacy, administering programs and grants, developing resources and partnering with public, private and other nonprofit or community groups. CAP Services provides a number of services in Waushara County. They also work closely with other agencies. For example, CAP Services partners with the Waushara County Habitat for Humanity to make more efficient use of nonprofit resources. During the 2005 Continuum of Care application process, CAP Services met with a number of agencies and individuals to identify and prioritize housing needs within Waushara County. These agencies included: the Waushara County Department of Human Services, Community Programs, UW-Extension and the Job Center; the WI Department of Workforce Development Migrant, Refugee and Labor Services; Family Health Medical and Dental Center; All-Area Counseling; and Legal Action of Wisconsin. These agencies plan to meet on a quarterly basis to discuss how best to meet the needs of the area's homeless, including the Hispanic/Latino population.

Waushara County has a number of departments which impact access to housing and housing services for residents in the Village of Coloma. Some departments such as the Departments of Aging, Human Services, UW-Extension and the Veteran's office provide information and support for residents. Other departments such as Land Records, Public Health, Register of Deeds and Zoning and Land Conservation engage in administrative functions such as enforcing codes and

zoning ordinances and collecting fees. These administrative functions can aid or hinder a community's ability to meet the housing needs of their residents.

The Village of Coloma relies on Waushara County to administer and enforce the uniform dwelling code (UDC). Some communities in the state have found that enforcing the state's uniform dwelling code is not necessarily compatible with preserving some of their existing and historical housing stock. Many of these structures are decent, safe and affordable, but they do not conform to the UDC. This potential conflict can be resolved by adopting a separate building code for older structures which protects the characteristics of those structures while also protecting the health and safety of residents.

## Village of Coloma

The Village of Coloma zoning ordinance regulates zoning within the Village.

## Federal, State and Regional Programs

Funding and technical assistance for housing programs are available from several federal, state and regional agencies. A listing of these programs follows.

## Federal Agencies

## United States Department of Agriculture

**Rural Development Housing Programs.** USDA Rural Development offers a variety of housing products including single family, multi-family and farm labor housing products. Assistance can be in the form of a loan, grant or technical assistance. Information about individual products can be obtained from the USDA Rural Development website at: <u>http://www.rurdev.usda.gov/rhs</u>. Website information is provided in English and Spanish. Information can also be obtained from the state USDA Rural Development office, which is located in Stevens Point. Their phone number is: (715) 345-7615.

## United States Department of Housing and Urban Development

**Brownfield Economic Development Initiative Grant.** This grant can be used for brownfield sites (converting old industrial to residential). BEDI and Section 108 funds must be used in conjunction with the same economic development project, and a request for new Section 108 loan guarantee authority must accompany each BEDI application. Funds can be used to benefit low-moderate income persons, prevent/eliminate slum and blight, and address imminent threats and urgent needs (usually follow the same guidelines as CDBG). More specifically, funds can be used for land writedowns, site remediation costs, funding reserves, over-collateralizing the Section 108 loan, direct enhancement of the security of the Section 108 loan, and provisions of financing to for-profit businesses at below market interest rates. The maximum grant amount is \$1 million, and the minimum BEDI to Section 108 ratio is 1:1. For more information, contact David Kaminsky in HUD's Office of Economic Development at (202) 708-0614 ext. 4612 or visit the web site at: http://www.hud.gov/offices/cpd/economicdevelopment/programs/bedi/index.cfm.

**Community Development Block Grant (small cities).** Small cities, towns, and villages with populations of less than 50,000 are eligible to apply for this grant. Funds are used for housing and neighborhood improvement activities for low to moderate income households, including rehabilitation, acquisition, relocation, demolition of dilapidated structures, and handicap accessibility improvements. The Small Cities Community Development Block Grant is administered by states. For more information, visit the Wisconsin Department of Commerce Bureau Housing website at:<u>http://commerce.wi.gov/housing/cd-boh-Community-Development-Block-Grant-CDBG.html</u>, or contact Caryn Stone at (608) 267-3682.

**Fair Housing Assistance Program (FHAP).** The federal fair housing law makes it illegal to discriminate in housing based on race, color, national origin, religion, sex, disability or familial status (i.e., the presence of children) in the sale, rental, or financing of housing. The State of Wisconsin also makes it illegal to discriminate based on age, marital status, lawful source of income and sexual orientation. FHAP provides funds to states to conduct intake of fair housing complaints, investigate complaints, counsel those who believe they have been denied equal access to housing and do systemic investigations. The program also provides outreach and education to consumers, advocates and the general public and technical assistance and training for real estate agents, property owners and managers and other members of the housing industry. General information about the FHAP can be obtained from the HUD website: <u>http://www.hud.gov/offices/fheo/partners/FHAP/index.cfm</u>. For local information and assistance, Waushara County residents and officials should initially contact the Wisconsin Department of Workforce Development Equal Rights Division Civil Right Bureau. Visit their website at: <u>http://www.dwd.state.wi.us/er/</u> or contact LeAnna Ware at: (608)266-1997.

**Multi-family Housing Programs.** HUD offers a number of multi-family programs through the state. These programs fund facility purchases, construction, rehabilitation, lead based paint abatement<sup>15</sup>, energy conservation and accessibility improvements. For more information, visit the Wisconsin Department of Commerce Bureau Housing website at: <u>http://commerce.wi.gov/housing/#HomePrograms</u> or contact CAP Services ((920) 787-3949), as CAP Services administers many of these programs in Waushara County.

**Public Housing Programs.** HUD offers a number of public housing programs for the development/redevelopment or management of public housing authorities, rental assistance through the Section 8 program and some limited homeownership opportunities. General information can be found at: <u>http://www.hud.gov/progdesc/pihindx.cfm</u>. Waushara County currently has no public housing authority.

**Single Family Housing Programs.** HUD offers a number of single family home programs, including homebuyer education and counseling, downpayment assistance, rehabilitation, weatherization, mortgage insurance and reverse mortgages. For general information, visit HUD's website at: <u>http://www.hud.gov/offices/hsg/sfh/ins/singlefamily.cfm</u>. Some of these products, such as FHA loans, are available through approved lending institutions. Access to HUD single family home programs can also be obtained through WHEDA or the Wisconsin Department of Commerce Bureau Housing. Information about products WHEDA provides can be found on WHEDA's website at: <u>http://www.wheda.com/root/WhedaProducts/Residential/Default.aspx?id=182</u> or you may contact: Arlene Scalzo at: 1-800-334-6873 Ext. 623 for information. For information about products provided through the state Bureau of Housing,

<sup>&</sup>lt;sup>15</sup> Home Lead Assessments are only performed after a child has been poisoned.

visit the Wisconsin Department of Commerce Bureau Housing website at: <u>http://commerce.wi.gov/housing/#HomePrograms</u> or contact: Betty Kalscheur at (608) 267-6904. CAP Services also administers some single family home programs in Waushara County. The local phone number for CAP Services is (920) 787-3949. Their website address is: <u>http://www.capserv.org/pages/About\_Us.html</u>.

**Special Needs Programs.** HUD also funds programs for special need populations through the state. Information regarding emergency shelter/transitional housing programs or housing opportunities for people with AIDS can be found at the Wisconsin Department of Commerce Bureau Housing website at: <u>http://commerce.wi.gov/housing/#HomePrograms</u> or by contacting Judy Wilcox at: (608) 266-9388. The state strongly encourages joint emergency shelter/transitional housing (ESG/THS) grant applications. CAP Services has willingly served as the grant writer for ESG and THS grant applications for Waushara County agencies.

# Federal Financial Institutions Examination Council

**Community Reinvestment Act.** Through the Community Reinvestment Act (CRA), banks/financial institutions help meet the credit/investment needs of their markets with the primary purpose of community development. This is in part accomplished through direct grants/investments or loans to nonprofits or agencies to develop affordable housing. Direct loans are also given to individual households of which a certain percentage must go to low to moderate income households. More information can be obtained from their website: <u>http://www.ffiec.gov/cra/default.htm</u> or from your local financial institution.

# United States Department of Veterans Affairs

**Home Loan Guaranty Service.** The Veterans Administration provides a variety of benefits for eligible veterans and their dependents. Housing products include low cost loans for purchase, construction or repair of owner-occupied housing. General information can be obtained from the Veteran's Affair website at: <u>http://www.homeloans.va.gov/index.htm</u>. Two Waushara County websites provide information for veterans and their dependents: <u>http://www.co.waushara.wi.us/veterans.htm</u> and <u>http://www.visitwaushara.com</u>. The Waushara County Veterans Service Office can also be contacted at (920) 787-0446 for information about specific programs.

# National Organizations

**National Association of Home Builders (NAHB).** The National Association of Home Builders is a trade organization that represents the building industry. They provide information and education about construction codes and standards, national economic and housing statistics, a variety of housing issues, jobs within the housing industry and information about local builders who are members of their organization. Visit their website at: <u>http://www.nahb.org/</u> for more information.

**National Low Income Housing Coalition (NLIHC).** NLIHC is a national advocacy group which conducts research on low income housing issues, provides information and data on a variety of housing or housing related issues affecting low income families and publishes reports and data regarding low income housing issues and legislation. Their mission is to end the affordable housing crisis for low income families. Information about NLIHC and its activities can

be found at: <u>http://www.nlihc.org/</u>. NLIHC also has a number of state partners. Wisconsin has two State Coalition Partners, the Wisconsin Partnership for Housing Development, Inc. and Housing For All. For information about the Wisconsin Partnership for Housing Development, visit their website at: <u>http://www.wphd.org/</u> or call their Madison office at: (608) 258-5560. For information about Housing For All, contact Brian Peters of Independence First at: (414) 291-7520.

**United Migrant Opportunity Services (UMOS).** UMOS works with federal, state and local agencies, employers, for profit and nonprofit agencies to meet the housing needs of migrant workers. Call: (920) 787-4617 for information about services and programs in Waushara County. UMOS also operates an emergency shelter in Aurora for a portion of the year. When the Aurora Center Emergency Shelter is open, it can be reached at: (920) 361-1266. Otherwise, persons needing shelter should call (800) 279-8667 for assistance. Information about UMOS's housing programs can also be found on their website at: <u>http://www.umos.org/social\_services/housing\_overview.aspx</u>.

# State Agencies

## University of Wisconsin - Extension

**Family Living Program.** The family living program provides assistance to families through Waushara County. Some of these programs include financial education and parent education.

**Homeowner Resources.** UW-Extension provides a number of publications and materials to aid homeowners. Topics include home care, home maintenance and repair, life skills, financial information, gardening, landscaping, pest control, etc. These publications may be obtained through the Waushara County UW-Extension office, or accessed online at: <u>http://www.uwex.edu/ces/house/</u> or through <u>http://infosource.uwex.edu/</u>.

**Housing – Ownership and Renting.** UW-Extension provides a website which includes information on home maintenance and repair, a seasonal newsletter, and Rent Smart, which is a tenant education program. This website is located at: <u>http://www.uwex.edu/ces/house/housing/renting.cfm</u>. Publications are also included in Spanish.

**Housing Specialist.** Dr. Marc Smith is the state UW-Extension Housing Specialist. He is located in the UW-Madison School of Human Ecology. His position priorities include assistance with the following topics: local housing policies, homeownership training, housing needs assessment, post-purchase support and housing program evaluation. He can be reached at: (608) 262-2831.

## Wisconsin Department of Agriculture, Trade & Consumer Protection (DATCAP)

**Consumer Protection.** DATCAP publishes a number of resources for renters, landlords and homeowners. Some of these are short fact sheets: others, such as "The Wisconsin Way: A Guide for Landlords and Tenants", are longer publications. These publications can be found on DATCAP's website at: <u>http://www.datcp.state.wi.us/cp/consumerinfo/cp/factsheets/index.jsp</u>.

## Wisconsin Department of Commerce

**Bureau of Housing.** This department helps to expand local affordable housing options and housing services by managing a number of federal and state housing programs and providing financial and technical assistance. Visit their website at: <u>http://commerce.wi.gov/housing/</u> for additional information. The Bureau of Housing also administers WIFrontDoor, which is a collaborative program with WHEDA and the WI Department of Health and Family Services. This website, located at: <u>http://www.wifrontdoorhousing.org/</u>, is a searchable statewide data base designed to help connect those looking for affordable housing with those providing housing and housing services. The website is searchable by location, unit size, availability, accessibility and cost of rent. Landlords and property managers can list their properties; they are also responsible for updating information about their properties. Renters can search for housing and services to fit their needs.

**Migrant, Refugee and Labor Services.** This department coordinates services for migrants, foreign-born residents and their families and employers who hire foreign and Limited English Proficient workers. Information regarding these services and contact information can be found at: <u>http://dwd.wisconsin.gov/migrantsandrefugees/</u>.

#### Wisconsin's Focus on Energy

**Focus on Energy.** This public private partnership offers a variety of services and energy information to energy utility customers throughout Wisconsin. To learn about the programs and services they offer, visit their website at: <u>http://www.focusonenergy.com</u>.

## Wisconsin Historical Society

**Historic Preservation.** The Wisconsin Historical Society offers technical assistance and two tax credit programs for repair and rehabilitation of historic homes in Wisconsin. One tax credit program provides state tax credits; the other program provides federal tax credits. The Wisconsin Historic Society also provides grants to local governments and nonprofit organizations for conducting surveys and developing historic preservation programs. For additional information, visit: <u>http://www.wisconsinhistory.org/hp/</u>

## Wisconsin Housing and Economic Development Authority (WHEDA)

**WHEDA Foundation.** The WHEDA Foundation awards grants to local municipalities and nonprofit organizations through the Persons-in-Crisis Program Fund to support the development or improvement of housing facilities in Wisconsin for low-income persons with special needs. Special needs is defined as homeless, runaways, alcohol or drug dependent, persons in need of protective services, domestic abuse victims, developmentally disabled, low-income or frail elderly, chronically mentally ill, physically impaired or disabled, persons living with HIV, and individuals or families who do not have access to traditional or permanent housing. For more information, visit WHEDA's web site at <a href="http://www.wheda.com/root/AboutWheda/FoundationGrants/Default.aspx?id=72">http://www.wheda.com/root/AboutWheda/FoundationGrants/Default.aspx?id=72</a>, or contact: Arlene Scalzo at: 1-800-334-6873 Ext. 623.

**WHEDA Multi-family Products.** WHEDA offers a number of multi-family home products, including tax credits, tax exempt bond funding, construction, rehabilitation and accessibility loans, asset management and tax credit monitoring services. For information about this

program, visit WHEDA's web site at <u>http://www.wheda.com/programs/grants/about.asp</u>, or contact: Diane M. Schobert at: 1-608-266-0191.

**WHEDA Single Family Products.** WHEDA offers a number of single family home products, including home improvement or rehabilitation loans, homebuyer assistance and homebuyer education. For information about this program, visit WHEDA's web site at <a href="http://www.wheda.com/programs/grants/about.asp">http://www.wheda.com/programs/grants/about.asp</a>, or contact: Arlene Scalzo at: 1-800-334-6873 Ext. 623.

**Wisconsin Affordable Assisted Living.** WHEDA and the Wisconsin Department of Health and Family Services have partnered to create affordable assisted living for low-income seniors. Through this partnership, housing costs are reduced and assistance is provided to help access the Medicaid program to pay for services. Information regarding elderly statistics, available services, and consumer links to directories of adult day care programs, adult family homes, community based residential facilities (CBRFs) and residential care apartment complexes (RCACs) can be found at: <u>http://www.wiaffordableassistedliving.org/</u>.

## Regional Programs

**CAP Services, Inc.** CAP Services is one of 16 community action programs in the state of Wisconsin. CAP Services offers a number of community based programs in Waushara County, including family services, housing, housing assistance, business development and preschool. CAP Services is a state-designated CHDO (Community Housing Development Organization), which means they have assess to certain restricted funds set aside to meet housing needs with-in communities. The local phone number for CAP Services is: (920) 787-3949. Information about CAP Services can also be found on their website: <u>http://www.capserv.org/pages/byCounty.html</u>.

## HOUSING – Village of Coloma

**GOAL H 1:** Recognize that the provision of affordable housing is an integral part of a comprehensive economic development strategy for the area. Rural communities often find themselves at a competitive disadvantage in attracting new employers. An adequate supply of decent, safe, affordable housing can aid communities in attracting and retaining businesses. Companies are reluctant to relocate to communities without adequate housing for their workers. Existing companies may move out of the area if they cannot attract an adequate labor force.

STRATEGY H 1.1: Encourage community leaders, housing providers and consumers to work together to help promote the development of housing that meets the needs of all income levels within a community, including entry level and low skill workers. Some businesses which employ low wage workers, such as restaurants, coffee shops, daycare centers, dry cleaners, etc., contribute to the overall amenities of the area, and are part of a package that contributes to the area's quality of life and attracts higher income residents. Affordable housing provides greater financial stability for these workers, which contributes to greater employee satisfaction and productivity.

RECOMMENDATION H 1.1.1: Explore the possibility of subsidized housing. Subsidized housing refers to programs that subsidize or fund part of a persons housing needs. There are many types of subsidized housing programs. These programs are funded and regulated by the Federal Department of Housing and Urban Development (HUD) and run through State, county and municipal governmental agencies. Subsidized housing can either be public or private. Private subsidized housing developments are owned and operated by private entities. These entities can be non-profit or for-profit organizations and individuals.

**GOAL H 2:** Maintain an adequate housing supply that will meet the needs of current and future residents and promote a range of housing choices for anticipated income levels, age groups and special housing needs. Housing is not a one size fits all commodity. Different types of households have different housing needs and preferences. As the population in the area changes, housing needs change also. Options need to be expanded to address housing needs of emerging households, the elderly, new immigrants, the growing minority population and an increasing variety of household types and preferences. According to an analysis conducted by ECWRPC about a quarter of homeowners (26.5%) and renters (20.8%) within the Village of Coloma were paying a disproportionate share of their income on housing.

**STRATEGY H 2.1:** Promote collaboration within and between governmental, private and non-profit sectors to ensure the provision of an adequate supply of affordable housing. Many individuals tend to assume or prefer that the private sector will meet housing needs. In reality, the private sector can only meet a portion of market demands. Existing household income, public opposition and regulatory, market and information barriers often prevent the private sector from addressing many segments of the housing market. Cooperation and coordination is needed from all sectors to help identify and meet housing needs.

• **RECOMMENDATION H 2.1.1: Promote the use of under utilized facilities for affordable housing.** The Village should identify vacant or under utilized buildings that may help fill the housing needs of the community. Work with private developers, nonprofits and others to assist in these endeavors.

- **RECOMMENDATION H 2.1.2:** Identify infill lots and market these properties to developers/non-profits and others as appropriate to meet the housing needs.
- RECOMMENDATION H 2.1.3: Support efforts lead by others to pursue federal funding to meet affordable housing needs of the very low income households within the area. Rural areas rarely have the staff and resources available to meet the housing needs of all their citizens. Rural communities are also often unaware of programs and funding that is available to meet housing needs.
- RECOMMENDATION H 2.1.4: Support funding agencies, such as CAP Services, USDA Rural Development, Waushara County's Veteran's Administrator to find out what assistance may be available.
- RECOMMENDATION H 2.1.5: Work with others to identify the type of housing and services needed for existing residents.
- RECOMMENDATION H 2.1.6: Work with the Town of Coloma, CAP Services and others to pursue the construction of federally assisted rental units, assisted living and other housing options for the elderly.

STRATEGY H 2.2: Encourage residential developments that provide a balance of lowincome, moderate-income, and high-income housing.

- **RECOMMENDATION H 2.2.1**: *Encourage the design of new affordable housing that fits into existing neighborhoods.*
- RECOMMENDATION H 2.2.2: Encourage the use of low cost design features that can be used to enhance curb appeal, as well as "green" building initiatives that can be used to boast energy efficiency of the home.
- RECOMMENDATION H 2.2.3: Review the existing zoning code CC Commercial District to allow for residential rental accommodations in the same building as a business. An apartment above retail space can provide year-round income for the landlord, which helps to subsidize the cost of the retail space.
- **RECOMMENDATION H 2.2.4: Maintain the ability to build varied types and sizes** of housing in the Village. A balanced mix of well designed housing types (owner and renter occupied), various sizes and prices for all income levels can enhance the character, viability and fulfill the housing needs of the Village.

**STRATEGY H 2.3: When evaluating housing needs in Coloma, support the development and preservation of varied types of housing developments.** This may occur when the Village is reviewing proposals from developers. During the review process it may be necessary to work with the developer to incorporate a range of housing opportunities.

RECOMMENDATION H 2.3.1: Be aware of cultural and generational differences in housing preferences. The number and share of elderly residents is rising. Some elderly residents prefer to remain in their homes while others desire to relocate. Some seniors may not be able to stay in their homes without modification, transportation services or assistance in meeting their daily care needs. This can be a difficult time for individuals when they lose some of their independence; therefore, outreach to these residents may be necessary to help them during this transition.

**STRATEGY H 2.4: Address the relationship between housing and other land uses in both private and public planning arenas.** Decisions made about housing impacts housing choice, supply and affordability. It also impacts other planning areas including future services provided by the town, economic development, transportation, community and public facilities, environmental quality and the overall land use and character of the town.

• RECOMMENDATION H 2.4.1: Review all new housing proposals taking into consideration their special relationship with other land uses within the Village such that decisions will be made in the best interest of the Village as a whole.

**GOAL H 3:** Encourage preservation and rehabilitation activities to preserve the integrity of the existing housing stock and the cultural identity and history of the area. The existing housing stock in the area is an important resource, which provides community character, cultural identity and reflects the historical development of the area. It also increases the housing stock diversity, provides housing choice and helps maintain housing affordability.

**STRATEGY H 3.1:** Address building code issues for houses built prior to the adoption of the Uniform Dwelling Code. Many older buildings may be structurally sound, decent and affordable; however, they do not meet current building code standards. In many instances, it is cost prohibitive to bring older buildings up to current building code standards, consequently these properties may be allowed to deteriorate. In the process, historic and period architecture are lost. In terms of new construction and building inspections, the Home Safety Act legislation that was passed in December of 2003 requires all municipalities to enforce the Uniform Dwelling Code (UDC). The Wisconsin Department of Commerce is the state agency administering this program. The Village of Coloma currently contracts with Waushara County for enforcement.

STRATEGY H 3.2: Reduce the incidence of poorly maintained owner and renter occupied housing.

- RECOMMENDATION H 3.2.1: Encourage non-threatening educational opportunities to teach people how to maintain their homes and yards through CAP Services, UW-Extension and others.
- RECOMMENDATION H 3.2.2: Continue community/housing improvement activities. These activities have the potential to not only reduce the incidence of poorly maintained owner and renter occupied housing but also to instill community pride. A community wide clean up day or other effort, possibly in partnership with church and /or civic organizations, could assist residents with home maintenance issues. Money may be available from Wisconsin Housing and Economic Development (WHEDA) for minor outside repairs.

- RECOMMENDATION H 3.2.3: Continue to encourage individuals and local groups, such as church and civic organizations, to aid elderly residents with home maintenance issues.
- **RECOMMENDATION H 3.2.4**: Continue to promote the availability of affordable low price handyman specials for new home buyers within the community.
- RECOMMENDATION H 3.2.5: Continue to encourage preservation and renovation of historic homes. Wisconsin homeowners may be eligible to claim a 25 percent combined state (10%) and federal (15%) income tax credit for rehabilitation of historic personal residences. This program is administered by the State Historical Society, Division of Historic Preservation (DHP). The Coloma Historical Society may be able to work with local homeowners to assist them with identifying historic properties and funding sources.

**STRATEGY H 3.3:** Identify additional funding sources and encourage better utilization of existing programs to make the most efficient use of housing dollars. Many funding agencies such as WHEDA and USDA Rural Development will come make presentations to your community.

- RECOMMENDATION H 3.3.1: Work with others to identify funding sources that allow seniors, who wish to do so, to remain in their homes longer. Community Development Block Grants (CDBG), administered through CAP Services, are available for weatherization and rehabilitation. Homeowners 62 years old and older may also want to consider reverse mortgages. These mortgages may allow homeowners to use their home to help pay for taxes, maintenance, living expenses and other items.
- **RECOMMENDATION H 3.3.2: Encourage joint funding applications to meet identified needs.** The Village of Coloma should work with the Town of Coloma and Waushara County.
- **RECOMMENDATION H 3.3.3: Encourage existing nonprofits to work closer together with the private sector to meet community needs.** CAP Services, Habitat for Humanity, USDA Rural Development and the Veterans Administration have programs that assist the elderly and allow them to remain in their homes.

# **STRATEGY H 3.4:** Encourage public private partnerships that promote economic opportunities and provide for decent, safe affordable housing.

• **RECOMMENDATION H 3.4.1:** Work with the Westfield School District regarding a potential joint construction training program between the high school and local construction companies.

**STRATEGY H 3.5:** Encourage the creation of multi-organizational partnerships that allow agencies to share staff time and leverage housing development resources. Many communities do not have paid staff that is available to apply for and administer housing programs. However, retirees or others within the community may have skills or expertise that they would be willing to share.

- RECOMMENDATION H 3.5.1: The Village should consider partnering with other communities in Waushara County to establish a housing coalition consisting of persons and agencies willing to assist in gathering information, preparing applications, presenting information to local council/board meetings and providing other technical assistance upon request.
- RECOMMENDATION H 3.5.2: Establish a talent pool of volunteers who may be able to assist with the issues identified in this chapter.

STRATEGY H 3.6: Compile an inventory of significant cultural resources.

- **RECOMMENDATION H 3.6.1**: Continue to inventory all historically and architecturally significant houses within the Village.
- RECOMMENDATION H 3.6.2: Collaborate with neighboring communities to apply for a grant from the Wisconsin Historical Society or other appropriate organization to complete a historical and cultural survey of the Village of Coloma.

#### CHAPTER 4: TRANSPORTATION ELEMENT

#### INTRODUCTION

The Village of Coloma is comprised of a transportation system that is made up of local roads, collectors and arterial streets. Interstate 39, a predominant statewide transportation corridor, splits the Village of Coloma diagonally east-west. Access to 139 is provided in the Village. East of 139 is the established portion of the Village, while west of the highway is mainly undeveloped. 139 is an important north-south transportation corridor through the central portion of the state. It provides access to Madison (and points south) and Wausau (and points north). STH 21, another essential transportation corridor, splits the Village of Coloma north-south. The majority of the Village of Coloma is found south of STH 21. STH 21 provides east-west access from Oshkosh to Tomah and is a popular truck route. While private vehicles are the primary mode of transportation in the area, there are several biking and pedestrian opportunities available to the residents and visitors.

#### Transportation Vision for 2030

In 2030, Village of Coloma residents have access to a network of well-maintained local roads and county, state and interstate highways that address the mobility needs for automobiles, trucks, bicycles and pedestrians. Due to its location at the crossroads of I-39 and STH 21, new industrial and business development has been attracted to the Village's Industrial/Business Park and downtown, making the area more self-sufficient. Even though the area is becoming more self-reliant, I-39 and STH 21 affords residents access to employment, shopping, health and entertainment opportunities elsewhere. Through a variety of funding sources, the Village of Coloma has been successful in implementing a street paving program. This has allowed the Village to maintain its local infrastructure.

Local trails, including snowmobile and bicycle trails and a link to the Ice Age Trail, are an integral part of the transportation network, providing connections to the school, school forest, and other local destinations. Sidewalks have been installed in many areas of the Village and are encouraged for all new construction to accommodate safe pedestrian travel. While the private automobile is still the vehicle of choice for trips both long and short, the availability of Waushara County public rural transportation on demand provides a valuable service that is particularly appreciated by the area's growing elderly population.

#### INVENTORY AND ANALYSIS

This chapter provides an inventory of the existing transportation, pedestrian, cycling, trucking, and airport facilities in the area. In addition, a summary of the existing transportation plans, policies and funding sources associated with these facilities are discussed.

#### Streets and Highways

The primary transportation system consists of a hierarchal network of highways, byways, and other roads and streets that pass through a community. *The entire transportation network in the Village of Coloma is comprised of 11.46 miles of local roads, county highways,* 

interstate and state highways (Table 4-1). Local roads compromise about threequarters (72 %) of the road network.

Total	IH Miles	Percent of Total	STH Miles	Percent of Total		Percent of Total		Percent of Total
11.46	0.98	8.6%	2.23	19.5%	0	0.0%	8.25	72.0%

Table 4-1. Village of Coloma Road Network

Source: WisDOT 2008

The hierarchy of the road network calls for each roadway to be classified according to its primary function, ranging from its ability to move vehicles (i.e., a freeway) to its ability to provide direct access to individual properties (i.e., a local street). The three general categories of functional classification used by transportation officials include arterials, collectors, and local roads.<sup>1</sup> Because traffic volumes are typically a good indicator of a roadway's appropriate functional classification, the Wisconsin Department of Transportation (WisDOT) conducts traffic counts at key locations throughout the state on a regular rotating basis. Displayed as average annual daily traffic (AADT), these counts are statistically adjusted to reflect daily and seasonal fluctuations that occur on each roadway.<sup>2</sup> The most recent counts in Waushara County were conducted in 2000, 2003 and 2006. When a significant difference in the two counts is encountered, it can generally be explained by a road closure, detour, or similar circumstance that temporarily disrupts the normal flow of traffic (Exhibit 4-1).

#### Principal Arterials

Principal arterials serve interstate and interregional trips. These routes generally serve all urban areas with populations greater than 5,000. These roadways are most important in terms of commerce and the transport of goods and services. Rural principal arterials are further subdivided into 1) Interstate highways and 2) other principal arterials. There are two principal arterials in the Village of Coloma.

*I-39, rural interstate, provides* a north and south linkage between the south central part of the state, Madison and Beloit and the north central part of the state, Wausau and northern Wisconsin. On a larger scale I-39, along with US 51, transcends central Wisconsin connecting Wisconsin with Upper Michigan and Illinois. I-39 is bisected by a number of principal arterials, including I-90 and I-94 to the south and USH 10 to the

<sup>&</sup>lt;sup>1</sup> WisDOT. 2002. *Facilities Development Manual: Procedure 4-1-5.* 

<sup>&</sup>lt;sup>2</sup> WisDOT. 2000, 2003 2006. *Wisconsin Highway Traffic Volume Data*.

north. AADT counts were taken at two locations along I-39 and on the four exit/entrance ramps in 2006. AADT counts on the ramps ranged from 960 (southbound exit ramp) to 1,900 (southbound entrance ramp). AADT counts on I-39 ranged from 13,100 north of the Village to 13,000 south of the Village. Generally, AADT counts on I-39 increase as traffic flows north through Waushara County.

 STH 21, rural principal arterial – other, provides for east-west movement between Oshkosh and I-39, I-90/I-94 and the western side of the state. It transverses the entire southern tier of Waushara County and provides direct access between the Village of Coloma and the City of Wautoma to the east and Necedah to the west. AADT counts taken in the Village of Coloma in 2006 were 6,200 at N. Madison Street and 7,200 at N. 2<sup>nd</sup> Street.

#### Minor Arterials

In conjunction with the principal arterials, minor arterials serve other population centers and major traffic generators providing intra-regional and inter-area traffic movements. *There are no minor arterials within the Village of Coloma.* 

#### Major Collectors

Major collectors provide service to moderate sized communities and other intra-area traffic generators. Major collectors often link those generators to nearby larger population centers or higher function routes. *There is one major collector, CTH CH in the Village of Coloma.* 

• **CTH CH** provides a north-south travel corridor from the City of Westfield in Marquette County to the Village of Coloma in Waushara County. CTH CH is considered a major collector through the Village of Coloma south to the Marquette County line. AADT counts taken at Old Highway 21 were 1,700 in 2003.

#### Minor Collectors

Minor collectors collect traffic from local function roads and provide links to all remaining smaller communities, locally important traffic generators, and higher function roads. All developed areas should be within a reasonable distance to a collector road. *There is one minor collector within the Village of Coloma.* 

• **CTH FF** runs north and south and is a minor collector stretching north from the Village of Coloma to the Village of Hancock. AADT counts taken north of the Village of Coloma varied slightly between 2000 and 2003 at 340/280, respectively.

#### Local Function Roads

Local function roads provide access to adjacent land and provide for travel over relatively short distances. All roads not classified as arterial or collector are local. These roads provide access to residential, recreational, commercial, and industrial uses within the area. WisDOT does not generally conduct official traffic counts on local function roads; however, these roads probably carry fewer than 300 vehicles per day.

Every two years all jurisdictions in Wisconsin are required to rate the condition of their local roads and submit the information to WisDOT. The surface condition rating of each roadway is updated in the State's computer database, the Wisconsin Information System for Local Roads (WISLR). The WISLR database is available to all jurisdictions via the internet and can be used to develop a capital improvement and maintenance program. The WISLR analysis is based, in most cases, on the PASER road rating method.<sup>3</sup>

4-4

Paved Road		
Rating	Condition	Needs
9 & 10	Excellent	None
8	Very Good	Little maintenance
7	Good	Routine maintenance, crack filling
6	Good	Sealcoat
5	Fair	Sealcoat or nonstructural overlay
4	Fair	Structural improvement - recycling or overlay
3	Poor	Structural improvement - patching & overlay or recycling
2	Very Poor	Reconstruction with extensive base repair
1	Failed	Total reconstruction
Gravel Road		
Rating	Condition	Needs
5	Excellent	Little maintenance
4	Good	Routine maintenance
3	Fair	Regrading, ditch & culvert maintenance, additional gravel
2	Poor	Additional aggregate, major ditch & culvert maintenance
1	Failed	Complete rebuild and/or new culverts

Table 4-2. PASER Ratings and Maintenance Needs

Source: Transportation Information Center, UW-Madison; 2000, 2001 and 2002

PASER pavement management system (PMS) has been developed and improved over the years by the Transportation Information Center (TIC) at the University of Wisconsin – Madison in cooperation with WisDOT and others. In general, PASER rates paved roadway surfaces on a scale of 1 to 10, with 1 being a road that needs to be reconstructed and 10 being a newly constructed road.<sup>4</sup> Unpaved roads are rated on a scale of 1 to 5, with 1 being a road that needs rebuilding and 5 being a brand new road (Table 4-2).<sup>5</sup> This inventory provides the basis for developing a planned maintenance and reconstruction program and helps the Village to track necessary improvements. Prompt maintenance can significantly reduce long-term cost for road repair and improvement. Table 4-3 and Appendix D provide a breakdown and display of the PASER ratings, conditions and maintenance needs.

Table 4-3 provides a summary of the total miles of local roads in the Village of Coloma by PASER rating. *Approximately eighty-three percent (7.2 miles) of the roads within Coloma are paved.* Of the total paved roads, roughly 6 percent (0.4 miles) of the paved roads are in excellent to very good condition and require little maintenance; *About ninety-four percent of the roads in Coloma (6.8 miles, 94.4%) are considered to be in good* 

<sup>&</sup>lt;sup>3</sup> WISLR. 2007. *Wisconsin Information System for Local Roads*. <u>https://trust.dot.state.wi.us/wislr/</u>.

<sup>&</sup>lt;sup>4</sup> Transportation Information Center. 2000, 2001, and 2002. *PASER Manuals: Asphalt, Brick & Block, Concrete, and Sealcoat.* 

<sup>&</sup>lt;sup>5</sup> Transportation Information Center. 2001 and 2002. *PASER Manuals: Gravel and Unimproved Roads.* 

*to fair condition*. While they are in good condition structurally, they will need slightly more maintenance work. This work may involve seal coating, crack filling, non-structural overlay and possibly structural improvements. There are no paved roads below a PASER rating of 4 in the Village.

Village of Coloma				
Paved Road Rating	Miles	Percent		
10	0.0	0.0%		
9	0.0	0.0%		
8	0.4	5.0%

Total	8.8	100.0%		

Table 4-3. Total Miles of Village of Coloma Roads by PASER Rating

Source: Wisconsin Information System for Local Roads (WISLR); 2008.

The conditions of the gravel roads within the Village are mixed. *The Village of Coloma has a total of 1.5 miles of unpaved roads*, 7.8 percent (0.1 miles) of unpaved roads are considered to be in good condition requiring only routine maintenance, while 78.4 percent (1.2 miles) of the village's unpaved roads are considered to be in fair condition requiring a more intensive maintenance schedule such as regrading, additional gravel and ditch and culvert maintenance. *Over seven percent (7.2%, 0.1 miles) of the village's unpaved roads are considered to be in poor condition requiring additional aggregate or major ditch and culvert maintenance (N. Church Street from South Street to W. Center Street). About seven percent (6.5%, 0.1 miles) of unpaved roads have failed (Cree Court from 4<sup>th</sup> Avenue to termini).* 

#### Rustic Roads

The Rustic Roads System was created by the State Legislature in 1973 to help citizens and local units of government preserve scenic lightly traveled country roads for the leisurely enjoyment of bicyclists, hikers, and motorists.<sup>6</sup> They offer excellent opportunities to travel through an attractive rustic area. The scenic qualities of these roads are protected by agreement with bordering property owners and by implementing roadside maintenance practices that allow wildflowers and other native flora to extend to the edge of the pavement. *There are no Rustic Roads in the Village of Coloma.* However, the WisDOT lists two roads in Waushara County that are in the Rustic Roads program.

- Rustic Road 48 (26<sup>th</sup> Road) is a 2.1 mile road that begins at CTH H and runs northwest to CTH W in the Town of Saxeville.
- Rustic Road 102 forms a loop off of STH 21 beginning at Cumberland Avenue and ending at 9<sup>th</sup> Avenue in the Town of Richford, just east of the Village of Coloma.

Several other roads within Waushara County may have the potential of being listed as a Wisconsin Rustic Road.

#### Truck Transportation

# *There are several designated truck routes within Waushara County that run through the Village of Coloma.*

- **I-39**, **rural interstate**, provides north-south linkage between the south central part of the state, Madison and Beloit and the north central part of the state, Wausau and northern Wisconsin.
- **STH 21** is the primary truck transportation route in Waushara County and provides direct access to Oshkosh and the Fox Cities to the east. STH 21 also provides access to western destinations in Wisconsin including the I-39/USH 51 corridor, I-90, and I-94.

# There are two major corridors passing through Waushara County that run through the Village of Coloma.<sup>7</sup>

- The Cranberry Country Corridor (STH 21) stretches 100 miles across the state from east to west (Oshkosh to Tomah). This corridor connects the Fox Valley to 139, southern Minnesota, South Dakota and beyond.
- The Wisconsin River Corridor (1-39/US 51) extends 260 miles linking north central Wisconsin to south central Wisconsin and Illinois. This corridor provides critical economic links for industrial and commercial communities in north central Wisconsin (i.e. Wausau, Wisconsin Rapids, Stevens Point and Marshfield.

<sup>&</sup>lt;sup>6</sup> WisDOT. 2005. *Wisconsin's Rustic Roads: A Positive Step Backward*. http://www.dot.state.wi.us/travel/scenic/rusticroads.htm.

<sup>&</sup>lt;sup>7</sup> Draft Connections 2030 Long Range Multimodal Transportation Plan.

#### Railroads

*Rail service to Waushara County was discontinued several decades ago.* The nearest rail service is available at Stevens Point, which is a division headquarters for the Canadian National railroad. Other rail lines include the Union Pacific, which passes through southern Marquette County, and the Canadian Pacific Railway, which has a major yard facility in Portage. All three lines generally connect Chicago with the Twin Cities and points westward. Amtrak utilizes the Canadian Pacific line to provide passenger service. In addition to Portage, station stops include Columbus, Wisconsin Dells, and Tomah.

#### Waterways

*There are no commercial ports in Waushara County.* The nearest commercial port is located in Green Bay. Passenger ferries are located in Manitowoc and Milwaukee. Both ports offer passage across Lake Michigan to Lower Michigan.

Several municipalities and Waushara County operate recreational boat facilities throughout the county. *There are no recreational boat facilities in the Village of Coloma.* 

#### Pedestrian Facilities

Walking is emerging as an important exercise as well as mode of transportation. The *Wisconsin Pedestrian Policy Plan 2020* outlines statewide and local measures to increase walking throughout the state as well as promote pedestrian safety and comfort. Pedestrians, by definition, are anyone who travels by foot. In addition, this definition has been extended to disabled persons who require the assistance of a mobility device. Pedestrian traffic can be difficult along highways where sidewalks are not present, safety measures are absent, or traffic volume is heavy.

Waushara County has several pedestrian opportunities. Hiking trails are located at several county parks. The county also operates the Bannerman Trail. A trailhead is located in downtown Redgranite on the south side of STH 21. The trail provides recreational opportunities for pedestrian activities as well as cross-county skiing, bicycling, and snowmobiling. The trail utilizes the former railroad grade that served quarries located in the Redgranite/Lohrville area. The seven mile trail terminates at STH 73 north of Neshkoro. The Ice Age National Scenic Trail is a thousand-mile-long footpath located entirely within Wisconsin. It is one of only eight National Scenic Trails in the County. Approximately 60 percent of Wisconsin residents live within 20 miles of the Ice Age Trail.<sup>8</sup> A portion of the Ice Age Trail passes through western Waushara County. The trail provides recreational opportunities through the Chaffee Creek and Mecan River State Fishery areas and the Greenwood State Wildlife Area (Town of Hancock).

*Sidewalks are located in some areas of the Village of Coloma and provide opportunities for walking.* In other areas, where sidewalks have not been established, due to the low volume of traffic on Village streets, safe pedestrian travel is still possible.

Most of the town roads in Waushara County have limited shoulder areas, and the posted speed limits are 45 miles per hour or greater. These conditions often hamper safe pedestrian travel.

<sup>&</sup>lt;sup>8</sup> Ice Age Park and Trail Foundation; http://www.iceagetrail.org/faqs.htm

The relatively low density development and lack of sidewalks do not facilitate increased pedestrian mobility. The centralization of goods and services often requires residents to use motor vehicles for routine trips.

#### Cycling Opportunities

Over 1,000 miles of highly scenic low volume roads provide abundant opportunities for bicycling in Waushara County. As such, *Waushara County has established an interconnected system of bicycle routes throughout the county* (Exhibit 4-2).<sup>9</sup> The rolling topography offers several challenges for bicyclists of all fitness levels. The routes follow existing town roads and county highways. Bicycle routes range in distance from 23 to 35 miles and offer several rest stops at municipal and county parks, as well as, local tourist attractions. *There is one route that includes the Village of Coloma:* 

• Route 3 – Coloma to Deerfield totals 23.6 miles and provides a relatively short, rolling tour of southwest Waushara County. Points of interest include the Mecan River crossing, Coloma Community Park and the Mecan Springs area.

Roadways with traffic volume less than 1,000 vehicles per day are considered generally safe for bicycling. Roadways meeting this criterion that are located within a primary bicycle corridor identified by WisDOT provide potential linkages between existing bicycle trails and are considered to be part of an interconnected statewide bicycle route network. Currently, the Bannerman Trail is the only multi-use recreational trail within Waushara County.

WisDOT has made several recommendations for bicycle traffic for Waushara County in the *Wisconsin State Bicycle Transportation Plan 2020.*<sup>10</sup> A map of Waushara County Bicycling Conditions is also available on WisDOT's website.<sup>11</sup> The map does not specifically indicate favorable roads for bicycling in the Village. However, bicycling is not permitted on I-39 and certain parts of STH 21 may not be desirable for biking. With these exceptions, most roads within the Village of Coloma are favorable for bicycling.

#### Airports

The four airports most convenient to area residents that provide scheduled commercial air service are: Central Wisconsin Regional Airport in Mosinee, Outagamie County Regional Airport in Appleton, Dane County Regional Airport in Madison, and Austin Straubel Airport in Green Bay. Other airports/airfields offering a lesser range of services include those in Oshkosh, Stevens Point, Wisconsin Rapids, Wautoma, Waupaca, and Wild Rose.

Two Basic Utility airport facilities are located in Waushara County. A Basic Utility (BU) airport is capable of handling single engine piston aircraft and smaller twin engine aircraft. Basic Utility airport facilities are sub-classified as class B (BU-B) and class A (BU-A) according to the gross weight and wingspan of the aircraft. These aircraft typically seat up to six persons and are used for private corporate travel, charter flying, recreational flying, and crop dusting.

<sup>&</sup>lt;sup>9</sup> Waushara County Parks Department. 2007. *Bike Routes.* http://www.co.waushara.wi.us/bike\_routes.htm.

<sup>&</sup>lt;sup>10</sup> WisDOT. 1998. *Wisconsin State Bicycle Transportation Plan 2020.* 

<sup>&</sup>lt;sup>11</sup> <u>http://www.dot.wisconsin.gov/travel/bike-foot/countymaps.htm</u> accessed 10-14-08.

- The Wautoma Municipal Airport is a BU-B facility located southwest of the City of Wautoma in the Town of Dakota. The airport has two paved runways measuring 1,190 feet and 3,300 feet in length and a turf runway measuring 2,280 feet. Aircrafts with gross weights of less than 12,500 pounds and wingspans less than 49 feet can be accommodated at this airport. Besides serving local air needs, the airport is utilized by pilots attending the annual EAA fly-in in Oshkosh.
- The Wild Rose Idlewild Airport is BU-A facility. The airport can accommodate aircraft with gross weights less than 6,000 pounds and wingspans less than 49 feet. A helipad is also located at the Wild Rose Community Memorial hospital for "flight for life" emergencies.<sup>12</sup>

Several private airports are located throughout Waushara County. Private facilities are generally characterized by short (2,500 to 3,000 feet) turf covered runways. Private runways primarily provide services for recreational flyers. *An unmanned airstrip, located northwest of the Village between Cottonville and Chicago Avenues, is owned by the Village of Coloma. This airstrip is used primarily for commercial crop dusting.* 

#### Transit and Transportation Facilities for the Disabled

*There is no scheduled bus service within the county.* However, the Department of Aging administers two programs on a county-wide basis that serve the elderly and disabled residents of Waushara County. These two programs are a volunteer driver program and a mini-bus program. The mini-bus program is based in the City of Wautoma and provides transportation for both medical and personal trips. Other members of the public can also utilize the mini-bus if space is available.<sup>13</sup>

#### **Current and Future Transportation Projects**

*There are no major transportation plans scheduled for the Village of Coloma.*<sup>14</sup> However, WisDOT has listed the following projects in Waushara County:

- CTH E Pine River Bridge Rehabilitation Town of Leon (2010)<sup>15</sup>
- CTH XX Fox River Bridge Rehabilitation City of Berlin (2010)<sup>15</sup>
- CTH XX STH 21 to CTH D Resurface (2009)<sup>15</sup>
- STH 21 Cambridge Street Road Maintenance City of Wautoma (2011)<sup>14,15</sup>
- STH 22 Main Street Road Maintenance Village of Wild Rose (2011)<sup>15</sup>
- STH 49 Poy Sippi to Fremont Road Maintenance (2010)<sup>14,15</sup>
- STH 49 Auroraville to Waupaca, Mosquito Creek Bridge Replacement (2010)<sup>14,15</sup>
- STH 73 Wautoma to Plainfield, Construction/Pavement Replacement (2011)<sup>14,15</sup>
- STH 73 Princeton to Wautoma, Road Resurface (2010 2013)<sup>14</sup>

County trunk and state highways comprise the Federal Aids Secondary System, thus qualifying them for federal aid for capital projects involving construction or repair. Waushara County is responsible for routine maintenance on these roadways. Maintenance of roads such as town

<sup>&</sup>lt;sup>12</sup> WisDOT. 1999. *Wisconsin State Airport System Plan.* 

<sup>&</sup>lt;sup>13</sup> Baugrud, P. 2005. Personal Communication. Waushara County Aging and Disability Resource Center.

<sup>&</sup>lt;sup>14</sup> WisDOT. 2008. Wisconsin 2008-2013 Six Year Highway Improvement Program.

<sup>&</sup>lt;sup>15</sup> 2009 – 2012 Statewide Transportation Improvement Program Final, Jan. 2009. WisDOT.

roads and city/village streets not on the state or county system rests with the local jurisdiction. As Table 4-1 indicates, these local roads comprised the bulk of a community's total roadway mileage. To assist communities with the cost of constructing and maintaining these roads, the state provides general transportation aids (GTA) which are available based on lane mileage and aidable local costs. Aidable local costs generally include the local share of all road and street construction and construction materials. The rate-per-mile is statutorily specified and will be \$2,015 in 2009.<sup>16</sup> It should be noted that road spending fluctuates, especially for larger municipalities, and depends on the number and types of projects that have been allocated for that year. Cities and villages also have more costly facilities, such as curb and gutter, storm sewer, and sidewalks which raise the cost per mile above town spending amounts.

#### Key Findings

#### Streets and Highways

- The entire transportation network in the Village of Coloma is comprised of 11.46 miles of local roads, county highways, interstate and state highways. Local roads compromise about three-quarters (72%) of the road network.
- I-39, a principal arterial, provides north and south linkage between the south central part of the State (Madison and Beloit) and the north central regions (Wausau and points north).
- STH 21, rural principal arterial other, provides for east-west movement between Oshkosh and I-39, I-90/I-94 and the western side of the state.
- There are no minor arterials within the Village of Coloma.
- CTH CH, a major collector, provides a north-south travel corridor from the City of Westfield in Marquette County to the Village of Coloma in Waushara County.
- CTH FF, a minor collector, stretches north from the Village of Coloma to the Village of Hancock.
- Approximately eighty-three percent (7.2 miles) of the roads within Coloma are paved.
- About ninety-four percent of the roads in Coloma (6.8 miles, 94.4%) are considered to be in good to fair condition.
- The Village of Coloma has a total of 1.5 miles of unpaved roads.
- N. Church Street from South Street to W. Center Street (0.1 miles) is considered to be in poor condition requiring additional aggregate or major ditch and culvert maintenance.
- Cree Court from 4<sup>th</sup> Avenue to termini (0.1 miles) has failed.

#### Rustic Roads

• There are no Rustic Roads in the Village of Coloma.

#### Truck Transportation

- There are several designated truck routes within Waushara County that run through the Village of Coloma: I-39 and STH 21.
- There are two major corridors passing through Waushara County that run through the Village of Coloma: the Cranberry Country Corridor (STH 21) and the Wisconsin River Corridor (I-39/US 51).

<sup>&</sup>lt;sup>16</sup> WisDOT. 2005. *General Transportation Aids.* http://www.dot.wisconsin.gov/localgov/highways/gta.htm

#### Railroads

• Rail service to Waushara County was discontinued several decades ago.

#### Waterways

- There are no commercial ports in Waushara County.
- There are no recreational boat facilities in the Village of Coloma.

#### Pedestrian Facilities

• Sidewalks are located in some areas of the Village of Coloma and provide opportunities for walking.

#### Cycling Opportunities

• Waushara County has established an interconnected system of bicycle routes throughout the county. There is one route that includes the Village of Coloma: Route 3 – Coloma to Deerfield.

#### Airports

- Four airports most convenient to area residents that provide scheduled commercial air service are: Central Wisconsin Regional Airport in Mosinee, Outagamie County Regional Airport in Appleton, Dane County Regional Airport in Madison, and Austin Straubel Airport in Green Bay.
- An unmanned airstrip, located northwest of the Village between Cottonville and Chicago Avenues, is owned by the Village of Coloma. This airstrip is used primarily for commercial crop dusting.

#### Transit and Transportation Facilities for the Disabled

• There is no scheduled bus service within the county.

#### *Current and Future Transportation Projects*

• There are no major reconstruction plans scheduled for the Village of Coloma.

#### INTERRELATIONSHIPS WITH OTHER COMPREHENSIVE PLAN ELEMENTS

#### Economic Development

Providing a quality transportation system is important to the economic success of the area. Businesses need to assess the transportation system as to its ability to ship and receive goods and provide access and increase visibility for customers. Employee access to the business facility is also crucial, especially if the jobs offered will be in the lower-wage category. These jobs are frequently filled by second wage-earners in the household or by persons with limited job options, including untrained persons with disabilities or young people. These groups of people are frequently not able to drive or cannot afford reliable transportation. Service occupations, which employ over 20 percent of people in the county, encompass such jobs.

Additionally, it is important to remember that different businesses have different transportation requirements. For example, a retail business in the Village of Coloma or the City of Wautoma may value on-street parking and pedestrian accommodations more than service businesses elsewhere in the County. Businesses which are located along major transportation corridors will require off-street parking.

#### Housing

Housing plays a strong role in transportation since either the origin or the destination of most trips is the home. When new residential developments are planned, it is important to consider how the new development will affect the transportation infrastructure, community accessibility, and the safety of the area. Affordable housing, including mixed income development, should be located in a manner that facilitates transportation access to services and employment. Consideration to both pedestrian and bicycling facilities should be given in all housing developments.

#### Utilities and Community Facilities

Joint and/or coordinated planning of public and transportation facilities is essential. The location of schools is closely related to transportation. Ideally, primary and secondary schools should have safe pedestrian and bicycle access. Trip distances should be minimized to reduce the need for school busing and automobile transportation to the school. Access to public transportation can also help minimize transportation costs for the school district. Colleges and universities can also benefit greatly by having public transit available, thus reducing the need for parking space and making the campus more accessible to a broader range of students including local, low-income, and disabled students.

Similar to schools, it is important that government buildings as well as human services be located with access to public transportation. Coordinating transportation planning with sewer service area planning helps minimize the overall cost of providing infrastructure.

#### Agriculture Resources

The transportation system provides access and mobility for rural residents and the farming community. Farmers utilize the transportation system to both transport goods to market and to provide mobility between their various farming operations. State and county highways throughout Waushara County provide farmers in the county access to both local and regional markets. When considering possible highway expansion projects, the impact on existing farming operations, especially as it relates to the creation of split parcels of agricultural land, must be considered. Access to these parcels may require unsafe highway crossings by farm equipment, or ultimately the loss of use of this land for agricultural purposes.

#### Natural Resources

Transportation decisions can both positively and negatively impact the environmental quality of the area. Development and subsequent transportation improvements on state and county

highway corridors or other potential projects may impact the area's natural resources (wetland areas and forestland). Loss of wetlands, which act as a natural buffer to filter nutrients and other pollutants, can be harmful to the wildlife habitat, including endangered species, and groundwater recharge. Finally, sprawl leads to longer travel times, which could result in increased air quality issues due to automobile emissions.

#### **Cultural Resources**

Early Native American habitation, the geological landscape, and the area's historic buildings are significant to the local history. It is imperative that as growth occurs and transportation projects are proposed, sensitivity be given to both the identified resources and to the areas where other historic and cultural resources may exist. Since the identity and integrity of the community depends on the preservation of these unique features, the impact from expanded transportation corridors and new land development must be kept to a minimum. Consideration should also be given to the impact of future transportation projects on the cultural identity of the historic downtown areas.

#### Land Use

Transportation, as with other planning elements, has a strong connection to land use. While transportation's primary purpose is to serve land use, land use patterns are dependent upon the condition and effectiveness of the transportation system. Expanded arterials, such as US 10, spur development by attracting development in proximity to new interchanges. Secondly, the traffic may be relocated if county highways or local roads are bisected or re-routed. Existing businesses may be negatively impacted as the former traffic flows for economic survival.

The efficient movement of vehicular traffic provides a quicker connection from one place to another. The expansion of STH 21 from two lanes to four lanes may reduce travel times from the Fox Cities to Waushara County and other areas. However, the increased accessibility may create additional development pressure as people are able to move further from urban centers without significantly increasing travel time to work and shopping.

#### Intergovernmental Cooperation

Transportation systems go beyond municipal boundaries. Regional development patterns and municipal land use policies affect the transportation network. This network must efficiently move people and goods from one place to another. The transportation system is made up of local roads, collector and arterials, none of which stop at municipal borders but continue from one community to another. An efficient transportation system can not be dependent on the decisions of one community but instead upon the input and cooperation of many different entities working together. For instance the possible expansion of STH 21 would affect many jurisdictions throughout the County. Each of these jurisdictions, along with the State of Wisconsin, would have input into the expansion of these transportation corridors. The resulting expansion will not only impact the local jurisdictions that it passes through, but could also impact the economics of the state as goods and people are more quickly and efficiently transported.

#### POLICIES AND PROGRAMS

#### State, Regional, County, and Local Policies

#### State of Wisconsin

**Wisconsin State Highway Plan 2020.** Wisconsin's State Trunk Highway system, consisting of approximately 11,800 miles of roads, is aging and deteriorating at the same time traffic congestion is increasing. In response to this critical issue, WisDOT, in partnership with its stakeholders, has developed the *Wisconsin State Highway Plan 2020,* a 21-year strategic plan that considers the highway system's current condition, analyzes future uses, assesses financial constraints, and outlines strategies to address its preservation, traffic movement and safety needs.<sup>17</sup> The plan is updated periodically to reflect changing transportation technologies, travel demand, and economic conditions in Wisconsin. According to the Wisconsin State Highway Plan 2020, STH 21 from Oshkosh to I-39/US 51 has been identified as a potential major project. Potential projects are subject to environmental analysis and legislative approval; they will be re-evaluated in future state transportation plans.

This plan also stressed the need to develop a safe inter-modal transportation system which can accommodate alternate forms of transportation, including designating specific state and county highways capable of safely accommodating bicycle transportation. Specific accommodations recommended in the plan include the use of designated bicycle lanes in urban areas, widening traffic lanes to allow for bicycle travel, and paving shoulders to allow for increased bicycle use.

Connections 2030 Long Range Multimodal Transportation Plan – Draft. A draft of the Connections 2030 Long Range Multimodal Transportation Plan was released in the fall of 2008. The plan address all forms of transportation; integrates transportation modes; and identifies policies and implementation priorities to aid transportation decision makers when evaluating program and project priorities over the next 20 years. The plan is organized around transportation themes rather than modes. The seven themes are to (1) Maintain Wisconsin's transportation system; (2) Promote transportation safety; (3) Foster Wisconsin's economic growth; (4) Provide mobility and transportation choice; (5) Promote transportation efficiencies; (6) Preserve Wisconsin's quality of life; and (7) Promote transportation security. Corridor management will be one of the main tools that WisDOT will use to achieve the plans goals. Two corridors are found in Waushara County: the Cranberry Country Corridor and the Wisconsin River Corridor. The Cranberry Country Corridor links the Fox Valley and I-94 to locations west in southern Minnesota, South Dakota and beyond. The corridor also serves the Wisconsin River flowage, Waushara County and Winnebago County tourism/recreation areas. The Wisconsin River Corridor is a critical tourist corridor that connects the population centers in Illinois and southern Wisconsin to major recreation areas on the north. Both the Wisconsin River Corridor and the Cranberry Country Corridor pass through the Village of Coloma.

**Wisconsin State Bicycle Transportation Plan 2020.** The *Wisconsin State Bicycle Transportation Plan (WSBTP) 2020* specifically addresses the future needs of bicycle transportation. Two primary goals exist in the plan: to double the number of bicycle trips made by 2010 and to reduce the number of motor vehicle-bicycle crashes by 10 percent by 2010. To achieve these goals, objectives for engineering, education, enforcement and encouragement

<sup>&</sup>lt;sup>17</sup> WisDOT. 1999. *Wisconsin State Highway Plan 2020*.

were identified. These included not only the need for the construction of an expanded network of transportation facilities that allows for safe bicycle travel, but also for the promotion of education to advance vehicle driver awareness of bicyclists (drivers licensing and bicycle safety courses). Finally, tips to promote the utility and ease of bicycle transportation were identified as well as the mandate to increase the enforcement of reckless driving behavior by motorists and bicyclists alike.

The *WSBTP* provides suggestions for both intercity (rural) and urban/suburban bicycle facilities. For the purposes of the *WSBTP*, urban areas were defined as villages or cities with populations of 5,000 persons or greater. Providing paved shoulders for bicycle accommodations along rural highways and the widths of these shoulders are determined by ADT, percentage of trucks, and curves and hills (see Wisconsin Rural Bicycle Planning Guide, Appendix A, Road Evaluation Method).

**Wisconsin State Airport System Plan 2020.** The *Wisconsin State Airport System Plan 2020* provides a framework for the preservation and enhancement of a public-use airport system which will meet future aviation demands for the state. It provides an inventory of existing public-use airport facilities; and categorizes them according to their current services, projected use, and future scheduled maintenance and construction projects. Based on existing conditions and projected improvements that are listed within airport master or layout plans, forecasts are made for future airport classifications. No projected changes have been made in the status of Waushara County's airport classifications. Several improvements have been completed in recent years at the Wautoma Municipal Airport. These have included taxing and runway expansion; entrance repairs, hanger improvements, etc. The 5-year Airport Improvement Program<sup>18</sup> indicates that a number of projects are planned at the Wautoma and Wild Rose Airports. These include seal coating, constructing a terminal building, runway expansion, and a land acquisition at the Wautoma Municipal Airport. Site improvements are planned for the Wild Rose Idlewild Airport.

#### Regional

**East Central Wisconsin Regional Planning Commission.** East Central Wisconsin Regional Planning Commission has adopted a regional smart growth plan. As part of this planning process, East Central adopted five core transportation goals:

- To act to help ensure that the negative effects of sprawl development on our regional transportation system are minimized by encouraging new development to locate where adequate services and facilities exist.
- To work with all levels of government and organizations throughout the region to pursue adequate funding for transportation projects and programs which meet short term and long term needs.
- To help ensure that the regional transportation network links economic centers and efficiently moves people and freight throughout the region.

<sup>&</sup>lt;sup>18</sup> http://www.dot.wisconsin.gov/projects/state/docs/air-5yr-plan.pdf

- To help maintain and continue the balance between transportation and the environment through efficient and consistent transportation and land use planning.
- To help ensure that alternative modes of transportation to the automobile exist and mobility options for all are efficient.

In 2002, East Central prepared a *STH 21 Corridor Study* that examined the corridor from Oshkosh to the Town of Rushford in Winnebago County. While this study looked at only a small portion of STH 21, it did address the long term needs of the entire corridor. According to the study, "In the future it may be desirable to construct STH 21 as a four lane expressway to Interstate 90/94".

#### County

**Zoning.** The *Waushara County Zoning Code* sets standards for access driveways and streets. Sec. 58.828. regulates access driveways (access permits, spacing standards, and number and width of driveways per land use) while Sec. 42-81 regulates street design within subdivisions.

The county zoning ordinance (Sec. 42-81) requires all roads within subdivisions to be built to certain standards. This is important to the continued success of the transportation network.

**Highway Department.** The Waushara County Highway Department provides maintenance on county highways found in the area. It also provides roadway and ditch maintenance for the towns within the county on a contract basis. The County does not have an officially adopted transportation plan or Capital Improvement plan. However, it is the policy of the County to evaluate the county road system in the spring of the year and set a specific roadway maintenance schedule for the coming year.

#### Village of Coloma

**Zoning.** The Village of Coloma Zoning Ordinance (Section 1.03) sets standards for parking requirements, traffic and access. Standards are further established through Title 4, Public Works, chapters 2, 3 and 4; and Title 8, Motor Vehicles and Traffic.

#### Federal, State and Regional Programs

#### Federal Agencies

**Surface Transportation Program – Rural (STP-Rural).** This program allocates federal SAFETEA-LU funds to complete a variety of improvements to rural local highways and roadways. To be eligible, two conditions must be met: the road must be located outside of an urban area and must be classified as at least a rural major collector. Project proposal applications are accepted only in odd numbered years. More information can be found at <u>http://www.dot.wisconsin.gov/localgov/highways/stp-rural.htm</u>.

**Surface Transportation Program – Urban (STP-U).** This program allocates federal funds to complete a variety of improvements to federal-aid-eligible roads and streets in urban areas. More information can be found at <u>http://www.dot.wisconsin.gov/localgov/highways/stp-</u>

<u>urban.htm</u>. Berlin is an urban area that qualifies for STP-Urban and a portion of this is located in Waushara County.

#### State of Wisconsin

**General Transportation Aid.** Road maintenance is in part funded by disbursement of the State Transportation Fund. The largest portion comes from General Transportation Aids. The State provides an annual payment to each county and municipality, which augments the local government's cost for activities such as road construction, crack and pothole filling, snow removal, and other related transportation maintenance. Disbursements from the account are determined by the total mileage of local roads within the municipality or by a formula based on historic spending. This information must be reported annually. More information can be found at <a href="http://www.dot.wisconsin.gov/localgov/highways/gta.htm">http://www.dot.wisconsin.gov/localgov/highways/gta.htm</a>.

**Local Roads Improvement Program (LRIP).** This program provides funding to improve or replace seriously deteriorating county highways, town roads, and city or village streets. New roads are not eligible. LRIP funds pay up to 50% of total eligible costs while the remaining amount must be matched by the local government. The program has three basic programs: County Highway Improvement (CHIP); Town Road Improvement (TRIP); and Municipal Street Improvement (MSIP). Additional discretionary funds are available for high cost projects. More information can be found at <a href="http://www.dot.wisconsin.gov/localgov/highways/lrip.htm">http://www.dot.wisconsin.gov/localgov/highways/lrip.htm</a>.

**Connecting Highway Aids (CHA).** The CHA program assists municipalities with costs associated with increased traffic and maintenance on roads that connect segments of the State Trunk Highway system. Over 120 municipalities receive quarterly payments on a per lane mile basis. There are no connecting highways currently located in Waushara County. More information can be found at <a href="http://www.dot.wisconsin.gov/localgov/highways/connecting.htm">http://www.dot.wisconsin.gov/localgov/highways/connecting.htm</a>.

**Flood Damage Aids.** This program provides funds to assist local units of government to improve or replace roads or roadway structures that have sustained major damage from flooding. The program helps defray costs for damaged streets, highways, alleys, or bridges which are not associated with the State Trunk Highway System. More information can be found at <u>http://www.dot.wisconsin.gov/localgov/highways/flood.htm</u>.

**Rural and Small Urban Area Public Transportation Assistance Program.** This program allocates federal funds to local units of government to provide both capital and operating costs for public transit services which operate within rural areas. All municipalities with populations less than 50,000 are eligible. More information can be found at <u>http://www.dot.wisconsin.gov/localgov/transit/ruralsmall.htm</u>.

**Wisconsin Employment Transportation Assistance Program (WETAP).** This program is designed to provide transportation for low-income workers to jobs, training centers, and childcare facilities through enhanced local transportation services. Funding is provided by a combination of federal, state, and local funds. This program provides a crucial link to allow low-income workers to remain in the workforce. More information can be found at <u>http://www.dot.wisconsin.gov/localgov/transit/wetap.htm</u>.

**Local Transportation Enhancement Program (TE)**. This program provides funds that increase multi-modal transportation within a region while enhancing the community and

the environment. Eligible projects include multi-use recreational trails, landscaping, or the preservation of historic transportation structures. Funds cover up to 80% of the total eligible project costs. More information can be found at <u>http://www.dot.wisconsin.gov/business/econdev/te.htm</u>.

**The Bicycle and Pedestrian Facilities Program (BPFP).** This program funds projects that that construct or plan for bicycle or bicycle/pedestrian facilities. For information on this program, go to <u>www.dot.wisconsin.gov/localgov/aid/bike-ped-facilities.htm</u>.

**Transportation Economic Assistance Grant Program (TEA Grant).** This program provides a 50% state grant to local governments, private businesses, and consortiums for road, rail, harbor, and airport projects that are necessary to help attract employers to Wisconsin. These grants have a performance-based incentive and successful funding requires that businesses and industries created by the grant program retain and expand local economies in Wisconsin. More information can be found at <u>http://www.dot.wisconsin.gov/business/econdev/tea.htm</u>.

**County Elderly and Disabled Transportation Assistance Program.** County governments are eligible for funds to establish a transit program for elderly and disabled citizens. The program allows for flexibility in various transportation options to their clients. County governments must provide a 20% match in funds. More information can be found at <a href="http://www.dot.wisconsin.gov/localgov/transit/countyelderly.htm">http://www.dot.wisconsin.gov/localgov/transit/countyelderly.htm</a>.

#### **TRANSPORTATION – Village of Coloma**

# GOAL TR 1: The Village of Coloma should ensure that its local transportation system is well maintained and safe for its residents.

**STRATEGY TR 1.1:** Address safety and congestion concerns along the STH 21 corridor. During the community vision session traffic congestion and safety was noted at the I-39 and STH 21 interchange and at the Village Industrial Park on the east side of the Village of Coloma.

- RECOMMENDATION TR 1.1.1: The Village and Town of Coloma should work with the Village of Coloma Police Department, the Waushara County Sheriff's Department and the Wisconsin State Patrol to improve safety and enforce current traffic laws as a way to alleviate traffic crashes at the I-39 and STH 21 interchange. Cars traveling west on STH 21 are encountering problems when turning north on 4<sup>th</sup> Lane. Illegally parked cars along this stretch of the road are making the problem worse.
- RECOMMENDATION TR 1.1.2: Work with the Town of Coloma, WisDOT and the Waushara County Highway Department to study and possibly reconstruct the intersection of STH 21 and North 4<sup>th</sup> Avenue.
- RECOMMENDATION TR 1.1.3: Work with the Waushara County Highway Traffic and Safety Commission to address safety concerns on the east and west side of the Village on STH 21. Petition the committee to:
  - Add truck entrance sign west of the intersection of North 4<sup>th</sup> Avenue and STH 21; and
  - Move the 25 MPH speed sign on the east side of the Village, east of its current location.
- RECOMMENDATION TR 1.1.4: The Village and Town of Coloma should contact and work with the WisDOT to conduct a traffic study of the I-39 and STH 21 interchange prior to approving any additional development in this area. Congestion is only expected to get worse on the west side of the intersection when the property at the southwest corner of the interchange is developed.
- RECOMMENDATION TR 1.1.5: The Village and Town of Coloma should continue to work with WisDOT to improve traffic flow and address safety concerns at Industrial Drive and STH 21. Industrial Park traffic, including emergency vehicles from the Coloma Fire Station, utilizes Industrial Drive to exit the Village Industrial Park onto STH 21. Due to heavy traffic along STH 21, emergency vehicles and industrial park traffic are encountering delays in both entering and exiting the Industrial Park.
  - Continue to work with WisDOT to study the installation of a traffic light, flashing light or reduced speed limit on STH 21 to alleviate safety concerns.

# STRATEGY TR 1.2: The Town should work with WisDOT, Waushara County, and surrounding communities in transportation planning.

- RECOMMENDATION TR 1.2.1: Work with WisDOT, Waushara County and surrounding communities to coordinate short and long range transportation planning efforts.
- RECOMMENTATION TR 1.2.2: Work with WisDOT to ensure that Village's short and long range plans for transportation and land use along and in the vicinity of I-39 and STH 21 are consistent with the State's short and long range plans for the highways.

STRATEGY TR 1.3: Work with WisDOT, ECWRPC, Waushara County Highway Department and other communities along the STH 21 corridor to ensure local involvement in any future planning of the corridor. While no immediate plans exist to upgrade the STH 21 corridor from Oshkosh to I39/USH 51; WisDOT has identified this corridor for further study within the draft *Connections 2030*.

- RECOMMENDATION TR 1.3.1: Monitor and keep informed about any plans that may affect the STH 21 corridor.
- **RECOMMENDATION TR 1.3.2:** Take appropriate action to ensure that the best interests of the Village of Coloma are incorporated into any future plans.
- RECOMMENDATION TR 1.3.3: In the future, the Village should form working relationships with affected communities along the STH 21 corridor.

**STRATEGY TR 1.4: Timely respond to site-specific road maintenance and/or safety issues.** The Village encourages feedback from residents so that safety or maintenance issues and concerns can be addressed and resolved in a timely manner. PASER is one method that communities can use to inventory their roads and develop a planned maintenance and reconstruction program. Established annual meetings with the County Highway Department and WisDOT ensure coordination on a regional and statewide basis.

- RECOMMENDATION TR 1.4.1: Continue to conduct a PASER evaluation of the existing road network. Every two years all jurisdictions in Wisconsin are required to rate the condition of their local roads and submit the information to WisDOT. In general, PASER rates paved roadways surfaces on a scale of 1 to 10, and gravel roads on a scale of 1 to 5. A rating of 10 for a paved roadway and a rating of 5 for unpaved roadway are considered new roadways, while a rating of 1 for both will require total reconstruction.
- **RECOMMENDATION TR 1.4.2: Replace existing signage that is illegible per** *the proposed federal requirements.* Current signage is in bad repair and is not in compliance with current requirements. New signage should be replaced with high intensity sheeting so that it will be in compliance with the new federal requirements that take affect in 2012.
- RECOMMENDATION TR 1.4.3: Develop a plan that will address the replacement of existing signage, and the testing and maintenance of all

signage in the Village by 2012 so that the Village will be in compliance with the new federal requirements.

- **RECOMMENDATION TR 1.4.4: Use capital improvements programming to** *establish appropriate funding levels.* A capital improvement program (CIP) will help Village officials to look toward the community's future needs and plan for them accordingly. Annual updates of the CIP are also needed to better assess any necessary changes to the program.
- RECOMMENDATION TR 1.4.5: Encourage residents to report any specific areas where safety or maintenance issues are of a concern.
- RECOMMENDATION TR 1.4.6: Maintain contact with the Waushara County Highway Department and WisDOT to ensure coordination on regional and statewide transportation issues that may affect the Village.
  - Set up annual meetings.

**STRATEGY TR 1.5: Ensure that the road network operations as an efficient system.** Roads that receive the highest level of use and have a functional classification are eligible for federal funding for maintenance and construction.

RECOMMENDATION TR 1.5.1: Review and revise the road classification system as needed so that the most important roads are eligible for federal funding. Communities should review and revise their road classification system periodically to ensure that roads that receive the highest level of use have a functional classification. In the future, roads rated rural minor collectors will not receive state or federal funding.

STRATEGY TR 1.6: Explore opportunities for cost efficiencies and shared services.

- **RECOMMENDATION TR 1.6.1**: Continue to work with neighboring communities to share the maintenance of common roads.
- RECOMMENDATION TR 1.6.2: Continue to work with neighboring communities to share road maintenance contracts.

**STRATEGY TR 1.7: Develop minimum standards for street construction.** Maintenance of poorly constructed roads, once accepted, becomes the responsibility of the Village. The Village should review and approve all roads prior to acceptance. If a road does not meet the standards as specified in the ordinance, corrections shall be made on a timely basis.

• **RECOMMENDATION TR 1.7.1: The Village of Coloma should develop and adopt standards for street construction.** These standards should include minimum right-of-way and surface widths as well as maximum cul-de-sac lengths.

**GOAL TR 2.** Continue to provide a diversity of affordable transportation options for <u>all age and income groups.</u> The Department of Aging administers two programs on a countywide basis that serves elderly and disabled residents. These programs include a volunteer driver program and a mini-bus program. The mini-bus program provides transportation for both medical and personal trips. Utilizing their location along STH 21 and I-39, the Village and Town of Coloma should jointly look at and pursue other avenues of public and private transportation.

**STRATEGY TR 2.1:** Encourage the availability of taxi/medi-van/minivan types of services for elderly and other transportation-dependent residents. While the County currently administers two programs, these programs should periodically be assessed so that the needs of the area elderly and disabled residents are being addressed. Additionally, there may be other transportation-dependent residents whose needs are not being addressed. This may include people who do not own a vehicle or who do not want to rely on the County program.

- **RECOMMENDATION TR 2.1.1:** Encourage Waushara County to continue to provide transportation for elderly and disabled residents within the area.
- **RECOMMENDATION TR 2.1.2:** Assess current transportation programs and needs for the elderly and disabled residents in the Village.
- RECOMMENDATION TR 2.1.3: Identify system gaps in service providers for elderly and other transportation dependent residents.

**STRATEGY TR 2.2: Increase ride sharing for work, shopping, and other trips.** Sharing rides for work, shopping and other trips benefits the environment and makes economic sense. Commuting to Wisconsin Rapids, Stevens Point, Oshkosh and other areas for work or shopping does occur. A "Park and Ride" lot should be strategically located to benefit the residents of the area. The Village of Coloma should work with the Town of Coloma and surrounding communities to locate and promote the site for use by all residents.

- RECOMMENDATION TR 2.2.1: Work with WisDOT and other to designate a strategic location for a "park and ride" lot.
  - Consider establishing a "park and ride" lot near the corner of I-39 and STH 21.
- **RECOMMENDATION TR 2.2.2:** Network with the Town of Coloma and surrounding communities to expand potential participants in ride sharing.

STRATEGY TR 2.3: Utilize the Village and Town's location at the crossroads of I-39 and STH 21 to expand public transportation to the area and to provide linkages to other Wisconsin communities along the I-39 corridor.

RECOMMENDATION TR 2.3.1: Collaborate with the Town of Coloma and others to explore the possibility of bringing scheduled bus service to the Coloma area. According to draft Connections 2030, WisDOT is recommending a new intercity bus route along the I-39/USH 51 corridor between Madison and Wausau. A collaborative area effort may have a larger impact than a single request. According to the WisDOT website, Lamers Bus Lines provides scheduled service to Wausau and Stevens Point along the I-39 corridor. While Greyhound provides service between Milwaukee, Madison and Eau Claire. Lamers, Greyhound or another service provider may be interested in extending service to the Coloma area.

- Contact the Town of Coloma and other surrounding communities to work on a collaborative effort
- Contact intercity service providers such as Lamers Bus Lines and Greyhound.
- Designate a potential site for a bus stop.
- RECOMMENDATION TR 2.3.2: In the future, support a passenger rail initiative that would link Madison with the Wausau area.

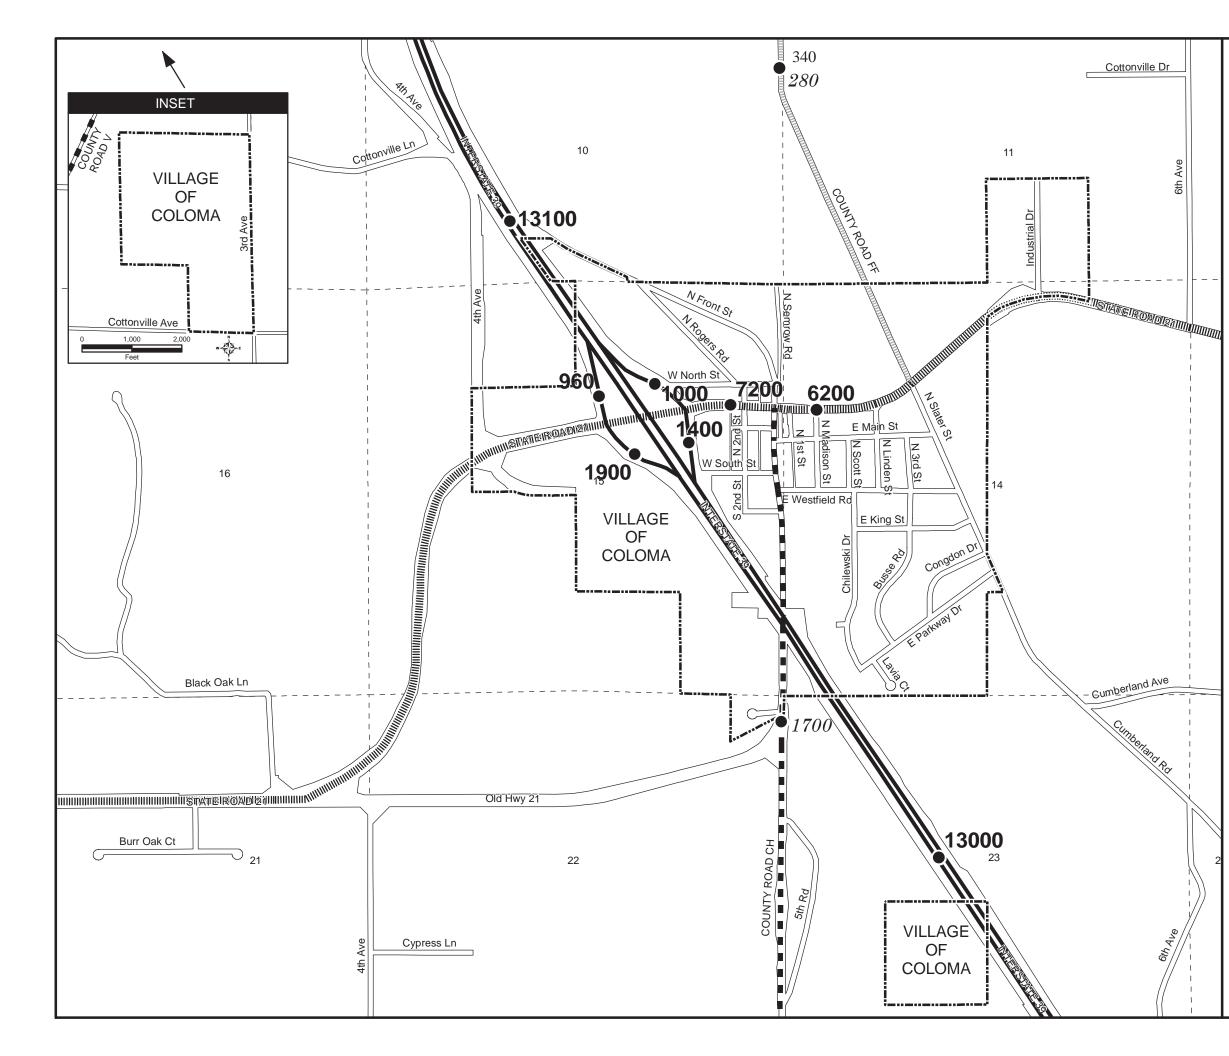

**GOAL TR 3:** Encourage the expansion and safety of non-motorized transportation and transportation opportunities. Bicycling and walking are important modes of transportation and are used for commuting to school and work, social interaction, recreation and exercise. For some people, such as children and households with no car or driver, this is the primary means of transportation. Bicycling and walking have health benefits, move people inexpensively, reduce congestion and air pollution.

**STRATEGY TR 3.1:** Accommodate bicyclists and pedestrians in areas of high activity or concentrated development. People may be more willing to walk or bike if using these modes can be done safely and conveniently.

- RECOMMENDATION TR 3.1.1: Provide sidewalks along streets to major destinations such as schools, downtown areas and parks.
- **RECOMMENDATION TR 3.1.2:** Encourage bicycle transportation and bicycle friendly road construction.
- RECOMMENDATION TR 3.1.3: Pursue funding and grants for adding bicycle and pedestrian lanes, sidewalks and pedestrian crossings when building/reconstructing roads.
- RECOMMENDATION TR 3.1.4: Encourage the Village of Coloma to examine the complete streets initiative.

**STRATEGY TR 3.2: Consider establishing bicycle, pedestrian, and other nonmotorized recreational trails.** The development of multi-use trails would provide the best way to increase pedestrian, bicycling and other non-motorized activities.

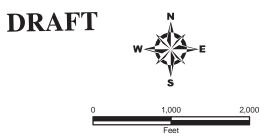

• RECOMMENDATION TR 3.2.1: Work with the Town of Coloma to establish connections between the Village of Coloma, the school forest, Pleasant Lake, the Ice Age Trail and other key destinations in the Coloma area.

#### **CHAPTER 5: UTILITIES AND COMMUNITY FACILITIES**

#### INTRODUCTION

One responsibility of a community is to maintain a certain level of community services. To achieve it, they must continuously maintain, upgrade, and expand existing facilities in a cost-effective manner based on future growth projections and the desires of the community. The involvement of the community in the planning process illustrates the importance that the board places on maintaining a high level of public services and facilities. The following section provides an inventory of some of the services and facilities available in the community. The analysis of facilities is based on generalizations and predictions and is no substitute for detailed engineering or architectural studies, which should be completed before municipal funds are expended on specific projects. The size of community facilities along with the cost of providing services is directly related to land use, development patterns, and the existing and future densities of development. See Exhibit 8-1, Existing Land Use Map, and Exhibit 5-1 and 5-2, Community Facilities and Utilities, which illustrate the location of the various items discussed below.

#### Utilities and Community Facilities Vision for 2030

In 2030, the Village of Coloma has been successful in providing residents with a level of municipal services and facilities that are adequate to maintain public health, welfare and sustain a vital economy. Through cooperation and other operational efficiencies, service providers are able to hold the line on user fees for water, sewer, solid waste and other municipal services.

Active citizen groups such as the Coloma Lions Club, Friends of the Park, Friends of the Library and the local snowmobile clubs continue to provide the needed resources for many Village amenities such as the Coloma Community Park and Library. Numerous volunteers have ensured that the Coloma Community Park continues to be a showcase that provides countless hours of recreation for area youth and adults. An extensive rehabilitation and expansion of the wastewater treatment facility and local sewer and water system has made it possible for the Village to attract and support a number of new business and the resulting new residential development. Due to a thriving local economy, the Village has welcomed the addition of a new medical clinic. This has made it possible for local residents to get most of their medical needs taken care of locally.

#### INVENTORY AND ANALYSIS

This section describes the existing utilities and community facilities within the Village of Coloma.

#### Wastewater Collection and Treatment

*The Village of Coloma owns and operates its own wastewater treatment facility (WWTF)* (Exhibit 5-1). The WWTF is situated on about 11 acres of Village owned land that is located approximately 1500 feet south of the contiguous Village limits. It was constructed in

1974 and consists of a single cell stabilization pond followed by a single seepage cell.<sup>1</sup> The plant has a design flow of 0.031 MGD. A majority of the Village of Coloma is served by public sewer. Included in an area not currently served by public sewer is the service station at the northwest corner of STH 21 and I-39; the area west of I-39; and a section in the southeast corner of the Village. Due to the age and performance of the existing wastewater facility, a facilities plan was completed in 2003 by Strand Associates, Inc. The plan evaluated the existing wastewater treatment facility and identified needed improvements to serve the current and future population through the year 2022. According to the facilities plan, "The existing collection and conveyance system, including the pumping station, should provide the Village with acceptable service for another 20 years, providing that current maintenance practices and current pumping conditions do not change". However, the report further states that "the existing facilities have provided significant service to the Village, but they are the product of design criteria more appropriate to a previous time". Since this report was written, the useful life of this facility has been extended for another 10 years as a result of dredging the bottom of the lagoon. According to the Village, the plant is currently operating at 56 percent of design and should have enough capacity to serve the existing Village, including the areas currently not served within the Village corporate limits. However, expansion of the wastewater treatment facility may be needed to accommodate new commercial/industrial development within the existing business park in the northeast corner of the Village or in the area west of I-39.

Private systems within the Village are covered under Waushara County Ordinances. Typically, private on-site systems are designed for each household or business based on the site's soil characteristics and capabilities. However, in some cases, a community, or 'cluster' system, may be used to serve more than one household. On-site systems, depending on the type and maintenance frequency, can function for 15 to 30 years and can cost-effectively treat wastes in rural areas not served by public sewers.

Beginning in 2000, Waushara County began an inspection program for POWTs. Newer POWTs built since 2000 are inspected every three years. Additional systems are included in the inspection program as they are replaced, or if there has been an improvement of over 25% of existing buildings and/or structures. Waushara County does allow holding tanks systems for new construction, and as an option for replacement situations. The Comm 83 rules do allow the use of holding tanks for new construction, however, individual counties and municipalities can continue to enforce such a ban at their discretion. The allowance of private on-site treatment systems will certainly be needed to accommodate new and existing development within the rural portions of the planning area.

As of October of 2008 the State of Wisconsin has created new requirements that will greatly affect POWTs. This change requires that by 2011 all counties in the state have a complete inventory of every POWTs in their area. By 2013 all POWTs will need to be part of the same inspection program that POWTs built since 2000 are a part of.

<sup>&</sup>lt;sup>1</sup> Wastewater Treatment Facilities Plan for the Village of Coloma, WI. August, 2003 by Stand Associates, Inc. Engineers.

#### Stormwater Management

Stormwater runoff and management have recently gained more attention as an environmental concern due to flooding and surface water quality issues. When the impacts of stormwater management are considered from a regional perspective, the potential for damage is tremendous. Although an individual development may not seem to have a significant impact on the natural drainage system, the cumulative impacts of development and urbanization can influence natural system functions. According to studies by the Center for Watershed Protection, as little as 10% impervious cover (concrete, asphalt, buildings, etc.) can negatively impact fish habitat. Moreover, if 25% of an area is impervious, the natural functions of a watershed become overloaded and stream quality can become permanently degraded.<sup>2</sup>

#### Drainage Districts

The Waushara County Drainage Board administers and oversees the drainage of agricultural lands. It regulates various land practices used to remove excess water from farmlands and raises issues regarding the impacts of scattered rural development and the cumulative impacts on water quality flowing to and through their legal drains. In addition, county drainage boards are authorized to assess costs to a landowner for any adverse impacts on downstream water quality that can be directly attributed to that landowner. Landowners must receive drainage board approval before undertaking any action which could potentially affect a drainage system.

Drainage districts usually require a 20 foot vegetated strip on both sides of any ditch, which is to be used as a maintenance corridor, or any applicable stream within the watershed. Row cropping is prohibited within this corridor. These requirements can be coordinated with soil and water conservation plans required under the Farmland Preservation program.<sup>3</sup>

# *Eight drainage districts have been established within Waushara County. The only active district is the Marion-Warren district. Therefore there are no active drainage districts in the Village of Coloma.*

#### Stormwater Systems

Typically, curb and gutter stormwater systems are located in urbanized areas. *Within the Village of Coloma, curb and gutter is limited.* A storm sewer system exists along STH 21, between Scott Street and the Mobil Station and was installed by WisDOT. Curb and gutter also can be found in the downtown area. Due to the sandy soils in the Village, flooding is extremely limited and corresponds to frozen ground and snow cover or unusual rainfall events.

#### Surface Water Quality Monitoring and Prevention

Several different methods can be used to control and reduce the amount of stormwater runoff into local waterways. These methods can be implemented at a localized, town-wide, or regional level.

<sup>&</sup>lt;sup>2</sup> *Site Planning for Urban Stream Protection.* 2004. Center for Watershed Protection.

<sup>&</sup>lt;sup>3</sup> *Guide to Community Planning in Wisconsin*. 1999. Ohm, B.W.

**Watershed Planning.** A watershed is an interconnected area of land draining from surrounding ridge tops to a common point such as a lake or stream confluence with a neighboring watershed.<sup>4</sup> This approach allows stakeholders on an individual water body to collectively focus their interests on improving the water quality in one area.

Land Conservation Techniques. Land conservation techniques are used to provide physical barriers and improvements and may include legislative actions to change the physical environment and reduce current levels of runoff. These techniques can include cluster or conservation subdivisions, setbacks, buffers, and land acquisition.

**Aquatic Buffers.** An aquatic buffer is an area along a shoreline, wetland, or stream where development is restricted or prohibited.<sup>5</sup> Natural vegetation is highly encouraged in the buffer area. If properly designed, buffers can physically protect waterways from future disturbance or encroachment. Furthermore, buffers can protect surface water quality by removing nutrients and silt from stormwater runoff.

**Site Design Techniques.** Site design techniques can be applied to all developments. Every development should incorporate three main goals: reduce the amount of impervious cover, increase the amount of lands set aside for conservation, and utilize pervious areas for more effective stormwater treatment.<sup>6</sup> Techniques that can be used to achieve these goals include reduction in lot sizes, building narrower streets, planting rain gardens, creating bioretention ponds, etc.

**Stormwater Best Management Practices (BMPs).** Best Management Practices (BMPs) is a general term used to describe a broad range of structural controls that may be utilized by agricultural, residential, and commercial developments to control and reduce the amount of erosion caused by stormwater. These practices may be used to reduce pollutant loads, maintain groundwater recharge areas, protect stream quality, and limit development within the 100-year floodplain.

#### Water Supply

The Village of Coloma is served by a municipal water system that relies on groundwater as its source. Water systems consist of four main components; supply, treatment, storage and distribution. Water supplies should be of adequate quantity to meet the most severe public demands and be of good quality. Treatment of raw water is necessary to remove objectionable constituents such as bacteria, suspended solids and high concentrations of dissolved solids. Treatment capacity should be adequate to meet service requirements. Since water pumpage capacity is fixed, often at a level below peak demand, storage capacity is needed to assure adequate flow. This is particularly important during periods of high demand (fires) and as a short-term buffer during equipment failure or processing problems.

Utilizing the elevated tanks in the community, *the Village of Coloma's peak flow in 2007 was 132,000 gallons per day (gpd)*.<sup>7</sup> The distribution system brings water from the point

<sup>&</sup>lt;sup>4</sup> *The Watershed Approach.* 2004. Wisconsin Department of Natural Resources.

<sup>&</sup>lt;sup>5</sup> Aquatic Buffers. 2004. Center for Watershed Protection.

<sup>&</sup>lt;sup>6</sup> Better Site Design. 2004. Center for Watershed Protection.

<sup>&</sup>lt;sup>7</sup> Coloma Municipal Water Utility Annual Report, December 31, 2007.

of supply to the customer. Distribution piping must be adequately sized to provide for normal customer demands as well as meet periodic demands for high volumes for fire protection purposes. Distribution systems should be "looped" with interconnections to assure supply in the event of main breakage and to provide good circulation of water within the distribution system.

The Village's current water system was constructed in 1938 or 1939. Areas not served by public water include an area of the Village in the southeast corner and the area west of I-39. Two wells with a combined yield of 864,000 gpd provide water to the Village (Table 5-1 and Exhibit 5-1). Well No. 1, located at 325 Main Street, was installed in 1941 and has a capacity of 190 gpm. Well No. 2, located at 310 Industrial Drive, was constructed in 2000 and has a capacity of 400 gpm. One water tower serves the Village of Coloma, with a capacity of 44,000 gallons; this lollipop shaped tower welcomes visitors and residents alike to the community. The tower, the first of its kind ever built, was filled on July 2, 1940. Coloma attained a bit of fame, when it was mentioned in the 1962 edition of the World Book Encyclopedia.<sup>8</sup> According to the Village of Coloma Website, the municipal water system is operating at less than 20 percent of capacity.<sup>9</sup> While the system has adequate capacity, in recent years the Village has

been experiencing breakage of the existing clay watermains. Current practice has been to replace portions of watermain as they break. Additionally, topography is at a higher elevation to the west of 1-39. In order to serve this area with adequate pressure, the Village may have to construct a new water tower. Therefore, while *it is anticipated that the existing system will be able to meet the Village's projected growth demands for the next 20 years, it may be necessary for the Village to construct a new water tower (due to pressure limitations) and schedule updates to replace their existing water distribution system in the future.*

As such, groundwater is the source of drinking water within the Village. As with many other locations in Wisconsin, a high concentration of minerals in the soil substrate creates "hard" water. Iron, one mineral which contributes to hardness, is found at extremely high levels.<sup>10</sup> (See the Agricultural, Natural and Cultural Resource Chapter for more information.)

<sup>&</sup>lt;sup>8</sup> "Chicago Bridge & Iron Co, a 77 foot high watersphere stores water for the Village of Coloma, WI. It has a 40,000 gallon water capacity." http://www.colomahistorical.org/history.html.

<sup>&</sup>lt;sup>10</sup> Summers, W.K. 1981. Geology and Groundwater Resources of Waushara County, Wisconsin. United States Geological Survey Report 1809-B.

#### Solid Waste and Recycling

Waushara County currently subsidizes waste management within the county. *The County operates nine waste collection sites and contracts with Waste Management of Wisconsin, Inc. and Onyx Waste Services to haul waste and recyclables*, respectively, that are collected at the sites. All non-recyclable wastes are hauled to Valley Trail Landfill in Berlin, Wisconsin. Wastes generated by commercial establishments are not accepted at the sites. Most commercial businesses and some rural residents also have curbside pickup. It is the policy of Waushara County to pay tipping charges for municipal, commercial, and rural residents that choose to have curbside pickup. The county also provides partial compensation for municipalities (cities and villages) to help them finance the hauling portion of waste disposal. The County does not pay tipping charges for foundry sand, demolition materials, rolloff containers, or compactors. The drop-off sites are open on Wednesdays from 12:00 PM to 4:00 PM and Saturdays from 10:00 AM to 4:00 PM year round; and Sundays from 12:00 PM to 3:00 PM during the months of June, July and August.<sup>11</sup>

*Waste Management presently provides residents in the Village of Coloma with curbside collection for waste and recyclables.*<sup>12</sup> *Additionally, residents are able to utilize any drop-off site within the county, but they most likely utilize the Coloma site* (Exhibit 5-1). Situated in the Town of Coloma, this 1.2 acre site is located south of the Village of Coloma and east of 5<sup>th</sup> Avenue. Waushara County maintains a yearly lease with the Village of Coloma to use this site, which is manned by the county.<sup>13</sup>

*All waste management sites in Waushara County accept recyclable materials.* Recyclables are sent to Paper Valley Recycling in Menasha (paper) and Resource Management in Chicago (co-mingled). Waste oil is subcontracted by Superior Services to Jacobus in Madison. Iron and tin collected by Superior Services is subcontracted to Fox Valley Metal in Oshkosh. Subsidized by the County, residents receive no payment for these materials. Materials that are collected include: glass, tin, aluminum, plastic, newsprint, cardboard, magazines, office paper, yard waste, scrap iron, waste oil, batteries, and tires.

Waushara County currently works with Waupaca County to provide a disposal option for household hazardous waste. County residents bring their household hazardous waste to a Waupaca County Processing and Transfer Facility located in Manawa. This program runs from May through October with regular hours of operation. Residents pay a fee for disposing of these hazardous items, but Waushara County helps to reduce costs by contributing grant money towards the program.

#### Electricity

*Alliant-Wisconsin Power & Light provides electric power to the Village of Coloma* (Exhibit 5-1).<sup>14</sup> Alliant Energy is an energy-services provider with subsidiaries serving approximately one million electric and over 400,000 natural gas customers. Wisconsin Power

<sup>&</sup>lt;sup>11</sup> Schuman, S. 2005. Personal Communication. Waushara County Parks, Recreation, and Solid Waste Department. Director.

<sup>&</sup>lt;sup>14</sup> Waushara County 2005, Utility Data by WPS

and Light, the company's Wisconsin utility subsidiary, serves 456,000 electric and 182,000 natural gas customers. Alliant Energy is headquartered in Madison, Wisconsin.<sup>15</sup>

#### Natural Gas

*Wisconsin Gas Company provides natural gas service to the Village of Coloma and is a subsidiary of Wisconsin Energy Corporation* (Exhibit 5-1).<sup>16</sup> The company serves approximately 583,300 gas customers in Wisconsin.<sup>17</sup> According to Wisconsin Public Service, WE Energy has a gas distribution line that diagonally cuts east-west and north-south through the Town of Coloma. Generally this gas line enters the Town of Coloma north of Cypress Avenue and south of STH 21. *It crosses I-39 south of the Village of Coloma, diagonally slicing through the southeast corner of the Village.* At this point, it splits and continues east into the Town of Richford and north along CTH FF. *A gas substation is located on Slater Street.* 

#### Power Generation Plants and Transmission Lines

*American Transmission Company (ATC) owns and maintains a number of transmission lines in the area* (Exhibit 5-1). ATC began operations on January 1, 2001, as the first multi-state transmission only utility. They own 9,350 circuit miles of transmission lines and wholly and jointly own 500 substations.<sup>18</sup> *A transmission line runs in a north to south direction along the eastern border of the Town of Coloma, intersecting another transmission line that cuts across the southeast corner of the Town.* According to ATC, transmission systems throughout Zone 1 (includes Waushara County) are overloaded and experiencing low voltages.<sup>19</sup>

#### **Telecommunications Facilities**

According to information obtained from the Village of Coloma there is one tower located in the southwest corner of the Village (Exhibit 5-1).<sup>20</sup> This tower is currently owned by SBA Systems and is in foreclosure proceedings. Additionally, an emergency siren is located on a post by the old fire station on Front Street.

## Telephone and Cable Television

*Union Telephone provides telephone and cable television service to the Village of Coloma.*<sup>21</sup> Union Telephone is based out of Plainfield, Wisconsin. According to the Village, Charter Communications also provides cable television to the area.

The advancement of telecommunication technologies, such as cell phones, has greatly increased the need for towers to provide receiving and sending capabilities. The number of

<sup>&</sup>lt;sup>20</sup> Waushara County 2008.

<sup>&</sup>lt;sup>21</sup> East Central Wisconsin Regional Planning Commission, *Milestone Report #1, State of the Region. 2003.* 

telecommunications towers in the United States currently exceeds 77,000; this number could double by 2010.<sup>22</sup> The federal government recognized this need with the passage of the Telecommunications Act of 1996.

# Internet

Due to the proliferation of internet service providers (ISP), area residents can also choose from several national and local ISPs. *Union Telephone supplies high speed internet service to the Village of Coloma*. Wi-Fi is also available in the Coloma Public Library. The availability of high speed access may change as ISPs increase coverage areas or if state and federal regulations or involvement change.

# Cemeteries

The ownership and maintenance of the cemeteries within the area varies between public organizations and public entities. According to the state statutes, if the authority (organization, family or individual) who owns or manages a cemetery fails to care for it for a period of five or more years, then the municipality where the cemetery is located is required to take over the control, management and care of the cemetery.<sup>23</sup> In this manner, some municipalities acquire the management and care of cemeteries; in other instances, the cemetery has always been under public ownership. *There are two cemeteries located in the Village of Coloma: Hillside and Prince of Peace Lutheran.* The cemeteries are further described below:

The **Hillside Cemetery** is located on the eastside of Slater Street, south of STH 21. This cemetery is maintained by the Hillside Cemetery Association and is open for burials. It dates back to the late 1800's and the settlement of this area.

The **Prince of Peace Lutheran Church Cemetery** is located adjacent to the Hillside Cemetery on Slater Street. This cemetery is maintained by the church and is open for burials.

# Childcare Facilities

Public involvement at the state level in the role of childcare falls largely under the supervision of the Wisconsin Department of Workforce Development's Office of Childcare (OCC). One of the OCC's primary areas of responsibility is the oversight of the Wisconsin Shares program, which is a childcare subsidy program.

The Wisconsin Shares program is administered by local counties, tribes and Wisconsin Works (W-2) agencies. The program assists families whose incomes are less than 200 percent of poverty to pay for childcare services. Parents choose the type of care and share the cost through co-payment. In order to be eligible for reimbursement, childcare providers must be licensed by the State, certified by county or tribal government, or operated by a public school. Research indicates that public dollars play a large financial role in the provision of childcare in the state, and in both urban and rural counties. Table 5-2 identifies available information on the number of regulated childcare facilities in the area. These figures are for licensed childcare

<sup>&</sup>lt;sup>22</sup> Wind Turbines and Birds: Putting the Situation in Perspective in Wisconsin. 2004. Sagrillo, M.

<sup>&</sup>lt;sup>23</sup> Wisconsin State Statues, Chapter 157.

providers only. A license is required for those who provide care for four or more children under the age of 7 at any one time.<sup>24</sup>

5-9

ChildCare Resource & Referral, Inc. works with counties and the State in monitoring childcare provision and has reported that the highest demand for care is for full-time, first shift (6 AM to 6 PM) hours. *The Mid-Wisconsin ChildCare Resource & Referral, Inc. and CAPSELL Services works with Waushara County.* 

**Residents of the Village of Coloma most likely use childcare facilities in the Village and surrounding area. Facilities in Coloma have a combined capacity of 16 children.** UMOS is a non-profit, community-based organization which provides housing and other services to underserved populations.<sup>25</sup> Within Waushara County, migrant workers utilize these programs. UMOS operates a housing complex, Head Start program, and childcare facilities in Plainfield and Aurora. The licensed facilities provided childcare for 130 children in 2008.<sup>26</sup>

Source: Mid-Wisconsin Child Care Resource & Referral, 2008

<sup>&</sup>lt;sup>24</sup> Wisconsin State Statutes 48.65.

<sup>&</sup>lt;sup>25</sup> UMOS. 2006. *Welcome to UMOS.* http://www.umos.org.

<sup>&</sup>lt;sup>26</sup> Mid-Wisconsin Child Care Resource & Referral, 2008.

According to the Mid-Wisconsin ChildCare Resource & Referral agency, a need exists in Waushara County for additional childcare, especially for children of non-traditional workers such as second shift. It should be noted that the available capacity versus number of children 12 years old and under may not be representative of the need, since not all children in this age category require licensed childcare. Some children come from families in which the primary caregiver is not employed outside of the home, while other people may seek childcare near their place of employment or utilize unlicensed facilities or family and friends for childcare needs.

## **Elderly Services**

**Waushara County Department of Aging** offers several programs to area senior citizens. In 2007, these programs provided almost 4,000 individuals with assistance.<sup>27</sup> *The Waushara County Coordinated Transportation System offers rides to not only senior citizens but also to veterans, and human service clientele on Medical Assistance.* Transportation is provided by either mini-bus or volunteers. While transportation for medical appointments is provided almost exclusively by volunteer drivers, the mini-bus offers rides for not only medical appointments but also for grocery shopping and other personal errands. This program has been successful and may need to expand to serve the increasing number of senior citizens.

*Meals along with activities and fellowship are provided to seniors at eight locations throughout Waushara County. The closest site is located at the Coloma Community Center, 155 Front Street. This site is open on Monday, Wednesday, Thursday and Friday only.* All sites, listed below are open from Monday through Friday unless indicated otherwise. Participants must be age 60 or older, but a spouse and/or caregiver any age are welcome to participate as well. Besides Coloma, other locations include the Wautoma-Waushara Senior Center (W8220 Cottonville Avenue in the Town of Dakota), Wild Rose Community Center (500 Wisconsin Avenue), the Redgranite Civic Center (202 Pine River Street), the Plainfield Senior Center (114 W. Clark Street), the Hancock Community Building (420 Jefferson Street), and The House Next Door in Poy Sippi (W2306 Prospect Street; Tuesday and Thursday). Meals are served at the Saxeville Town Hall (W4022 Archer Avenue; Monday and Wednesday).<sup>28</sup> Meals are also delivered to individual residences. Currently, the county provides this service to nearly 1,000 senior citizens.<sup>29</sup>

*The Aging & Disability Resource Center of Green Lake, Marquette and Waushara Counties provides information and assistance on aging, long term care, disabilities, and other related topics.* A grant written in 2007, and extended through 2010 has allowed the expansion of services and the development of this tri-county consortium.<sup>29</sup>

A trained benefit specialist is available to help seniors and their families find information on public programs such as Social Security, Medicare, and other related programs. This individual not only provides guidance by thoroughly explaining all available options, but also assists seniors with completing all required paperwork for these programs. The benefit specialist offers

<sup>&</sup>lt;sup>27</sup> Waushara County Department of Aging Services. 2007. *Waushara County Department of Aging Services Summary*.

<sup>&</sup>lt;sup>28</sup> Communication with the Aging and Disability Resource Center, November 21, 2008.

<sup>&</sup>lt;sup>29</sup> Waushara County Department of Aging Services 2007 Summary

flexible hours at meeting locations which include the office, local senior centers, and personal residences. Since this program is supervised by an attorney, legal help is available to seniors with an appeal process if they are denied claims or assistance.

According to the Aging and Disability Resource Center, transportation remains an issue within the county.

The **Wautoma-Waushara Senior Center** is located at W8220 Cottonville Avenue in the Town of Dakota. The center serves as a meal site for the Waushara County Department of Aging meal program each weekday. *The center offers a wide range of social and educational activities for seniors including bingo, card tournaments, crafts, and others.* Several field trips are organized each year to Wisconsin casinos, museums, and other destinations.

#### Residential Care Facilities

The Wisconsin Department of Health and Family Services (DHFS) regulates' adult care facilities. Several types of residential services exist for the elderly. These include Residential Care Apartment Complexes (RCACs), Adult Family Homes (AFHs), Community Based Residential Facilities (CBRF), and adult day cares.

RCACs provide independent apartment living options for individuals in groups of five or more. Apartments must have a lockable entrance and exit; a kitchen with a stove (or microwave); and individual bathroom, sleeping, and living areas. Individuals can receive no more than 28 hours of supportive services (transportation, housekeeping, recreation), personal assistance (dressing, bathing, etc.), or nursing care per week. They are appropriate only for individuals who require in-depth health monitoring by health care professionals.<sup>30</sup>

AFHs are designed to provide care for up to four persons and allow the opportunity for residents to receive specialized care. AFHs can specialize in residents of advanced age or persons with dementia, Alzheimer's, or physical disabilities.<sup>31</sup>

In Wisconsin, CBRFs provide housing for five or more residents. The minimum age for CBRF residency is 18. CBRFs provide housing for both individuals who can live independently and for those who require care.<sup>32</sup>

An Adult Day Care Facility provides services for adults who need assistance with daily activities in a group setting. Adult day care may be provided in home, a specialized facility, or other community facility (i.e., churches). Unlike other elderly services, adult day care facilities provide services for only a portion of the day; these services are usually provided during normal business hours. *Even though there are no adult day care facilities listed with the Department of Health and Family Services in Waushara, Green Lake, or Waupaca* 

<sup>&</sup>lt;sup>30</sup> DHFS. 2006. *Residential Care Apartment Complexes (RCACs) – Introduction.* http://dhfs.wisconsin.gov/rl\_dsl/RCACs/RCACintro.htm

<sup>&</sup>lt;sup>31</sup> DHFS. 2006. Adult Family Homes – Introduction.

http://dhfs.wisconsin.gov/rl\_DSL/AdultFamilyHomes/AFHintro.htm
 <sup>32</sup> DHFS. 2006. Community Based Residential Facilities (CBRFs) – Introduction. http://dhfs.wisconsin.gov/rl\_dsl/CBRF/CBRFintro.htm.

*counties.*<sup>33</sup> *There is an adult day care facility in Wautoma called Adult Day Services Living Environmental. Additionally Cooperative Care, based out of Wautoma, provides in-home personal and home care services to elderly and disabled residents.* The profits from this member owned cooperative are divided up between all the members who worked in that year. Table 5-3 lists the number of adult care facilities that Village of Coloma citizens may choose to use and their corresponding capacities. *Facilities for Waushara County are located in Wautoma and Redgranite.* 

	Waushara County		
Facility	Number	Capacity	
Residential Care Apartment Complexes (RCAC)	3	93	
Adult Family Homes (AFH)	5	19	
Community Based Residential Facilities (CBRF)	8	106	
Adult Day Care Facilities (ADC)	1	40	
Adult Day Care Facilities (ADC) Total	17	40 258	

Table 5-3. Elderly Care Facilities

Source: Wisconsin Department of Health and Family Services, 2008.

Although the elderly population is healthier and living longer than in the past, assistance will likely be needed at some point in their lives. The type of assistance preferred should be identified with input from potential users. *The overall capacity for adult care facilities serving Waushara County is 258 persons.* By 2030, about 30 percent of the population in Waushara County is projected to be age 65 or older.<sup>34</sup> As the population ages, it can be assumed that a growing proportion of senior citizens may need additional facilities to meet their recreational, medical, and everyday necessities. In addition, more focus is being placed on allowing individuals to remain in their personal residences. Additional staff may be needed to provide care and assistance to senior citizens who wish to remain in their homes.

## Police Service

## Coloma Police Department

*The Coloma Police Department provides law enforcement protection to the Village.* Hours of service vary but are coordinated with the Waushara County Sheriff Department, who provides backup service to the Village, as needed. The Police Department is staffed by a fulltime police chief and two officers. Police protection is also provided to the Town of Coloma by the Village of Coloma Police Department for about 40 hours per month. The department shares a facility with the Coloma Volunteer Fire-Rescue-EMS Department. The facility was constructed in 2002, and is located in the Village industrial park at 383 Industrial Drive.

<sup>&</sup>lt;sup>33</sup> DHFS. 2006. *Adult Day Care (ADCs) – Introduction.* 

http://dhfs.wisconsin.gov/rl\_DSL/AdultDayCare/AdultDCintro.htm.

<sup>&</sup>lt;sup>34</sup> Wisconsin Department of Administration, 2004.

Currently the facility is meeting the needs of the police department, and there are no plans for expansion at this time.

#### Waushara County Sheriff Department

*The Waushara County Sheriff's Office is located on Division Street in Wautoma. The Hancock and Poy Sippi fire departments serve as satellite headquarters each Saturday afternoon.* This increases the officers' visibility and availability to county residents who do not live near the sheriff's office.<sup>35</sup> The department employs 25 full-time sworn officers. Other employees include 25 correction officers, eleven E911 dispatchers, one emergency management specialist, and two secretaries. The emergency management specialist coordinates the emergency disaster response programs for both natural and manmade disasters. One police liaison officer is employed by the department; he serves as liaison officer for schools in Wautoma, Redgranite, Wild Rose and Coloma.

The sheriff's department has two vehicles patrolling the entire county from 5:00 AM to 5:00 PM, while three patrol vehicles work in the county the remainder of the day. New in 2008, the Sheriff's department provides boat patrol for all lakes within Waushara County.<sup>36</sup>

Several specialized units, including drug enforcement and canine units are operated by the Waushara County Sheriff's Office. Cooperative agreements exist with other multi-jurisdictional drug units in East Central Wisconsin. Several employees have been trained in latent print examination (fingerprint analysis).<sup>37</sup> In 2000, the County instituted an enhanced county-wide 911 system. The County is now working with Green Lake County, Centurytel and other county agencies on a wireless 911 project.

A common method used to assess the level of service that is being provided locally is to compare the number of employees per 1,000 residents served with averages for other law enforcement agencies statewide. However, it should be noted that the number of employees per 1,000 residents served is related to a variety of factors including crime level, geographic coverage, size of agency, and budgetary issues.<sup>38</sup> As of October 31, 2006, for a police department serving a community of 25,000 to 49,999 residents, the state average was 1.74 sworn employees per 1,000 residents served. *For a sheriff's office (includes most jail personnel), the state average was 1.77 sworn employees per 1,000 residents served. The Waushara County Sheriff's Office employs 1.1 officers per 1,000 population. This is below the state average.* 

Plans exist to upgrade several facilities. In 2003, a joint effort to develop an interoperability plan was initiated between county and local jurisdictions. The plan includes improving radio coverage; ensuring communication with all other agencies; decreasing reliance on telephone cable; and upgrading to digital equipment by 2008. Additionally, all equipment upgrades identified in the 2007 Radio Improvement Project were purchased and installed.<sup>39</sup> Video cameras will also be added to patrol cars within the next 10 years. New cameras for crime

<sup>&</sup>lt;sup>35</sup> Waushara County Sheriff Department Annual Report, 2003. Waushara County Sheriff Department.

<sup>&</sup>lt;sup>39</sup> Waushara County Sheriff's Department Annual Report, 2007.

scene investigations and specialized equipment for latent prints examination are also budgeted in future fiscal years.

The Waushara County Sheriff's Department maintains a TRIAD program to educate and raise senior and retired citizens' awareness of safety related issues. The TRIAD meets monthly and includes a different topic or issue at each meeting.

## **Correctional Facilities**

According to the Wisconsin Adult Jail Report 2003, total adult admissions to state jails increased by 30 percent from 2001 to 2003, while Waushara County jails have decreased by 20.1 percent in the same time period.<sup>40</sup>

The average daily population (ADP) or average number of inmates held each day during one year is based upon a combination of admissions and the average length of stay. Waushara County reported an ADP of 87 in 2003 which is a 42 percent decrease from 2001. Generally, when the ADP reaches 80 percent of maximum capacity, the facility is considered to be overcrowded. Setting the standard below maximum capacity allows for flexibility in managing seasonal populations, weekend arrests, and other special situations. *There are three correctional facilities in Waushara County; the Waushara Huber Facility, the Waushara County Jail and the Redgranite Correctional Institution.* 

The **Waushara Huber Facility** is located in Wautoma. The facility is housed in the former county jail on Park Street and has a maximum capacity of 36 inmates. Inmate populations for the Huber facility fluctuate seasonally.

The **Waushara County Jail** is located in Wautoma. The current facility was opened in January 2000 and has a maximum capacity of 153 inmates. The jail employs 29 security staff and other employees. In 2002, the ADP of the facility was 135 inmates (88.2%).

The **Redgranite Correctional Institution** is located in the Village of Redgranite. This facility is situated north of downtown and west of CTH EE on an 89-acre parcel. This medium security facility was opened in January 2001. With recent expansions, the prison has a maximum capacity of 990 inmates. Currently, the facility is over capacity with 1,013 inmates.<sup>41</sup> The prison employs 182 security staff and 94 other employees.

# Fire Protection

*The Village of Coloma is served by the Coloma Volunteer Fire-Rescue-EMS Department* (Exhibit 5-2). The Town and Village of Coloma equally share the expenses of a joint volunteer fire department that is housed in the northeast corner of the Village industrial park at 383 Industrial Drive. In addition to the Town and Village of Coloma, the fire department also serves the Town of Richfield (Adams County) and a portion of the Town of Richford.

<sup>&</sup>lt;sup>40</sup> *Wisconsin Adult Jail Populations*, 2003. Office of Justice Assistance.

<sup>&</sup>lt;sup>41</sup> Offenders Under Control Report, 2008. Wisconsin Department of Corrections.

The building, constructed in 2002 provides office space for the police and fire departments as well as a meeting room and garage facilities. The department operates three engines, three tankers, and two rescue squads. The Town and Village department combined consists of 33 members. There are 12 Emergency Medical Technicians and First Responders that respond with the Rescue Squad as a first in medical treatment.<sup>42</sup> There is a mutual aid agreement with Marquette, Adams and Waushara County.<sup>43</sup> *Currently the building is meeting the needs of the fire-rescue-EMS department and there are no improvement plans for this building at this time.* 

The Insurance Service Office (ISO) of Wisconsin, through the use of the Fire Suppression Rating Schedule, evaluates the adequacy of fire protection within the state for municipal fire protection.<sup>44</sup> The schedule provides criteria to be used by insurance grading engineers in assessing the physical conditions of municipalities relative to fire hazards and rating municipalities' fire defenses. Ratings obtained under the schedule are widely used to establish base rates for fire insurance. While ISO does not presume to dictate the level of fire protection services that a municipality should provide, reports of evaluation results published by its Municipal Survey Office generally outline any serous deficiencies found through the evaluation. Over the years, these findings have come to be used as a guide to municipal officials planning improvements to local fire protection services.

Table 5-4. ISO Ratings

Source: Milestone Report #1; State of the Region, ECWRPC 2003

The grading is obtained by ISO based upon its analysis of several components of fire protection, including fire department equipment, alarm systems, water supply systems, fire prevention programs, building construction, and the distance of potential hazard areas from the fire station. In rating a community, total deficiency points in the areas of evaluation are used to

<sup>44</sup> ISO. 2006. *Fire Suppression Rating Schedule*. http://www.iso.com/products/2400/prod2404.html.

<sup>&</sup>lt;sup>42</sup> <u>http://www.1coloma.com/fire.htm</u>. Accessed 12/31/08.

<sup>&</sup>lt;sup>43</sup> *Town of Coloma Land Management Plan*, February, 2003. East Central Wisconsin Regional Planning Commission.

assign a numerical rating of 1 to 10, with a 1 representing the best protection and 10 representing an essentially unprotected community. Many towns and villages in the more rural areas typically have ratings of class 8 through 10 (Table 5-4). *The Coloma Fire Department has an ISO rating of 6 within the Village of Coloma and 9/10 in the towns of Coloma, Richford and Richfield (Adams County).* 

The standards for fire station location utilized by the National Board of Underwriters are given in Table 5-5. These standards are based on the density of development in the station service area.<sup>45</sup> Since rural villages constitute a relatively low-density rural area, a two to four mile service radius is the recommended standard.

	Suggested Service Radius			
	Engine or Pumper Ladder			
Land Use	Company	Company		
Commercial/Industrial	.75 - 1.0 miles	1.0 miles		
Res. Med./High Density				
(<100' bet. Structures)	2.0 miles	3.0 miles		
Res. Scattered				
(>100' bet. Structures)	3.0 - 4.0 miles	3.0 miles		
Res Rural Low				
Density	4.0 - 6.0 miles	-		

 Table 5-5. Recommended Density/Distance Standards for Fire Protection

Source: American Planning Association, 1988

## Health Care Facilities/Emergency Medical Services

*There are no hospitals located within the Village of Coloma; however there are eight hospitals located within approximately 60 miles.* Table 5-6 indicates which hospitals are used by residents as well as the approximate distance between the hospital and the municipality and general information about the area hospitals.

*Emergency medical services for the Village of Coloma are provided by the Waushara County EMS.* The various fire districts and local fire departments within the county also have First Responders on staff that can assist with the basic and advanced medical emergencies. Depending on the location, First Responders are usually able to arrive at the emergency scene either ahead of the ambulance or at approximately the same time. The Coloma Fire Department employs Emergency Medical Technicians and First Responders. An ambulance, shared jointly between the Coloma Fire Department and the Village of Plainfield, resides half time in the Village of Coloma and half time in the Village of Plainfield.

#### Libraries

*Village of Coloma residents have access to a number of libraries within the county, but will most likely use the Coloma Public Library.* Other libraries within a reasonable distance include the Wautoma Public Library.

These and other libraries in the County receive their revenue through a combination of local and county funding based on resident usage. Any town, city or village resident has access to the materials in any county-supported library within Waushara County. All libraries in Waushara County are members of the Winnefox Library System; an organization that promotes cooperative efforts in interlibrary loans, library programs and resident borrowing privileges.<sup>46</sup> Table 5-7 provides relevant information for Public Libraries in Waushara County.

	Library Type	Municipal Population 2007	Additional Service Population	Total Service Population 2007	Annual Hours Open	Total Staff	Library Materials Total

Table 5-7 Public Library Statistical Data

Source: Wisconsin Department of Public Instruction, 2007

Service targets for libraries are based on quantitative standards contained in the Wisconsin Library Standards. Reported for each standard is the effort required to achieve basic, moderate, enhanced or excellent levels of service. These standards are based on the population served and vary for a community in regard to municipal population versus service population. For the Coloma and Wautoma public libraries (the most likely to be used by Village

<sup>&</sup>lt;sup>46</sup> *Town of Springwater; Land Use Management Guide Plan,* 2003. East Central WI Regional Planning Commission.

of Coloma residents), municipal and service population varies greatly (Table 5-7). Other standards that apply, besides what is listed in Table 5-8 are that a certified library director is paid to perform board-designated duties for no fewer than 25 hours per week and that the library supports the library director's continuing education. None of the libraries employ a certified library director. Additionally the operating budget for the Coloma Public Library is less than the minimum standards.

	Co	oloma	Wautoma		
Criteria	Municipal	Service Pop	Municipal	Service Pop	
Staff FTE	Excellent	Enhanced	Enhanced	< Basic	
Volumes Held (print)	Enhanced	< Basic	Basic	< Basic	
Periodical Titles Received	Excellent	Moderate	Moderate	Basic	
Audio Recording Held	Excellent	Enhanced	Excellent	Enhanced	
Video Recordings Held	Excellent	Enhanced	Excellent	Excellent	
Hours Open per Week	Moderate	Enhanced	Excellent	Moderate	
Materials Expenditures	< Basic	< Basic	Enhanced	< Basic	
Collection Size (print, audio, video)	Excellent	Basic	Moderate	< Basic	

 Table 5-8. Library Service Levels

Source: Public Library Service Data, 2007; Wisconsin Public Library Standards, 4th edition, 2005.

*The Coloma Public Library provides an enhanced to excellent level of service of all criteria listed above based on their municipal population. However when the much larger service population is considered, the level of service falls for most criteria (Table 5-8).* The Wautoma Public Library provides a lower service level for the number of volumes held in print for its municipal population. However, for other criteria, the Wautoma Public Library generally provides between an enhanced and excellent level of service. Service levels fall when the service population is considered.

## Education

## Primary and Secondary Education

#### The entire Village of Coloma is served by the Westfield School District (Exhibit 5-2).

#### Westfield School District

The Westfield School District has a total of 175.8 staff members, 1,325 students, and a pupil to teacher ratio of 13.5.<sup>47</sup> It operates six schools: the Westfield Area High School (grades 9 - 12, Westfield), Westfield Area Middle School (grades 7 - 8, Westfield), Coloma Elementary School (4 year old K – 6, Coloma), Neshkoro Elementary (K – 6, Neshkoro), Oxford Elementary School (K – 6, Oxford) and the Westfield Elementary (Early Childhood, K – 6, Westfield).<sup>48</sup> All schools are being maintained by the district and no improvements are planned at this time other than general maintenance. According to the district, *enrollment has remained stable at the elementary schools. Therefore, it is anticipated that the schools will be able to* 

<sup>&</sup>lt;sup>47</sup> Wisconsin Taxpayers Alliance. 2008. *School Facts 08.* 

<sup>&</sup>lt;sup>48</sup> <u>http://www.westfield.k12.wi.us</u>. Accessed December 2, 2008.

*continue to serve the district's enrollment for the near future.*<sup>49</sup> However, it may be necessary to provide updates at the schools in the future based on technological advances.

The Westfield Area High School and Middle School, along with district offices are located at N7046 CTH CH in Westfield. The high school, home of the Pioneers, was built in 1997. In 2002, a middle school addition including classrooms and office facilities were added. The schools share a common gym, auditorium, cafeteria, and athletic fields while maintaining separate office and classroom space. An athletic building that is used for athletic events, storage and classroom space was added about three years ago and is used by both schools. The Neshkoro Elementary School is located at 114 E. Park Street in Neshkoro. This school is older and was remodeled about 10 or 15 years ago.<sup>50</sup> Built in three stages, the Oxford Elementary School includes a center section which was built in 1984, after the original first floor from the 1890's Oxford High School was demolished; the southern portion, which includes the cafeteria and grades K, 1, 2 and 3 was built in 1954; and the north section which includes the gym was built in 1958. The Coloma Elementary School is located at 210 Linden Street in Coloma.

## Institutions of Higher Education

*The Village of Coloma does not have any institutions of higher education.* However, UW-Oshkosh (Oshkosh), UW-Stevens Point (Stevens Point), Lawrence University (Appleton), and Ripon College (Ripon) are within a couple hour drive of the area. UW–Fox Valley (Menasha) is a two-year university offering freshman and sophomore level classes. Students can earn an associate's degree, or credits are transferable to all four-year UW system schools.

## Vocational Technical Colleges

The state is covered by 16 multi-county vocational technical and adult education districts which are organized on a regional basis and financed primarily by local property taxes.<sup>51</sup> These districts tend to follow school district boundaries rather than county lines. *The Village of Coloma is part of the Fox Valley district.* However, due to the proximity of the Village in relation to the local campuses, many residents attend classes at Mid-State Technical College. Curriculum in the technical schools is usually geared toward an area's particular needs. Typically a student may choose from among a two-year highly technical associate degree program, a two-year vocational program, a one-year vocational program, and a short-term program.

## **Community Theaters**

Entertainment for local residents is provided by the Clauson Family Theater. Located on CTH CC, the theater features dinner shows, and arts and crafts festivals. A local theater group, the Coloma Players have been in existence for over 30 years, presenting shows at both local and area venues (Sunset Point Resort, Westfield High School, The Radio Station Restaurant, McComb Bruchs Performing Arts Center, the Anna

<sup>&</sup>lt;sup>49</sup> Personal conversation with the Westfield Area School District, December 2, 2008.

<sup>&</sup>lt;sup>50</sup> Town of Wautoma Comprehensive Plan 2025. East Central WI Regional Planning Commission.

<sup>&</sup>lt;sup>51</sup> Wisconsin Department of Instruction. 2006. *Wisconsin Technical College Districts*. http://dpi.wi.gov/lbstat/techcmap.html.

*Follett Community Center, Nordic Mountain, Federal Correctional Institution in Oxford and area campgrounds).*<sup>52</sup> Several smaller theaters are located in City of Wautoma and the towns of Saxeville and Mount Morris. These theaters schedule a diverse calendar of events throughout the year including musical concerts, talent shows, the Wautoma Queen Pageant, and theatrical performances. Audiences are attracted from throughout Waushara County and central Wisconsin. The general public can rent the facilities for private events.<sup>53</sup>

5-21

## Other Municipal Buildings

# Community Center

Located on Front Street in the Village of Coloma, the Anna Follett Memorial Community Center was built in 1997 (Exhibit 5-2). The Village of Coloma shares the community center with the Town of Coloma. The Village utilizes the community center for elections, village board meetings, office space for the village clerk and treasurer and storage of village records. The community center also houses the Coloma Public Library; Town office; two meeting rooms; and serves as the county meal site. The Community Center is currently meeting the needs of the Village, however there is no room for expansion at the current site.

# Maintenance Garage

*The Village utilizes three pole barns at the northeast end of the Coloma Community Park.* These buildings range in age from about 30 to 50 years old and are functional. Village equipment such as plow trucks, tractor, sewer and water maintenance equipment are stored in these buildings. An office and bathroom for the Village Maintenance Director is also situated here.

## Parks and Recreation

The Waushara County area is a popular recreational retreat. Waushara County's natural resources and outdoor recreational facilities provide a wide range of active and passive recreational activities. The abundance of natural lakes, forests, parks, recreational trails, and other amenities provide year-round recreational opportunities.

## Parks

## Waushara County

*Waushara County's park system is comprised of 15 sites containing a total of 761 acres.* The county park system is considered to primarily provide active recreational opportunities. There are no Waushara County facilities located within the Village of Coloma. County facilities found within the surrounding towns are described below.<sup>54</sup>

<sup>&</sup>lt;sup>52</sup> Coloma Players Inc. website: www.ColomaPlayers.org.

<sup>&</sup>lt;sup>53</sup> McComb-Brush Performing Arts Center. 2006. http://www.mccombbruchspac.com.

<sup>&</sup>lt;sup>54</sup> Waushara County Outdoor Recreation Plan, April 2006. East Central Wisconsin Regional Planning Commission.

#### Marl Lake County Park

Located in the west central portion of Waushara County between Wautoma and Hancock on CTH C, Marl Lake County Park occupies a 24-acre wooded site leased from the Town of Deerfield on the west side of 12th Avenue. Facilities include a paved boat ramp, a shelter, restroom facilities, picnic facilities, play equipment, and drinking water. Park visitors use a portion of the shoreline for swimming. Erosion control remains a problem in this area. Because parking capacity is limited, parked vehicles often infringe on adjacent lawn areas. Recent projects include a property survey and boundary markings in 2001, resurfacing of the boat landing in 2003, and installation of a fishing/boarding pier in 2005.

## **Curtis Lake County Park**

Curtis Lake County Park in the Town of Richford serves the southwestern portion of Waushara County. The one-acre site fronts the east shore of Curtis Lake, a relatively pristine 33-acre body of water located about a mile south of CTH JJ on 10th Court. Development consists of a boat ramp, restrooms, a swing set, and picnic facilities. The natural beach, although not officially designated for swimming, is popular with park visitors. Additional land is needed to more effectively develop and utilize this site. Since completion of the 2000 plan, a boundary survey has been conducted, the boat landing resurfaced, and the parking area sealcoated.

#### **Sorenson Natural Area**

Purchased about five years ago, this 71-acre site in the Town of Deerfield is located on the north shore of Hartford (Lyman's) Lake, a 9-acre kettle pond some 27 feet deep. The County intends to limit development of this site so that its natural character is preserved. Walk-in access to the lake and a boarding pier is provided but use of the lake will be limited to canoes, kayaks, and other non-motorized craft. Sorenson Natural Area lies within the identified corridor of the Ice Age Trail and could provide modest overnight camping facilities for trail users without compromising the beauty and natural setting the site provides. An extensive trail system for hiking and snowshoeing is presently available. Other site improvements include a well and septic system.

#### Village of Coloma

Village and Town of Coloma residents utilize and jointly share in the maintenance and upkeep of the Coloma Community Park located in the south central portion of the Village of Coloma off of Front Street. Many of the improvements to the park have been made by the local Lion's Club over the years. Friends of the Park, a local volunteer organization, also help to oversee the park. Park facilities include a playground, ball diamond with lights, picnic tables, new tennis court, flush toilets, playground equipment, basketball hoops and ample off street parking. A large shelter house is available with stoves,

refrigerators, hot water, sinks, a serving bar and a 40 feet by 50 feet enclosed area. The park is generally open from April 15<sup>th</sup> through October 15<sup>th</sup> from 7:30 AM to 9:00 PM.

#### **Recreational Needs**

According to the National Park and Recreation Association, local communities should provide 10 acres of park and open space for every 1,000 residents.<sup>55</sup> Generally, smaller communities may require more acreage if all recreational needs are to be met. This is particularly the case when a community is expected to provide recreational opportunities not only for its residents, but also for residents of the surrounding area and a sizable number of visitors.

These standards suggest that Coloma's present need is 5 acres. This figure is expected to increase to 6 acres by 2030, as the population of the Village increases to 595 people. *The Village of Coloma currently has 17.5 acres of park and recreational land. Based on these standards the Village has an adequate amount of park and recreational to meet these standards through the year 2030.* 

#### Lakes

*There are no lakes within the Village of Coloma.* However two lakes can be found within the Town of Coloma and include Pleasant Lake, along the southern boundary of the Town and Bing Lake in the northeast corner.<sup>56</sup> The lakes provide a diversity of recreational opportunities including boating, swimming, and fishing. Public access is available on Pleasant Lake.

#### Church and Youth Camps

Waushara County has long been a popular area for churches and other organizations to develop camps and retreats for members and their children. There are several of these facilities located throughout the county, collectively occupying nearly 2,000 acres of land. *There are no church or youth camps located in the Village of Coloma.* While the facilities are generally not available to the public, the county benefits from goods and services they obtain from local vendors. In recent years, some of these camps have been sold off.<sup>57</sup>

#### School and Town Forests

Three school forests and a town forest provide 819 acres of passive open space in Waushara County. These facilities include the Tri-County School Forest (230 acres), the Wild Rose School Forest (128 acres), the Coloma School Forest (42 acres) and the Town of Rose Forest (421 acres). *The Coloma School Forest is owned by the Westfield School District and is located east of the Village of Coloma off of Slater Street and Westfield Road.* In 1954, the Coloma Elementary School acquired 42 acres of pasture. Today, this pasture has been transformed into a working pine plantation with a few acres of mature oaks.<sup>58</sup> The property provides residents in the area and school children the opportunity to study and enjoy the outdoors. Cross-country skiing as well as hiking trails are available within the site.

<sup>&</sup>lt;sup>55</sup> Recreation, Park, and Open Space Guidelines, 1990. National Park and Recreation Association.

<sup>&</sup>lt;sup>56</sup> Wisconsin DNR. 1970. *Surface Water Resources of Waushara County.* 

<sup>&</sup>lt;sup>57</sup> ECWRPC. 2006. Waushara County Outdoor Recreation Plan.

<sup>&</sup>lt;sup>58</sup> <u>http://www.westfield.k12.wi.us/ces/ces\_schoolforest.htm</u>. 12/31/08.

#### Campgrounds

Sixteen private campgrounds are located throughout Waushara County. These facilities occupy an estimated 250 acres and provide an estimated 1,700 camping sites. Most of the campgrounds offer a diversity of recreational activities including swimming, boating, and fishing. *There are no campgrounds located in the Village of Coloma.* However, there is one campground is located in the Town of Coloma: Coloma Camperland (N1130 5<sup>th</sup> Road).

#### Snowmobile Trails

*About 285 miles of state-funded snowmobile trails are available in Waushara County.* The public trail network and 50 miles of interconnected privately maintained club trails are readily accessible to all portions of the county and link up with trails of surrounding counties as part of a statewide system. Most of the public trails operate on wintertime easements which cross private property.<sup>59</sup> A notable exception is the previously discussed Bannerman Trail between Redgranite and Neshkoro. Snow permitting, the public snowmobile trail system has a major impact on county's economy during the winter months. The private trails within the area are maintained by the Coloma Pathfinders.

#### Sportsman's Clubs and Conservation Organizations

*Over a dozen parcels in the county are owned by a variety of sportsmen's and conservation groups.* These sites total an estimated 800 acres and accommodate a variety of uses including trap and other shooting ranges; a snowmobile club; hunting and fishing grounds, areas set aside for preservation; and, in the case of private hunting clubs, hunting opportunities on a fee basis. Some of the hunting clubs also provide overnight accommodations. Depending on the activities each site provides and the user groups it serves, it can make a noticeable contribution to the local economy. Because some of these lands provide public recreational opportunities at times, they also help reduce use pressure on public land holdings.

#### Golf Courses

There are three golf courses located in Waushara County. *However, there are no golf courses within the Village of Coloma.* The following golf courses are located within the County: the Waushara Country Club, Two Oaks North Golf Course and Marl Links. Waushara Country Club, located on STH 21 east of Wautoma, has recently been expanded to a 27-hole facility. Although the course is semi-private, guests are always welcome. Two Oaks North Golf Course is located near the City of Wautoma on CTH F in the Town of Marion. This 18-hole public course provides a golfing experience amid a scenic, peaceful, countryside setting. Marl Links, a par 3 course located near Marl Lake in the Town of Deerfield, is also available for public play. The courses offer challenging opportunities for golfers of all skill levels.<sup>60</sup>

<sup>&</sup>lt;sup>59</sup> Waushara County Outdoor Recreational Plan, April 2006. East Central Wisconsin Regional Planning Commission.

<sup>&</sup>lt;sup>60</sup> Waushara County Outdoor Recreational Plan, April 2006. East Central Wisconsin Regional Planning Commission.

## Post Office

The Village of Coloma uses the post office at 145 N. Front Street in the Village. This full service post office provides post office boxes to local residents and some hand delivery depending on the location of the resident or business. Current needs at the post office include: a drive thru for mail delivery and additional parking. However, at the present time there are no plans for expansion of this facility.

#### **Key Findings**

#### Wastewater Collection and Treatment

- The Village of Coloma owns and operates its own wastewater treatment facility (WWTF).
- "The existing collection and conveyance system, including the pumping station, should provide the Village with acceptable service for another 20 years, providing that current maintenance practices and current pumping conditions do not change."
- According to the Village, the plant is currently operating at 56 percent of design and should have enough capacity to serve the existing Village, including the areas currently not served within the Village corporate limits. However, expansion of the wastewater treatment facility may be needed to accommodate new commercial/industrial development within the existing business park in the northeast corner of the Village or in the area west of I-39.

#### Stormwater Management

- Eight drainage districts have been established within Waushara County. The only active district is the Marion-Warren district. Therefore there are no active drainage districts in the Village of Coloma.
- Within the Village of Coloma, curb and gutter is limited.

#### Water Supply

- The Village of Coloma is served by a municipal water system that relies on groundwater as its source.
- The Village of Coloma's peak flow in 2007 was 132,000 gallons per day (gpd).
- Two wells with a combined yield of 864,000 gpd provide water to the Village.
- One water tower serves the Village of Coloma, with a capacity of 44,000 gallons.
- It is anticipated that the existing system will be able to meet the Village's projected growth demands for the next 20 years, however it may be necessary for the Village to construct a new water tower (due to pressure limitations) and schedule updates to replace their existing water distribution system in the future.

#### Solid Waste and Recycling

- The County operates nine waste collection sites and contracts with Waste Management of Wisconsin, Inc. and Onyx Waste Services to haul waste and recyclables.
- Waste Management currently provides residents in the Village of Coloma with curbside collection for waste and recyclables.

- Additionally, residents are able to utilize any drop-off site within the county, but they most likely utilize the Coloma site.
- All waste management sites in Waushara County accept recyclable materials.

# Electricity

• Alliant-Wisconsin Power & Light provides electric power to the Village of Coloma.

# Natural Gas

- Wisconsin Gas Company provides natural gas service to the Village of Coloma and is a subsidiary of Wisconsin Energy Corporation.
- According to Wisconsin Public Service, WE Energy has a gas distribution line that crosses I-39 south of the Village of Coloma, diagonally slicing through the southeast corner of the Village. A gas substation is located on Slater Street.

# Power Generation Plants and Transmission Lines

- American Transmission Company (ATC) owns and maintains a number of transmission lines in the area.
- A transmission line runs in a north to south direction along the eastern border of the Town of Coloma, intersecting another transmission line that cuts across the southeast corner of the Town.

# Telecommunications Facilities

- According to information obtained from the Village of Coloma there is one tower located in the southwest corner of the Village.
- Union Telephone provides telephone and cable television service to the Village of Coloma.
- Union Telephone supplies high speed internet service to the Village of Coloma.

# Cemeteries

• There are two cemeteries located in the Village of Coloma: Hillside Cemetery and Prince of Peace Lutheran.

# Childcare Facilities

- The Mid-Wisconsin ChildCare Resource & Referral, Inc. and CAPSELL Services works with Waushara County.
- Residents of the Village of Coloma most likely use childcare facilities in the Village and surrounding area. Facilities in the Village of Coloma have a combined capacity of 16 children.

# Elderly Services

• The Waushara County Coordinated Transportation System offers rides to not only senior citizens but also to veterans, and human service clientele on Medical Assistance.

- Meals along with activities and fellowship are provided to seniors at eight locations throughout Waushara County. The closest site is located at the Coloma Community Center, 155 Front Street. This site is open on Monday, Wednesday, Thursday and Friday only.
- The Aging & Disability Resource Center of Green Lake, Marquette and Waushara Counties provides information and assistance on aging, long term care, disabilities, and other related topics.
- The Wautoma-Waushara Senior Center (in the Town of Dakota) offers a wide range of social and educational activities for seniors including bingo, card tournaments, crafts, and others.
- Even though there are no adult day care facilities listed with the Department of Health and Family Services in Waushara, Green Lake, or Waupaca counties. There is an adult day care facility in Wautoma called Adult Day Services Living Environmental. Additionally, Cooperative Care, based out of Wautoma, provides in-home personal and home care services to elderly and disabled residents.
- Facilities for Waushara County are located in Wautoma and Redgranite.
- The overall capacity for adult care facilities serving Waushara County is 258 persons.

# Police Service

- The Coloma Police Department provides law enforcement protection to the Village.
- Currently the facility, housing the police and fire departments, is meeting the needs of the police department, and there are no plans for expansion at this time.
- The Waushara County Sheriff's Office is located on Division Street in Wautoma.
- The Hancock and Poy Sippi fire departments serve as satellite headquarters each Saturday afternoon.
- For a sheriff's office (includes most jail personnel), the state average was 1.77 sworn employees per 1,000 residents served. The Waushara County Sheriff's Office employs 1.1 officers per 1,000 population. This is below the state average.
- There are three correction facilities in Waushara County: the Waushara Huber Facility, the Waushara County Jail, and the Redgranite Correctional Facility.

# Fire Protection

- The Village of Coloma is served by the Coloma Volunteer Fire-Rescue-EMS Department.
- Currently the building is meeting the needs of the fire-rescue-EMS department and there are no improvement plans for this building at this time.
- The Coloma Fire Department has an ISO rating of 6 within the Village of Coloma and 9/10 in the towns of Coloma, Richford and Richfield (Adams County).

# Health Care Facilities/Emergency Medical Services

- There are no hospitals located within the Village of Coloma; however there are eight hospitals located within approximately 60 miles.
- Emergency medical services for the Village of Coloma are provided by the Waushara County EMS.

## Libraries

- Village of Coloma residents have access to a number of libraries within the county, but will most likely use the Coloma Public Library.
- The Coloma Public Library provides an enhanced to excellent level of service of all criteria listed above based on their municipal population. However when the much larger service population is considered, the level of service falls for most criteria.

# Education

- The entire Village of Coloma is served by the Westfield School District.
- Enrollment has remained stable at the elementary schools. Therefore, it is anticipated that the schools will be able to continue to serve the district's enrollment for the near future.
- The Village of Coloma does not have any institutions of higher education.
- The Village of Coloma is part of the Fox Valley District.

# Community Theaters

- Entertainment for local residents is provided by the Clauson Family Theater.
- A local theater group, the Coloma Players has been in existence for over 30 years, presenting shows at both local and area venues (Sunset Point Resort, Westfield High School, The Radio Station Restaurant, McComb Bruchs Performing Arts Center, the Anna Follett Community Center, Nordic Mountain, Federal Correctional Institution in Oxford and area campgrounds).

# Other Municipal Buildings

- Located on Front Street in the Village of Coloma, the Anna Follett Memorial Community Center was built in 1997.
- The Community Center is currently meeting the needs of the Village; however there is no room for expansion at the current site.
- The Village maintenance department utilizes three pole barns at the northeast end of the Coloma Community Park.

# Parks and Recreation

- Waushara County's park system is comprised of 15 sites containing a total of 761 acres.
- Village and Town residents utilize and jointly share in the maintenance and upkeep of the Coloma Community Park located in the south central portion of the Village of Coloma off of Front Street.
- The Village of Coloma currently has 17.5 acres of park and recreational land. Based on these standards the Village has an adequate amount of park and recreational to meet these standards through the year 2030.
- There are no lakes within the Village of Coloma.

# Church and Youth Camps

• There are no church or youth camps located in the Village of Coloma.

## School and Town Forests

• The Coloma School Forest is owned by the Westfield School District and is located east of the Village of Coloma off of Slater Street and Westfield Road.

## Campgrounds

• There are no campgrounds located in the Village of Coloma.

## Snowmobile Trails

- About 285 miles of state-funded snowmobile trails are available in Waushara County.
- The private trails within the area are maintained by the Coloma Pathfinders.

## *Sportsman's Clubs and Conservation Organizations*

• Over a dozen parcels in the county are owned by a variety of sportsmen's and conservation groups.

# Golf Courses

• There are no golf courses within the Village of Coloma.

# Post Office

• The Village of Coloma uses the post office at 145 N. Front Street in the Village. Current needs at the post office include: a drive thru for mail delivery and additional parking. However, at the present time, there are no plans for expansion of this facility.

# INTERRELATIONSHIPS WITH OTHER COMPREHENSIVE PLAN ELEMENTS

## **Economic Development**

Rising heath care costs directly impact a company's ability to compete in a global market. High quality, affordable, and accessible health care that is available to all residents is important to the vitality of the area. As the area's residents become older, the importance of healthcare will increase. Residents who live and work in healthy communities are more active, have fewer health problems, and are more productive. Studies have shown that productivity for working parents increase if they have access to safe, reliable, quality daycare for their children.

A vital, safe, clean and healthy environment is an economic draw for new industry and residents. It aids in the retention of existing residents and businesses. Parks or green space add to the local economy by maintaining or increasing property values; providing a place where local citizens can socialize, play sports or relax; and promoting healthy active lifestyles that encourage physical activity. In addition, local parks and recreational facilities draw visitors to an area. These visitors spend money at local restaurants, motels and other businesses.

A good educational system has the ability to respond to an ever-changing job market, to educate or retain residents, and to form partnerships between businesses and schools.

Citizens, businesses and industries need accessible, reliable gas and electric services. To enable economic growth and open up new markets and opportunities for diverse and innovative services, access to fast, reliable, cost-effective, and cutting edge telecommunications must be available.

# Housing

Preplanning can save municipalities' time and money. Infill of housing units or reuse of existing buildings in areas that already have the needed infrastructure in place, such as streets, sewer, water, emergency services and schools, saves taxpayers the cost of extending these services to new areas.

Housing developments should be provided with infrastructure that promotes healthy community lifestyles. It is important that housing, businesses and schools be interconnected with a network of sidewalks, green space and parks to encourage active lifestyles. Schools, parks, and libraries should be located in or near existing residential areas within walking distance for both children and adults. Parks and green space not only promote more active lifestyles but may increase housing values in the area.

However economically expedient or convenient it may seem at the time, housing should not be located in floodplains, areas of high groundwater, or other areas that are susceptible to flooding. Not only does this ill-conceived practice increase insurance costs, but it may also increase the cost to install basements and on-site sewage systems.

# Transportation

A well maintained, efficient and safe transportation network provides access for emergency service providers (police, fire and ambulance) and ensures a timely response. By incorporating pedestrian and bicycling facilities into the design of a transportation system, options other than the motor vehicle are made available and active healthy lifestyles that rely less on driving can be promoted.

The siting of a local park, recreational facility, school, library, solid waste or recycling facility may have an impact on the adjoining transportation network or facility. These facilities often result in additional vehicular and pedestrian traffic, increasing the likelihood that new roads, signalized intersections and pedestrian facilities will need to be built. The siting of facilities that attract birds and other wildlife, such as parks, solid waste or recycling centers, can adversely impact the safety of nearby transportation systems, including air traffic.

# Agricultural Resources

Preplanned development leads to the efficient use of public infrastructure and reduces the extent of sprawl, which contributes to the consumption of the rural countryside. Educating local officials and citizens about local land use decisions and their implications for farming is essential if farmland and the ability to grow or raise food are to be preserved.

#### Natural Resources

The ability to accommodate growth while protecting the natural environment is essential if our quality of life is to be maintained or improved. The quality of the surface and groundwater resources is linked to the proper siting, installation and maintenance of individual on-site wastewater treatment systems. Improper treatment can result in the discharge of excessive human waste and bacteria into the groundwater system, which in turn can contaminate public and private water supplies. The cumulative impacts of development and well density can not only affect the level of aquifers but also the rate at which the aquifer is recharged due to increased amounts of impervious surface. Additionally, improperly abandoned wells provide a direct link between the upper and lower aquifers and can be the cause of leakage between the two.

Parks, recreational areas, and other open space preserve and protect green areas for future generations to enjoy. They protect wildlife habitat within our communities, enhance water and air quality, lower heating and cooling costs, help control stormwater runoff, enhance property values, contribute to the vitality of a community, and encourage active lifestyles.

#### **Cultural Resources**

Cultural and historical resources often help to determine and define a community's identity. Renovating or preserving an existing historic structure or building and reusing it not only enhances the area, but is often coveted by future tenants. Forming partnerships between public and private sectors to encourage development or redevelopment in already developed areas can make better use of existing public infrastructure and allow for ideas to become reality. Historic buildings can often be creatively converted to restaurants and other business and residential uses. Reuse of these buildings contributes to the tax roll as they are in close proximity to existing facilities; eliminates the need to expand infrastructure to new areas; cuts down on urban sprawl and the consumption of farm and open land; and saves taxpayers money. Cemeteries preserve the history of a community or area and are invaluable in the search for individual family history. In addition to their historical significance, they also contribute to the green space within a community.

## Land Use

Preplanned development leads to an efficient use of an area's resources, reduces urban sprawl, utilizes existing public infrastructure, and helps to eliminate land use conflicts. Concerns regarding the siting of solid waste and recycling facilities; gas, electric and telecommunications facilities; cemeteries; schools; and other public facilities are often raised by local citizens. However, education of local citizens and officials may result in a better general understanding of the issues and an acceptance of a solution that ultimately benefits everyone. Compact development in more urban areas reduces the cost to install public and private infrastructure and deliver public services (garbage pickup, sewer, water, emergency, electric, gas, and telecommunication, and elderly services, etc.).

Comm 83 regulations (affecting private on-site systems) have brought about state-level concerns regarding the promotion of "sprawl" development patterns and the ability to develop in or near sensitive areas. While the county has adequate groundwater supplies, well density in both urban and rural areas can impact the level of the aquifers. The rate at which they are recharged is influenced by the amount of impervious surface. Therefore when making land use

decisions, it is imperative that the cumulative impacts of development on natural resources be examined carefully.

#### Intergovernmental Cooperation

Forming partnerships between schools, park departments, libraries, non-profits and others benefits the community and saves the local taxpayer money. In some instances, if these facilities are located near each other, additional cost savings and avoidance of duplicative services can be realized.

## POLICIES AND PROGRAMS

The provision of public and private utilities and community facilities is governed at federal, state, regional, and local levels. Given the breadth of topics discussed in this chapter, the policy background is provided for those areas most relevant to the comprehensive planning process.

#### Regional, County and Local Policies

#### Regional

**East Central Wisconsin Regional Planning Commission.** East Central has adopted a regional smart growth plan. As part of this planning effort, East Central has adopted six Utilities and Community Facilities goals:

- Support opportunities for the sustainable and safe management of solid waste and recycling, collection, processing and disposal activities working in a cooperative, regional manner.
- Support efforts to provide electric, gas and telecommunication services to meet industrial and residential needs while being environmentally conscientious.
- Support the provision of efficient quality emergency and non-emergency services in a timely cost-effective manner within the region.
- Work cooperatively to protect and preserve current park, open space, recreational facilities, programs and plan for new facilities, while providing for and balancing the needs of various community groups with the needs of the general public in a financially responsible manner.
- Support a collaborative regional forum to create and implement a strategic policy framework for the continuum of care for the health and well being of the residents of the region.
- Support a variety of meaningful educational options and opportunities for all students.

## County

**Waushara County Zoning Ordinance.** The Waushara County Zoning Ordinance regulates public facilities referenced in this chapter that involve county facilities. The following chapters contain relevant information.<sup>61</sup>

<sup>&</sup>lt;sup>61</sup> Waushara County Zoning and Land Conservation Department. 2006. *Code of Ordinances: Waushara County, Wisconsin.* 

Chapter 30, Parks and Recreation, regulates land, structures and properties owned or leased by the County. This chapter specifies the laws associated with public usage of county parks. Topics discussed include, but are not limited to, park hours, permissible activities, safety standards, and police protection.

Chapter 38, Solid Waste, regulates solid waste and recycling activities in the county. Zoning ordinances are intended to preserve and protect environmental resources, to safeguard public health, and promote county-wide recycling initiatives. This section establishes hours for county waste collection facilities, delineates recycling guidelines, and discusses proper disposal techniques for solid waste.

Chapter 54, Utilities, regulates private on-site wastewater treatment systems within the unsewered portions of the County. This section regulates the proper siting, design, installation, inspection, and maintenance of private on-site wastewater systems (POWTS). The prerequisites necessary for the essential protection of the public health and the environment are the same everywhere. To a lesser extent, POWTS are also regulated by the Health and Sanitation Zoning Ordinance contained within Chapter 22. This ordinance declares that improper disposal of sewage and effluents are a public health hazard.

Chapter 54 is augmented by Comm 87 and Comm 83. Comm 87 requires that all new private on-site wastewater treatment systems be inspected at installation. Comm 83 specifies that all new POWTS must be inspected and maintained by a licensed certified professional. All new or replacement systems must be inspected every three years. POWTS should also be pumped out as mandated by their normal usage. Individual owners are now required to execute a verified affidavit and restrictive covenant running with the land which verifies that the POWTS serving the property is under such a maintenance program. Comm 83 requires that the service providers submit these forms on behalf of the POWTS owner within 30 days of the service. Records are kept on file with individual counties for a period of six years.

Chapter 58, Zoning, establishes the general zoning practices for unincorporated areas of Waushara County. Chapter 58 regulates cell tower heights (58-825), airport height limitations (58-236) and Wireless Communication Facilities (58-236). Cell towers are permitted as conditional uses according to the Waushara County zoning ordinances. Cell towers can be placed anywhere in the county with the exception of shoreland, wetland, or floodplain areas or the Wautoma airport height limitation zone. Although not specifically included in the Waushara County Zoning Codes, additional restrictions could be placed on communication towers.

**Waushara County Outdoor Recreation Plan.** The Waushara County Outdoor Recreation Plan discusses longstanding goals and objectives, inventories existing park and recreation needs and opportunities, and presents recommendations and an action program for addressing the system's growth and development. The current plan was adopted in April 2006.

**Waushara County Solid Waste Plan Update.** The Waushara County Solid Waste Plan Update 1999 inventories current waste management activities, projects future waste volumes, and discusses alternatives that the county may want to consider as they proceed into the future.<sup>62</sup>

<sup>&</sup>lt;sup>62</sup> Waushara County Parks, Recreation, and Solid Waste Department. 1999. *Solid Waste Plan Update.* 

## Local

**Village of Coloma Zoning Ordinance.** The Village of Coloma Zoning Ordinance regulates many of the facilities referenced in this chapter. These include:

Title 3 Public Safety, Chapter 1 – Law Enforcement. This ordinance establishes the police department, duties, salaries, hours of duty, and other items pertaining to the running of a law enforcement department.

Title 3 Public Safety, Chapter 2 – Fire Protection. This ordinance pertains to fire department such as the fire protection agreement with the Town of Coloma, the fire department board and other issues related to fire protection.

Title 3 Public Safety, Chapter 3 – Emergency Government. This ordinance pertains for the provision of emergency government so that the Village of Coloma will be prepared to cope with an emergency in that one occurs.

Title 5 Public Utilities, Chapter 1 – Cable Television. This ordinance allows the Village to grant a Franchise to a Cable Television System.

Title 5 Public Utilities, Chapter 2 – Natural Gas. This ordinance allows Wisconsin Natural Gas Company, the exclusive right, authority and permission to construct, maintain, operate, enlarge and repair a system for the furnishing and distribution of natural gas and natural gaseous fuels within the Village.

Title 5 Public Utilities, Chapter 3 – Sewer Utility. This ordinance allows for the establishment of a public sewer utility in the Village.

## Federal, State and Regional Programs

## Federal Agencies

## United States Environmental Protection Agency (USEPA)

**Water Pollution Control Act.** The Federal Water Pollution Control Act (1977), more commonly known as the Clean Water Act, established the basic structure for regulating discharges of pollutants into surface waters. Effluent standards for wastewater treatment plants and other industrial facilities were established by this landmark legislation. The legislation also provided grants to communities to assist with planning and construction of upgraded facilities. Today, increasing levels of growth and changing treatment standards have caused more recent expansions and improvements of these systems.

**National Pollutant Discharge Elimination System (NPDES) Storm Water Program.** The Clean Water Act also established the National Pollutant Discharge Elimination System (NPDES) Storm Water Program. The comprehensive two–phased program addresses the nonagricultural sources of stormwater discharges which adversely affect surface water quality. A NPDES permitting mechanism requires the implementation of controls designed to reduce the volume of stormwater runoff and the level of harmful pollutants in stormwater runoff. **Safe Drinking Water Act (SDWA).** Drinking water standards are set by the USEPA. The Safe Drinking Water Act (SDWA) requires the USEPA to set primary standards, while individual public water systems must ensure that they are met. Drinking water standards apply to public water systems which supply at least 15 connections or 25 persons at least 60 days of a calendar year. Standards have been set for 90 chemical, microbiological, radiological, and physical contaminants. Non-enforceable guidelines are also set for secondary standards for contaminants that may cause cosmetic effects such as poor taste or odors.

# United States Department of Agriculture

**Rural Emergency Responders Initiative.** The Rural Emergency Responders Initiative can be utilized to strengthen the ability of rural communities to respond to local emergencies. Public bodies and non-profit organizations are eligible to receive funds. Eligible projects include the purchase of equipment, vehicles or buildings for the following types of projects: fire protection, rescue/ambulance, civil defense/early warning systems, communication systems, training facilities, and several other projects. More information can be found at <a href="http://www.rurdev.usda.gov/rhs/cf/Emerg\_Responder/rural\_emergency\_responders\_initi.htm">http://www.rurdev.usda.gov/rhs/cf/Emerg\_Responder/rural\_emergency\_responders\_initi.htm</a>.

Water and Waste Grant and Loan Program. The Water and Waste Grant and Loan Program offers grants and loans to communities with populations of up to 10,000. The funds are utilized to develop water and wastewater systems, including water supply, storage, waste disposal and storm drainage in rural areas. Eligible projects involve the original construction, modification or extension of existing projects. More information can be found at <u>http://www.usda.gov/rus/water/programs.htm</u>.

**Community Facilities Grant Program.** The Community Facilities Grant Program provides assistance to rural communities in the development of essential community facilities. Eligible applicants include public entities with populations less than 20,000. Grant funds may be used to purchase equipment or construct, enlarge, or improve facilities associated with health care, public safety, or community and public services. More information can be found at <u>http://www.rurdev.usda.gov/rhs/cf/brief\_cp\_grant.htm</u>.

## Federal Emergency Management Administration (FEMA)

FEMA offers several annual grant awards to fire departments. Eligible project costs include equipment, supplies, training, emergency work (evacuations, shelters, etc.), and mobilization/ demobilization activities. All municipal jurisdictions with a population of less than 50,000 are eligible to receive funding. Recipients must provide a 10 percent match for all project costs. FEMA also operates disaster relief programs. For additional information see http://www.fema.gov.

# Other Federal Agencies

Federal regulation of telecommunications, radio, and television towers is currently under the auspices of the **Federal Communications Commission (FCC)**, the **Federal Aviation Administration (FAA)**, and the **Occupational Safety and Health Administration (OSHA)**. The FCC issues licenses for new telecommunication facilities by determining the overall need, coordinates frequencies, and regulates tower placement. Communication towers must be located at the most central point at the highest elevation available. The FAA regulates

tower height, coloring, and lighting to ensure aircraft safety. OSHA regulates the occupational exposure to non-ionizing electromagnetic radiation emitted from radio, microwave, television, and radar facilities.

# State Agencies and Associations

**Public Service Commission (PSC).** Public utilities in Wisconsin are regulated by the PSC, an independent regulatory agency. The PSC sets utility rates and determines levels for adequate and safe service. More than 1,400 utilities are under the agency's jurisdiction. PSC approval must be obtained before instituting new rates, issuing stock or bonds, or undertaking major construction projects such as power plants, water wells, and transmission lines.

# Wisconsin Department of Agriculture, Trade, and Consumer Protection (DATCP)

Rural areas are governed by several non-point pollution prevention programs. Small-scale drains are prevalent throughout Waushara County. Administrative rules relating to agricultural runoff include NR-151, ATCP-50, NR-88, and ATCP-48. The first two regulations govern the total suspended solids (TSS) loadings; a 20 percent reduction is required by 2008 and 40 percent reduction by 2013. The latter two regulations pertain to the daily operations and functions of agricultural drainage districts. Primary responsibility for planning for, administering, and enforcing drainage district regulations resides with the county drainage board.

# Wisconsin Department of Commerce

COMM 83 is a health and safety code that sets standards for private on-site wastewater treatment system (POWTS). COMM 83 provides a technical and administrative framework for enforcing POWTS related issues. This legislation regulates traditional septic and mound systems as well as delineates alternative options in which soil conditions and other factors limit the use of these traditional methods of private domestic wastewater treatment. The updated code prescribes specific effluent standards for POWTS.

**Community Development Block Grant – Public Facilities (CDBG – PF).** The Community Development Block Grant – Public Facilities (CDBG – PF) is a versatile tool that allows local units of government to finance public works projects. Projects must enhance the economic vitality of a community by undertaking public investment that contributes to overall community and economic development. Funds can be allocated to a wide array of infrastructure and public building projects, excluding buildings for the conduct of government. Typically, funded projects include improvements or construction of municipal sewer systems, wastewater treatment plants, municipal water systems, and other related projects. More information can be found at <a href="http://www.commerce.state.wi.us/CD/CD-bcf-cdbg-pf.html">http://www.commerce.state.wi.us/CD/CD-bcf-cdbg-pf.html</a>.

**Community Development Block Grant Public Facilities for Economic Development (CDBG – PFED).** The Community Development Block Grant Public Facilities for Economic Development (CDBG – PFED) helps underwrite municipal infrastructure development that retains or promotes business development by creating employment opportunities. Eligible projects include water and sewer systems and roads that are owned by a special purpose unit of government. All local governmental units with populations of less than 50,000 are eligible for funding. More information can be found at <u>http://www.commerce.state.wi.us/CD/CD-bcf-cdbg-pfed.html</u>.

**Wisconsin Fund.** The Wisconsin Fund provides grants to homeowners and small commercial businesses to repair, rehabilitate, or replace an existing private on-site wastewater treatment system (POWTS). Since 1978, the program has provided \$77 million in assistance. Waushara County residents living in areas not serviced by municipal sewer systems are eligible to participate if the annual household income is less than \$45,000. Small businesses with gross revenues totaling less than \$362,700 are also eligible. Waushara County provides assistance to county residents to prepare grant applications. A portion of the funds is used to develop more environmentally friendly systems. More information can be found at http://www.commerce.state.wi.us/SB/SB-WisconsinFundProgram.html.

# Wisconsin Department of Natural Resources

Federal legislation such as the Clean Water Act has served as the impetus for state legislation. Areawide Water Quality Management under Section 208 and the Facility Planning Grant Program under Section 201 mandated the preparation of sewer service area plans for urban areas. These principles have been embodied into Chapters NR-121 and NR-110 of the Wisconsin State Statutes respectively. NR-121 specifies the standards and processes for initiating and continuous areawide wastewater treatment management planning. As provided by NR-121, the WNDR's role is to review and approve every sewer service area plan and its amendments, taking into account water quality impacts and cost-effectiveness. NR-110 regulates site-specific facility planning and sanitary sewer extensions. Decisions regarding the extension or expansion of wastewater collection facilities are made primarily at the local level.

**Wisconsin Solid Waste Management Program.** Begun in the 1970s, the Wisconsin Solid Waste Management Program regulates existing landfills and provides assistance to local governments. The program delineates all environmental regulations and standards that landfills must adhere to including construction specifications, water monitoring requirements, and sanitary procedures. The program inventories and licenses all operating and proposed solid waste facilities. Periodic updates are performed to ensure that environmental protection standards are the most current based on data collection.

**Wisconsin Act 335.** In 1989, Wisconsin Act 335 was passed. This law governs the recycling programs within the state. Recycling programs for all commercial and residential entities were mandated under this legislation. The intent of the legislation is to divert recyclable material and various household hazardous wastes from landfills. Municipal governments are responsible for arranging residential programs, and the WDNR oversees and supports these efforts.

**NR-809.** Drinking water standards are also maintained at a state level. NR-809 regulates the design, construction, and proper operation of public water systems. The WDNR also assures that regulated contaminants are adequately monitored.

**Knowles-Nelson State Stewardship.** The Knowles-Nelson State Stewardship Fund is a land acquisition program for the State of Wisconsin. Created by the state legislature in 1989, \$60 million dollars per year is utilized to purchase lands for parks and other recreational purposes. An important component of the program is the cooperation between the DNR and local governments and non-profit organizations. The program offers a 50 percent grant

match to create parks, hiking trails, hunting grounds, and other facilities. The funds can also be utilized for facilities improvements such as road construction and capital acquisition projects (picnic equipment, playgrounds, etc.). More information can be found at <u>http://dnr.wi.gov/org/caer/cfa/lr/stewardship/stewardship.html</u>.

**Clean Water Fund Program (CWFP)**. The Clean Water Fund Program (CWFP) offers loans and hardship grants to any town, village, city, county utility district, public inland lake protection & rehabilitation district, metropolitan sewerage district or federally recognized American Indian tribe or band to construct or modify municipal wastewater systems or construct urban storm water best management practices. More information can be found at <u>http://dnr.wi.gov/org/caer/cfa/BUREAU/CleanWaterFund.pdf</u>.

**Safe Drinking Water Loan Program (SDWLP)**. The Safe Drinking Water Loan Program (SDWLP) offers loans to any city, village, town, county, sanitary district, public inland lake protection & rehabilitation district, or municipal water district to construct or modify public water systems to comply with public health protection objectives of the Safe Drinking Water Act. More information can be found at <u>http://dnr.wi.gov/org/caer/cfa/EL/Section/drinkingwater.html</u>.

## Wisconsin Pollutant Discharge Elimination System (WPEDS) Storm Water Program.

The NPDES program is administered by the WDNR through NR-216. The Wisconsin Pollutant Discharge Elimination System (WPEDS) Storm Water Program regulates stormwater discharge from construction sites, industrial facilities, and selected municipalities. Recent Phase II requirements will require six minimum control measures to be addressed by communities and other local entities: public education, public participation, illicit discharges, construction site pollutant control ( $\geq$  1 acre in size), post construction site stormwater management, and pollution prevention. More information can be found at <u>http://dnr.wi.gov/org/water/permits/wpdes.htm</u>.

**Well Compensation Program.** The Well Compensation Program provides grants to owners of contaminated private water supplies that serve a residence or are used for livestock. Contamination can not be bacterial in nature. Eligibility is determined based on annual family income. More information can be found at

http://dnr.wi.gov/org/caer/cfa/Grants/wellcomp.html

## Department of Public Instruction (DPI)

The Wisconsin Constitution as it was adopted in 1848 provided for the establishment of district schools that would be free to all children age 4 to 20. Subsequent laws allowed a property tax to be collected to fund school programs. Today, the Department of Public Education (DPI) oversees the operations of school systems and sets state standards for educational curricula, teacher certification standards, and other educational programs.

## Wisconsin Community Action Program Association (WISCAP)

**Rural Community Assistance Program (RCAP).** Rural Community Assistance Program (RCAP) offers training and technical assistance to small (under 10,000), rural, low income communities, sanitary districts, and isolated rural areas for problems related to water and wastewater system development. More information can be found at <u>http://www.wiscap.org/rcap\_what\_is\_rcap.htm</u>.

#### Board of Commissioners of Public Lands (BCPL)

**State Trust Fund Loan Program.** The State Trust Fund Loan Program offers loans to municipalities, lake districts, metropolitan sewerage districts and town sanitary districts for a wide variety of municipal purposes. More information can be found at http://bcpl.state.wi.us/.

#### Wisconsin Rural Water Association

The Wisconsin Rural Water Association offers rural communities with populations of less than 10,000 grants, loans, and technical assistance for approved Rural Utility Service, Clean Water, Safe Drinking Water and Brownfield projects. More information can be found at <a href="http://www.wrwa.org">http://www.wrwa.org</a>.

#### **Regional Agencies**

**East Central Wisconsin Regional Planning Commission (ECWRPC).** ECWRPC acts in an advisory and regulatory role for Sewer Service Area (SSA) Plans. ECWRPC has prepared detailed long range plans for 26 wastewater treatment plants to address growth and ensure water quality within the region. These plans were developed and administered by East Central through an agreement with the Wisconsin DNR. ECWRPC also acts in an advisory capacity to WDNR and provides recommendations on various plan updates, amendments, facilities plans, and sewer extensions.

(Page left blank intentionally)

# UTILITIES AND COMMUNITY FACILITIES – Village of Coloma

# GOAL CF 1: Provide high-quality and cost effective community facilities and services that meet existing and projected future needs.

# STRATEGY CF 1.1: Provide adequate services and facilities in a fiscally responsible manner.

- RECOMMENDATION CF 1.1.1: Prepare a Capital Improvement Program (CIP) to comprehensively address the Village of Coloma's future needs by programming the timing and funding for undertaking identified projects. A CIP will allow the Village to make sure that an adequate level of facilities is being maintained. To ensure an adequate level of services, the Village should monitor growth that is occurring and develop a plan that addresses necessary public and community facility needs, timing and funding.
- RECOMMENDATION CF 1.1.2: Continue to explore opportunities for shared services within Waushara County, neighboring municipalities (including the Town of Coloma), the Westfield School District, and other public entities. The Village has developed strong working relationships with the Town of Coloma, the Westfield School District and its neighbors. However, there may be other opportunities to partner with the Westfield School District, the Town of Coloma, Waushara County and others to provide expanded benefits to the elderly, youth and the general population of the Village. These activities could include:
  - Work with the Westfield School District, local churches, youth groups, and civic organizations to establish a program that would provide benefit to elderly residents for light home and/or lawn maintenance.
  - Work with Waushara County to cooperatively address the needs of the area's aging population when planning new facilities.
- RECOMMENDATION CF 1.1.3: Promote the exchange of information with utilities, adjacent municipalities (including the Town of Coloma), the Waushara County Highway Department, WisDOT and others to encourage the coordinated scheduling of planned roadway and utility improvements. Communication is key to controlling costs. Projects are often scheduled many years in advance. If a road is scheduled for reconstruction, it is more cost effective to do all improvements at the same time. This will eliminate the need to tear up and patch a new road. To accomplish this recommendation, the Village of Coloma should work with Waushara County to establish annual meetings with utilities (gas, electric, and telecommunications), neighboring communities, and WisDOT to discuss upcoming projects.
- RECOMMENDATION CF 1.1.4: Promote coordination and cooperation between community partners (civic organizations, local government, Westfield School District and others). Civic organizations and others provide a valuable service to the community. These organizations assist in the maintenance and development of the Coloma Community Park and local library. To ensure that community needs are being met, the Village should annually meet with local organizations to discuss priority areas.

STATEGY CF 1.2: Encourage the use of existing structures for placement of new communication system towers.

- RECOMMENDATION CF 1.2.1: Encourage the Village to adopt a cell tower ordinance. The Federal Telecommunications Act of 1996 allows the retention of local control over many aspects of wireless facilities. Municipalities can exert reasonable control over tower aesthetics, including height restrictions, co-location, setbacks, safety and other design issues. Towers must be located where they do not interfere with aviation, specifically the flight paths of airport facilities or in areas where activities such as aerial crop dusting is prevalent.
- **RECOMMENDATION CF 1.2.2: Promote opportunities for shared mountings.** Some types of structures are conductive to hosting more than one provider. When possible, structures should be utilized that can accommodate multiple installations, thus reducing the total number of separate towers.

# GOAL CF 2: Maintain and enhance recreational opportunities in the community.

**STRATEGY CF 2.1:** Provide adequate active and passive recreational opportunities for local residents.

- **RECOMMENDATION CF 2.1.1: Encourage Waushara County to maintain a** *quality county park system and provide improvements identified in its Outdoor Recreation Plan.* The county park system not only provides recreational opportunities for local residents, it also attracts visitors to the county.
- **RECOMMENDATION CF 2.1.2:** Continue to jointly share in the maintenance and upkeep of the Coloma Community Park and support and recognize the efforts of the "Friends of the Park", a local volunteer organization. While the park is located within the Village of Coloma, it is utilized by both town and village residents.
- RECOMMENDATION CF 2.1.3: The Village and Town of Coloma should jointly prepare an outdoor recreation plan for the area. An outdoor recreational plan would allow for the Village to cost effectively plan for the improvement of existing facilities and the development of new facilities. It would provide an inventory of existing recreational resources and identify recreational needs and opportunities. Plan recommendations and an action program would be develop and could be used as a guide by the communities. An outdoor recreation plan would not only serve as a useful tool, but it would also allow the communities to remain eligible for participation in the WDNR administered funding program. Since the Village and Town of Coloma share many of the same outdoor recreational facilities, any outdoor recreation plan should be a joint effort between the two communities.
- RECOMMENDATION CF 2.1.4: Support the Westfield School District and the Waushara County Park Department in the establishment of local youth and adult recreational programs and fitness classes. The Westfield School District operates the Coloma Elementary School in Coloma. School facilities could be used to

hold youth and adult recreational programs in the evenings and on the weekends. Additionally, the School Forest provides residents with opportunities to enjoy the outdoors. Hiking and cross-country skiing trails are available for local use.

- **RECOMMENDATION CF 2.1.5: Continue to support community-based organizations involved in re-vitalization and other community betterment activities.** Parks in many small communities, where little funds are budgeted for park improvements, often suffer from deteriorated facilities, lack of upkeep, and inadequate day-to-day maintenance. Soliciting the support of volunteers can be an effective way to make local parks more attractive and provide the funding for building and upgrading facilities.
- **RECOMMENDATION CF 2.1.6: Encourage local residents to consider estate planning techniques that gift land and/or money for projects in the Village.** Major donations can be effective in enabling a community to provide parks and recreational facilities it could not undertake relying strictly on taxes.
- RECOMMENDATION CF 2.1.7: Development of or designation of an area for sledding or other outdoor winter activities.
- **RECOMMENDATION CF 2.1.8:** Institute the use of park dedication fees to help fund new park facilities and investigate other funding options. Park dedication fees can be collected by municipalities to fund new park facilities.

# GOAL CF 3: Promote quality schools and access to educational programs.

**STRATEGY CF 3.1: Ensure that new or renovated school facilities serve not only the needs of the school district but also the needs of the community.** It is not only important that community needs be considered in the design of school facilities, but community involvement should also be sought in the placement of these facilities. This will ensure that the necessary infrastructure is in place to serve the facility.

• RECOMMENDATION CF 3.1.1: Work with the Westfield School District to plan new or renovate existing facilities.

STRATEGY CF 3.2: Ensure that residents have access to educational opportunities and programs.

RECOMMENDATION CF 3.2.1: Work with the Waushara County Economic Development Corporation, the Tri County Economic Development Corporation, local businesses, public service departments, Fox Valley Technical College and others to bring additional educational opportunities to Waushara County and the Coloma area. This should include an expansion of program offerings at the Wautoma Campus and distance learning classes to the Coloma area. An assessment of existing business needs should be made as well as training opportunities for the local law enforcement, fire departments and emergency personnel. **GOAL CF 4: Encourage improved access to health and childcare facilities.** Residents currently must travel to the City of Wautoma or other areas for healthcare. This will be changing in the future when a new medical clinic is complete. However, healthcare facilities are still needed to meet the demands of the local population.

STRATEGY CF 4.1: Strive for expansion of healthcare services in the Coloma area.

- RECOMMENDATION CF 4.1.1: Work with Waushara County Health and Human Services, Tri-County Economic Development Corporation, Waushara County Economic Development Corporation, adjacent communities, state representatives and others to encourage other medical providers (dentist, chiropractor, hearing aide specialist, etc.) to establish a practice that would provide part-time services to Coloma residents.
- **RECOMMENDATION CF 4.1.2:** Work with the proposed medical clinic to include a pharmacy in the design of their new facility.
- RECOMMENDATION CF 4.1.3: Work with the Waushara County Department of Aging and Human Services to assess the current level of services and identify any system gaps.

STRATEGY CF 4.2: Support improved transportation opportunities which help residents' access local and regional healthcare.

• **RECOMMENDATION CF 4.2.1:** Promote volunteering for the Waushara County elderly and disabled transportation programs.

STRATEGY CF 4.3: Encourage expansion of childcare facilities in the Coloma area.

- RECOMMENDATION CF 4.3.1: Support school districts or local community organizations who wish to sponsor childcare programs.
- **RECOMMENDATION CF 4.3.2: Support requests for the development of properly located and operated childcare facilities.** Licensed childcare facilities, including in home childcare, are considered a business. Therefore, zoning and subdivision covenants often preclude their development in residential areas.

#### GOAL CF 5: Continue the high level of existing community involvement.

STRATEGY CF 5.1: Support activities that encourage community involvement and interaction and instill "Community Pride".

• RECOMMENDATION CF 5.1.1: Encourage the continuation of existing community activities including the Coloma Chicken Chew, Pleasant Lake Fishery, community dances, and local softball and basketball tournaments.

GOAL CF 6: Ensure the proper treatment of wastewater to protect public health, ground and surface water quality, while meeting current and future needs.

STRATEGY CF 6.1: Ensure that the wastewater treatment facility and collection system meets the current and future needs of the Village.

- RECOMMENDATION CF 6.1.1: In the future address the needs of the aging wastewater treatment facility by implementing the preferred option recommended in the Wastewater Treatment Facilities Plan developed by Strand Associates, Inc. in August 2003. While the facilities plan indicates that the existing wastewater treatment facility has reached it usefulness and must be replaced, the Village has been able to extend the life of the existing plant through maintenance activities. Nevertheless, while the plant is currently functioning within acceptable standards, eventually a replacement facility will be needed.
- **RECOMMENDATION CF 6.1.2:** Work with the Village engineer to purchase land, if necessary, for future wastewater treatment expansion.
- RECOMMENDATION CF 6.1.3: Assess incompleteness of wastewater coverage within the village and cost-effectively address expansion of the existing system. The current wastewater collection system does not provide coverage to the entire Village of Coloma. Areas in the southeast corner, the northwest corner and west of 1-39 are not currently served by public wastewater collection. The ultimate goal of the Village should be to expand public sewer.

**STRATEGY CF 6.2:** Coordinate the orderly extension of service to areas not currently served by public sewer.

• **RECOMMENDATION CF 6.2.1: Encourage new development to occur adjacent to existing development.** Even if the developer underwrites the cost of extending utilities, there is a long-term cost to the utility in maintenance and replacement. A logical extension of existing lines to areas immediately adjacent to those already served minimizes these costs.

STRATEGY CF 6.3: Encourage development to occur within areas that are already sewered.

• **RECOMMENDATION CF 6.3.1: Encourage infill development to occur within the Village over the extension of sewer to areas not currently served.** Infill development utilizes existing infrastructure and is more cost-effective for the Village.

STRATEGY CF 6.4: Work with Waushara County to protect public health and ground and surface water quality.

• RECOMMENDATION CF 6.4.1: Support and assist residents and business owners, not currently served by public sewer, to comply with Waushara County POWTS monitoring program.

• **RECOMMENDATION CF 6.4.2:** Work with residents, not currently served by public sewer, to ensure that aging POWTS are addressed before they fail. Priority should be given to extending service to these areas.

GOAL CF 7: Ensure that the public water system has sufficient capacity, is in compliance with the drinking water quality standards and regulations, and is able to meet present and future needs.

STRATEGY CF 7.1: Ensure that the water system meets the current and future needs of the Village.

- RECOMMENDATION CF 7.1.1: Assess incompleteness of water system coverage within the village and cost-effectively address expansion of the existing system. The current water collection system does not provide coverage to the entire Village of Coloma. Areas west of I-39 and the southeast portion of the Village are not currently served by public water collection. The ultimate goal of the Village should be to expand public water to these areas.
- **RECOMMENDATION CF 7.1.2:** Develop and adopt a wellhead protection ordinance that will protect the source of the village water supply.
- **RECOMMENDATION CF 7.1.3: Address the aging public water system.** During the visioning process, a weakness identified the water system as needing addressing. The Village of Coloma public water system was installed in the late 1930's. Due to the age of the system, pipe breakage is occurring. Currently, the village has been addressing pipe failures as they occur.
- RECOMMENDATION CF 7.1.4: Work with the Town of Coloma and Waushara County to ensure that the wellhead protection plan is being enforced within the Town of Coloma.

**STRATEGY CF 7.2:** Coordinate the orderly extension of service to areas not currently served by public water.

 RECOMMENDATION CF 7.2.1: Encourage new development to occur adjacent to existing development. Even if the developer underwrites the cost of extending utilities, there is a long-term cost to the utility in maintenance and replacement. A logical extension of existing lines to areas immediately adjacent to those already served minimizes these costs.

STRATEGY CF 7.3: Encourage development to occur within areas that already have access to public water.

• **RECOMMENDATION CF 7.3.1: Encourage infill development to occur within the Village over the extension of water to areas not currently served.** Infill development utilizes existing infrastructure and is more cost-effective for the Village. GOAL CF 8: Provide a level of law enforcement, fire and emergency services, and municipal solid waste and recycling collection that meets present and future needs.

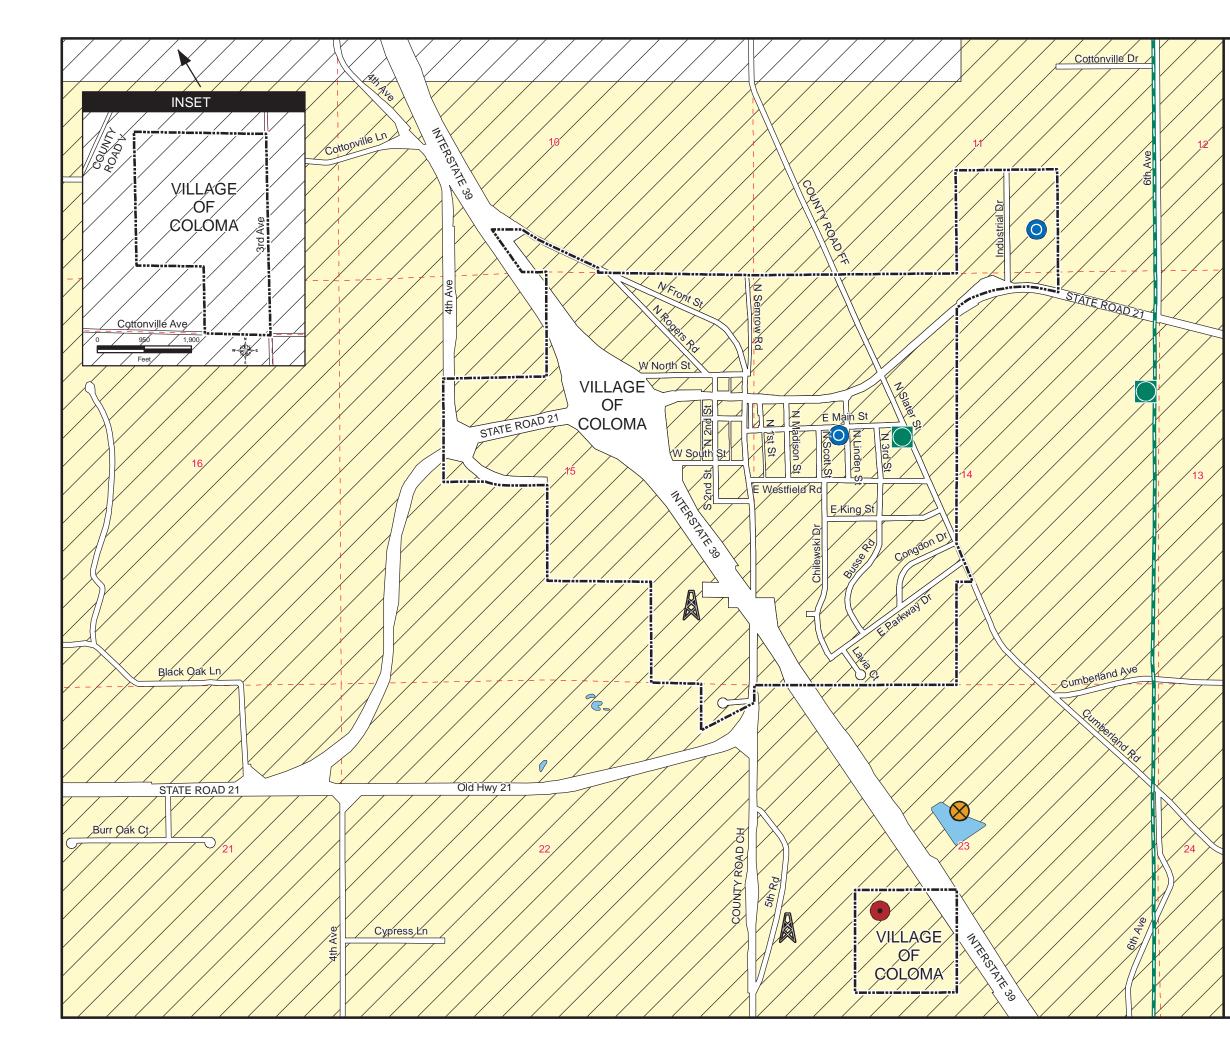

STRATEGY CF 8.1: Continue to work with Waushara County, the Town of Coloma and others to provide these services to Village residents.

• **RECOMMENDATION CF 8.1.1:** Periodically evaluate levels of service including response time to ensure that the interests of Village residents are being served.

#### GOAL CF 9: Promote energy efficiency in governmental operations and utilities.

**STRATEGY CF 9.1: Realize cost savings through the incorporation of energy saving policies and practices.** Some energy saving practices are relatively inexpensive yet provide significant cost savings. These practices could include replacing light bulbs with more energy efficient ones, turning off lights when not in the room, turning off the computer and other electronics when they are not in use, providing adequate roof insulation, utilizing biodiesel fuels, purchasing energy star equipment and more fuel efficient vehicles.

- RECOMMENDATION CF 9.1.1: Evaluate existing facilities and practices to determine energy saving techniques that would be relatively inexpensive to complete and/or would have the largest impact.
- RECOMMENDATION CF 9.1.2: When purchasing new equipment, updating existing facilities or building new facilities consider energy efficiency in any decisions.

#### CHAPTER 6: AGRICULTURAL, NATURAL, AND CULTURAL RESOURCES

#### INTRODUCTION

Agricultural, natural, and cultural resources give definition to a community and strongly affect its quality of life. For communities in Waushara County, a tapestry of working farms interwoven with large stands of woodlands and wetlands continue to dominate the rural landscape and help shape the area's identity and culture. The County's natural features such as topographic relief, lakes, streams, wetlands and soils also have a significant bearing on historic and contemporary land use, development patterns and contribute to a strong heritage of outdoor recreational pursuits. Fishing, swimming, hunting, and other outdoor activities are important quality of life past-times. The area's lakes and other scenic landscape features provide attractive home sites for many permanent and seasonal residents. At the same time, many of these environmental elements have limiting conditions that make them less than ideal for supporting particular types of activity or development. Understanding the relationship between these environmental characteristics and their physical suitability to accommodate specific types of activity or development is a key ingredient in planning a community's future land use.

#### Agriculture, Natural and Cultural Resources Vision for 2030

In 2030, the Village of Coloma is a vibrant rural community and agriculture continues to thrive in western Waushara County. Family and small corporate farms comprised of extended families and/or neighbors have become profitable by working closely with the educational and business community to identify new markets, products and processes. Their efforts have been aided by new agricultural-based businesses that have located in the Village of Coloma's Industrial/Business Parks. The Village, working with local farmers and craftsman, provides an outlet for locally grown and produced products. Many local restaurants, including the local school, utilize locally grown food in their daily menus.

While new residential growth continues to occur, it has generally occurred in ways that respect the integrity of the areas natural resources. These efforts have helped preserve the rural character so valued by local residents. Surrounded by the Town of Coloma and other area communities, the Village of Coloma enjoys an abundance of natural resources. These resources provide Village residents with access to the Ice Age Trail, the Chaffee Creek Fishery, Pleasant Lake and other nearby local lakes, the school forest and area hiking and snowmobile trails.

The Coloma Historical Society maintains an active presence in the Village of Coloma. Through their efforts a local collection of historic memorabilia has been preserved and showcased. This has given residents and school children the opportunity to learn about local history. The group has also been instrumental in identifying and assisting local businesses and homeowners in the rehabilitation of historic homes and businesses. A multitude of cultural and entertainment opportunities exist within the immediate area. Amish Settlements in the Coloma and Richford area provide residents and visitors with exposure to a simpler life. Entertainment is provided by the Clauson Family Theater (dinner shows, arts and crafts festivals) and the Coloma Players (Year round performances). Local social groups such as the quilters club, yarn club and scrapbooking club utilize the Anna Follet Memorial Community Center for meeting. The Center is also used by seniors in area as a meal site and social center. Area residents continue to rely on easy access to outlying urban centers to meet many of their cultural and entertainment needs. The McComb/Bruchs Performing Arts Center in Wautoma attracts professional talent and is an important county asset.

#### **INVENTORY AND ANALYSIS**

This chapter provides an inventory of existing agricultural, natural, and cultural resources. In addition, existing policies associated with these resources are discussed.

#### Agricultural Resources

Waushara County farmers produce a variety of feed and cash crops. Farming and other agricultural activities contribute significantly to the local economy. As with elsewhere in rural Wisconsin, these trends are changing as new developments encroach on productive farmland. The suburbanization trend is of great concern to both farmers and residents of the County.

#### Farmland Soils

Waushara County's farmland contributes to the quality of life, provides an open agricultural landscape, and adds to the economy of the area. A classification system rating the suitability of a specific area based on soil type and condition was developed by the U.S. Department of Agriculture.<sup>1</sup> These classifications in order of importance are: 1.) prime farmland, 2.) unique farmland, 3.) farmlands of statewide importance, 4.) farmlands of local importance, and 5.) other lands. Table 6-1 and Exhibit 6-1 summarize the distribution of available farmland in these categories.

**Prime farmland**, as defined by the U.S. Department of Agriculture is "the land that is best suited for food, feed, forage, fiber, and oilseed crops" when managed according to acceptable farming methods. These lands may be cultivated, pasture, woodland, or other land, however the land cannot be built-up, urbanized, or a water area. Prime farmland produces the highest yields with minimal inputs of energy and economic resources with the least damage to the environment. Criteria used to determine prime farmland include an adequate and dependable supply of moisture from precipitation or irrigation, few or no rocks, high permeability, gently sloping terrain (0 to 6%) and a low erodiblity. Prime farmland is not frequently flooded during the growing season or saturated with water for long periods of time. Soils that have a seasonal high water table may qualify as prime farmland if this limitation is overcome by drainage measures.

**Unique farmland** is defined as land other than prime farmland that is used to produce specific high-value food or fiber crops. It has a moisture supply, either from stored precipitation or irrigation systems, and combines favorable factors of soil quality, growing season, temperature, humidity, drainage, elevation, aspect or other conditions. Examples of specialty crops that typically require a high management and investment level include apple orchards, lettuce, carrots, celery, and cauliflower.

**Farmlands of statewide importance** are lands in addition to prime and unique farmland that are important to the State of Wisconsin for crop production.

**Farmlands of local importance** are lands in addition to the previous three categories which are important to Waushara County for crop production.

<sup>&</sup>lt;sup>1</sup> USDA. 1993. USDA Handbook 18: Soil Survey Manual.

Other lands are areas which have little value for producing crops.

According to the above criteria, the highest percentage of land within the Village of Coloma is considered local importance farmland. Within the Village, 35.1 percent (330 acres) is classified as local importance farmland. Unique farmland classification is the second most abundant category of farmland (31.4%) with a total of 295 acres. *Only 70 acres or 7.5 percent of the land in the Village of Coloma is considered prime farmland.* Approximately 14 percent (126 acres) of land is considered state importance farmlands, while approximately 13 percent (118 acres) of the land is classified as other lands (Table 6-1, Exhibit 6-1).

	V. Coloma					
Farmland Class	Acres	Percent				
Prime Farmland	70	7.5%				
Unique Farmland	295	31.4%				
State Importance	126	13.5%				
Local Importance	330	35.1%				
Other Lands	118	12.5%				
Water	0	0.0%				
Total	939	100.0%				

Table 6-1. Important Farmland Classes

Source: USDA-NRCS, 1982, Waushara County, 2003.

#### Natural Resources

This section will describe the general soils' associations of the Village of Coloma together with the soils' suitability for on-site waste disposal, septage spreading, the potential for building site development and steep slopes. It will also explain the water resources of the area including watersheds and drainage; lakes, ponds and quarries; rivers and streams; floodplains; wetlands and groundwater. Wildlife, parks, open space, recreational and mineral resources will also be touched upon.

#### Soils

Soils provide the physical base for development and agriculture within a community. Knowledge of their limitations and potential difficulties is important in evaluating crop production capabilities and other land use alternatives such as residential development, and utility installation. The criteria considered by the Natural Resource Conservation Service (NRCS) in establishing the severe rating of soils include wetness, shrink–swell potential, bearing strength, susceptibility to flooding, land spreading, slope steepness, and frost action.<sup>2</sup> Severe soil limitations do not necessarily exclude areas from being developed, but instead indicate that more extensive construction measures must be taken to prevent environmental and property damage.

Soils are classified according to their associations, which are a grouping of similar soil types based on geographic proximity, physical characteristics, and permeability. There is one major soil association within the Village of Coloma.

<sup>&</sup>lt;sup>2</sup> U.S. Department of Agriculture Soil Conservation Service. 1989. *Soil Survey of Waushara County, Wisconsin.* 

**Plainfield-Okee-Richford Association soils** are sloping to steep sandy soils located on moraines, hills, and terraces. Plainfield soils are rapidly permeable and excessively drained, while Okee and Richford soils are moderately permeable and somewhat excessively drained. Slopes range from 6 to 30 percent. While some of the Richford soils are used for cropland, most acreage in this association is used for woodlands. These soils are especially suited for pine species.

#### On-Site Waste Disposal

The Village's developed areas, with a few exceptions, are served by public sewer (see Utilities and Community Facilities Chapter). Exhibit 6-2 identifies suitability for on-site waste disposal options based on an evaluation of soil characteristics. This map is not intended to serve as a substitute for on-site soil investigations, but rather as an indicator of reasonable expectations for soils underlying a site.

Evaluation of the soil data indicates that the vast majority of the soils in the Village of Coloma (96%) are rated suitable for conventional or at-grade in-ground pressure or mound systems. Generally, soils near streams and rivers are the least suitable for on-site waste disposal.

Although the vast majority of developed areas within the Village are served by public sewer, soil evaluation data shows *almost all of the Village of Coloma is suitable for conventional systems* (Table 6-2).

	Conventi	onal	At-C	Grade <sup>1</sup>	Holdin	g Tank <sup>2</sup>	Uns	uitable	No	Rating	W	ater	Total
Community	Acres	Percent	Acres	Percent	Acres	Percent	Acres	Percent	Acres	Percent	Acres	Percent	Acres

Table 6-2. Soil Limitations for On-Site Waste Disposal

<sup>1</sup>Includes in-ground pressure and mound systems.

<sup>2</sup>Includes new technology systems producing 10<sup>4</sup> or less coliform fecal units (cfu) per 100ml. Source: USDA-NRCS, 1982, Waushara County, 2003.

#### Building Site Development

The USDA-Natural Resource Conservation Service has evaluated soil characteristics and rated soil potential for building site development based upon wetness, shrink-swell potential, bearing strength, susceptibility to flooding, slope steepness, and frost action. The ratings range from low to very high potential. Typically, areas near flowages and in wetlands have the lowest ratings. Exhibit 6-3 identifies soil potential for building site development. *Over three-quarters of the area within the Village of Coloma (84.1%, 790 acres) have soils that are considered to have a very high suitability for building site development*, while an additional 11.6 percent (109 acres) have a medium suitability (Table 6-3). Approximately 4 percent (40 acres) of the Village is rated very low or is not rated for building site developments. Less suitable areas are found in the Village located south of the Village proper.

		00111	0101111		ananig		10100

Table 6-3	Soil Potential for Building Site Development
	Solid Otential for Building Site Development

Source: USDA-NRCS, 1982, Waushara County, 2003.

#### Septage Spreading

The Waushara County Land Conservation Office has evaluated soil characteristics for the suitability of septage spreading based on groundwater depths, permeability, soil texture, slope, wetness, and soil depths (Exhibit 6-4). The ratings range from none or slight to severe. Soils rated slight are relatively free of limitations that affect the intended use or have limitations that are easily overcome. Soils with moderate limitations can normally be overcome with corrective planning, careful design, and good management. Soils rated severe have physical limitations which are severe enough to make the use of the soil doubtful for the proposed use. Septage spreading cannot occur within 300 feet or rivers and streams or within 1,000 feet of lakes unless they are incorporated into the soil within 72 hours of application. Spreading rates need to be based on current soil tests, on-site vegetation, and a septic nutrient test.

# Although the Village's soils are rated for septage spreading (Table 6-4), actual land spreading does not occur within the Village limits.

			1.001				<u>ugo op</u>	loadini	1		
	None to Slight		Moderate		Severe		No Rating		Water		Total

Table 6-4. Soil Limitations for Septage Spreading

Source: USDA-NRCS, 1982, Waushara County, 2003.

# Geography and Topography (Scenic Resources)

Local communities in Waushara County are defined by diverse topographical features.<sup>3</sup> Evidence of several phases of the Wisconsin Glacier can be found in the County.<sup>4</sup> The western edge of the County is a flat outwash plain. A narrow moraine is located on the eastern boundary of this outwash plain extending through the villages and towns of Coloma, Hancock and Plainfield. This moraine creates a groundwater divided separating the county's groundwater flow east and west. Central Waushara County (City of Wautoma, Village Wild Rose and surrounding towns) gradually flattens to a rolling plain as one moves eastward across the County. The eastern third of the County is a gently rolling lake plain. The southeastern areas of Waushara County were once occupied by Lake Oshkosh and are characterized by relatively flat to gently rolling plains. The glacial plain areas of Waushara County have

<sup>&</sup>lt;sup>3</sup> WDNR, *Ecological Landscapes of Wisconsin; 2001* 

<sup>&</sup>lt;sup>4</sup> Dutch, S. 2003. *Lake Oshkosh Drainage*. http://www.uwgb.edu/dutchs/geolwisc/geohist/wi12ka.htm

expansive deposits of red clay and organic-rich soils.<sup>5</sup> This combination has resulted in expansive wetlands and valuable agricultural areas.

As a result of glacial activity, land relief within Waushara County is quite varied.<sup>6</sup> Within the Village of Coloma, land relief is approximately 80 feet, from a low of 1,020 feet above sea level on the eastern edge of the Village to a high of 1,100 on the western edge.

#### Steep Slopes

Exhibit 6-5 indicates areas that have slopes greater than 12 percent. *Four percent (37 acres) of the Village of Coloma is classified as having slopes in excess of 12 percent* (Table 6-5). In the Village of Coloma, steep slopes are concentrated along the outer moraine (east of 139). Steep slopes are generally found in conjunction with moraines, drumlins, and other glacial features.

 Table 6-5.
 Steep Slopes

Source: USDA-NRCS, 1982, Waushara County, 2003.

#### Water Resources

Water resources are sources of water that are useful or potentially useful to humans. Water is important because it is needed for life to exist. Water is used for household, agricultural, recreational, industrial and environmental activities.<sup>7</sup> Essentially all these uses require fresh water.

#### Watersheds and Drainage

The WDNR has divided the state into 24 hydrological based geographic management units (GMUs) or basins. Each GMU is further divided into smaller units based on smaller subwatersheds. The Wisconsin DNR has completed several reports analyzing water quality for designated GMUs.<sup>8</sup>

*Surface water drainage for the Village of Coloma is located entirely within the Upper Fox River Basin.* The Upper Fox River Basin covers 2,090 square miles and is comprised of fifteen different sub-watersheds.

The Village of Coloma falls within one sub-watershed (Exhibit 6-5):

<sup>&</sup>lt;sup>5</sup> Attig, J., et al. 2005. *Glacial Lakes Wisconsin and Oshkosh: Two Very Different Late-Glacial Ice-Marginal Lakes.* http://gsa.confex.com/gsa/2005NC/finalprogram/abstract\_86950.htm

<sup>&</sup>lt;sup>6</sup> USGS. 1984. USGS 7.5 Minute Quadrangle Maps.

<sup>&</sup>lt;sup>7</sup> Wikepedia, <u>http://en.wikepedia.org/wiki/Water\_resources</u>, 2/16/07.

<sup>&</sup>lt;sup>8</sup> WDNR. 2002 . *State of the Basin Reports.* http://dnr.wi.gov/org/gmu/stateofbasin.html

• The Mecan River sub-watershed (Upper Fox River Basin) encompasses 69 square miles.

#### Lakes, Ponds and Quarries

The majority of lakes within Waushara County are natural and of glacial origin. Sandy soils readily allow for the percolation of precipitation into the ground rather than overland flow directly to surface waters. This results in a continual recharge of the shallow aquifer underlying the county and surrounding region.<sup>9</sup> *There are no lakes and/or impoundments found within the Village of Coloma*.

Lakes can be described as drainage, seepage, spring, or drained lakes. The vast majority of Lakes within Waushara County are classified as seepage lakes. Seepage lakes do not have an inlet or an outlet and are recharged by precipitation and runoff supplemented by groundwater. Seepage lakes commonly reflect groundwater levels and can fluctuate seasonally.

The second most common type of lake in Waushara County are drainage lakes. These lakes have both an inlet and an outlet; the main water source is stream drainage. Drainage lakes, in which one-half of the maximum depth is dependent on a dam, are considered to be artificial lakes or impoundments.

Waushara County has a small number of spring lakes, primarily scattered throughout north central and south central Waushara County (Towns of Springwater, Saxeville, Mount Morris, Leon, Dakota, and Richford). Spring lakes have an outlet, but have no inlet. The primary source of water is groundwater flowing into the bottom of the lake from inside and outside the immediate surface drainage area. Spring lakes are the headwaters of many streams.

Waushara County has one listed drained lake (located in Mount Morris). Drained lakes have no inlet, but have a continuously flowing outlet. Drained lakes are not groundwater fed. The primary source of water is from precipitation and direct drainage from the surrounding land. Water levels fluctuate depending on the supply of water.

#### **Rivers and Streams**

*There are no named rivers/streams in the Village of Coloma.* However, there are several unnamed creeks throughout the County. In addition, agricultural ditches have been constructed throughout Waushara County to drain excess water from agricultural fields.

#### Floodplains

Areas susceptible to flooding are considered unsuitable for development due to potential health risks and property damage. *There are no floodplains in the Village of Coloma*. However Flood Insurance Rate Maps for the unincorporated portions of Waushara County identify areas lying within the Town of Coloma.<sup>10</sup> Approximately 1.2 percent (260 acres) of the land within the Town of Coloma is included in a floodplain.

<sup>&</sup>lt;sup>9</sup> WDNR. 1970. *Surface Water Resources of Waushara County*.

<sup>&</sup>lt;sup>10</sup> FEMA. 1985. *Flood Insurance Rate Maps.* 

#### Wetlands

Wetlands act as a natural filtering system for nutrients such as phosphorous and nitrates. More importantly, wetlands serve as a natural buffer protecting shorelines and stream banks from erosion. Wetlands are essential in providing wildlife habitat, flood control, and groundwater recharge. Consequently, local, state, and federal regulations place limitations on the development and use of wetlands and shorelands. The U.S. Army Corps of Engineers has authority over the placement of fill materials in virtually all wetlands two acres and larger or adjacent to navigable waters. The Wisconsin Department of Natural Resources and United States Department of Agriculture also have jurisdiction over wetlands within Wisconsin. The U.S. Department of Agriculture incorporates wetland preservation criteria into its crop price support programs. Prior to placing fill or altering wetland resources, the appropriate agencies must be contacted to receive authorization.

The wetlands surveyed according to the Wisconsin Wetlands Inventory Map are shown in Exhibit 6-6.<sup>11</sup> They were identified on aerial photographs by interpreting vegetation, visible hydrology, and geography based on the U.S. Fish and Wildlife Service. *The Village does not have mapped wetlands within its boundary.* 

#### Groundwater

In Waushara County, groundwater occurs mostly in the alluvium and glacial drift of the Quaternary Age and in the sandstone of the Cambrian Age. Precipitation in the form of either rain or snow is the largest contributor to recharge of the groundwater aquifers. Recharge is generally greatest in spring when water from melting snow and heavy rains saturates the ground and percolates to the water table. If discharge (the drawing out and use of groundwater) is greater than recharge, the elevation where the groundwater is extracted will fall and a local depression in the water table will result. Lower water levels cause the pumping lifts to increase and may reduce the yields of some of the wells.

Groundwater within the county occurs under both water table and artesian conditions. Water in the unconsolidated beds of sand and gravel is generally unconfined and occurs under water table conditions. Confined or artesian conditions exist locally where the water in the sand and gravel deposits is confined by layers of silt or clay.

A groundwater divide, located west and parallel to the topographic divide, cuts diagonally through Waushara County. It extends from Marquette County, through the towns of Hancock and Coloma, the Village of Coloma, and east of the Village of Plainfield to the Portage County line.<sup>12</sup> East of this divide, groundwater moves southeasterly toward the Wolf and Fox Rivers. West of this divide groundwater moves westerly toward the Wisconsin River.

According to the well water information obtained from the Central Wisconsin Groundwater Center in Stevens Point, some private wells located in this area contain nitrate levels that are

<sup>&</sup>lt;sup>11</sup> WDNR. 1979. *Wisconsin Wetland Inventory Maps*.

<sup>&</sup>lt;sup>12</sup> Geology and Ground-Water Resources of Waushara County, Wisconsin, Geological Survey Water-Supply Paper, 1809-B. Map of Waushara County, Wisconsin, Showing Configuration of Water Table, July 1957 and Location of Wells, Springs, and Streamflow-Measurement Sites.

higher than the EPA Safe Drinking Water Act standards of 10 mg/l.<sup>13</sup> These standards apply to municipal water sources only, but are strongly suggested thresholds for private systems. Nitrates originate in both agricultural and residential fertilizers, human sewage, and farm animal waste. Excessive levels of nitrates in drinking water have caused serious illness or death in infants less than six months of age. Pregnant women are also advised not to drink water in which nitrate levels exceed the EPA standards. Due to sandy soils within the County, there is potential for groundwater contamination in the shallower aquifers. However, this potential is greatly reduced in the deeper aquifers. The WDNR provides yearly Consumer Confidence Report recorded nitrate levels at 2.7 ppm. This is well below the maximum contaminant level (MCL) of 10 ppm. Table 6-6 lists results of water sample tests of private wells located within the surrounding Town of Coloma conducted between 1990 and 2001.<sup>14</sup> For conversion purposes, 1 part per million (ppm) is the same concentration as 1 mg/l.

Table 6-6.	Nitrate Levels	(ppm) in	Waushara	a County	Wells

	Detected	ppm	ppm	ppm	Ppm
T. Coloma	0	8	8	2	2

Source: Central Wisconsin Groundwater Center, UW – Stevens Point, 2001.

Although groundwater is found at varying depths throughout the area, *the majority of groundwater in the Village of Coloma is found in depths greater than six feet* (Table 6-7 and Exhibit 6-5). Groundwater exceeds 6 feet in about 91 percent (853 acres) of Coloma. The remaining 8.9 percent (84 acres) of the Village has groundwater occurring within 2 to 6 feet of the surface. Groundwater depths are closer to the surface near the STH 21/I-39 intersection and in the south detached portion of the Village.

	< 2	Feet	2-6	6 Feet	> 6	Feet	No R	ating	W	ater	Total
Community	Acres	Percent	Acres

Table 6-7. Depth to Groundwater

Source: USDA-NRCS, 1982. Waushara County, 2005.

According to the *Wisconsin Administrative Code, Chapter ATCP 30* Atrazine, *Pesticides; Use Restrictions*, atrazine prohibition areas have been established throughout Waushara County. In the prohibitation areas no person can apply, mix or load any atrazine product, except under special conditions. The Department of Agriculture has determined these areas based on well samples. These areas are monitored, and if atrazine is not applied, the levels may diminish and may be removed from the list. *There are no atrazine prohibition areas within the Village of Coloma.* 

<sup>&</sup>lt;sup>13</sup> USEPA. 2005. *List of Drinking Water Contaminants & MCLs.* http://www.epa.gov/safewater/mcl.html.

<sup>&</sup>lt;sup>14</sup> Central Wisconsin Groundwater Center. 2001. UWEX Private Well Project: Waushara County.

#### Natural Springs and Artesian Wells

There are a number of natural springs and artesian wells scattered throughout Waushara County. A natural spring can occur when an impermeable layer (usually consisting of clay) forces the water table to the surface or when water-bearing crevasses in fractured rock intersect the surface. An artesian well is created when a well is drilled into a confined aquifer which is recharged from a source located at a higher elevation.<sup>15</sup> The majority of springs within Waushara County are gravity depression springs, generally located in the eastern portions of the County.

#### Groundwater Planning

Water quality and quantity have been a concern for Waushara County communities. Low lake levels throughout Waushara County underscore a more pressing problem: groundwater quantity and quality preservation. Communities throughout East Central Wisconsin have been challenged with a number of issues ranging from potable water supply shortfalls to contamination issues such as elevated arsenic and radium levels. A prolonged drought coupled with increased water demands may be contributing to a declining water table. The anticipated population increases, agricultural irrigation demands, and growing recreational demands will continue to place significant demands on Waushara County's groundwater resources.

With an ever increasing demand on current groundwater supplies, local communities must assess how local and county-wide land use decisions will continue to affect groundwater quantity and quality. Identifying soil characteristics, water table levels, and groundwater susceptibility is just a beginning step in this process. Other underlining geological characteristics such as bedrock, groundwater flow direction, private well information, community groundwater pumping rates, and water table depth will be essential in understanding the current status of groundwater. Moreover, the abundance and quality of surface water is directly tied to groundwater supplies. Many streams and lakes rely on groundwater levels. Human impacts such as high capacity wells, irrigation systems, and others also place demands on groundwater supplies.

Additional information and technical expertise is available from several governmental and academic agencies statewide. The Center for Land Use education has completed several case studies and groundwater planning assistance documents for local communities. Additional information can be found at <u>http://www.uwsp.edu/cnr/landcenter/groundwater/index.html</u>.

#### Wildlife Resources

#### Wildlife Habitat

Waushara County falls within the following Ecological Landscapes:<sup>16</sup>

<sup>&</sup>lt;sup>15</sup> Wisconsin Department of Natural Resources, Source Water Springs and Natural Wells <u>http://dnr.wi.gov/org/water/dwg/OpCert/HTML/chapter2/sw2a.htm</u>,

<sup>&</sup>lt;sup>16</sup> WDNR, 2002. *Ecological Landscapes of Wisconsin* 

- **Central Sand Plains** is located in western Waushara County, occurring on a flat, sandy lake plain, and supports agriculture, forestry, recreation, and wildlife management. This Ecological Landscape formed in and around what was once Glacial Lake Wisconsin, which contained glacial meltwater extending over 1.1 million acres at its highest stage.
- Central Sand Hills encompasses the majority of Waushara County and is located at the eastern edge of what was once Glacial Lake Wisconsin. The landforms in this Ecological Landscape are a series of glacial moraines that were later partially covered by glacial outwash. The area is characterized by a mixture of farmland, woodlots, wetlands, small kettle lakes, and cold water streams, all on sandy soils. The mosaic of glacial moraine and pitted outwash throughout this Ecological Landscape has given rise to extensive wetlands in the outwash areas, and the headwaters of coldwater streams that originate in glacial moraines.
- **Southeast Glacial Plains** is located in the eastern portions of Waushara County, and are made up of glacial till plains and moraines. Most of this Ecological Landscape is composed of glacial materials deposited during the Wisconsin Ice Age.

*The Village of Coloma falls within the Central Sand Hills Ecological Landscape.* Ecological Landscapes support numerous habitat types throughout Waushara County for a varied and abundant wildlife and fish community. Habitats found within Waushara County include streams, lakes, rivers, woodlands, marshes, open wet meadows, and fallow/abandoned farmland. White-tailed deer and small mammals such as opossum, raccoon, gray and fox squirrels are abundant in wooded areas. Lakes and streams support diverse warm and cold water fisheries. Wetlands attract waterfowl during spring and fall migrations as well as during the nesting season. Other wildlife found in the area include grassland and wetland birds, cottontail rabbits, mink, otter, muskrats, red fox, and a wide variety of songbirds and similar passerines.

# Rare, Threatened and Endangered Species and Natural Communities

The Wisconsin Department of Natural Resources maintains a database of rare, special concern, threatened, and endangered species and natural communities in Waushara County.<sup>17</sup> In order to protect these communities from harm, their exact locations are not released to the public; however, Waushara County has access to this database. When a development proposal is presented to the county, the WDNR database is consulted prior to granting approval. Before development, precautions should be taken to minimize adverse impacts which could disturb potential habitats for these flora and fauna. A list of the rare, threatened, and endangered species and natural communities is included in Appendix E (Table E-1). The WDNR's database is organized by Township and Range and therefore the Town of Coloma was used to identify possible rare, threatened, and endangered species.

# Exotic and Invasive Species

Non-native species commonly referred to as exotic or invasive species have been recognized in recent years as a major threat to the integrity of native ecosystems, habitats, and the species that utilize those habitats. Invasive species disrupt native ecosystems by out-competing native

<sup>&</sup>lt;sup>17</sup> WDNR. 2005. *Natural Heritage Inventory Program*. http://dnr.wi.gov/org/land/er/nhi/.

plants and animals for valuable resources such as food and space. The resulting competition between native and invasive species has the potential to completely displace native species. Invasive species are found in both aquatic and terrestrial habitats. The WDNR updates a list of plant and animal invasive species in Wisconsin. This list can be found on the Department's website at: <u>http://dnr.wi.gov/invasives/</u>. Human livelihood and quality of life are greatly altered by invasive species; they hamper boating, swimming, fishing, and other water recreation; place an economic burden on local communities in eradication and control costs; and in some instances present a potential fire hazard. Prior to introduction of any non-native fish or wildlife, a permit from the WDNR is required pursuant to Wisconsin Statutes 29.736 and 29.745.

#### Woodlands

Originally, the majority of Waushara County contained vegetation consisting of a mixture of oak forest species interspersed with pine forests and oak openings with an understory of prairie grasses. Waushara County once encompassed substantial areas of wetland conifers, lowland hardwoods, wet meadows with lowland shrubs, and marshes. Currently, upland forest areas are characterized by an oak-hickory association. Pine species are found throughout much of the county, while the wetland conifers have been replaced largely by shrub wetlands, general agriculture, and urban areas. Woodlands are found in large stands as well as scattered throughout the Village. *Woodlands comprise about 28 percent of the total land area in the Village of Coloma* (Exhibit 6-6).

Forests and woodlands can be classified into one of two categories: general (unplanted) woodlands and planted woodlands. General woodlands are naturally occurring forests and hedgerows. Planted woodlands are tree plantations in which trees are found in rows; these areas include orchards, timber tracts, Christmas tree production and other general uses. *There are 114 acres of general woodlands and 149 acres of planted woodlands in the Village of Coloma.* These woodlands should be considered as prime wildlife habitat areas; efforts to protect them from encroaching development should be evaluated (Table 6-8).

	General Woodlands		Planted Woodlands		Total Woodlands		Total
Community	Acres	Percent	Acres	Percent	Acres	Percent	Acres
V. Coloma	114	12.2%	149	15.9%	263	28.0%	939

Table 6-8. Woodlands

Source: ECWRPC, 2005.

The Forest Crop Law of 1927 (FCL) and the Woodland Tax Law of 1954 (WTL) were established to encourage sound forestry practices on private lands. In 1985, the Managed Forest Law (MFL) replaced both the FCL and WTL.<sup>18</sup> Enrollment in the FCL closed in 1986, and renewal in the program is not permitted. The last WTL contract expired in 2000. The MFL ensures the growth of future commercial crops while balancing individual property owner objectives and society's need for compatible recreational activities, forestry aesthetics, wildlife habitat, erosion control and protection of endangered resources. *In 2008, a total of 50 acres were actively managed within the Village of Coloma under the MFL* (Table 6-9).

<sup>&</sup>lt;sup>18</sup> WDNR. 2005. *Managed Forest* Law. http://dnr.wi.gov/org/land/forestry/ftax/mfl.htm.

Acres	Percent

#### Parks, Open Space, and Recreational Resources

Public open space such as parks and parkways are important to the quality of life within a community. These lands serve many purposes including outdoor recreation and education; buffers between different land uses; flood and stormwater management; habitat preservation; air and surface water quality improvements; protection of groundwater recharge areas; and aesthetics. They can also enhance the value of nearby properties. (See Utilities & Community Facilities Chapter)

#### Wisconsin Department of Natural Resources (WDNR) and Public Lands

Since 1876, the State of Wisconsin has been acquiring land to meet conservation and recreation needs. Public lands managed by the Wisconsin Department of Natural Resources provide many opportunities and public spaces to hunt, fish, hike, canoe, or watch or photograph wildlife. All Wildlife Areas are open to a full range of traditional outdoor recreational uses. These include hunting, fishing, trapping, hiking, nature study, and berry picking. Dog training or trialing (hunting dog competitions) may be allowed by permit. A limited number of properties allow additional outdoor recreation at designated locations; like camping, bicycling, horseback riding, and snowmobiling.

State Fishery Areas (SFAs) protect important waterways in Wisconsin by providing a natural buffer from agricultural practices and urban runoff. SFAs often preserve and manage the headwaters or springs of streams which serve as the biological base for fish and other aquatic life. SFAs also increase the availability of public access to navigable waterways throughout the state. *The WDNR does not own land within the Village,* however the WDNR owns approximately 1,099 acres within the surrounding Town of Coloma.

The Town of Coloma has the following State owned and managed lands:

State Wildlife Areas:

The Town of Coloma does not have any lands classified as Wildlife Areas.

State Fishery Areas:

 Mecan River Fishery is composed of the Mecan River and three tributaries; Chaffee Creek, Wedde Creek and Little Pine Creek. Zinke Lake is included in this fishery area. The waters of these tributaries (Chaffee, Wedde and Little Pine) are generally crystal clear, Exceptional Water Resources. Public access is fragmented by various parcels along stream corridor segments. Headwaters known as the Mecan Springs are protected as a wildlife refuge. Portions of the Ice Age Tail traverse through the Mecan Fishery.

WDNR Managed Lands:

• There are a number of State owned lands within the Town of Coloma, all of which are associated of the Mecan River Fishery Areas.

#### Environmental Corridors

Environmental corridors are continuous systems of open space created by the natural linkage of environmentally sensitive lands such as woodlands, wetlands, and habitat areas that provide important travel ways for a variety of wildlife and bird species. These features are sensitive natural resources; preserving the corridors from development protects habitat and keeps nonpoint source pollution to a minimum, thus ensuring that high quality groundwater and surface water is maintained and habitat is not impaired.

#### **Mineral Resources**

**Non-metallic Mineral Resources.** Non-metallic mineral resources include all mined minerals other than those mined as a source of metal. Economically important non-metallic minerals include building stone, lime, sand, gravel, and crushed stone. *There are no active non-metallic mining sites in the Village of Coloma.* 

**Metallic Mineral Resources.** Metallic mineral mining refers to mining of mineral deposits that contain recoverable quantities of metals such as copper, zinc, lead, iron, gold, silver, and others. *There are no metallic mineral resource sites in the Village of Coloma*.

#### Solid and Hazardous Waste

The Wisconsin Department of Natural Resources has inventoried the past and current sites which have been used for solid and/or hazardous waste disposal.<sup>19</sup> The list includes active, inactive, and abandoned landfills and collection sites. Inclusion of a site on the Registry does not mean that environmental contamination has occurred, is occurring, or will occur in the future. Instead, the document is intended to be utilized as a general information resource and planning tool. *There is one site in the Village of Coloma that is listed on the WDNR's registry of active, inactive and abandoned sites where solid waste or hazardous wastes were known or likely to have been disposed* (Table 6-10).

Table 6-10.	Waste Disp	osal Sites
-------------	------------	------------

Facility Name	Location (Section number)
Village of Coloma	23

Source: WDNR, 1999 Registry of Waste Disposal Sites in Wisconsin

<sup>&</sup>lt;sup>19</sup> Wisconsin Department of Natural Resources. 1999. *Registry of Waste Disposal Sites in Wisconsin.* 

Air quality, particularly good air quality, is often taken for granted. Clean air is vital to maintain public health. Sound local and regional planning can minimize negative impacts to the air. Development patterns can impact automobile use. As communities become more spread out, the use of automobiles increases dramatically, resulting in more emissions and subsequent decreases in air quality. As residential development moves into rural areas, there are increased conflicts between non-farm residents and agricultural operations that emit odors and dust. Emissions from certain industrial uses also have the potential to impact air quality.

There are no areas in Waushara County which exceed the limits of the National Ambient Air Quality Standards (NAAQS) for ozone, particulates, or carbon monoxide. The nearest ozone monitoring sites are in Brown and Outagamie Counties.<sup>20</sup>

#### Cultural Resources

Cultural resources, like natural resources are valuable assets which should be preserved. These resources define a community's unique character and heritage. Included in this section is an inventory of historic buildings, sites, structures, objects, archeological sites and districts.

#### State and National Register of Historic Places.

The Wisconsin Historical Society's Division of Historical Preservation (DHP) is a clearing house for information related to the state's cultural resources including buildings and archaeological sites. A primary responsibility of the DHP is to administer the State and National Register of Historic Places programs. The National Register is the official national list of historic properties in the United States that are worthy of preservation. The program is maintained by the National Park Service in the U.S. Department of the Interior. The State Register is Wisconsin's official listing of state properties determined to be significant to Wisconsin's heritage. The inventory is maintained by the DHP. Both listings include sites, buildings, structures, objects, and districts that are significant in national, state, or local history. Sites are chosen based on the architectural, archaeological, cultural, or engineering significance.

The following items are listed on the National Register for Waushara County:

- Alanson M. Kimball House Town of Leon
- Waushara County Courthouse, Waushara County Sheriff's Residence and Jail City of Wautoma
- Whistler Mound Group Village of Hancock

At the present, no properties within the Village of Coloma are listed on the National Register. However, the National Register is not a static inventory. Properties are constantly being added, and, less frequently, removed. It is, therefore, important to access the most updated version of the National Register properties. This can be found by accessing the DHP website (<u>http://www.wisconsinhistory.org/histbuild/register/index.html</u>) or by contacting the DHP at (608) 264-6500.

<sup>&</sup>lt;sup>20</sup> U.S. Environmental Protection Agency. 2007. *County Air Quality Report – Criteria Air Pollutants*.

#### Architecture and History Inventory (AHI)

In order to determine those sites that are eligible for inclusion on the National Register, the DHP frequently funds historical, architectural, and archaeological surveys of municipalities and counties within the state. Surveys are also conducted in conjunction with other activities such as highway construction projects. A minimal amount of this type of survey work has been done in Waushara County. The Wisconsin Historical Society records indicate that a survey of Coloma was conducted in 1981.

A search of the DHP's on-line Architecture and History Inventory (AHI) reveals 20 properties in the Village of Coloma. These sites include Gothic Revival Churches (4), a Gabled Ell style house, a Queen Anne style house, an Italianate style house, a Greek Revival style house, a Boomtown style house, a house, retail buildings (6), Gabled Ell style gas station, gas station (1), Gabled Ell style hotel/motel, and a rectory/parsonage.

Inclusion in this inventory conveys no special status, rights, restrictions, or benefits to owners of these properties. It simply means that some type of information on these properties exists in the DHP's collections. As was the case in other communities, some of these properties may no longer exist. AHI is primarily used as a research and planning tool. Like the National Register, this is not a static inventory. Properties are constantly being updated. Information can be found on the DHP web site (<u>http://www.wisconsinhistory.org/ahi/search.asp?cnty=WS</u>).

#### Archaeological Sites Inventory (ASI)

An inventory similar to the AHI exists for known archaeological sites across the state: the Archaeological Sites Inventory (ASI). Due to the sensitive nature of archaeological sites, information as to their whereabouts is not currently made available on-line. This information is distributed only on a need-to-know basis. Archaeological sites are added to ASI as they are discovered; discovery is a continual process. For technical assistance and up to date information on sites within a given area, contact the DHP at (608) 264-6500.

#### Wisconsin Historical Markers

Wisconsin historical markers identify, commemorate and honor important people, places, and events that have contributed to the state's rich heritage. The Wisconsin Historical Markers Program is a vital education tool, informing people about the most significant aspects of Wisconsin's past. The Society's Division of Historic Preservation administers the Wisconsin Historical Markers and plaques.<sup>21</sup> *There are no historical markers in the Village of Coloma.* According to the Wisconsin Historical Society, three historical markers or plaques are located within Waushara County:

- Sir Henry Wellcome Town of Oasis
- Whistler Mound Group and Enclosure Town of Hancock
- The Auroraville Fountain Town of Aurora

<sup>&</sup>lt;sup>21</sup> Wisconsin Historical Markers of the Wisconsin Historical Society. <u>http://www.wisconsinhistory.org/hp/markers/index.asp</u>. Accessed 10/28/08

#### Museums/Other Historic Resources

Museums protect valuable historic resources for community enjoyment. Residents are welcome to learn from the exhibits and amenities they have to offer. *There is one museum in the Village of Coloma; Spaulding Store and Post Office; and several museums located in close proximity to the Village.*<sup>22</sup>

- Spaulding Store and Post Office was constructed in 1876 and relocated to the Coloma Community Park from Coloma Corners (Ross Corners) in the spring of 2008. Renovations are currently being made to the building and grounds.<sup>23</sup> When completed, this building will house the Coloma Area Historical Society and be open to the public for tours.
- Waushara County Museum is housed in the former county jail in Wautoma. The Waushara County Historical Society

maintains several exhibits detailing the genealogy, antiques, and the history of the sheriffs department. The original doors and bars of the jail cells have been preserved.

- **Pioneer Museum** is located in the Village of Wild Rose. This museum encompasses the Victorian era home of Elisha and Jane Stewart, Pioneer Hall (bank and drug store), a country school, barn and carriage house.
- **Woodland Indian Mounds** in Whistler Park. These historic earthen structures were constructed by Woodland Indians during the period of 650 to 1200 AD.
- Hancock Public Library is housed in a fully restored historic firehouse.

#### Local History<sup>24</sup>

The earliest inhabitants of Waushara County were Native Americans. Considerable evidence of their civilization has been found. A total of 332 mounds, 49 camp and village sites, two spirit stones, two cemeteries, and several other archeological sites have been identified within the County.

<sup>&</sup>lt;sup>25</sup> Fox, G., and E.C. Tagatz. *The Wisconsin Archeologist*. <u>http://www.wisconsinhistory.org/turningpoints/tp-061/?action=more\_essay</u>

*On October 18, 1849, the Menominee Tribe ceded their land, including Waushara County, to the U.S. Government.*<sup>26</sup> The history of the Town of Coloma dates back to the spring of 1849, when John Drake, originally from Green Lake County, staked out a claim for a new tavern to be built as a halfway house between Portage and Stevens Point. The Portage-Stevens Point Road was well traveled and a main artery between the cities of southern Wisconsin and the pine forests of the north. In addition, a stage line made scheduled trips along its route. Illness forced Mr. Drake to return to Green Lake County after delivering lumber for the tavern. Mr. Stowe, visiting the area on his honeymoon, decided to build a tavern first, confiscating the wood. This first building was erected in 1849 in what is now known as Coloma Corners. Mr. Drake returned the following year and was forced to build his tavern of rough hewn logs instead. Drake's log structure was known as the "Bur-Oak Prairie House".

In 1853, a special meeting of the Waushara County Board established two new towns from a part of Dakota. These towns included what are now the Town of Coloma and the Town of Hancock. In 1855, the northern half was detached forming the Town of Sylvester (Hancock).

When talk of construction of a railroad between Stevens Point and Portage began, Elias Follette, hoping to capitalize on the venture, built a store in Ross Corners (Coloma Corners) in 1875 where he thought the railroad would be laid. Unfortunately, a land dispute arose and the railroad was actually laid several miles east of the store. A new village sprang up at the location of the railroad called Coloma Station and the old village of Coloma began to decline. Eventually, Coloma Station was renamed Coloma and the old village (Ross Corners) became known as Coloma Corners. Some of the original buildings are still standing in the Town of Coloma. *The Village of Coloma was incorporated in 1939.*<sup>27</sup>

#### Ethnic Origin

*In 2000, the most common ancestry identified by Village and county residents was German* (Table 6-11; Appendix E, Table E-2). *Thirty-six percent (35.6%) of Village of Coloma and 38.0 percent of Waushara County residents claimed German ancestry.* Several residents (28.4% Village of Coloma, 20.0% Waushara County) could not identify or chose not to report their ancestry. The second most common ancestry identified by Village residents was Irish and United States or American. Approximately 6 percent or 31 individuals reported that they were Irish or United States or American in the Village of Coloma. The second most common ancestry in Waushara County was Polish. Approximately 7 percent of Waushara County residents claimed Polish ancestry.

Research has shown that there is a high correlation between those communities with Pennsylvania German ancestry and those communities with concentrations of Amish population.<sup>28</sup> Within Waushara County, Amish settlements include 52 households, 291 people, and an average household size of 5.6 persons (Appendix E, Table E-3). Thirty-three percent are employed in farming, 23 percent in dairying and 51 percent in woodworking. *The Village of Coloma may contain Amish Settlements.* According to a power point presentation

<sup>&</sup>lt;sup>26</sup> Coloma History by Floyd King and Sue Semrow. <u>http://www.colomahistorical.org/history.html</u>. Town of Coloma Land Management Plan, February 2003. East Central Wisconsin Regional Planning Commission.

<sup>&</sup>lt;sup>27</sup> Wisconsin Blue Book, 2007-2008.

<sup>&</sup>lt;sup>28</sup> UW Madison Applied Population Lab

given by UW-Extension<sup>29</sup>, in 2000, there were between 0 and 10 Waushara County residents over the age of 5, who speak a Germanic language at home in the Village of Coloma. It further states that "The Amish speak a Germanic language at home" and that "only in the Towns of Richford, Coloma, Dakota and Aurora do youth (ages 5 to 17) speak a German language at home".

	Ancestry	Total Population in Sample	Percent of Population
V. Coloma	German	173	35.6%
	Unclassified or Not reported	138	28.4%
	Irish	31	6.4%
	United States or American	31	6.4%
	Italian	19	3.9%
	Total Population	486	100.0%
Waushara County	German	8,805	38.0%
	Unclassified or Not reported	4,629	20.0%
	Polish	1,681	7.3%
	Irish	1,101	4.8%
	United States or American	1,055	4.6%
	Total Population	23,154	100.0%

Table 6-11. Top 5 Ancestries

Note: Includes individuals who only reported one ancestry and the first response listed for those who reported multiple ancestries.

Source: U.S. Census, 2000 STF 3A

#### Key Findings

#### Agricultural Resources

• Only 70 acres or 7.5 percent of the land in the Village of Coloma is considered prime farmland.

#### Natural Resources

#### Soils

- Almost all of the Village of Coloma is suitable for conventional systems.
- Over three-quarters of the area within the Village of Coloma (84.1%, 790 acres) have soils that are considered to have a very high suitability for building site development.
- Although the Village's soils are rated for septage spreading, actual land spreading does not occur within the Village limits.

<sup>&</sup>lt;sup>29</sup> Waushara County Demographic Overview, 2008; as presented by UW-Extension Waushara County. Source data: Wisconsin Department of Administration.

# Geography and Topography

- Within the Village of Coloma, land relief is approximately 80 feet, from a low of 1,020 feet above sea level on the eastern edge of the Village to a high of 1,100 on the western edge.
- Four percent (37 acres) of the Village of Coloma is classified as having slopes in excess of 12 percent.

# Water Resources

- Surface water drainage for the Village of Coloma is located entirely within the Upper Fox River Basin.
- The Village of Coloma falls within one sub-watershed: the Mecan River sub-watershed (Upper Fox River Basin).
- There are no lakes and/or impoundments found within the Village of Coloma.
- There are no named river/streams in the Village of Coloma.
- There are no floodplains in the Village of Coloma.
- The Village does not have mapped wetlands within its boundary.
- A groundwater divide, located west and parallel to the topographic divide, cuts diagonally through Waushara County. It extends from Marquette County, through the towns of Hancock and Coloma, the Village of Coloma, east of the Village of Plainfield to the Portage County line. East of this divide, groundwater moves southeasterly toward the Wolf and Fox Rivers. West of this divide groundwater moves westerly toward the Wisconsin River.
- The WDNR's 2007 Coloma Waterworks Consumer Confidence Report recorded nitrate levels at 2.7 ppm.
- The majority of groundwater in the Village of Coloma is found in depths greater than six feet.
- There are no atrazine prohibition areas within the Village of Coloma.

# Wildlife Resources

- The Village of Coloma falls within the Central Sand Hills Ecological Landscape.
- Woodlands comprise about 28 percent of the total land area in the Village of Coloma.
- There are 114 acres of general woodlands and 149 acres of planted woodlands in the Village of Coloma.
- In 2008, a total of 50 acres were actively managed within the Village of Coloma under the MFL.

# Parks, Open Space and Recreational Resources

• The WDNR does not own land within the Village of Coloma.

# Mineral Resources

- There are no active non-metallic mining sites in the Village of Coloma.
- There are no metallic mineral resource sites in the Village of Coloma.

# Solid and Hazardous Waste

• There is one site in the Village of Coloma that is listed on the WDNR's registry of active, inactive and abandoned sites where solid waste or hazardous wastes were known or likely to have been disposed.

# Air Quality

• There are no areas in Waushara County which exceeds the limits of the National Ambient Air Quality Standards (NAAQS) for ozone, particulates, or carbon monoxide.

# **Cultural Resources**

- At the present, no properties within the Village of Coloma are listed on the National Register.
- A search of the DHP's on-line Architecture and History Inventory (AHI) reveals 20 properties in the Village of Coloma.
- There are no historical markers in the Village of Coloma.
- There is one museum in the Village of Coloma; Spauling Store and Post Office and several museums located in close proximity to the Village.
- The earliest inhabitants of Waushara County were Native Americans.
- On October 18, 1849, the Menominee Tribe ceded their land, including Waushara County, to the U.S. Government.
- The Village of Coloma was incorporated in 1939.
- In 2000, the most common ancestry identified by Village and county residents was German. Thirty-six percent (35.6%) of Village of Coloma and 38.0 percent of Waushara County residents claimed German ancestry.
- The Village of Coloma may contain Amish Settlements.

# INTERRELATIONSHIPS WITH OTHER COMPREHENSIVE PLAN ELEMENTS

Wisconsin's important agricultural base is strongly integrated with its natural resources. Complex agricultural patterns are mixed with the state's natural features to form a patchwork of different land uses. Natural resource issues and concerns are closely linked to activities taking place on agricultural lands, not only adjacent to one another, but in the area. Soil erosion from farm fields and surface water runoff of crop nutrients and agricultural chemicals can impact the quality of streams, rivers, and lakes. Leaching of pesticides and nutrients has the potential to impact underground aquifers and affect drinking water supplies. There is a growing concern, especially in areas where rural residential development is occurring, about the impact of livestock farming on air quality. However, it is important to note that individual farming operations differ in management practices and vary widely in their contribution to these environmental problems.

Although agricultural activities can have negative impacts on the environment, they can also provide positive benefits. People value the open agricultural landscape and the benefits of maintaining wildlife habitats. Other benefits include nutrient recycling and enhanced water recharge.

The long, rich history of farming in Wisconsin has lead to the creation and exposure of many of the state's archaeological sites. In the County it is not uncommon to find evidence of native villages and burial mounds. Architecturally distinctive homes, barns, or entire farmsteads can reflect a significant time period, be associated with a notable person, reflect ethnic building types and construction practices, or represent an example of a once important agricultural specialty.

#### Economic Development

Agriculture, natural and cultural resources should be considered when developing an economic development plan. It is important to remember that farming is still an important segment of Waushara County's rural economy. There may be specific economic development strategies that could help improve the well-being of local farmers; as long as financial conditions remain difficult, farmers will continue to find alterative uses for their land. Natural resources can provide a positive economic benefit to the area through recreational uses and overall aesthetics. However, protection and impact to the area's natural resources should be considered whenever a new business or development is proposed.

Cultural and natural elements provide opportunities for enhanced quality of life for current residents and can be a valuable tool to bring new workers and employers to the area. Historic preservation can be used to enhance unique qualities found in many of Waushara County's communities and towns.

#### Housing

Agriculture and natural resources need to be considered when planning for the housing element. Most new residential construction is occurring on agricultural land or adjacent to significant natural resources such as a lake, stream, river, wetland, steep slope, or woods. Although these natural features provide aesthetically pleasing views for new homeowners, residential encroachment has detrimental impacts to the natural resource base. In many areas, housing development patterns have been rather haphazard. Scattered housing patterns have resulted in high costs to local communities in the form of lost farmland, increased demand for public services, and conflicts between homeowners, farmers, environmentalists, and recreationalists. Demand for home sites also drives land costs upward, reducing the ability of farmers to buy land to either begin farming or expand existing operations.

Existing older housing stock provides community character and reflects the historical development of the area. Older neighborhoods often offer the best opportunities for low income housing that can be rehabilitated using community improvement programs. Abandoned historic industrial buildings and old schools can be retrofitted and preserved to provide unique and attractive affordable housing for the community.

#### Transportation

Transportation planning should consider the transportation needs of the area. Transportation is critical to the agricultural community because it provides access to suppliers, processors, haulers, and other support industries. The transportation network also allows goods to be brought to local, regional, national, and international markets. An efficient transportation network can increase income levels for Wisconsin farmers. Additionally, when planning for

transportation, it is important to consider how rural residential developments and expanding agricultural operations will affect the transportation infrastructure and safety of the local area. Development and subsequent transportation improvements may impact the County's natural resources, wetland areas, and farmland adjacent to existing highway corridors. To minimize this impact, Waushara County and its communities should monitor these situations and consider development techniques that offer greater environmental protection.

When transportation corridors are expanded or proposed, care should be taken to minimize the effects on historical and cultural resources. Sensitivity must be shown for historic buildings and markers as well as archaeological sites and objects. The integrity and identity of a community is dependent on the preservation of its historic character and distinctive natural features. For example, the identity and aesthetics of a historic neighborhood can easily be threatened by a street widening project that removes large trees and narrows street terraces.

#### **Utilities and Community Facilities**

Planned development leads to an efficient use of public infrastructure and reduces the amount of sprawl, which leads to the consumption of the rural landscape and other natural resources. Educating local officials and citizens about how local land use decisions impact the agricultural industry is important if the ability to grow and raise food is to be preserved. Diminishing farmland also affects a community's ability to land spread bio-solids, a byproduct of the wastewater treatment process. As large areas of farmland in close proximity to suburban areas decrease, communities must travel longer distances to dispose of this waste, thereby increasing the cost of sewage disposal.

Similar to farmland, our natural resources are limited and are being consumed at an alarming rate. Fossil fuel emissions lead to persistent health and environmental problems; regional haze; acidification of surface waters and forests; mercury in fish and other wildlife; acidic damage and erosion to buildings and other materials; ozone damage to forests; and eutrophication of water bodies. Renewable energy, or an alternative energy source, is created from sustainable natural resources. Corn and other cellulose products can be used to produce ethanol for alternative fuel vehicles. Wind energy provides an alternative to coal and natural gas boilers.

To maintain our quality of life, it is essential that not only is growth accommodated but that it be done while protecting our natural environment. The quality of the region's surface and groundwater resources are linked to the proper siting, installation, and maintenance of individual onsite wastewater systems. Improper treatment and discharge of human waste and bacteria can contaminate public and private water supplies. The impact of increased development and associated impervious area can adversely affect groundwater quality and quantity.

Public buildings such as city, village or town halls, county courthouses, schools, water treatment plants, water towers, libraries, and fire stations are often architecturally significant landmarks in a community and are an important element of the community's character. Even when these buildings have outgrown their original use, they are often converted into a community center, senior center, housing or another productive use due to the community's attachment to them.

#### Land Use

Land use is an integral part of all the elements in the plan. County residents value the preservation of agricultural land and the natural resources. There is a need to protect the rural atmosphere while allowing for controlled orderly development. Opportunities for historical preservation should also be considered in all future planning, zoning, and development decisions.

#### Intergovernmental Cooperation

Many agricultural and natural resource issues go beyond local boundaries. Watersheds and other ecosystems, economic conditions, transportation patterns, and housing can impact regions as a whole. Air and water pass over the landscape so that one jurisdiction's activities can affect other jurisdictions located downwind or downstream. Regional development patterns and neighboring municipal land use policies also affect land price, availability of land, and the economic performance of local farms in adjoining towns. Unless towns, cities, villages, and counties communicate and coordinate effectively, it will be difficult to control growth in agricultural areas that preserves farmland and protects natural resources.

Preserving a community's heritage allows people to connect with the past. Unfortunately, little has been done in Waushara County to establish a base of historically significant buildings and other features. The Wisconsin Historical Society's Division of Historic Preservation provides funding to local governments and non-profit organizations. These funds can be sought independently or collectively with neighboring communities to fund architectural and historical surveys. Communities should work together to utilize existing local expertise on not only the history of the area, but also on historic preservation issues.

#### POLICIES AND PROGRAMS

#### State, Regional, County, and Local Policies

**Wisconsin Administrative Code.** Comm 83, revised during the 1990s to add provisions for new wastewater treatment system technologies and land suitability criteria, came into effect on July 1, 2000. Unlike the code it replaced, the new rules prescribe end results – the purity of wastewater discharged from the system – instead of specific characteristics of the installation. This rule provides land owners with more on-site wastewater treatment options, while at the same time protecting natural resources and groundwater. Within Waushara County, holding tanks are banned for new construction and are not allowed for replacement systems unless the property cannot support any other on-site sewage disposal systems.

NR-103, Water Quality Standards for Wetlands, establishes water quality standards for wetlands.

NR-115, Wisconsin's Shoreland Management Program, requires counties to adopt zoning and subdivision regulations for the protection of all shorelands in unincorporated areas.

NR-116, Wisconsin's Floodplain Management Program, requires municipalities to adopt reasonable and effective floodplain zoning ordinances.

NR-117, Wisconsin's City and Village Shoreland-Wetland Protection Program, establishes minimum standards for city and village shoreland-wetland zoning ordinances.

NR-135 was established to ensure that nonmetallic mining sites are properly abandoned. This law promotes the removal or reuse of nonmetallic mining refuse, removal of roads no longer in use, grading of the nonmetallic mining site, replacement of topsoil, stabilization of soil conditions, establishment of vegetative groundcover, control of surface water flow and groundwater withdrawal, prevention of environmental pollution, development and reclamation of existing nonmetallic mining sites, and development and restoration of plant, fish and wildlife habitat if needed to comply with an approved reclamation plan.

NR-243, Animal Feeding Operations, purpose of this chapter is to implement design standards and accepted manure management practices for concentrated animal feeding operations. This chapter also establishes the criteria under which the department may issue a notice of discharge or a permit to other animal feeding operations which discharge pollutants to waters of the state or fail to comply with applicable performance standards and prohibitions in <u>ch. NR 151</u>.

#### Wisconsin State Statutes.

Wis. Stats. S. 93.90 and rule ATCP 51, Livestock Facility Siting Law regulates the siting of new and expanded livestock operations. The statute limits the exclusion of livestock facilities from agricultural zoning districts. It establishes procedures local governments must follow if they decide to issue conditional use or other local permits for siting livestock facilities. It also creates the <u>Livestock Facility Siting Review Board</u> to hear appeals concerning local decisions on permits.

Wis. Stats. S. 823.08, Actions against agricultural uses. The "Right to Farm" law protects farmers from nuisance law suits related to odor and noise in normal agricultural operations provided that public health and safety are not endangered.

#### Regional

**East Central Wisconsin Regional Planning Commission.** East Central has adopted a regional comprehensive plan. As a part of this Plan, East Central has adopted several core policies and/or goals for agricultural, natural, and cultural resources.

#### Agricultural Resources

- Encourage appropriate and practical conservation oriented land and wildlife management practices.
- Promote management of renewable resources in ways compatible with sustained yield.
- Support land use patterns which are consistent with soil suitability and other environmental considerations.
- Encourage development on lands not suitable for farming and community recreation.
- Maintain employment and increased income in the agricultural sector.
- Encourage contiguous planned development to eliminate the intermingling of farms and urban land uses.
- Preserve land suitable for the production of food and fiber to meet present and future needs.

• Promote adoption of exclusive agricultural zoning districts to ensure that valuable farming lands are not lost or disrupted by urban land uses.

#### Natural Resources

- Improve and protect surface and groundwater quality.
- Improve and/or maintain high air quality.
- Preserve and protect environmentally sensitive areas and promote the linking of these areas into environmental corridors.
- Manage wildlife and wildlife habitat in a manner that maintains ecological stability and diversity while considering the social and economic impacts.
- Protect nonmetallic mineral deposit sites.
- Ensure sufficient natural public open space is provided to meet the active and passive recreational needs of all residents while preserving and protecting the region's natural and cultural resources.
- Promote the consideration of design and aesthetics as a means of ensuring that communities and the region as a whole remain attractive as places to live, work, and play.

#### Cultural Resources

- Establish a regional cultural resource implementation committee to work on pursuing implementation of the regional cultural resources plan.
- Hold an annual Cultural Resources Summit where local organizations, preservation professionals, HP commissioners, and the general public could hear speakers, exchange ideas and interact with each other, raise and address current issues and needs, and encourage support for cultural resource appreciation, enhancement, and protection.
- Create a web-based clearinghouse to serve the region, offering a variety of resources to support preservation of our prehistoric and historic, archeological, and cultural heritage.
- Ensure that decision makers have an understanding of, and an appreciation for, cultural resource protection.
- Make the public better aware of the tax benefits and protections which are available to local landmarks, state and national register site properties, as well as associated responsibilities.
- Work with the Wisconsin Historical Society to increase access to the WHS WHPD database and expand its usefulness to a broader user base.
- Develop an easy, reliable way to alert local government officials conducting permit reviews, and prospective buyers making land/home purchase decisions, as to the location of culturally significant properties by including these cultural resource status designations in all title transfer records.
- Work with local and regional groups to update the State's list of archaeological and historical inventories.
- Revise the Wisconsin State Statutes (709.02) to expand and include "archaeological sites" as well as historic buildings and sites, in the items which realtors must make known to potential buyers.
- Prevent generational loss of cultural heritage by encouraging the use of more cultural resource programming in the history and social studies curriculum of K-12 and higher education institutions in the region.
- Establish a Cultural Resource Center for the ECWRPC region.

• Encourage greater interaction and sharing of ideas, resource materials, etc. between the private sector and the public sector, volunteers and professionals.

#### Local

**The Village of Coloma Zoning Ordinance.** The Waushara County Zoning Ordinance regulates zoning in the Village of Coloma.

**Coloma Area Historical Society.**<sup>30</sup> The Coloma Area Historical Society (CAHS) was founded in February 2007. CAHS became affiliated with the Wisconsin State Historical Society in June and began selling a DVD of Historic Coloma photos. CAHS was granted a tax exempt, 501(c)(3), status the following month. Following renovation of the historic 1876 Spaulding Store, it will serve as the permanent home of CAHS.

#### Federal and State Programs

#### Federal

#### United States Department of Agriculture

**Conservation Reserve Program (CRP) and Conservation Reserve Enhancement Program (CREP).** These programs protect sensitive land by reducing erosion, increasing wildlife habitat, improving water quality, and increasing forestland. CREP, a partnership between federal and state agencies and county land conservation departments, allows a landowner to enroll agricultural lands into various land conservation management practices. To be eligible under this program, farmland needs to be highly prone to erosion and must have been planted for 4 to 6 years before the enactment of the 2002 law. Marginal pastureland is also eligible. Producers need to develop and follow a plan for the conversion of cropland to less intensive use and to assist with the cost, establishment, and maintenance of conservation practices. More information can be found at <u>http://www.nrcs.usda.gov/Programs/crp/</u> and <u>http://www.fsa.usda.gov/FSA/webapp?area=home&subject=copr&topic=cep</u>.

**Grassland Reserve Program (GRP).** This program is used to protect private grasslands, shrublands, and pasturelands. Agricultural areas which were formerly one of these ecosystems are also eligible for enrollment. The program helps to restore native grasslands and forbs by banning any agricultural practice which requires breaking the ground. Landowners must place their land into an easement for a period of between 10 and 30 years. An accompanying restoration plan delineates how best to return the area to a natural state. Program participants must share in installation costs. More information can be found at http://www.fsa.usda.gov/FSA/webapp?area=home&subject=copr&topic=grp.

**Wildlife Habitat Incentives Program (WHIP).** This voluntary program is used to develop or improve wildlife habitat on privately owned land. All private land is eligible for this program unless the land is enrolled in CRP, WRP, or other similar programs. Producers must design and implement a wildlife habitat development plan and assist in the implementation costs. More information can be found at <u>http://www.nrcs.usda.gov/Programs/whip/</u>.

<sup>&</sup>lt;sup>30</sup> http://www.colomahistorical.org/cahs.html

**Grazing Lands Conservation Incentive.** This program provides cost sharing to improve grazing land management. More information can be found at <u>http://www.nrcs.usda.gov/Programs/glci/</u>.

**Environmental Quality Incentives Program (EQIP).** This voluntary conservation program promotes agricultural production and environmental quality and compatible goals. Financial assistance and technical help are offered to assist eligible participants in the installation and implementation of structural improvements and management practices which better protect agricultural land from environmental degradation. All private agricultural land is eligible for enrollment including cropland, grassland, pastureland, and non-industrial private forestland. Participants are required to develop and implement an EQIP plan that describes the conservation and environmental purposes to be achieved. Participants must share in the overall costs. More information can be found at <a href="http://www.nrcs.usda.gov/Programs/eqip/">http://www.nrcs.usda.gov/Programs/eqip/</a>.

**Forest Land Enhancement Program (FLEP).** This program aids landowners in the application of sustainable forestry on private land. The program places a permanent easement on farmland. All non-industrial private forestlands are eligible for financial, technical, and educational assistance. Landowners must develop and implement a management plan to harvest timber while protecting the environmental quality of the forest. More information can be found at <u>http://www.fs.fed.us/spf/coop/programs/loa/flep.shtml</u>.

**USDA Farmland Protection Policy Act (FPPA).** The purpose of this program is to maintain prime farmland in agricultural use through agricultural conservation easements. This program provides funding for state, tribal, or local government to purchase development rights on prime agricultural land. More information can be found at <u>http://www.nrcs.usda.gov/programs/fppa/</u>.

**Wetland Reserve Program.** This program which provides financial and technical assistance to private landowners to restore, protect, and enhance wetlands. The management goals include restoring both the functional values of the wetlands and providing optimal wildlife habitat. Most private wetlands that were converted to agricultural uses prior to 1985 are eligible. Participants must develop and follow a plan for the restoration and maintenance of the wetland and, if necessary, assist in the cost of restoration. More information can be found at <u>http://www.nrcs.usda.gov/PROGRAMS/wrp/</u>.

# US Environmental Protection Agency

**Clean Water Act (1977).** The Clean Water Act established the basic structure for regulating discharges of pollutants into the waters of the United States.

**National Pollution Discharge Elimination System (NPDES) Storm Water Program.** The NPDES program addressed the non-agricultural sources of storm water discharge and the Safe Drinking Water Act.

# State

# Wisconsin Department of Agriculture, Trade and Consumer Protection

**Wisconsin Farmland Preservation Program.** The 1977 Wisconsin Farmland Preservation Program was developed to preserve farmland through local planning and zoning; promote soil and water conservation; and provide tax relief to participating landowners. Landowners qualify

if their land is located in an exclusively agricultural zoning district or if they sign an agreement to use their land exclusively for agricultural purposes. Participating landowners must comply with soil and water conservation standards set by the state Land Conservation Board.

# Wisconsin Department of Revenue

**Farmland Tax Relief Credit Program.** The Farmland Tax Relief Credit Program provides tax relief to all farmland owners with 35 or more acres. The credit is computed as a percentage of the first \$10,000 in property taxes up to a maximum credit of \$1,500. The DOR determines the actual percentage based on the estimated number of claims and amount appropriated for the credit.<sup>31</sup>

# Wisconsin Department of Natural Resources

**Wisconsin Pollutant Discharge Elimination System Permits (WPDES).** The Wisconsin Pollutant Discharge Elimination System Permits (WPDES) was instituted as a complement to the NPDES program. WPDES regulates municipal, industrial, and agricultural operations which discharge (or have the potential to discharge) into local surface waters. Depending on the site-specific land use, the program regulates three different uses. Wastewater discharge permits regulate effluents discharged by industries and municipalities into surface and groundwater. Construction sites greater than one acre and industrial sites (non-metallic mining) are regulated through stormwater runoff permits.<sup>32</sup> Concentrated Animal Feeding Operations (CAFOs) with 1,000 animal units or more are regulated as a result of potential contamination from animal waste.<sup>33</sup> If an individual operation is found to be a significant contributor of pollutants, it may be considered a medium-sized CAFO; permits can be issued for medium-sized CAFOs which exceed 300 animal units.

In order to be defined a CAFO, the agricultural operation must first be defined as an animal feeding operation (AFO). AFOs are facilities which animals are stored, stabled, or fed for at least 45 days within a 12 month period and which vegetation or post-harvest residues are not sustained in the normal growing season over any portion of the facility.<sup>34</sup> Permits require CAFOs to provide runoff management plans for outdoor lots and feed storage areas; a manure storage facility plan/diagram, an annually updated comprehensive manure management plan; and routine monitoring and reporting of daily operations. Permits are issued for a maximum of five years. The permit system regulates land application, manure storage, and runoff management; it does not address noise, land values, traffic, odors, or other similar types of issues because there is no statutory authority to do so. These issues must be regulated by county and local ordinances.

**Forest Crop Law and Managed Forest Law.** In 1927, the Wisconsin Legislature enacted the Forest Crop Law (FCL), a voluntary forest practices program to encourage sound forestry on private lands. It has promoted and encouraged long-term investments as well as the proper management of woodlands. This law allowed landowners to pay taxes on timber only after

<sup>&</sup>lt;sup>31</sup> Wisconsin Department of Revenue. 2002. *Division of Research and Policy Farmland Preservation Credit Program and Farmland Tax Relief Credit Program*.

<sup>&</sup>lt;sup>32</sup> Wisconsin State Statutes NR 135 and NR 216.

<sup>&</sup>lt;sup>33</sup> Wisconsin State Statutes NR 243.

<sup>&</sup>lt;sup>34</sup> U.S. Environmental Protection Agency and U.S. Department of Agriculture. 1999. Unified National Strategy for Animal Feeding Operations.

harvesting, or when the contract is terminated. Since the program expired in 1986, participants are not allowed to re-enroll in the program. Since 1986, the Managed Forest Law has replaced the Forest Crop Law.

The Managed Forest Law (MFL), enacted in 1985, encourages the growth of future commercial crops through sound forestry practices. To be eligible, a landowner must own at least 10 contiguous acres of woodlands in a village or town. The landowner must implement a forestry management plan for future commercial harvests on the land. Contracts can be entered for a period of either 25 or 50 years. Portions of the land enrolled are open to public access for hunting, fishing, cross-country skiing, sight-seeing, and hiking. The program recognizes individual property owners' objectives while providing for society's need for compatible recreational activities, forest aesthetics, wildlife habitat, erosion control, and protection of endangered resources.

**Wisconsin Forest Landowner Grant Program.** The Wisconsin Forest Landowner Grant Program assists private landowners in protecting and enhancing their woodlands. Only private non-industrial forest owners of at least 10 acres but no more than 500 acres who have an approved or pending forest stewardship management plan are eligible for assistance. Qualified projects include reforestation; soil and water protection; wetland and riparian protection, restoration, and creation; fish and wildlife habitat enhancement; recreational, historic, and aesthetic forest enhancement; and endangered or threatened resources protection.

**Forest Land Enhancement Program (FLEP).** The purpose of this program is to assist private landowners in protecting and enhancing their forested lands and water by providing cost-share reimbursement for sustainable forestry practices.

**Partners for Fish and Wildlife.** Partners for Fish and Wildlife is a program which provides financial and technical assistance to private landowners to restore, protect, and enhance wildlife habitats on their land. This is a voluntary incentive based program. State resource agencies and individual landowners work closely with the Service to help establish priorities and identify focus areas. The restoration of degraded wetlands, native grasslands, streams, riparian areas, and other habitats to conditions as close to natural is emphasized. The program's philosophy is to work proactively with private landowners for the mutual benefit of declining Federal trust species and the interests of the landowners involved. A 50 percent cost sharing is required from individual landowners. Landowners must sign an agreement to retain the restoration for a minimum of 10 years. During this time period, no other private property rights are lost.

# Wisconsin Historical Society

The Wisconsin Historical Society (WHS) Division of Historic Preservation (DHP) provides funds for conducting surveys to identify and evaluate historical, architectural, and archaeological resources, nominating properties and districts to the National Register, and carrying out a program of comprehensive historic preservation planning and education. These are available to local units of government and non-profit organizations. Although funding is limited, the DHP identified target communities during each funding cycle. In recent years the DHP has favored underrepresented communities: unincorporated communities or villages or fourth-tier cities with a population less than 5,000. A set of funds is also designated for use by Certified Local Government (CLG) status communities. In addition, many private funding sources specifically target smaller communities in the more rural parts of the state. Other specific programs are listed below.

**Federal Historic Preservation Credit.** This program returns 20 percent of the cost of rehabilitating historic buildings to owners as a direct reduction in the federal income taxes. To qualify, buildings must be income producing historic buildings, must be listed on the National Register of Historic Places, or contribute to the character of a National Register Historic District.

**Wisconsin Supplemental Historic Preservation Credit.** This program returns an additional 5 percent of the cost of rehabilitation to owners as a discount on their Wisconsin state income taxes. Owners that qualify for the Federal Historic Preservation Credit automatically qualify for the Wisconsin supplement if they get National Park Service approval before they begin any work.

**25-Percent State Income Tax Credits.** This program can be used for the repair and rehabilitation of historic homes in Wisconsin. To qualify, buildings must be either listed on the state or national register; contribute to a state or national register historic district; or be eligible for individual listing in the state register.

(Page left blank intentionally)

# AGRICULTURAL RESOURCES – Village of Coloma

#### GOAL AG 1. Maintain the economic viability of the area's agricultural community.

**STRATEGY AG 1.1: Preserve the area's most productive farmland for continued agricultural activities.** While the Village of Coloma has very little farmland within its corporate limits, the village does recognize the influence that farming has contributed to the character, well being and vitality of the area.

• RECOMMENDATION AG 1.1.1: Work with the Town of Coloma to steer higher density residential, commercial and manufacturing developments to areas within or adjacent to the Village of Coloma.

**STRATEGY AG 1.2: Maintain a critical mass of farmers needed to sustain the agribusiness community and other support businesses.** The decline in the number of farms has hurt many support businesses, some of which no longer exist in the area. As a result, farmers often have to travel greater distances for equipment, supplies, and other services. To sustain the agribusiness community, enough farmers need to remain in farming to make it cost effective for support businesses to remain or relocate to the area.

- RECOMMENDATION AG 1.2.1: Support an agricultural economic base by working with Waushara County to encourage farmers in the county to explore opportunities for alternative specialty agricultural products, methods and services.
- **RECOMMENDATION AG 1.2.2: Encourage the county to form a committee to explore development of alternative specialty products, methods and services.** *Committee should include representation from local farmers, local communities, UW-Extension, county agricultural department, local businesses, Chamber of Commerce and local economic development groups.*

**STRATEGY AG 1.3: Encourage farmers to work with educators and other resource specialists to make their operations more economically viable.** New tools, techniques and trend in equipment, products and crops are constantly being developed. To enhance their ability to compete not also locally, but also globally, farmers need to keep apprised of the latest information.

 RECOMMENDATION AG 1.3.1: Encourage the county, UW-Extension, Wisconsin Department of Agriculture, Trade and Consumer Protection, USDA-NRCS and other to work with and provide information and resources to farmers who are seeking to innovate, modernize or maintain their operations. A sound business plan combined with adequate financing at a favorable rate could well be the key driver in a farmer's decision to continue in agriculture. Information that is provided should support a wide range of agricultural interests.

STRATEGY AG 1.4: Solicit the expansion and/or creation of new complementary industrial and commercial agribusinesses and support local farm product processing and marketing initiatives. Waushara County has a rich and vibrant agricultural history. Agriculture remains an important part of the local economy. Industrial or commercial

businesses that can process, manufacture, or sell agricultural and/or forestry products locally not only help local farmers compete, they also provide employment opportunities for other area residents. Residents and tourist strive for a simpler life and appreciate the benefits of buying fresh food, and other products that are grown or made locally.

- RECOMMENDATION AG 1.4.1: Work with the local economic development groups to encourage the establishment of businesses in Coloma Business Park that would support the agricultural economy.
- **RECOMMENDATION AG 1.4.2: Organize a local farmers market and/or participate in the establishment of a regional farmers market.** Work with the Waushara County Economic Development Corporation to promote the farmers market countywide and/or as part of a countywide agricultural marketing effort. Invite various community partners including local farmers, craftspeople, artists, and businesses.

STRATEGY AG 1.5: Work with the Waushara County Economic Development Corporation, and others to organize, promote and market agriculture as a tourist attraction.

- RECOMMENDATION AG 1.5.1: Market locally grown and/or crafted items.
- RECOMMENDATION AG 1.5.2: Encourage the establishment of a restaurant specializing in farm fresh or Amish cooking.
- RECOMMENDATION AG 1.5.3: Encourage the development of a country, Amish or other similar store.
- RECOMMENDATION AG 1.5.4: Encourage the establishment of "Bed & Breakfasts" or other similar enterprises that highlight agriculture such as apple orchard, pumpkin patch, wagon rides, lease a tree or hive, life on the farm.

**STRATEGY AG 1.6: Support local farm product processing and marketing initiatives.** Local farmers markets can provide an outlet for locally produced products. Area grocers, restaurants, schools, nursing homes, and other food providers can help the local farm economy by making an effort to purchase directly from local farmers.

- **RECOMMENDATION AG 1.6.1: Provide an outlet for farmers to market or sell their products.** These activities could include roadside stands, local and regional farmers markets, etc.
- RECOMMENDATION AG 1.6.2: Encourage local businesses to buy and sell locally grown produce and other agricultural products.
- **RECOMMENDATION AG 1.6.3:** Encourage the local school districts to utilize local food in their hot lunch program.

#### GOAL 2. Minimize conflicts between ongoing agricultural operations and rural nonfarm residents.

**STRATEGY AG 2.1: Educate new rural residents about the rural lifestyle and its implications.** Residents new to country living often have misconceptions about what it means to live in the country. Helping them understand that living in the country is not all "milk and honey" can help them cope when an aspect of farming offends one or more of their senses.

- **RECOMMENDATION AG 2.1.1: Encourage the farm bureau, UW-Extension and FFA to work with the non-farm community to promote rural lifestyles and activities.** This could include expansion of the county fair to include farm machinery and other agricultural events.
- **RECOMMENDATION AG 2.1.2: Work with the county to promote and support** *the annual "June Dairy Breakfast" program.* An expansion of the "Breakfast on the Farm" could also be considered. This annual event could include a weekend of community activities scattered throughout the county.
- RECOMMENDATION AG 2.1.3: Continue to work with the Town of Coloma to develop community-wide activities. These events could promote the "sense of community" and would allow neighbors and other members of the community to connect with each other for a common bond.

# GOAL 3: Provide opportunities for farmers to profit from the equity in their land.

STRATEGY AG 3.1: Educate farmers on how to take advantage of their land's development potential in ways that maintain the utility of remaining lands for productive agricultural activities. Many farmers hope to use proceeds from the sale of a portion of their lands for non-farm uses to help underwrite their ability to continue a viable farming operation. Farmers benefiting the most from selling off parts of their farm are those who carefully weigh the profits earned from the sale of smaller less productive parcels with the loss of productivity on the farm's remaining acreage. Without adequate forethought, the ability to maintain a viable farming operation (and the remaining raw land value) once portions of a farm are sold can be inadvertently compromised.

**STRATEGY AG 3.2: Identify ways to enable retiring farmers to pass farms on to their heirs or other farmers.** Not all farmers can or want to sell off their farms for development. Many hope that their children or someone else will continue to operate their farms following their death. Estate planning can help make the ensuing transfer orderly and less financially painful.

- RECOMMENDATION AG 3.2.1: Encourage the UW-Extension in cooperation with the Waushara County Agricultural Department to present information to county farmers on deed restrictions, permanent easements, estate planning or use value assessment.
- RECOMMENDATION AG 3.2.2: Encourage high schools and vocational schools to incorporate education in their curriculum that encourages and educates young people about farming.

#### NATURAL RESOURCES – Village of Coloma

#### GOAL NR 1. Preserve the quality and quantity of our groundwater supplies.

**STRATEGY NR 1.1: Ensure that adequate amounts of safe drinking water are available throughout the area.** Although most village residents are connected to municipal water, the village and surrounding areas depend on an adequate supply of safe drinking water. Maintaining an adequate supply of safe drinking water is critical to the well-being of both existing and future residents whether or not they have access to municipal water. Extraction of groundwater for spray irrigation of crops in the area may pose a long-term threat in groundwater quantity and quality.

- RECOMMENDATION NR 1.1.1: Support county efforts to permit private wells. If state policy change, the town would support county permitting of private wells. Current law requires that prior to drilling an individual well; a permit must be taken out. While these permits may be ineffective, the county does not want to impose a double permitting fee.
- RECOMMENDATION NR 1.1.2: Work with the County and Town of Coloma to limit development near the former landfill.
  - Encourage Waushara County to continue to inform potential landowners and new property owners at the time of property transfer and prior to approval of a building permit if the property is within 1,200 feet of the former landfill. Notification should indicate that more information be obtained before installing a private well. A 1,200 foot buffer is indicated on the future land use map.
- **RECOMMENDATION NR 1.1.3**: Use zoning to protect existing and future municipal wellhead locations from land uses that could potentially contaminate the groundwater.
  - Enact a wellhead protection zoning.
  - Encourage the Town of Coloma to revise their zoning map to include the County's Groundwater Protection Overlay District

**GOAL NR 2:** Maintain and improve the water quality of our lakes, streams, rivers and wetlands. While there are no lakes, streams or rivers within the village limits, village residents enjoy the natural resources found within the area.

**STRATEGY NR 2.1: Reduce non-point nutrient runoff into lakes, streams and rivers.** Maintaining water resources in the county helps preserve a high-quality aquatic ecosystem. Since most of the streams contain a naturally reproductive trout fishery, their tolerance for nutrient-enrichment is extremely limited. Nutrient loads raise water temperature, contributing to the growth of excessive aquatic vegetation including invasive species. When these conditions exist, opportunities for quality water-based recreation (boating and swimming as well as fishing) are greatly diminished. Additionally, particularly for shoreline residents, poor surface water quality adversely impacts the aesthetic values of the water resource and can lead to decreased property values.

- RECOMMENDATION NR 2.1.1: Control storm water runoff from construction activities and impervious surfaces.
  - Work with Waushara County to enforce mandatory construction site erosion control requirements.
  - Incorporate stormwater runoff and detention requirements from impervious surfaces such as building footprints, parking areas, and other hardscapes as specific site criteria in the building permit application.

# GOAL NR 3: Protect key natural features and resources.

**STRATEGY NR 3.1:** Work toward the eradication of invasive species in area lakes, streams, wetlands, and forests. Since most invasive plant and animal species have been introduced from overseas, they generally have no natural enemies to control their spread. Their unchecked growth destroys native habitat, reduces the ability of the natural resource base to accommodate high-quality recreational experiences, and can result in significant economic loss for individuals as well as the area in general.

- ◆ RECOMMENDATION NR 3.1.1: Increase public awareness of its role/responsibility in introducing/containing invasive species.
  - Work with the Land Conservation Department, the WDNR and others to inform the public of issues and preventative measures.
- RECOMMENDATION NR 3.1.2: Support a countywide coordinated approach to deal with specific problem species on a countywide basis.
  - Encourage local input to conduct an inventory and establish priorities for addressing concerns at the countywide level.

**STRATEGY NR 3.2: Protect all designated class I and class II trout streams from degradation.** Waushara County's trout streams are considered to be a fisheries resource of statewide and perhaps even national significance. The trout habitat offered by these coldwater streams is extremely sensitive to any impact that elevates their temperature, including damming, nutrients, and stream bank vegetation removal.

**STRATEGY NR 3.3: Maintain a quality forest resource.** Many residents within the Village of Coloma enjoy the forest resource within the Town of Coloma. Over half the town's total area is presently wooded. These woodlands provide attractive building sites but, equally important, also are an important economic resource for individual property owners and provide employment opportunities for area residents. Additionally, most of the wooded acreage is a natural ecosystem, providing wildlife habitat and playing a major role in the scenic character so highly valued by residents and visitors alike.

# • RECOMMENDATION NR 3.3.1: Work with and support the WDNR to control the spread of diseases and insects which threaten the resource.

• Encourage the WDNR to use media and educational materials to help the public identify diseases and insect pests when they occur in the landscape.

**STRATEGY NR 3.4:** Protect the integrity of existing and future mineral extraction sites. The glacial heritage of the area has left a number of sites that are rich in sand and

gravel deposits. Because public pressure from nearby residents can often make it difficult for an operator to expand his pit or open a new site, it is important to protect both working and future sites from adjacent development. Underscoring this concern is the fact that, since these construction materials are bulk products requiring relatively high transportation costs, they need to be utilized relatively near their source of extraction to be economically viable.

• **RECOMMENDATION NR 3.4.1: Discourage this type of development within the Village of Coloma.** There are no non-metallic mining operations currently in operation or planned in the Village of Coloma. After discussing the potential location of a nonmetallic mining operation in the Village it was determined that areas outside of the village would be better suited for this type of development.

# GOAL NR 4: Preserve the intrinsic visual qualities of our landscape that define its rural character.

**STRATEGY NR 4.1:** Protect the visual integrity of important scenic features and/or vistas, like outcroppings and undisturbed glacial landforms. These scenic features are highly prized and contribute significantly to the quality of life they presently enjoy. Preserving them so that they can be enjoyed by future generations is a priority.

• RECOMMENDATION NR 4.1.1: Protect and promote the area's rich glacial heritage by supporting efforts to extend a spur trail from the Village of Coloma to the Ice Age Trail.

**STRATEGY NR 4.2:** Minimize the visual impact of non-farm development on the rural landscape. Outlying rural areas continue to be viewed as an attractive option for new residential development, particularly those locations with highly scenic landscape features. While most people would include farmsteads as integral components of "rural character", the proliferation of non-farm residences in the rural landscape is generally considered to detract from its inherent visual qualities. This concern can be lessened by taking care in the placement and design of new structures, as well as managing their numbers.

- **RECOMMENDATION NR 4.2.1:** Influence the types and locations of rural residential development.
  - Encourage the Town of Coloma to regulate development densities in rural areas.
  - Support Town of Coloma efforts to encourage innovative development techniques such as conservation subdivisions.
  - Encourage the Town of Coloma to direct higher density residential development to areas within or adjacent to the Village of Coloma where municipal services are available.
- **RECOMMENDATION NR 4.2.2: Establish a cell tower ordinance.** The cell tower ordinance should address issues of aesthetics.
- RECOMMENDATION NR 4.2.3: Discourage the placement of billboard within the Village of Coloma. Billboards, once sited, are virtually impossible to relocate until the lease expires. Wisconsin's new digital billboard requirements have resulted in longer leases for new billboards.

**STRATEGY NR 4.3: Eliminate, change, or improve unsightly properties and other elements generally regarded as eyesores.** Community image for local residents and visitors passing through, more often than not, is defined by appearance. Tidy, well-maintained properties with a lack of necessary clutter presents a positive image while a proliferation of eyesores such as unkempt properties, improperly discarded household items, and other evidence of blight reflects poorly on all the residents who live there. It is difficult to achieve a high level of community pride when its eyesores reflect the common perception of a community.

# • RECOMMENDATION NR 4.3.1: Enforce existing nuisance/litter ordinances and building codes.

**STRATEGY NR 4.4: Preserve the night sky.** Until they have spent time in a rural area, most urban residents have no idea of the number of stars in the sky. Rural residents often comment that their ability to experience the night sky is one of the most rewarding aspects of rural living. For them, the glare and diffuse light from commercial activities and other illuminated sources is considered an intrusion they would like to see minimized or eliminated.

• RECOMMENDATION NR 4.4.1: Enact a light ordinance that would address shielding, light directing, and similar measures to control the direction, intensity and "leakage" of exterior lighting.

# CULTURAL RESOURCES – Village of Coloma

**GOAL CR 1: Preserve the community's important cultural resources.** Integral to the tapestry of structures, fields, woodlands, and other features that define a community's visual character are those cultural resources that over time have been intrinsically interwoven into its growth and development. Preserving those resources deemed by residents to having made meaningful contributions to their community's heritage allows them to connect with its past history and provides an opportunity to pass on this heritage to future generations. These cultural resources often include archaeological sites dating from the area's pre-history, more recent historical sites and structures, important and unique architecture, elements reflecting its ethnic heritage, and other significant cultural features.

**STRATEGY CR 1.1: Support the Coloma Historical Society.** The Coloma Historical Society is comprised of individuals who share a common bond to preserve historic memorabilia, historic buildings and to give residents and school children the opportunity to learn about local history.

- **RECOMMENDATION CR 1.1.1: Invite the Coloma Historical Society to a Village Board** *meeting on an annual basis.* Use this meeting to keep communication open and keep informed about historical society activities.
- **RECOMMENDATION CR 1.1.2:** Consider the adoption of historic preservation ordinance.

**STRATEGY CR 1.2: Compile an inventory of the significant cultural resources.** A survey of historical, architectural and archeological resources would give the Village a base of information for future planning endeavors. It would also identify properties that are potentially eligible for inclusion ion the National Register of Historic Places (NRHP).

RECOMMENDATION CR 1.2.1: The Village of Coloma should work with the Town of Coloma to seek grant money to fund architectural and historical surveys. The Wisconsin Historical Society's (WHS) Division of Historic Preservation (DHP) provides funds for surveys to identify and evaluate historical, architectural, and archaeological resources, nominating properties and districts to the National Register of Historic Places (NRHP), and carrying out a program of comprehensive historic preservation planning and education. In addition to identifying properties that are potentially eligible for the NRHP, these surveys would contribute a base of information to the Architecture and Historic Inventory (AHI) for future planning endeavors.

These funds are available to local units of government and non-profit organizations. Although funding is limited, the DHP identifies target communities during each funding cycle. In recent years the DHP has favored underrepresented communities: unincorporated communities or villages or fourth-tier cities under 5,000 in population. In addition, many private funding sources specifically target smaller communities in the more rural parts of the state.

• RECOMMENDATION CR 1.2.2: Work with the Coloma Historical Society and other interested individuals to compile an inventory of historical, architectural and archeological resources within the Village.

RECOMMENDATION CR 1.2.3: The Village of Coloma should seek Certified Local Government (CLG) status through the DHP. A set of funds is also earmarked for use by Certified Local Government (CLG) communities. Participation in this program gives a local government certain benefits. It allows the government to apply for sub-grants for certain preservation activities, review State and National Register nominations for properties within the municipal boundaries, and use the Wisconsin Historic Building Code for locally designated historic buildings. It should be noted that entrance into the CLG program is not automatic. Moreover, funding is limited, and only a few communities receive grant money each year.

**STRATEGY CR 1.3: Develop and utilize existing local expertise on historic preservation issues.** The Coloma and Waushara County Historical Societies include a membership that has a diverse and broad perspective on the area's history, including past events and personalities, as well as sites and structures. They and other individuals may also have an extensive collection of early photographs, artifacts and other memorabilia. This is an excellent resource that should be involved when decisions are needed regarding the potential remodeling/renovation or removal/demolition of key sites and structures.

- RECOMMENDATION CR 1.3.1: Support local historic preservation of structures and landmarks by:
  - Seeking out local residents that have knowledge and are interested in historic preservation;
  - Seeking input from the local residents and the Coloma and Waushara County Historical Societies when land use decisions need to be made.

**STRATEGY CR 1.4: Consistent with smart growth, consider opportunities for historic preservation in all future planning, zoning, and development decisions.** Land-use decisions made about transportation, zoning, and subdivisions can directly impact local efforts to preserve a historic building, an archaeological site or a historic area. Available information that has been assembled in the community is an important tool that provides a valuable reference for sound decision making.

- RECOMMENDAITON CR 1.4.1: The Village of Coloma should consider cultural resources and historic preservation in any future land use planning and development decisions it may undertake in the future.
- RECOMMENDATION CR 1.4.2: The Village of Coloma should consistently seek the input from informed individuals when making decisions that involve existing sites and structures.

**STRATEGY CR 1.5: Educate local officials and the public at large on the importance of historic preservation.** Too often, local officials and residents alike have little understanding of why it is important to preserve certain sites and structures in their community. Preserving important sites and structures not only enables a community keep in touch with its past, it also can help promote a "sense of place".

• **RECOMMENDATION CR 1.5.1: Work with owners of historic properties to seek** available grants and other favorable funding sources. The UWEX working in tandem with the WHS should take a lead role in making educational materials that provide guidance on building renovation and restoration projects readily available. This information would be geared toward helping property owners preserve the architectural integrity of their structures when they undertake remodeling or renovation projects. Experience has shown that insensitive "remodels" not only compromise the original appearance of the structure, they often detract from the architectural character of nearby structures.

• **RECOMMENDATION CR 1.5.2: Provide educational materials related to the benefits available to properties enrolled on the National Register.** The benefits afforded properties on the National Register need to be publicized within the area. These benefits include protective consideration during state and federal projects, and two tax credit programs for historic buildings: the 25% Historic Preservation Tax Credit for Income-Producing Properties, and the 25% Historic Homeowners Tax Credit. Both of these typically require that the property in question be listed on the National Register. The Archaeological Sites Property Tax Exemption program is also available for listed archaeological sites.

**GOAL CR 2:** Support local efforts to bring entertainment and cultural events to the Coloma area. The Coloma Hotel features occasional dinner shows, and art and craft shows. Additionally, the Coloma Players, made up of local volunteers, performs for the local community.

STRATEGY CR 2.1: Ensure that local entertainment and culture continue in the Coloma area.

• RECOMMENDATION CR 2.1.1: Promote these events through local businesses, county publications and websites.

# EXHIBIT 6-1 VILLAGE OF COLOMA IMPORTANT FARMLAND CLASSES

Prime Farmland - Those soils that produce the highest yields of food, fiber, feed, forage and oilseed crops when managed according to acceptable farming methods.

Prime Farmland Where Drained

Unique Farmland - Land other than prime that is used to produce specialty crops such as apple orchards, lettuce, carrots, celery, cauliflower, etc. that require a high management and investment level.

#### Unique Farmland Where Drained and Protected From Frequent Flooding

Statewide Important Farmland - Land in addition to prime and unique that is important to the State of Wisconsin for crop production.

Statewide Important Farmland Where Drained

Statewide Important Farmland Where Drained and Protected From Frequent Flooding

Local Important Farmland - Land in addition to prime, unique and statewide that is important to Waushara County for crop production.

Local Important Farmland Where Drained

Other Lands - Land that has little value for producing crops.

# EXHIBIT 6-4 VILLAGE OF COLOMA SOIL LIMITATIONS FOR SEPTAGE SPREADING

None to Slight - Soils relatively free of limitations that affect the intended use or the limitations are easy to overcome.

**Moderate** - Soils with moderate limitations resulting from the effects of slope, wetness, soil texture, soil depth, groundwater, etc. Normally the limitations can be overcome with correct planning, careful design, and good management.

Severe - Soils with severe limitations resulting from the effects of slope, wetness, soil texture, highwater table,etc. Soils rated as having severe limitation are severe enough to make the use of the soil doubtful for the proposed use. Careful planning and aboveaverage design and management are required. This often includes major soil reclamation work.

# CHAPTER 7: ECONOMIC DEVELOPMENT

#### INTRODUCTION

Planning for economic development is an on-going process in which a community organizes for the creation and maintenance of an environment that will foster both the retention and expansion of existing businesses and the attraction of new businesses and ventures. It is important to place an emphasis on existing resources which serve as assets for economic development efforts.

#### Economic Development Vision for 2030

In 2030, the Village of Coloma has been successful in attracting several commercial and industrial businesses to their two business/industrial parks. The employment that they provide and competitive wages that they offer have helped retain younger members of the workforce and are serving to keep more dollars in the local economy. This in turn has enabled the area's retail base to expand and become more diverse. The downtown area is thriving with many unique one-of-a-kind businesses and few vacant storefronts exist. While the area is becoming more self-sufficient, many residents still need to travel to larger urban centers for many of their shopping needs. However the expanding population base has allowed several local merchants to successfully expand their operations and product lines.

# INVENTORY AND ANALYSIS

Some components of the area's economy are presented in this chapter to better understand the state of the economy in the Village of Coloma. Characteristics reviewed in this element include educational attainment, employment and unemployment levels, location of workplace, travel times, and a look at the area's economic base.

#### **Educational Attainment**

Table F-1 (Appendix F) presents educational achievement information from the 2000 Census for residents 25 years of age or older. A higher percentage of residents in the Village of Coloma received high school diplomas than Waushara County, as a whole. *The high school graduation rate for Village of Coloma residents was 79.6 percent compared to 78.8 percent in the County and 85.1 percent in the State.* However, it is in the area of post-high school achievement where the state generally has a higher level of educational attainment. For example, 23 residents (7.2%) from Coloma completed four years of college or more. Comparatively, at the state level, 22.4 percent of residents have achieved this goal. Educational achievement at the county level was slightly higher than the Village, but lower than the state with 11.7 percent having completed four or more years of college.

The U.S. Census Bureau reports that *a person with a bachelor degree can expect to earn \$2.1 million over the course of a career, nearly double what the expected earnings* 

*are for a high school graduate*.<sup>1</sup> The results of this study demonstrate there is a definite link between earning potential and education. Greater educational attainment is a goal that all of Wisconsin should be striving toward. Since the data suggests that many of the county's best educated residents are retirees, it points to the apparent lack of job opportunities in the area to retain or attract better educated members of the workforce.

# Labor Force

Labor force is an indicator of economic performance. It shows how quickly the labor force is growing and the extent to which people are able to find jobs. The labor force is defined as individuals currently with a job, the employed; and those without a job and actively looking for one, the unemployed.

Census information indicates that *labor force growth rates for Waushara County* (29.4%) and the Village of Coloma (52.8%) exceeded the state's 14 percent growth rate between 1990 and 2000 (Table F-2, Appendix F). Even though the labor market experienced overall growth in Waushara County, the unemployment rates in the county were higher than the state in both 1990 and 2000 (Table F-3 and Table F-4, Appendix F). According to census data, in 2000, Waushara County and Wisconsin had unemployment rates of 6.6 percent and 4.7 percent, respectively. The Village of Coloma (12.5%) was also high relative to the state and the county. *The Village had the second highest unemployment rate in the County in 2000 (12.5%); while the Town of Coloma had the highest (29.3%).* Table 7-1 includes more recent information for the county and state between 2001 and 2004.<sup>2</sup> According to Wisconsin Department of Workforce Development, unemployment rates dropped between 2004 and 2007 for both Waushara County and Wisconsin

	2004	2005	2006	2007
Waushara County	6.0%	5.6%	5.5%	5.4%
Wisconsin	5.0%	4.8%	4.7%	4.9%

Source: Wisconsin Department of Workforce Development, 2004 to 2007

# Economic Base Information

The composition and types of employment in Waushara County and the Village of Coloma provides a snapshot description of the economic base in the area. Table 7-2 illustrates employment information by occupation and by industry.<sup>3</sup> *Manufacturing (29.8%); Public Administration (10.6%); Educational, health and social services (9.6%); and Retail trade (9.2%) employed over half (59.2%) of workers in the Village of Coloma in 2000.* Information (0.0%) and Wholesale Trade (1.8%) employed the fewest workers in the Village of Coloma. In comparison, Manufacturing (22.1%/22.2%); Educational, health and social services (17.9%/20.0%); and Retail trade (10.4%/11.6%) employed the largest percentage of workers in Waushara County and Wisconsin.

<sup>&</sup>lt;sup>1</sup> U.S. Census Bureau. 2002. *The Big Payoff: Educational Attainment and Synthetic Estimates of Work-Life Earnings.* 

<sup>&</sup>lt;sup>2</sup> Wisconsin Department of Workforce Development, 2004 through 2007. *Local Area Unemployment Statistics Estimates Report.* 

<sup>&</sup>lt;sup>3</sup> U.S. Census Bureau, 2000. *Community Profiles.* <u>http://www.doa.state.wi.us/dir/wisconsin/index.html</u>.

The positive aspect of this distribution is that the manufacturing sector, in general, pays higher wages than most service industries. The negative aspect, however, is that the manufacturing sector tends to be severely impacted by recessions, which is particularly painful for most Wisconsin communities.

*The top four occupations for Village of Coloma workers in 2000 were Production, transportation, and material moving occupations (31.7%); Service occupations (27.1%); and Management, professional, and related (15.1%).* The top occupation in Waushara County was Production, transportation, and material moving (25.0%), while in Wisconsin, Management, professional and related (31.3%) had the largest share of workers.

	Village of Coloma	Waushara County	Wisconsin

Table 7-2. Employment by Occupation and Industry

U.S. Census 2000, SF 3

Table 7-3 lists the largest employers in Waushara County.<sup>4</sup> Two of the top nine employers are manufacturing facilities. This list also indicates that Waushara County, the Department of Corrections and three school districts provide a large share of public sector employment. Care for the elderly is provided by three of the top 20 employers.

<sup>&</sup>lt;sup>4</sup> Wisconsin Department of Workforce Development, 2005. *OEA – Top 100 Employers.* http://dwd.wisconsin.gov/oea/xls/top\_100\_all.xls.

#### **Travel Time to Work**

Travel time to work provides information about the time residents spend commuting to work. On an average, residents from the Village of Coloma, Waushara County and the state spent less than 30 minutes traveling to and from work in 1990 (Table 7-4). In 1990, average commute times for residents was 20.1 minutes in the Village of Coloma. County residents traveled an average of 21.8 minutes to work, while state residents traveled an average of 18.3 minutes to work.

Employers	Industry/Product/Service	Employees
Wautoma Public School	Elementary & secondary schools	250-499

	V. Coloma	Waushara County	Wisconsin
1990 Mean Travel Time	20.1	21.8	18.3
2000 Mean Travel Time	20.6	27.1	20.8

Source: U.S. Census 1990 and 2000

Between 1990 and 2000, average commute times rose for all jurisdictions, with the Village of Coloma experiencing a lower increase in average commute times than Waushara County and Wisconsin (Tables F-5 and F-6, Appendix F). On an average, commute time for Village of Coloma residents increased by a half (0.5) minute. Waushara County experienced the largest increase in commute times. *In 2000, average commute times for residents from Coloma was 20.6 minutes*, County residents traveled an average of 27.1 minutes, and state residents traveled an average of 20.8 minutes to work.

The mean travel time increased because a larger share of residents was traveling 20 to 44 minutes to work. For example in 1990, 34 percent of workers traveled between 20 and 44 minutes to work; by 2000 40 percent were traveling this same distance. This indicates that the residents had to travel slightly further away from home to obtain adequate employment and/or wages.

# Location of Workplace<sup>5</sup>

Location of workplace data provides information on the direction and distance residents have to travel to find employment. Table F-7 (Appendix F) includes the Top 20 workplace destinations for Waushara County and Village of Coloma residents. According to the U.S. Bureau of Census, the over fifty percent (58.7%) of county residents worked in Waushara County in 1990. *Village residents were slightly more dependent on Waushara County for employment; a total of 63.1 percent of the residents from the Village of Coloma worked in Waushara County in 1990.* 

In 2000, the location of workplace somewhat mirrored the information from 1990 but showed a decreasing dependence on employment locations in Waushara County. *The largest share of residents from the county (52.5%) and the Village of Coloma (57.6%) continued to work in Waushara County* (Appendix F, Table F-7). While a shift of employment was experienced by Waushara County workers to the Appleton-Oshkosh MSA, three out of the top five workplace destinations remained in Waushara County (Table 7-5). Village of Coloma workers had a slightly different workplace destination makeup. *About 49.7 percent of workers found employment locally, working in the Village of Coloma (27.1%), City of Wautoma (14.3%) and Town of Coloma (8.1%).* The other two top destinations included the Town of Westfield, Marquette County and the City of Stevens Point, Portage County. Both of these destinations were accessed by way of I-39.

Place of Residence	Place of Work	Number	Percent
Village of Coloma	V. Coloma	57	27.1%
	T. Westfield, Marquette Co.	30	14.3%
	C. Wautoma	30	14.3%
	T. Coloma	17	8.1%
	C. Stevens Point, Portage Co.	13	6.2%
	Top 5 Total	147	70.0%

<sup>&</sup>lt;sup>5</sup> U.S. Census, 1990 and 2000.

#### **Employment Forecast**

The Wisconsin Department of Workforce Development calculates employment projections for the various industries and occupations for the State of Wisconsin.<sup>6</sup> These projections are completed on a statewide basis and growth is expected in all industries. It is anticipated that the largest increases will be seen in the education and health services sector. Educational services, which makes up part of this sector includes all public and private elementary, secondary and post-secondary schools. This sector also includes ambulatory health care. The ambulatory health care industry, which is estimated to have the highest growth, is made up of offices of physicians, dentists, and other health practitioners as well as home health While the state is expected to see the highest increases in this area, care. employment opportunities in Waushara County may differ. According to the various school districts serving the county, enrollment is declining. These declines in enrollment may be the result of limited work opportunities for county residents, an aging population, and the subsequent loss of residents with children in the school district. Education sector employment is unlikely to increase if enrollments continue to drop. It should be noted that it is difficult to forecast employment for small communities, since the addition or loss of one industry or employer greatly impacts the community's economic base.

#### **Industrial Park Information**

*There is one industrial park in the Village of Coloma.* The Coloma Business Park is located on the east side of the Village on STH 21. *There are currently 25 acres available in the Coloma Business Park.* Table 7-6 contains more information about industrial parks within the county. When these parks become full, it is important that community leaders plan for the expansion of existing parks and for the development of land for future industrial and business sites. An area where infrastructure is already in place is the most cost efficient choice for the community.

#### **Business Retention and Attraction**

Tri-County Regional Development Corporation (TCREDC) is a partnership between Waushara, Marquette and Green Lake counties. The TCREDC has a 6-member volunteer board of directors, and a fulltime director. The mission of the TCREDC is to work in cooperation with public and private entities; to promote the region and businesses in order to attract, stimulate and revitalize commerce, industry and manufacturing that results in the retention and creation of viable living wage jobs. Within the county, the Waushara County Economic Development Corporation, run by a board of volunteers, is working to foster new business development, and support and sustain existing businesses throughout the county.

Several local economic development organizations also actively promote business retention and attraction.<sup>7</sup> *The Coloma Industrial Development Corporation is staffed by volunteers, whose focus is on businesses interested in access to 1-39 and the Industrial Park. The Highway 21 Corridor Project is also active in the area.* This organization is made up of volunteers and is funded by the seven municipalities (town, village and city) along the STH 21 corridor. Table F-8, Appendix F contains a listing of economic development organizations and groups present in the county.

The Village of Coloma has little or no staff to engage in the activities listed below. However, the Tri-County regional Development Corporation and the Waushara County Economic

<sup>&</sup>lt;sup>7</sup> UW – Extension Waushara County, 2005. *Economic Development Organizations*. http://www.uwex.edu/ces/cty/waushara/cnred/ed/organizations.html.

Development Corporation will be able, in certain instances, to offer assistance in some of these areas.

*Business attraction involves the promotion of community assets*. For example, some of the activities that are involved in a business attraction program include:

- Providing information about available commercial/industrial sites;
- o Identifying labor and community characteristics;
- Marketing sites to businesses that would be complementary to existing businesses or would provide diversity to the local economy; and
- Offering low cost land, state or federal grants or other incentives to encourage businesses to locate in the community.

Business retention is very important in that it is a relationship building effort between the community and already present local businesses. Activities associated with business retention programs include:

- Helping businesses learn about potential sites for expansion, offering low cost loans and identifying state and federal grants to finance business expansions;
- Providing business areas with reliable, efficient public services such as snow removal, road repair, sewer/water utilities, and technology infrastructure;
- Providing a contact person to answer business questions and to serve as a resource for business leaders regarding future business development; and
- Partnering with organizations to support the development of a qualified, educated and trained workforce.

#### Economic Strengths and Weaknesses

By developing a set of strengths and weaknesses, the Village of Coloma is better prepared to develop an economic development strategy. *These strengths and weaknesses are listed below.* 

# Strengths

- Access to STH 21 and the I-39 corridor
- Proximity to Natural Areas, Open Space, and Recreational Opportunities, particularly hunting and fishing
- Located within a prime agricultural area
- Strong agricultural economy
- Strong community involvement
- Public water and sewer
- High speed internet access
- Elementary School
- Low mill rate compared to other communities
- Fire and police protection
- Outstanding library facilities
- Statewide central location

#### Weaknesses

- Lack of diversity in economic base
- Lack of population density is a deterrent for service and retail businesses
- Distance from urban centers
- Distance to services

Although new development is highly encouraged, it must exist in harmony with the local environment. It should not compromise the natural resources or the historical and cultural components of the area. New development should blend into the rural landscape and complement existing development.

#### **Commercial and Industrial Design**

*Site review procedures and design standards can be used to improve the quality of design and to promote the individual identity for a community.* Specific standards regarding commercial building design, lot layout, building materials, parking, landscaping, and preservation of sensitive natural resources where necessary can be created so that developers have a clear understanding of the requirements they need to meet in order for their project to receive approval. Communities should consider applying site plan review to all commercial and industrial buildings. This ensures that downtown areas and other planned development are designed in a manner consistent with the vision of the local community comprehensive plans.

In addition to design standards, restrictive covenants are another tool business and industrial parks can use. The use of restrictive covenants enables communities to develop business parks with quality buildings and businesses. Covenants also serve to protect the investments of businesses that choose to locate in these parks.

# Infill and Brownfield Redevelopment

Brownfield's are sites where development or redevelopment is complicated by real or perceived hazardous substances, pollutants, or contamination. Knowing the location of Brownfield's and the extent of pollution greatly improves the likelihood that these sites will be redeveloped.

The Wisconsin Department of Natural Resources Bureau of Remediation and Redevelopment maintains a listing of Brownfield's and contaminated sites. This website lists 35 entries for Coloma in Waushara County. These entries are classified in the following six categories: Environmental Repair (ERP), Leaking Underground Storage Tank (LUST), Spills, General Property Information (GP), Liability Exemption (VPLE) and No Action Required by RR Program (NAR). Statuses include Closed, Historic, Open, General Property and No RR Action Required. Closed is defined as "Activities where investigation and cleanup of the contamination has been completed and the State has approved all cleanup actions." Open is defined as "Spills, LUST, ERP, VPLE and Abandoned Container activities in need of cleanup or where cleanup is still underway". Historic is defined as "Spills where cleanups may have been completed prior to 1996 and no end date is shown." General Property is defined as "Liability exemptions, liability clarifications, etc. to clarify the legal status of the property." No RR Action Required is defined as "There was, or may have been, a discharge to the environment and, based on the known information, DNR has determined that the responsible party does not need to undertake an investigation or cleanup in response to that discharge." Seventeen of the

*sites are closed; nine are historic; seven are considered closed; one has been removed; and one is open.* A listing of Brownfield and contaminated sites is available in Appendix F and from the Wisconsin Department of Natural Resources (WDNR) Bureau for Remediation and Redevelopment. A tracking feature is available at their website.<sup>8</sup>

Waushara County and its communities should complete and maintain an inventory of existing vacant buildings and land identified as "Brownfields". This information could be used to encourage infill development and redevelopment opportunities that take advantage of existing infrastructure and services and removes blight created by vacant and dilapidated buildings and parcels. Once identified, State and federal programs could be used to further study, clean, and redevelop these Brownfields.

Funding resources are listed at the end of the chapter for remediation of contaminated sites. To prevent future environmental damage, the Village of Coloma should encourage environmentally friendly businesses that are properly permitted and regulated to protect the soil and groundwater. This is particularly critical in areas that depend on private wells for drinking water.

# Key Findings

# Educational Attainment

- The high school graduation rate for Village of Coloma residents was 79.6 percent compared to 78.8 percent in the County and 85.1 percent in the State.
- A person with a bachelor degree can expect to earn \$2.1 million over the course of a career, nearly double what the expected earnings are for a high school graduate.

# Labor Force

- Labor force growth rates for Waushara County (29.4%) and the Village of Coloma (52.8%) exceeded the state's 14 percent growth rate between 1990 and 2000.
- The Village had the second highest unemployment rate in the County in 2000 (12.5%); while the Town of Coloma had the highest (29.3%).

# Economic Base Information

- Manufacturing (29.8%); Public Administration (10.6%); Educational, health and social services (9.6%); and Retail trade (9.2%) employed over half (59.2%) of workers in the Village of Coloma in 2000.
- The top four occupations for Village of Coloma workers in 2000 were Production, transportation, and material moving occupations (31.7%); Service occupations (27.1%); and Management, professional, and related (15.1%).

<sup>&</sup>lt;sup>8</sup> Wisconsin Department of Natural Resources. 2005. Remediation and Redevelopment Tracking System. <u>http://botw.dnr.state.wi.us/botw/Welcome.do</u>

# Travel Time to Work

- On an average, residents from the Village of Coloma, Waushara County and the state spent less than 30 minutes traveling to and from work in 1990.
- In 1990, average commute times for residents was 20.1 minutes in the Village of Coloma.
- In 2000, average commute times for residents from Coloma was 20.6 minutes.

# Location of Workplace

- Village of Coloma residents were slightly more dependent on Waushara County for employment; a total of 63.1 percent of the residents from the Village of Coloma worked in Waushara County in 1990.
- The largest share of residents from the county (52.5%) and the Village of Coloma (57.6%) continued to work in Waushara County in 2000.
- About 49.7 percent of workers found employment locally, working in the Village of Coloma (27.1%), City of Wautoma (14.3%) and Town of Coloma (8.1%) in 2000.

# Employment Forecast

- It is anticipated that the largest increases will be seen in the education and health services sector.
- While the state is expected to see the highest increases in this area, employment opportunities in Waushara County may differ.

# Industrial Park Information

- There is one industrial park in the Village of Coloma.
- There are currently 25 acres available in the Coloma Business Park.

# **Business Retention and Attraction**

- Tri-County Regional Development Corporation (TCREDC) is a partnership between Waushara, Marquette and Green Lake counties.
- The Waushara County Economic Development Corporation, run by a board of volunteers, is working to foster new business development, and support and sustain existing businesses throughout the county.
- The Coloma Industrial Development Corporation is staffed by volunteers, whose focus is on businesses interested in access to I-39 and the Industrial Park.
- The Highway 21 Corridor Project is also active in the area.
- Business attraction involves the promotion of community assets.
- Business retention is very important in that it is a relationship building effort between the community and already present local businesses.

# Economic Strengths and Weaknesses

• Economic strengths generally include the Village of Coloma's location; proximity to natural areas, open space and recreational opportunities; location within a prime

agricultural area with a strong agricultural economy; public infrastructure such as public water and sewer; high speed internet access and a local grade school.

• Weaknesses include low population density; lack of economic diversity; and distance to services.

# Commercial and Industrial Design

• Site review procedures and design standards can be used to improve the quality of design and to promote the individual identity for a community.

# Infill and Brownfield Redevelopment

- The Wisconsin Department of Natural Resources Bureau of Remediation and Redevelopment maintains a listing of Brownfield's and contaminated sites. This website lists 35 entries for Coloma in Waushara County.
- Seventeen of the sites are closed; nine are historic; seven are considered closed; one has been removed; and one is open.

# INTERRELATIONSHIPS WITH OTHER COMPREHENSIVE PLAN ELEMENTS

# Housing

Economic growth will generate more jobs and, consequently, a need for greater housing availability and choices. These choices should reflect the needs of an area. For example if economic growth results in lower wage service sector jobs (retail, leisure, hospitality, and food services) and pay remains at the minimum wage level, housing affordability may become a concern. Therefore it is essential that a balanced mix of well designed housing types of various sizes and prices be available for all income levels. Affordable housing is also an important component of an economic development strategy, as it helps ensure an adequate labor force supply.

# Transportation

Facilitating commerce in the area and state is the function of the transportation system. Adequate access to the transportation system is essential to the economic success of the area. Businesses must have the ability to ship and receive goods quickly and economically. Access to and visibility of the business facility may be crucial for both customers and employees. Businesses in different locations may need different transportation accommodations. For example businesses in downtown areas may value on-street parking and pedestrian accommodations more than businesses in a more rural setting.

# Utilities and Community Facilities

A vital, safe, clean and healthy environment is an economic draw for new industry and residents. It aids in the retention of existing residents and businesses. Parks and green space add to the local economy by maintaining or increasing property values; providing a place where local citizens can socialize, play sports or relax; and promoting healthy active lifestyles that

encourage physical activity. In addition, local parks and recreational facilities draw visitors to an area. These visitors spend money at local restaurants, motels and businesses.

A good educational system has the ability to respond to the ever changing job market, to educate or retrain the residents of an area and to form partnerships between business and schools.

Citizens, businesses and industries need accessible, reliable, and affordable gas and electric services. To enable economic growth and open up new markets and opportunities for diverse and innovative services, access to fast, reliable, cost effective, and cutting edge telecommunications must be available.

# Agriculture Resources

Agriculture and agricultural related industries have been and are still important to the economy of Waushara County. One of the many challenges facing Waushara County and the state is the preservation of prime agricultural soils and the farming industry as more farms are converted out of farming and into other uses. Additionally, the future of family farms is a concern as fewer children are choosing to take over farming operations. Reasons given for this include time commitments, cost of entry and the inability to make a living solely from farming. To remain competitive, farmers working with others in the county may want to explore opportunities for industry cluster development. A cluster, which is a geographical group of interconnected companies or associations in a particular field, can include product producers, service providers, suppliers, educational institutions and trade associations. As part of this effort, specialty and organic crops and livestock, along with support industries could be expanded in the area. Communities could also explore programs that match outgoing farmers with individuals who want to farm.

# Natural Resources

Although economic benefits can accrue from both consumptive and non-consumptive uses of natural resources, balancing the demands of economic development with the preservation of natural resources is a challenge. Conserving these resources is necessary to maintain and in some cases improve the quality of life for residents while providing an attraction tool for new businesses and workers. Given the importance of tourism in the county, protection of the area's natural resources is essential. However, communities should be aware of the economic trade-offs between sectors. These trade-offs include long term intrinsic values versus current economic gain; high wages versus low wages; informed decisions versus short term economic gains; and actual protection and preservation versus aesthetics.

# **Cultural Resources**

Buildings dating back to the early 1900's can be found throughout Waushara County. These buildings along with artifacts tell the story of the county and the area. This rich history includes the early Native American habitation, the quarrying of red granite, and the development of the communities that make up the county. While the promotion of economic development is important, special care must be taken to preserve not only the character but the historical and cultural elements that remain today. Positive economic benefits can be realized by preserving these elements to provide a charming setting for businesses and communities that evokes a

feeling in people's minds of a time or era when things were simpler, peaceful and more welcoming. It may also draw people to an area to explore their culture and/or identity.

#### Land Use

The development of land can impact the value of land as well as the quality of life within the community. Ideally, the siting of commercial and industrial land uses should have minimal environmental impacts and be located near the necessary infrastructure. Redevelopment of abandoned buildings and areas contribute to the economic vitality of the area.

#### Intergovernmental Cooperation

Economic development goes beyond municipal and county borders. Commercial and industrial development as well as sporting, tourism and other activities in one community will impact others. This business may also generate a support industry elsewhere in the county. Working in partnership, communities and the county can promote the amenities of the area that contribute to a high quality of life; work to form industrial clusters that involve producers, service providers, suppliers and education; and promote other things that are important to the economic development of the area such as agriculture, organic and specialty crop production, biomass, and forest products.

### POLICIES AND PROGRAMS

#### Regional, County and Local Policies

### Regional

**East Central Wisconsin Regional Planning Commission.** East Central has recently completed a regional comprehensive plan. As part of this planning effort, East Central has adopted five core economic development goals:

- Promote the expansion and stabilization of the current economic base and employment opportunities, while working to promote a positive, growth oriented, entrepreneurially supportive image to attract new business and create additional employment.
- Increase the awareness of on-going collaborative economic activities in the area to ensure maximum benefit to the regional economy.
- Create better relationships between political representatives and the business and educational sectors to effectively link and apply research, development, and technology to production processes, as well as to ensure an appropriately trained workforce.
- Encourage planning to guide community development to maximize the use of existing infrastructure, facilitate the provision of shared resources, minimize costs and environmental impacts, and promote a sense of place and healthy communities.
- Promote the economic benefits of natural resources, parks and recreation.
- Assess options to increase the viability of family farms.

**NorthEast Wisconsin (NEW) Economic Opportunity Study.** Waushara County participated in the NEW Economic Opportunity Study.<sup>9</sup> The NEW Study is a multi-jurisdictional partnership intending to further connect workforce development issues with economic development goals. Even before the economic downturn, the northeast region of Wisconsin experienced declines in its strong manufacturing sector employment levels and these negative changes in many cases have continued. The Fox Valley Workforce Development Board initiated a study to address these negative trends and to present recommendations to change the direction of the northeast Wisconsin economy. In addition to Waushara County, the study area is composed of the following 16 counties: Brown, Calumet, Door, Fond du Lac, Green Lake, Kewaunee, Manitowoc, Marinette, Marquette, Menominee, Oconto, Outagamie, Shawano, Sheboygan, Waupaca, and Winnebago Counties.

The five strategies developed for the NEW Economic Opportunities project are:

- Strategy I Move to a New Economy Construct
- The New Economy building blocks are brain power, risk capital, technological innovation, and entrepreneurship. These New Economy building blocks must be incorporated within the mindset of abundance theory. Business, labor, government, education, and the communities across NEW must all work actively together under a common vision to harness the resources available within the region (and some outside the region) to drive future economic growth.
- Strategy II Move to a Collaborative Economic Development Construct
   NEW must abandon the economic strategy of a cost race to the bottom and embrace
   the concept of abundance theory that by collaborating, the pie will increase with
   everyone getting a larger piece. This is best and most efficiently accomplished through
   proactive collaboration across all sectors in the region business, labor, government,
   education, and the general populace.
- Strategy III Change Social and Cultural Mindset to Risk and Collaboration
  Proactive collaboration will require an opening up of the region's mindset both socially
  and culturally. Cultural diversity is a key to the melding of fresh ideas, best practices,
  and collaboration. It is what has worked in the country and the region in the past and it
  will be what works in the future.
- Strategy IV Change Regional Image
   NEW and much of the greater Midwest has an image of being a wholesome but dull
   place. It is perpetuated by the national press and exists in the mindsets of Hollywood
   and Wall Street. That image is somewhat internalized, but also generally accepted by
   businesses and worker talent outside the region, making it difficult to retain and attract
   talent to the region. NEW must also develop both an internal and external image that
   promotes the resource and lifestyle benefits in the region. Inventorying and promoting
   the richness of the region's assets will help to retain and attract businesses and workers
   to NEW.
- Strategy V Promote Industry Cluster Development
  - This strategy addresses clusters, or a concentration of industries, that have potential for the area based on current industries and their expansion. Waushara County is a part of the Fox Valley Rural Sub-Region and for this sub-region the study recommended the possibility of building a biomass refinery that would use wood and other agricultural

<sup>&</sup>lt;sup>9</sup> NorthStar Economic, Inc. 2004. Northeast Wisconsin Economic Opportunity Study. http://www.neweconomyproject.org/Pages/NEWEconStudy.htm.

products to supply power to local foundries and other users be considered. The study suggests collaboration on food production and processing, safety, and packaging cluster. Specialty and organic crops and livestock should be expanded for farmers in this area.

**Lake Winnebago Anglers' Survey.** Researchers from UW-Extension, UW-Green Bay, UW-Madison, and the Wisconsin Department of Natural Resources (WDNR) recently completed the Lake Winnebago Anglers' Survey.<sup>10</sup> This study examined the economic impact of the Lake Winnebago Pool Lakes fisheries. The study area was defined as the entire pool lake system within the five county region surrounding the Winnebago system (Calumet, Fond du Lac, Outagamie, Waushara, and Winnebago counties). Only fishing trips from the mouth of the Wolf River on Lake Poygan southward to the mouth of the Upper Fox River were considered in this study. An extensive 12-page survey was mailed to a stratified sample of tournament anglers, anglers within the five-county region, anglers statewide, and out-of-state anglers randomly selected from the WDNR ALIS license database. The survey asked specific questions on anglers' fishing habits and preferences, fishing equipment replacement costs, fishing excursions on the Winnebago system, expenditures on these excursions, and attitudes towards current fisheries management practices.

Researchers concluded that:

- Over 1.1 million fishing trips were made on the Lake Winnebago system in 2005.
- 41% of these trips were made by local anglers within the five county region.
- The typical angler from out of the region spent \$273 per day, while out-of-state and tournament anglers spent \$755 and \$469, respectively.
- Conservative estimates indicate that anglers from outside of the five county region contributed \$147.5 million in direct spending in the region.
- Researchers found that spending generated from fishing created an additional \$73.9 million dollars in indirect and induced spending.

Indirect spending is defined as increased sales among businesses in different sectors. For example, increased sales at a local bait and tackle shop may lead to an expansion of the store size; the bait shop will use the increased revenue to buy building materials from a hardware store. Induced effects result from increased buying power of local employees from the pay raises received.

This study emphasized the true importance of the Lake Winnebago system and the economic implications that a quality natural resource base can have on local communities. The direct revenues generated by fishing were greater than several major events or tourist attractions in the area including the annual EAA Fly-in (\$80 million), Country USA (\$23 million), or the Green Bay Packer Lambeau Field Atrium Complex (\$144 million). Unlike week-long festivals, fishing generates revenues for local businesses throughout the year.

Furthermore, this study will have important ramifications on local land use policies throughout the region. Due to the economic importance of the Winnebago fisheries, local policy makers should continue to address land use issues which have the potential to adversely affect water quality and aquatic wildlife habitat within shoreland areas. Development practices that increase shoreland protection and promote erosion control should be implemented. Since only 10

<sup>&</sup>lt;sup>10</sup> UW – Extension and UW – Green Bay. 2005. Lake Winnebago Angler Survey. <u>http://www.uwex.edu/ces/cty/winnebago/cnred/documents/finalinitialdatapressrelease063006.doc</u>.

percent of the population lives on the lakeshores, public access will continue to be a major issue. Providing adequate boat ramps, parking areas, shoreline fishing piers, and handicapped accessible facilities will ensure more people have access to this unique fishery. Since these issues must be addressed within the context of current budgetary constraints, it may be necessary to address how user fees can better contribute to the management of the fishery as well as improving public infrastructure. Creative solutions will be needed to incorporate natural resource policies that enhance the Winnebago system fisheries and complement local economic development and revitalization projects.

# Federal, State and Regional Programs

# Federal Agencies

Some communities in Waushara County meet the requirements of the US Department of Agriculture-Rural Development and may be eligible for Rural Development Economic Assistance Programs. However, there are typically strict income limits associated with some of the programs so the Wisconsin Division of USDA-Rural Development should be contacted regarding eligibility for certain programs. A complete listing of USDA-Rural Development Programs can be found at <a href="http://www.rurdev.usda.gov/wi/programs/index.htm">http://www.rurdev.usda.gov/wi/programs/index.htm</a>. Grants are also available through the US Department of Labor and can be found at <a href="http://www.doleta.gov/sga">http://www.doleta.gov/sga</a>. A partial list is given below.

**Rural Business Opportunity Grants.** The Rural Business Opportunity grant program promotes sustainable economic development in rural communities with exceptional need. Grants typically fund projects that will become sustainable over the long term without continued need for external support. These projects should have the ability to serve as a local catalyst to improve the quantity and quality of economic development within a rural region. Grant funds can be used for technical assistance to complete business feasibility studies, conducting training for rural managers and entrepreneurs, establishing business support centers, conducting the Rural Business Opportunity Grant Program can be found at http://www.rurdev.usda.gov/wi/programs/rbs/opportun.htm.

# **Rural Economic Development Loans and Grants**

Rural Economic Development Loans and Grants help develop projects that will result in a sustainable increase in economic productivity, job creation, and incomes in rural areas. Projects may include business start-ups and expansion, community development, incubator projects, medical and training projects, and feasibility studies. Information regarding Rural Economic Development Loans and Grants can be found at http://www.rurdev.usda.gov/wi/programs/rbs/economic.htm.

**Susan Harwood Training Grants Program.** These training grants are awarded to nonprofit organizations for training and education. They can also be used to develop training materials for employers and workers on the recognition, avoidance, and prevention of safety and health hazards in their workplaces. Grants fall into two categories; Target Topic Training and Training Materials Development. The Target Topic Training grants are directed towards specific topics chosen by OSHA. Follow-up is required to determine the extent to which changes were made to eliminate hazards associated with the chosen topic. The Training Materials Development grants are specifically aimed at creating classroom quality training aids. Aids which are

developed under the grant program must be ready for immediate self-study use in the workplace. Information regarding the Susan Harwood Training Grant Program can be found at <u>http://www.osha.gov/dcsp/ote/sharwood.html</u>.

**Community-Based Job Training Grants.** Community-Based Job Training grants (CBJTG) seek to strengthen the role of community colleges in promoting the US workforce potential. The grants are employer-focused and build on the President's High Growth Job Training Initiative. The primary purpose of the CBJTG grants is to build the capacity of community colleges to train workers to develop the skills required to succeed in high growth/high demand industries. Information regarding the Community Based Job Training Grants can be found at <u>http://www.doleta.gov/business/Community-BasedJobTrainingGrants.cfm</u>.

H-1B Technical Skills Training Grant Program. The H-1B Technical Skills Training Grant program provides funds to train current H-1B visa applicants for high skill or specialty occupations. Eligible grant applicants include local Private Industry Councils and Workforce Investment Boards that were established under the Workforce Investment Act. Eighty percent of the grants must be awarded to projects that train workers in high technology, information technology, and biotechnology skills. Specialty occupations usually require a bachelor's degree, and an attainment of this degree is strongly encouraged. The program is designed to assist both employed and unemployed American workers acquire the needed technical skills for high skill occupations that have shortages. Information regarding the H-1B Technical Skills Training Grant program can be found at <u>http://www.doleta.gov/h-1b/html/overv1.htm</u>.

**New Market Tax Credit (NMTC) Program.** The NMTC program permits taxpayers to receive a credit against Federal income taxes for making qualified equity investments in designated Community Development Entities (CDEs). Substantially all of the qualified equity investment must in turn be used by the CDE to provide investments in low-income communities. An organization wishing to receive awards under the NMTC Program must be certified as a CDE by the Fund. To qualify as a CDE, an organization must: be a domestic corporation or partnership at the time of the certification application; demonstrate a primary a mission of serving, or providing investment capital for, low-income communities or low-income persons; and maintain accountability to residents of low-income communities through representation on a governing board of or advisory board to the entity.

# State of Wisconsin

There are many state programs that communities can consider utilizing to meet their stated goals and objectives. While not an all inclusive list, there are several programs that communities should strongly consider and are addressed below. Wisconsin Department of Commerce area development managers assist business expansions, promote business retention, and help local development organizations in their respective territories. Area development managers (ADM) use their knowledge of federal, state, and regional resources to provide a variety of information to expanding or relocating firms. They also mobilize resources to help struggling businesses. Local economic development practitioners can turn to area development managers for assistance with long-term marketing and planning strategies. Waushara County is in Region 3. The ADM is Deb Clements and she can be reached at 715/344-1381 or via email at dclements@commerce.state.wi.us.

Wisconsin Main Street Program. The Main Street Program is a comprehensive revitalization program designed to promote the historic and economic redevelopment of traditional business districts in Wisconsin and is administered by the Wisconsin Department of Commerce - Bureau of Down Town Development. Communities are selected to participate on an annual basis and are judged on a submitted application. These communities receive technical support and training needed to restore their Main Streets to centers of community activity and commerce. Details regarding the Wisconsin Main Street Program can be found at http://commerce.wi.gov/cd/CD-bdd.html.

**Community Based Economic Development (CBED) Program.** The Community-Based Economic Development (CBED) Program provides financing assistance to local governments and community-based organizations that undertake planning or development projects, or that provide technical assistance services that are in support of business (including technology-based businesses) and community development. The program provides grants for planning, development, and assistance projects; Business Incubator/Technology-Based Incubator; a Venture Capital Fair; and Regional Economic Development Grants. Additional information regarding the CBED program can be found at <u>http://www.commerce.wi.gov/cd/CD-bcf-cbed.html</u>.

Community Development Block Grant for Economic Development (CDBG-ED). The CDBG-ED program is designed to assist businesses that will invest private funds and create jobs as they expand or relocate to Wisconsin. The Wisconsin Department of Commerce would award the funds to the community, which then loans the funds to a business. When the business repays the loan, the community may retain the funds to capitalize a local revolving loan fund. This fund can then be utilized to finance additional economic development projects within the community. Communities may also utilize the existing Waushara County Economic Revolving Loan Fund to provide loans to community businesses. Additional information regarding the CDBG-ED program can be found at the following website: http://commerce.wi.gov/BD/BD-RLF.html.

**Early Planning Grant Program (EPG)**. The EPG program is designed to help individual entrepreneurs and small businesses throughout Wisconsin obtain the professional services necessary to evaluate the feasibility of a proposed start up or expansion. Under the EPG program, the Wisconsin Entrepreneurs' Network (WEN) – with funding from the Wisconsin Department of Commerce – can provide applicants with a grant to help cover a portion of the cost of hiring an independent third party to develop a comprehensive business plan. The maximum funding available for Early Planning Grants is 75% of eligible project costs up to \$3,000. Additional information regarding the EPG program can be found at the following website: <u>http://wenportal.org/grant\_applications/epg\_help.html</u>.

**Milk Volume Production (MVP) Program.** The Milk Volume Production (MVP) program is designed to assist dairy producers that are undertaking capital improvement projects that will result in a significant increase in Wisconsin's milk production. This program was created to aggressively support Wisconsin's \$20 billion dairy industry. The goal of the MVP program is to provide qualifying dairy producers with the type of financing necessary to fill the "equity gap" and to partner with local communities to increase dairy production in Wisconsin. It is important to note that the MVP application process is competitive, and not all applications will be funded. Only those projects that have a comprehensive business plan and can demonstrate that they will have a long-term sustainable impact upon Wisconsin's milk production will be successful.

Information regarding the Milk Volume Production (MVP) Program can be found at <u>http://commerce.wi.gov/BD/BD-AG-MilkVolumeProduction.html</u>.

**Dairy 2020 Early Planning Grant Program.** The Dairy 2020 Early Planning Grant Program is specifically designed for small Wisconsin dairy farms. Professional assistance can help keep smaller operations profitable and competitive in the agricultural industry. Information regarding the Dairy 2020 Early Planning Grant Program can be found at <a href="http://commerce.wi.gov/BD/BD-AG-Dairy2020EPG.html">http://commerce.wi.gov/BD/BD-AG-Dairy2020EPG.html</a>.

**Customized Labor Training Program (CLT).** The CLT program provides a matching grant to assist companies which are utilizing new technologies or manufacturing processes to train employees on new technologies. Grant recipients must either expand an existing or build a new facility within the state. The grants help Wisconsin's manufacturers remain on the cutting edge of technological innovation. Eligible expenditures must focus on the continuing technological education of employees. Grants can cover employee wages, training materials, and trainer costs. Grants provide up to \$2,500 per trainee. Information regarding the CLT Program can be found at <u>http://commerce.wi.gov/BD/BD-CLTprogram.html</u>.

**Entrepreneurial Training Grant Program (ETG).** The ETG program provides potential new small business owners with partial tuition for attending the Small Business Center's (SBDC) Entrepreneurial Training Course. This course helps entrepreneurs prepare a comprehensive business plan that evaluates the feasibility of the proposed start up or expansion; identifies possible financing sources; and provides other information in regard to initial business start-up costs. Grants provide up to 75% of total tuition costs. Information regarding the ETG Program can be found at <a href="http://wenportal.org/grant\_applications/etp\_help.html">http://wenportal.org/grant\_applications/etp\_help.html</a>.

**Business Employees' Skills Training Program (BEST).** The BEST program helps small businesses in industries that are facing severe labor shortages upgrade the skills of their workforce. This program provides applicants with a tuition re-imbursement grant to cover training costs. To be eligible, businesses must have 25 or fewer employees and sales of less than \$2.5 million. In addition, businesses must specialize in automation, agricultural/food products, biotechnology, manufacturing, medical devices, paper/forest products, printing, tourism, or child care. All training must be provided by an independent third party. Information regarding the BEST Program can be found at <u>http://commerce.wi.gov/BD/BD-BESTprogram.html</u>.

**Industrial Revenue Bond.** The Industrial Revenue Bond program allows all Wisconsin municipalities to support industrial development through the sale of tax-exempt bonds. The proceeds from the bond sale are loaned to businesses to finance capital investment projects. Even though the bonds are issued by the municipality, the interest and principal are paid by the company. Information regarding the Industrial Revenue Program can be found at <u>http://commerce.wi.gov/BD/BD-IRB.html</u>.

**Transportation Economic Assistance (TEA) Program.** The state-funded Transportation Economic Assistance (TEA) program provides fast tract financing to construct rail spurs and port improvements for new or expanding industries. The program is available through the Wisconsin Department of Transportation. Additional information regarding the TEA program can be found at the following website: <u>http://www.dot.wisconsin.gov/localgov/aid/tea.htm</u>

#### Wisconsin Department of Commerce

Listed below are additional Wisconsin Department of Commerce commerce programs. This quick reference guide identified these programs and selected programs from other agencies. COMMERCE maintains a network of Area Development Managers to offer customized services to each region of Wisconsin.

**Brownfields Initiative.** The Brownfields Initiative provides grants to persons, businesses, local development organizations, and municipalities for environmental remediation activities for Brownfield sites where the owner is unknown, cannot be located or cannot meet the cleanup costs. Contact Jason Scott, 608/261-7714.

**CDBG-Blight Elimination and Brownfield Redevelopment Program.** This program can help small communities obtain money for environmental assessments and remediate Brownfields. Contact Joe Leo, 608/267-0751.

**CDBG-Emergency Grant Program.** This program can help small communities repair or replace infrastructure that has suffered damages as a result of catastrophic events. Call 608/266-8934.

**Community Development Zone Program.** This program is a tax-benefit initiative designed to encourage private investment and job creation in economically-distressed areas. The program offers tax credits for creating new, full-time jobs, hiring disadvantaged workers and undertaking environmental remediation. Tax credits can be taken only on income generated by business activity in the zone. Call 608/267-3895.

**Freight Railroad Preservation Program.** The Freight Railroad Preservation Program provides grants to communities to purchase abandoned rail lines in the effort to continue freight rail service, preserve the opportunity for future rail service, and to rehabilitate facilities, such as tracks and bridges, on publicly-owned rail lines. Contact Ron Adams, Department of Transportation, 608/267-9284.

**Health Care Provider Loan Assistance Program.** This program provides repayment of educational loans up to \$25,000 over a five-year period to physician assistants, nurse practitioner, and nurse midwives who agree to practice in medical-shortage areas in Wisconsin. The program is designed to help communities that have shortages of primary care providers and have difficulty recruiting providers to their area. Contact M. Jane Thomas, 608/267-3837.

**Minority Business Development Fund – Revolving Loan Fund (RLF) Program.** This program is designed to help capitalize RLFs administered by American Indian tribal governing bodies or local development corporations that target their loans to minority-owned businesses. The corporation must be at least 51-percent controlled and actively managed by minority-group members, and demonstrate the expertise and commitment to promote minority business development in a specific geographic area. Contact Mary Perich, 414/220-5367 or Bureau of Minority Business Development, 608/267-9550.

**Physician Loan Assistance Program.** This program provides repayment of medical school loans up to \$50,000 over a five-year period to physicians who are willing to practice in medical-shortage areas in Wisconsin. The program is designed to help communities that have shortages

of primary care physicians, and have had difficulty recruiting these physicians to their area. Contact M. Jane Thomas, 608/267-3837.

**State Infrastructure Bank Program.** This program is a revolving loan program that helps communities provide transportation infrastructure improvements to preserve, promote, and encourage economic development and/or to promote transportation efficiency, safety, and mobility. Loans obtained through SIB funding can be used in conjunction with other programs. Contact Dennis Leong, Department of Transportation, 608/266-9910.

**Tax Incremental Financing (TIF).** Tax Incremental Financing (TIF) can help a municipality undertake a public project to stimulate beneficial development or redevelopment that would not otherwise occur. It is a mechanism for financing local economic development projects in underdeveloped and blighted areas. Taxes generated by the increased property values pay for land acquisition or needed public works.

**Wisconsin Transportation Facilities Economic Assistance and Development Program.** This program funds transportation facilities improvements (road, rail, harbor, airport) that are part of an economic development project. Contact Dennis W. Leong, Department of Transportation, 608/266-9910.

**Freight Railroad Infrastructure Improvement Program.** This program awards loans to businesses or communities wishing to rehabilitate rail lines, advance economic development, connect an industry to the national railroad system, or to make improvements to enhance transportation efficiency, safety, and intermodal freight movement. Contact Ron Adams, Department of Transportation, 608/267-9284.

**Recycling Demonstration Grant Program.** This program helps businesses and local governing units fund waste reduction, reuse, and recycling pilot projects. Contact JoAnn Farnsworth, 608/267-7154, DNR.

**Wisconsin Fund.** The Wisconsin Fund provides grants to help small commercial businesses rehabilitate or replace their privately-owned sewage systems. Contact Jean Joyce, 608/267-7113.

### Regional

**East Central Wisconsin Regional Planning Commission.** The East Central Wisconsin Regional Planning Commission annually creates a Comprehensive Economic Development Strategy (CEDS) report, which evaluates local and regional population and economic activity. Economic development trends, opportunities, and needs are identified within the CEDS report. All communities, which are served by the Commission, are invited to identify future projects for economic development that the community would like to undertake. Those projects are included within the CEDS and may become eligible for federal funding through the Economic Development Administration (EDA) Public Works grant program. Additional information can be found at <a href="http://www.eastcentralrpc.org/planning/economic.htm">http://www.eastcentralrpc.org/planning/economic.htm</a>.

**Northeast Wisconsin Regional Economic Partnership.** The combined Bay-Lake and East Central Wisconsin Regional Planning Commission areas were recently named as a Technology Zone by the Wisconsin Department of Commerce. The Northeast Wisconsin Regional Economic

Partnership (NEWREP) Technology Zone provides \$5 million in tax credits to businesses certified by commerce, based on a company's ability to create jobs and investment and to attract related businesses. The Technology Zone Program focuses primarily on businesses engaged in research, development, or manufacture of advanced products or those that are part of an economic cluster and knowledge-based businesses that utilize advanced technology production processes in more traditional manufacturing operations. Additional information can be found at <u>http://www.eastcentralrpc.org/planning/economic.htm</u>.

**CAP Services, Inc.** CAP Services Inc. (CAP) is a private non-profit corporation offering programs in Waushara, Marquette, Outagamie, Portage, Waupaca and parts of Marathon and Wood counties. The primary mission of CAP is to help low-income households attain economic and emotional self-sufficiency. Programs include Skills Training to help low-income individuals acquire skills to compete for higher paying jobs by assisting them with tuition, books, transportation and child care costs related to training; Business Development to provide entrepreneurs with the technical assistance, coaching advice and loan packaging they need to successfully start and grow their businesses; and Home Buyers Assistance to provide matching dollars to eligible low-and moderate-income, first-time homebuyers for down payment and closing costs. Funds are also available for repair and rehabilitation on newly purchased units; Weatherization measures including caulking, insulation, window repair and other conservation measures; Special Needs Housing; Asset Development to provide financial wellness training and incentives to low-income households; Preschool Services including head start for ages 3-5 and their families; and Crisis Intervention. Additional information can be found at www.capserv.org.

# Private

The Wisconsin Public Service Corporation (WPS) also contributes a number of economic development services that communities should be aware of for their businesses. WPS maintains an online database of available industrial buildings with information provided by the communities. The WPS economic development page can be a useful resource for communities, and can be accessed at <u>http://www.wisconsinpublicservice.com/business/bcd.aspx</u>.

(Page left blank intentionally)

#### ECONOMIC DEVELOPMENT – Village of Coloma

**GOAL ED 1: Partner with area/regional economic development organizations.** The Village of Coloma's economy is dependent on the economy of the municipalities in the area. For example, a new business in the City of Wautoma may employ someone who lives in the Town of Coloma, buys gas and groceries in the Village of Coloma, and generates a support business in the Village of Coloma. Waushara County is also a member of Northeast Wisconsin Regional Economic Partnership (NEWREP). This partnership implements the Technology Zone program and works with other groups to promote economic development.

**STRATEGY ED 1.1: The Village of Coloma along with other local and regional economic development organizations should participate in regional initiatives.** Many local and regional economic development organizations and groups are working to promote economic development in the state, region and county. The Village of Coloma's economy can benefit from these efforts and the Village should be an active participant in any regional initiatives that are currently being conducted.

- RECOMMENDATION ED 1.1.1: Continue to participate in regular meetings with Tri-County Regional Economic Development Corporation and Waushara County Economic Development Corporation.
- RECOMMENDATION ED 1.1.2: Continue to maintain contact with Waushara County's representative to NEWREP.

STRATEGY ED 1.2: Promote available commercial and industrial sites.

• RECOMMENDATION ED 1.2.1: Continue to post available lots on the websites of the Tri-County Regional Economic Development Corporation (TCREDC) and the Village of Coloma. Available buildings and sites can also be marketed on Forward Wisconsin's Locational One Information System Database (LOIS). Forward Wisconsin, the Wisconsin Department of Commerce and the state's electric utilities have joined together to develop and implement a state-wide system that will make available comprehensive building, site, and community information. It is an internet based marketing tool. Any community in Wisconsin can use it as a single point of data entry. There is no charge to use LOIS or to integrate it into an existing website. Examples of local organizations that have integrated LOIS into their Web site can be found on Forward Wisconsin's website at <u>www.forwardwi.com</u>. Click on "Resources for Economic Developers" and then on LOIS: A User's Guide. Additional information about LOIS and help to get started is also available by contacting East Central Planning at staff@eastcentralrpc.org or at (920) 751-4770. Within the Tri-County area, the TCREDC does the listing for LOIS of sites and buildings through their website.

**STRATEGY ED 1.3: Market area tourism opportunities.** A wealth of potential opportunities exists to draw tourists to the Coloma area. Residents and tourists strive for a simpler life and appreciate the benefits of buying fresh food and other products that are produced locally. A farmers market that would provide an outlet for farmers and local craftspeople to market locally grown products would not only fulfill this end but may entice someone to stop at other locations in the village. A Bed and Breakfast, a country store, and a restaurant that promotes farm fresh foods could also be considered. Many existing features are

also a draw for the tourists into the community. These amenities include the Ice Age Trail, community events (Chicken Chew), community plays and professional performances, the Coloma Hotel, local snowmobile trails and bicycling facilities. The Village, along with the other municipalities, should work with the Waushara Area Chamber of Commence to promote existing amenities and to bring additional opportunities to the area.

- **RECOMMENDATION ED 1.3.1: Support the local farmers market and/or** *participate in the establishment of a regional farmers market* (See Agricultural Element AG 1.4.2). Work with the Tri-County Regional and Waushara County Economic Development Corporations and the Waushara Convention and Visitors Bureau to promote the farmers market countywide and/or as a countywide agricultural marketing effort.
- **RECOMMENDATION ED 1.3.2: Organize**, **promote and market agriculture as a tourist attraction** (See Agricultural Element). Work with the Tri-County Regional and Waushara County Economic Development Corporations and the Waushara Convention and Visitors Bureau to promote and market agriculture as a tourist attraction.
- RECOMMENDATION ED 1.3.3: Work with the Town of Coloma and the Ice Age Trail organization to add signage that would direct users of the trail system to amenities in the Village of Coloma.
- RECOMMENDATION ED 1.3.4: Work with the local snowmobile club and area businesses to add signage that would direct snowmobilers to amenities in the Village of Coloma.
- **RECOMMENDATION ED 1.3.5:** Continue to work with the Waushara Area Chamber of Commence to market area tourism opportunities.
- RECOMMENDATION ED 1.3.6: Work with the Town of Coloma, Waushara County Highway and Parks Department to consider establishing a bike trail between Pleasant Lake and the Village of Coloma.

**STRATEGY ED 1.4: Promote the amenities of the area.** It is important to recognize that the quality of life plays a key role in attracting business and an educated workforce. These include educational availability and quality, natural resources and recreational opportunities, the moraine, location, service provision, and other factors. A fact sheet could be developed that highlights these amenities and could easily be made into a brochure that could be available at the Waushara Area Chamber of Commerce. This information could also be available on area websites.

- **RECOMMENDATION ED 1.4.1:** Work with UW-Extension to develop a fact sheet that highlights the amenities of the Coloma area. Periodically update this fact sheet to keep it current.
- RECOMMENDATION ED 1.4.2: Request that the fact sheet be available and/or posted on the websites for the Waushara Area Chamber of Commerce, Village of Coloma, Waushara County, Tri-County Regional Economic Development Corporation, etcetera.

STRATEGY ED 1.5: Encourage the Tri-County Regional Economic Development Corporation Revolving Loan Fund administrators to develop criteria consistent with comprehensive planning recommendations.

• RECOMMENDATION ED 1.5.1: Encourage the Tri-County Regional Economic Development Corporation to refer to the local comprehensive plan recommendations and priorities when evaluating loan applications. Revolving loan fund programs (RLFs) provide low interest funding to businesses for working capital, equipment or for expansion purposes. The businesses must in turn create jobs.

**STRATEGY ED 1.6: Solicit the expansion and/or creation of new complementary industrial and commercial agribusinesses and support local farm product processing and marketing.** To keep agriculture viable, farmers need an outlet to market or buy their products; this could include the addition of a cannery in the area, a cheese marketing warehouse or possibly an ethanol plant within the county (See Agricultural Resources AG 1.4).

- RECOMMENDATION ED 1.6.1: Work with the Tri-County Regional and Waushara County Economic Development Corporations to encourage the establishment of businesses in the Coloma Business Park that would support the local agricultural economy.
- RECOMMENDATION ED 1.6.2: Continue to encourage area grocers, restaurants, schools, nursing homes, and other food providers to purchase locally grown and produced foods.
- RECOMMENDATION ED 1.6.3: Encourage the development of agricultural support industries.
- RECOMMENDATION ED 1.6.4: Promote industry cluster development. A cluster is a geographical group of interconnected companies or associations in a particular field. A cluster can include product producers, service providers, suppliers, educational institutions and trade associations. The NEW Economic Opportunities study recommends that Waushara County collaborate on food production and processing, safety, and packaging. As part of this effort, specialty and organic crops and livestock along with support industries could be expanded in the area.
- RECOMMENDATION ED 1.6.5: Encourage local produce producers in the state (cranberry, vegetable) to consider the Village of Coloma as a prime location for product storage between harvesting and processing.

# GOAL ED 2: Build community identity.

**STRATEGY ED 2.1: Revitalize Front Street.** A vital and vibrant downtown area, will entice residents, visitors and the traveling public on STH 21, to utilize downtown businesses. This will cause other businesses to locate in the area.

• RECOMMENDATION ED 2.1.1: Work with downtown businesses to develop a Downtown Economic Development Plan.

- **RECOMMENDATION ED 2.1.2: Work with the Coloma Historical Society to promote the history of the downtown area.** A number of the buildings in the downtown area are historic in nature.
- **RECOMMENDATION ED 2.1.3: Encourage beautification projects that would promote pedestrian friendly amenities and community pride.** This could include benches, planters, seasonal decorations, banners, lighting, awnings, etc.
- **RECOMMENDATION ED 2.1.4: Encourage new businesses that complement** *existing businesses.* These businesses should encourage variety and uniqueness.
- RECOMMENDATION ED 2.1.5: Identify building vacancies and post on the Village's website, as well as the Waushara County Chamber of Commerce, Tri-County Regional Economic Development Corporation, Coloma and Waushara County Historical Societies, etc.
- RECOMMENDATION ED 2.1.6: Encourage historic building renovation and preservation. Funds are available to identify and evaluate historical, architectural and archeological resources (See Cultural Resources).
- **RECOMMENDATION ED 2.1.7:** Consider working with a local business, the Coloma Library, churches or others to establish a location for teenagers and young adults to gather in the evenings. This venue could serve specialty coffee drinks, offer local entertainment, age appropriate movies and high speed internet connection.
- RECOMMENDATIN ED 2.1.8: Consider surveying local youth and young adults or setting up a public input meeting to gain a better understanding of activities that would appeal to them and are cost effective to implement.
- **RECOMMENDATION ED 2.1.9: Encourage area business owners and civic organizations to sponsor local events that bring people to the Coloma area.**

STRATEGY ED 2.2: Promote the Village Business Park.

- RECOMMENDATION ED 2.2.1: Continue to promote the available lots on the Village website, and the Tri-County Regional County Economic Development websites.
- RECOMMENDATION ED 2.2.2: Promote the convenient location at the crossroads of I-39 and STH 21.
- RECOMMENDATION ED 2.2.3: Promote the amenities of the area and the availability of high speed internet.

STRATEGY ED 2.3: Promote the location of the Village at the crossroads of I-39 and STH 21.

- RECOMMENDATION ED 2.3.1: Continue to work with individual property owners in the Village TIF district near I-39 and STH 21 to develop this area in a logical and cost efficient manner.
- RECOMMENDATION ED 2.3.2. Continue to pursue EDA and other funding opportunities for the development of this site.

**STRATEGY ED 2.4: Strive to keep current with the newest technology, especially in regards to high speed internet.** For businesses to compete effectively, it is essential that affordable access to cutting-edge telecommunications be available in the village. While high speed internet is currently available in the Village, as the technology continues to evolve, the Village should stay abreast of the latest technologies.

STRATEGY ED 2.5: Promote the clean up and reuse of under utilized, vacant, blighted or commercial/industrial sites and buildings to efficiently use existing public utilities, infrastructure and services.

- **RECOMMENDATION ED 2.5.1: Encourage building owners to contact the Village of Coloma of vacancies.**
- **RECOMMENDATION ED 2.5.2:** Post available sites on the Village of Coloma's website.
- **RECOMMENATION ED 2.5.3:** Encourage the Chamber of Commerce to continue to provide a forum to bring building owners and business people together.

STRATEGY ED 2.6: Develop criteria/design standards that future commercial and industrial proposals must meet in order to be approved by the community.

- **RECOMMENDATION ED 2.6.1:** Develop a check list that can be used when considering areas for future or expanding business/industrial sites.
- RECOMMENDATION ED 2.6.2: When identifying future or expanding business/industrial sites, consider the environmental conditions of the area such as wetland, groundwater, and floodplain status.

**STRATEGY ED 2.7: Evaluate Village entrances.** Community entrances are the first thing that a prospective business owner sees when evaluating a location.

- **RECOMMENDATION ED 2.7.1:** Compile a check list to evaluate the entrances to the village.
- **RECOMMENDATION ED 2.7.2: Encourage a civic organization to adopt a** *village entrance.*

GOAL ED 3: Partner, when possible, with educational institutions to promote life long learning for the area's youth and adults. Overall, the support for education and job skills training is essential for increasing earning potential for all Wisconsin residents. A local branch of CAP Services as well as the Fox Valley Technical program is available for local residents. Additionally, partnerships among learning institutions are forming in response to the economic changes Wisconsin is experiencing. One such group includes Wisconsin technical colleges, the University System and private colleges. They are working together as a group called North East Wisconsin Educational Resource Alliance (NEW ERA). One of the goals of this partnership is to enhance and expand learning opportunities in Wisconsin to offer necessary training/learning to Wisconsin's current and future workers.

# STRATEGY ED 3.1: Support entrepreneurial programs to facilitate local business start-ups.

- **RECOMMENDATION ED 3.1.1: Work with CAP Services in Wautoma and/or the FVTC Venture Center, an available resource to entrepreneurs.** CAP Services is a resource available to entrepreneurs for business plan development, information on financing and other tools that are necessary for starting a business.
- RECOMMENDATION ED 3.1.2: Encourage the Westfield School District to initiate a Junior Achievement Program. Junior Achievement is a worldwide program whose purpose is to educate students in kindergarten through 12<sup>th</sup> grade about business, including entrepreneurship, ethics, career development, financial literacy and economics.
- **RECOMMENDATION ED 3.1.3: Encourage individuals to seek support from other sources as needed.** Additional support for business plan development, financing information, and other assistance can be found at the following places:
  - Build Your Business: 1-800-435-7287 or www.wisconsin.gov/state/byb
  - Small Business Development Centers (SBDC): 1-800-940-SBDC or <u>www.wisconsinsbdc.org</u>
  - Virtual Business Incubator: <u>www.virtualincubate.com</u>
  - Impact Seven: (608) 251-8450 or <u>www.impactseven.org</u>
  - Fox Valley Technical College E-Seed Program: <u>www.fvtc.edu/bis</u> or
  - 1-800-735-3882
  - East Central Regional Planning Commission for additional information and referrals: <u>staff@eastcentralrpc.org</u> or (920) 751-4770

# STRATEGY ED 3.2: Encourage youth and adults in the area to utilize FVTC's satellite programming.

- RECOMMENDATION ED 3.2.1: Encourage Tri-County Regional and Waushara County Economic Development Corporations to work with FVTC to evaluate the educational needs of the area.
- RECOMMENDATION ED 3.2.2: Encourage local high schools and guidance counselors to promote technical programs/job skill training through FVTC and the local high school.
- **RECOMMENDATION ED 3.2.3:** Encourage high schools to continue to provide career direction programming.

• RECOMMENDATION ED 3.2.4: Encourage high schools to work with CESA 5, CAP Services and the business community to initiate a youth apprenticeship program or other similar program to provide students with valuable skills.

STRATEGY ED 3.3: Develop a Main Street Business Plan.

• RECOMMENDATION ED 3.3.1: Work with UW-Madison Department of Urban and Regional Planning or others to encourage a student to consider Coloma as the subject of a Capstone Project.

## CHAPTER 8: LAND USE

#### INTRODUCTION

Land use directly influences the elements presented in the previous chapters. The choices for housing type, location, transportation alternatives, decisions on employment locations, recreational opportunities, and the quality of the man-made and natural environments are all intricately woven together into land use. Land use policy decisions can have far-reaching repercussions for factors including housing growth and the protection of natural resources. For example, rural areas in Waushara County are under pressure from scattered rural residential and vacation home development. Large lot development in rural areas has fragmented farmland and forests and place greater stress on the lakes, streams, and other environmentally sensitive areas.

This chapter describes existing land use patterns and current zoning ordinances. Development trends over the past 20 years were analyzed, and future land use needs were extrapolated. Finally, the chapter discusses the land use policy context and the need for additional intergovernmental cooperation. Several potential land use conflicts are identified, and issues that must be addressed are discussed.

#### Land Use Vision for 2030

In 2030, new growth in the Village of Coloma has been accommodated in ways that protect the natural resources and character of the area. Following the extension of sewer and water west of I-39, development around the I-39 and STH 21 intersection has occurred. New industrial and business development has been successfully directed to the two Industrial/Business Parks. Due to the Village of Coloma's prime location, major commercial and industrial traffic generators have good access to the state highway system. Residential developments continue to infill existing subdivisions as well as expand along the north side of the Village along CTH FF.

#### INVENTORY AND ANALYSIS

#### Existing Land Use

*The Village of Coloma existing land use map was last updated by the Village in 2009.* Land use information was compiled into the general land use categories summarized below and is presented in Table 8-1 and Exhibit 8-1. *The land use categories are agricultural, residential, commercial, industrial, transportation, utilities/communications, institutional facilities, recreational facilities, water features, woodlands and other open land.* 

#### Land Use Categories

**Agricultural.** Agricultural land is broadly classified as land that is used for crop production. Agricultural uses include farming, dairying, pastures, apiculture (bees), aquaculture (fish, mussels), cropland, horticulture, floriculture, viticulture (grapes), and animal and poultry

husbandry. Agricultural land is divided into two sub-categories: irrigated and non-irrigated cropland. Irrigated cropland is watered by artificial means, while non-irrigated cropland is watered by natural means (precipitation).

**Residential.** Residential land is classified as land that is used primarily for human inhabitation. Residential land uses are divided into single family residential, farmsteads, and multi-family residential and mobile home parks. Single family residential includes single family dwellings, duplexes, and garages for residential use. Within platted subdivisions, residential land use encompasses the entire lot. In rural areas where lots are typically larger, single family includes the primary residence, outbuildings, and the mowed area surrounding the structures. Single family also includes isolated garages and similar structures on otherwise undeveloped rural lots. Farmsteads include the farm residence, the mowed area between the buildings and the associated outbuildings (barn, sheds, manure storage, abandoned buildings). Multi-family includes apartments of three or more units; condos; room and boarding houses; residence halls; group quarters; retirement homes; nursing care facilities; religious quarters; and the associated parking and yard areas. Mobile home parks are classified as land that is part of a mobile home park. Single standing mobile homes are classified under single family residential.

**Commercial.** Commercial land uses represent the sale of goods and services and other general business practices. Commercial uses include retail and wholesale trade (car and boat dealers; furniture, electronics and appliance stores; building equipment and garden equipment; grocery and liquor stores; health and personal care stores; gasoline stations; clothing and accessories, sporting goods, hobby, book and music stores; general merchandise; miscellaneous store retailers; couriers; and masseuse), services (publishing; motion picture and sound recording; telecommunications; information systems; banks and financial institutions; real estate offices; insurance agencies and carriers; waste management; accommodations; restaurants and drinking places; repair and maintenance; personal and laundry; social assistance, etc.) and other uses (warehousing and automobile salvage and junk yards).

**Industrial.** Industrial land uses represent a broad category of activities which involve the production of goods. Industrial is divided into two separate categories: industrial and quarries. Industrial uses include construction; manufacturing (includes warehousing with factory or mill operation); mining operations and quarries; and other industrial facilities (truck facilities).

**Transportation.** Transportation includes land uses that directly focus on moving people, goods, and services from one location to another. Transportation is divided into two separate categories: transportation and airport. Transportation uses include highway and street rights of way; support activities for transportation (waysides, freight weigh stations, bus stations, taxi, limo services, park and ride lots); rail related facilities; and other related categories. Airports included areas that are dedicated specifically to air traffic.

**Utilities/Communications.** Utilities and communications are classified as any land use which aids in the generation, distribution, and storage of electric power (substations and transformers); natural gas (substations, distribution brokers); and telecommunications (radio, telephone, television stations and cell towers). It also includes facilities associated with water distribution (water towers and tanks); water treatment plants; wastewater processing (plants and lift stations); landfills (active and abandoned); and recycling facilities.

**Institutional Facilities.** Institutional uses are defined as land for public and private facilities dedicated to public services. Institutional land uses include educational facilities (schools, colleges, universities, professional schools); hospitals; assemblies (churches, religious organizations); cemeteries and related facilities; all governmental facilities used for administration (city, village, town halls, community centers, post office, municipal garages, social security and employment offices, etc.); and safety services (police departments, jails, fire stations, armories, military facilities, etc.). Public utilities and areas of outdoor recreation are not considered institutional facilities.

**Recreational Facilities.** Recreational facilities are defined as land uses which provide leisure activity opportunities for citizens. This category encompasses both active and passive activities. Recreational activities include designated hunting and fishing areas; nature areas; general recreational parks; sports facilities (playgrounds, ball diamonds, soccer fields, tennis courts, etc.); city, county and state parks; fairgrounds; marinas; boat landings; spectator sport venues; hiking trails; mini-golf; bowling; bicycling; skiing; golf courses; country clubs; performing arts centers; museums; historical sites; zoos; amusement parks; gambling venues; and other related activities.

**Water Features.** Water features include all surface water including lakes, streams, rivers, ponds, and other similar features. Intermittent waterways are also incorporated into this category.

**Woodlands.** Woodlands are forested areas which are characterized by a predominance of tree cover. Woodlands are divided into two subcategories: general woodlands and planted woodlands. General woodlands are naturally occurring; this category includes forests, woods, and distinguishable hedgerows. Planted woodlands include forestry and timber track operations where trees are typically planted in rows; this category includes tree plantations, orchards and land dedicated to Christmas tree production (nurseries are not included).

**Other Open Land.** This category includes land which is currently vacant and not developed in a manner similar to the other land use categories described within this section. Open land includes areas that are wet, rocky, or outcrop; open lots in a subdivision; or rural parcels and side or back lots on a residential property that are not developed.

### Current Land Use Inventories

Developed land has been altered from its natural state to accommodate human activities. Although agricultural areas are considered undeveloped by land classification systems, these uses have different impacts on land use decisions than urbanized uses; thus, agricultural uses have been separated to obtain an accurate total of all related activities.

*The Village of Coloma encompasses approximately 939 acres* (Table 8-1, Figure 8-1 and Exhibit 8-1). *Approximately 49 percent (49.1%) of the total area is developed.* The primary developed uses include Residential (Single Family, Farmstead, Multi-Family – 32.9%), Transportation (38.4%), and Commercial/Industrial (15.4%). Collectively these uses account for 87 percent (86.7%) of the developed area.

As a share of the overall total land uses, woodlands (planted and unplanted) account for 26.9 percent, cropland (irrigated and non-irrigated) makes up another

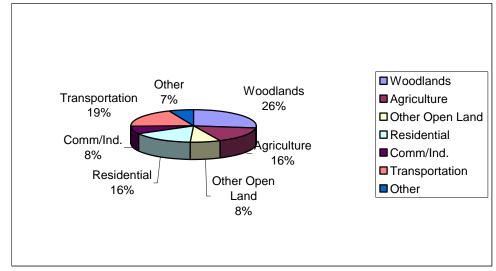

*16.3 percent.* Single family (15.8%), transportation (18.9%) and other open land (7.8%) comprise the majority of the overall land uses in the Village.

		Percent of	
	Total	Developed	Percent
Land Use	Acres	Land	of Total
Single Family Residential	149	32.3%	15.8%
Farmstead	1	0.2%	0.1%
Multi-Family Residential	2	0.4%	0.2%
Mobile Home Parks	0	0.0%	0.0%
Industrial	25	5.3%	2.6%
Recreational Facilities	25	5.4%	2.6%
Commercial	47	10.1%	5.0%
Institutional Facilities	24	5.3%	2.6%
Utilities/Communications	12	2.6%	1.3%
Transportation	177	38.4%	18.9%
Total Developed	461	100.0%	49.1%
Non-irrigated Cropland	28		3.0%
Irrigated Cropland	125		13.3%
Planted Woodlots	128		13.6%
Unplanted Woodlots	125		13.3%
Active Quarry	0		0.0%
Other Open Land	73		7.8%
Water Features	0		0.0%
Total Acres	939		100.0%

# Zoning

Zoning is a major tool used to regulate land uses. A zoning ordinance regulates the use of property in order to advance public health, safety, and welfare through orderly development. Zoning is performed at several levels in Waushara County. Each incorporated city or village has general zoning powers.<sup>1</sup> Waushara County has general zoning jurisdiction within most unincorporated areas of the county; the ordinances are administered by the Zoning and Land Conservation Department (WCZLC).<sup>2</sup> *The Village of Coloma has adopted its own zoning ordinance.* 

#### Village of Coloma

All zoning district information is contained within the Village of Coloma Zoning Ordinance adopted in 2009. A summary of the usage requirements and restrictions of the districts found within the Village is listed below.

- *(R-1) Residential Single-Family District:* This district provides for moderate size lot (8,000 square feet minimum) single family residential development in a suitable environment.
- *(R-2) Residential Single-Family District:* This district provides for a large lot (12,000 square feet minimum) single family residential development in a suitable environment.
- (*R-3*) Residential Two-Family District: This district provides for two-family dwelling in a residential environment.
- (*R-4*) *Residential Multi-Family District:* This district provides for multi-family dwellings in a residential environment.
- *(C-1) Neighborhood Commercial District:* This district provides for uses found in small commercial areas as located throughout the Village.
- *(C-2) Community Commercial District:* This district provides for uses found in the central business district of the Village.
- *(C-3) Highway Commercial District:* This district provides for commercial service type uses, uses specifically oriented towards the traveler, tourist or vacationer and usually located near major highways.
- *(I-1) Light Industrial:* This district is intended to accommodate a limited range of general business and light industrial uses. It is the intent of these provisions that all structures shall be designed and constructed in such a manner as to provide aesthetically pleasing and harmonious overall development within the district.
- *(I-2) Heavy Industrial:* This district is intended to provide for uses which by their nature may exhibit characteristics harmful, noxious or detrimental to surrounding uses of land.

<sup>&</sup>lt;sup>1</sup> *Wisconsin Statues* 62.23 for cities and *Wisconsin Statutes* 61.35 for villages.

<sup>&</sup>lt;sup>2</sup> Wisconsin Statues 69.69.

• *Rural Development District:* This district provides for the continuation of forestry and general crop farming in areas of the Village not yet committed to development. It is further intended to protect lands from development until their orderly transition into other districts is required.

## Development Trends

The growth and development of Waushara County has been influenced by a number of factors. These factors include the topography, the abundance of navigable surface waters, wooded lands and natural resources, the ability of the soils to support crops and the central location of the county in the state, and its proximity to the Fox Cities, Oshkosh, Stevens Point and Madison.

*The earliest inhabitants of Waushara County were Native Americans.* Considerable evidence of their civilization has been found throughout the county and still exists today. The Whistler Mound group, in the Village of Hancock, is included on the National Register, but many other sites are still present in the county.

On October 18, 1846, the Menominee Tribe ceded their land, including Waushara County to the U.S. Government. *By the late 1840's and early 1850's, farming communities centered around small villages and hamlets could be found in the county.* Many of these communities were established along existing logging and old military roads, and at creek and river crossings. A typical early farming community usually included a tavern, sawmill, stage house (a place for overnight accommodations), church, houses and a few commercial establishments.

*In the 1880's, the county experienced a surge of activity with the coming of the railroad and the discovery of red granite.* Overnight houses and businesses materialized in the Redgranite/Lohrville area as skilled workers, their families and others made Waushara County their home. The boom ended in the 1920's as concrete replaced stone as the nation's preferred paving material.

*Today, agriculture and tourism has grown to become the county's major industries.* While the county has seen a decline in the number of farms over the years, in 1997 over half of the county was taxed as farmland. Waushara County's 136 lakes make up about 7,000 acres of surface water. The greatest concentration of lakes is found among the moraines and drumlins in central and western portions of the county. These lakes, along with over 500 miles of rivers and streams and 185,000 acres of woodlots provide for a diversity of boating, fishing, hunting, hiking and other recreational opportunities.

Similar to other rural areas in the state, Waushara County has faced development pressures. *Large portions of farm and woodlands are being converted to small parcel residential development.* Easy access to STH 21 and the expansion of USH 10 has shortened the time/distance between Waushara County and the Fox Cities and Oshkosh. As a result, towns along the eastern tier have experienced growth in housing starts by people working outside the county. While communities along the western tier of the county, have closer ties to Stevens Point, Westfield and other areas along the I-39 corridor.

As growth occurs, land use changes in intensity and net density. Analyzing the patterns in land use provides valuable information to local communities in determining how the community has changed and how to assess current needs. This information can be used to plan for the appropriate development in the future. To analyze land use changes, East Central Wisconsin Regional Planning Commission (ECWRPC) looked at a number of different data sources, including its own land use inventories of the area, revenue data from the Wisconsin Department of Revenue (DOR), and building permit records from the Wisconsin Department of Administration (DOA).

Several limitations with the information in the data sets necessitate utilizing general summaries for land use trends. A brief discussion of the limitations follows.

ECWRPC conducted land use inventories in 1980 and again in 2000, the latter data was updated by the Village in 2009. Two distinct classification systems were used in the 1980 and in 2000 and the subsequent land use updates. This made it difficult to compare specific categories between the two inventories. Secondly, computer technology has changed the degree of specificity in which data is collected. In 1980, computerized parcel data was not available. Current land use utilizes parcel data; therefore if a house is located in a subdivision, the entire parcel may be included as residential. Residential areas in 1980 may have included only a portion of these areas.

A comparison of Wisconsin Department of Revenue (DOR) data was used to analyze land use changes between 1990 and 2005<sup>3</sup> The DOR collects information by real estate class for each minor civil division in the state.<sup>4</sup> Acreage figures from DOR do not include Department of Natural Resource (DNR) lands or other tax-exempt properties.<sup>5</sup> Acreage data for incorporated communities is also incomplete, as their information is frequently provided in number of parcels, as opposed to the total acreage of the parcels. Beginning in 1996, the DOR also changed their classification system. Wisconsin Act 27 mandated that agricultural land was categorized from a standard based on use value instead of a standard based on full market value.<sup>6</sup> Therefore, some land use changes between 1990 and 2005 are a direct result of Act 27 and do not necessarily reflect a change in land use but a change in the way that the land was classified. Following the implementation of the use value standard, agricultural land with improvements was moved to other categories. If these improvements included residential, then the agricultural land with improvements was moved to residential. Additionally, following the use value assessment, less productive land was moved out of agriculture and reclassified as swamp and waste land. Furthermore, the increasing popularity of privately owned recreational land caused a shift of lands from agriculture to both forestland and swamp and wasteland.

The Wisconsin Department of Administration (DOA) collects building permit information for new construction as well as demolition information from communities within the state.<sup>7</sup> This data is annually reported by communities and includes single-family, two-family, multi-family and mobile homes. The data is an inventory of the net change in the number of residential units for each community that were reported to DOA. As stated above, this data set includes informa-

<sup>&</sup>lt;sup>3</sup> DOR. 1980. *1980 Statistical Report of Property Values Waushara County, Wisconsin.* 

<sup>&</sup>lt;sup>4</sup> DOR. 1990, 2000, and 2005. Statement of Equalized Values.

<sup>&</sup>lt;sup>5</sup> DOR. 1990, 2000, and 2005. *Statement of Assessments.* 

<sup>&</sup>lt;sup>6</sup> Wisconsin State Assembly. 1995. *Wisconsin Act 27 (Assembly Bill 150).* 

<sup>&</sup>lt;sup>7</sup> Wisconsin Demographics Service Center. 1990 to 2004. *Annual Housing Units Surveys.* 

tion that is reported by individual communities to the DOA. If a community does not accurately report its building permit information, it is infeasible to determine actual land use changes.

While the historical data from ECWRPC, DOR and DOA gives us an incomplete picture of the total amount of land historically devoted to the various land uses, it does give us a picture of land consumption patterns within the communities. According to these data sources, several trends can be seen. The collective summary utilizing all three sources is presented for each individual community, and general trends are discussed.

#### Land Use Trends

As stated above, some of the changes in land use trends utilizing ECWRPC data can be directly attributed to changes in technology and changes in the way land use data was categorized. To determine overall trends in land use between the 1980 and 2000 years the following land use categories were grouped together:

- Residential: Single family, multi-family, farmsteads, mobile homes, mobile home parks, duplex, group quarters, part-time and seasonal;
- Industrial: Industrial and quarries;
- Parks and Recreation: Parks, recreational activities, conservation and preservation areas, resorts and camps;
- Institutional Facilities: Educational, public assembly, government facilities, cemeteries, churches, hospitals, libraries and institutional;
- Cropland: Irrigated cropland, pastureland, and non-irrigated cropland; and
- Residual: Residual, streets, highways, water features, utilities, planted woodlots, unplanted woodlots, other open land and transportation.

After grouping the land use categories, certain trends were evident. While 1980 land use data has inherent discrepancies due to available technology, it is likely that the Village of Coloma experienced annexation during this time period. *It is also apparent that increases were experienced in all land use categories between 1980 and 2009 (Table 8-2).* 

Existing Land Use	1980	2009	Change	Percent
5	Acres	Acres	Acres	Change
Residential	109	151	42	38%
Commercial	16	47	31	194%
Industrial	13	25	12	89%
Parks and Recreation	15	25	10	69%
Institutitional Facilities	17	24	8	48%
Cropland	59	153	94	161%
Residual	452	515	63	14%
Total	680	939		

Table 8-2. Land Use Trends (ECWRPC), 1980 to 2009

Source: ECWRPC: 1980 and 2009

Even though land use trends utilizing Department of Revenue data does not include WDNR data or tax exempt properties, and is usually less consistent for incorporated communities, certain broad trends can be noted and generally correspond to trends apparent in the data from ECWRPC. *Residential, commercial and industrial acreages are increasing, while* 

*agricultural acres are decreasing* (Table 8-3). The difference in total acreage in the Village is most likely related to the property that is tax exempt.

	1980	1990	2000	2005	Pe	ercent Chan	ge
Land Use	Acres	Acres	Acres	Acres	1980-1990	1990-2000	2000-2005

Total	406	349	324	283			

Table 8-3. Land Use Trends (DOR), 1980 to 2005

Source: WI DOR Final Statement of Assessment Report. 1980, 1990, 2000, 2005.

#### **Building Permits**

As stated above, net building permit data is available from the DOA. This data has been submitted by the jurisdictions that issue building permits. Net building data indicates the net change, not the total number of building permits. Therefore, if a building is demolished within a community, this information is subtracted from the new permit numbers. *Between 1990 and 2007, 38 net units were added within the Village of Coloma. This averages to about 2.1 units per year (units/yr)* (Table 8-4). The largest growth in single family units occurred during 1996 to 1998. During these three years, an average of 4 units was added per year. It is important to note that the accuracy of the data source is dependent on timely reporting by local officials.

	Additions	Deletions	Net
Year	Number	Number	Number
1990	1	0	1
1991	3	0	3
1992	4	1	3
1993	3	0	3
1994	1	0	1
1995	1	0	1
1996	4	0	4
1997	4	0	4
1998	4	0	4
1999	0	0	0
2000	0	1	-1
2001	4	1	3
2002	0	1	-1
2003	3	0	3
2004	3	0	3
2005	4	0	4
2006	0	0	0
2007	3	0	3

Table 8-4. Residential Building Permits, 1990 to 2007

Source: State of Wisconsin Demographic Services Center Annual Housing Unit Surveys. Utilizing ECWRPC, DOR and DOA data, the following trends are apparent between 1980 and 2000: residential, commercial and industrial land uses are increasing.

### Density and Intensity

### Density

Density is broadly defined as "a number of units in a given area".<sup>8</sup> For the purposes of this report, residential densities are defined as the number of housing units per square mile of total land area (units/square mile), excluding water. **Between 1990 and 2000, residential densities increased throughout the county, state and Village.** As the population of the area has grown, so has the overall housing density (Table 8-5). *Within the Village of Coloma, residential densities remained more stable, increasing from 184.91 units per square mile to 185.85 units per square mile during this time period.* While less than the state, residential densities in Waushara County increased by about 12 percent from 19.56 units per square mile to 21.83 units per square mile. Whereas residential densities in Waushara Per square mile to 42.74 units per square mile.

	Land Area	19	90	20	00
Jurisdiction	Sq. Miles	Total Units	Units/Sq. Mi.	Total Units	Units/Sq. Mi.
Wisconsin	54,313.7	2,055,774	37.85	2,321,144	42.74
Waushara County	626.1	12,246	19.56	13,667	21.83
Village of Coloma	1.1	196	184.91	197	185.85

Table 8-5. Residential Density, 1990 to 2000

Source: U.S. Census, 1990, 2000.

### Intensity

Intensity is the degree of activity associated with a particular land use. Generally, higher intensity land uses also have higher environmental impacts. Due to limited information available, this report will compare the intensities of single-family versus multi-family developments in the various communities. To calculate land intensities, the ECWRPC categorizes single and two-family residential, farmsteads, and mobile homes as "single family."

Incorporated communities or areas served by public sewer often have more intense development patterns than rural towns. Single-family residential development is typically a less intense land use than multi-family (3 or more units) which is typically restricted to areas on public sewer. According to the 2000 U.S. Census, there were twelve units within the Village of Coloma containing 3 or more units. Second, incorporated areas in Waushara County are smaller in overall land area than the surrounding towns, resulting in a more intensive land use. Finally, incorporated municipalities, in the county, have areas of older development that were constructed during a period when society was less dependent on cars for transportation. This necessitated the need for smaller lot development that allowed for closer proximity to neighbors and services.

<sup>&</sup>lt;sup>8</sup> Measuring Density: Working Definitions for Residential Density and Building Intensity, November 2003. Design Center for American Urban Landscape, University of Minnesota.

Utilizing 2000 U.S. Census data and net building permit data from DOA for 2000 to 2007, there were 199<sup>9</sup> single family units in the Village of Coloma on a total of 149.64 acres<sup>10</sup>. *This resulted in a single family intensity of about 1.33 units per acre in the Village in 2009.* There were 12 multi-family units in the Village of Coloma in 2009 on a total of 1.77 acres. *Therefore, the multi-family intensity was 6.52 units per acre in 2009 (Table 8-6).* 

		Single Famil	у		Multi-Family	/
Municipality	Units	Acres	Units/Ac.	Units	Acres	Units/Ac.
Village of Coloma	199	149.64	1.33	12	1.77	6.52

#### **DEVELOPMENT CONSIDERATIONS**

#### Recommended State, Regional, and County Goals

State, regional, and county goals were developed to provide communities with a framework on which land use decisions could be based. These goals make the planning process and decision defensible to the general public when formulating alternate scenarios for developing parcels within a community.

#### State of Wisconsin

The State of Wisconsin requires that communities address 14 specific goals in their comprehensive plans.<sup>11</sup> These goals encourage development to occur in an orderly well-planned manner. The goals are:

- Promoting the redevelopment of lands with existing infrastructure and public services and the maintenance and rehabilitation of existing residential, commercial, and industrial structures.
- Encouraging neighborhood designs that support a range of transportation choices.
- Protection of natural areas, including wetlands, wildlife habitats, lakes, woodlands, open spaces, and groundwater resources.
- Protecting economically productive areas, including farmlands and forests.
- Encouraging land uses and development patterns that promote cost-efficient government services and utility costs.
- Preserving cultural, historic, and archaeological sites.
- Encouraging coordination and cooperation with neighboring communities.
- Building community identity by improving overall appearance and attractiveness to visitors.
- Providing an adequate supply of affordable housing for all income levels.
- Providing adequate infrastructure, public services, and a supply of affordable land to meet existing needs and accommodate future growth.

<sup>&</sup>lt;sup>9</sup> 185 Single Family, Mobile Home, Two Family per U.S. Census 2000 plus 14 net homes per DOA.

<sup>&</sup>lt;sup>10</sup> ECWRPC 2009 Land Use.

<sup>&</sup>lt;sup>11</sup> Wisconsin State Statutes 66.1001.

- Promoting the expansion or stabilization of the current economic base and the creation of additional and better employment opportunities.
- Balancing individual property rights with community interests and goals.
- Planning and developing a pattern of land use that preserves and creates a pleasing and unique setting.
- Providing all citizens, including those that are transportation dependent, a variety of economical, convenient, and safe transportation options adequate to meet their needs.

### East Central Wisconsin Regional Planning Commission

East Central Wisconsin Regional Planning Commission has developed a regional comprehensive plan.<sup>12</sup> As a part of this planning process, East Central has identified several key land use goals:

- Educate the public on potential conflicts and trade-offs associated with alternative development patterns.
- Encourage efficient development in order to reduce land use conflicts and contain community costs.
- Encourage actions and incentives which preserve and protect natural and cultural resources.
- Educate all decision makers regarding what their property rights are and how they can influence the public arena.
- Educate the public on potential cultural, economic and land use conflicts.
- Encourage intergovernmental cooperation and coordination.
- Encourage building code standards which preserve historical and cultural character.
- To protect and improve the aesthetic qualities and high-value scenic resources of the region and its communities while balancing the needs of private industry, government, and the general public.
- Identify techniques, which can be used to preserve local community character.
- Encourage a balance between individual property rights and community interest and goals.
- Encourage public participation in comprehensive planning.
- To ensure the region and its communities develop in a manner which is sustainable in nature.
- Comprehensive plan updates have considered the voluntary incorporation of sustainable concepts.
- Communities are informed and educated on the benefits of developing sustainable plans and regulations.

### Waushara County

The Waushara County Zoning Ordinance has identified the following criteria for all unincorporated areas within the county:

- Promote and protect public health, safety, comfort, convenience, prosperity, aesthetics, and other aspects of general welfare.
- Establish reasonable standards to which buildings and structures shall conform.

<sup>&</sup>lt;sup>12</sup> ECWRPC, 2008. *Milestone Report #3: Goals, Strategies and a Plan for Action.* 

- Regulate and restrict lot coverage and population density.
- Conserve the value of land and buildings.
- Guide the proper distribution and location of land use patterns.
- Promote safety and efficiency of transportation networks.
- Provide adequate light, air, sanitation, and drainage.
- Prevent the uncontrolled use of shorelands and pollution of the navigable waters of the county.
- Encourage the preservation, conservation, and development of land areas for a wide range of natural resources.
- Minimize expenditures of public funds for flood control projects; rescue and relief efforts undertaken at the expense of the taxpayers; business interruptions and other economic disruptions; damage to public facilities in the floodplain; and minimize the occurrence of future flood blight areas.
- Discourage the victimization of unwary land and homebuyers.

#### Local Land Use Issues

#### **Environmental Impacts and Public Utilities**

*Development costs vary based on density, design, social, economical, political and environmental constraints.* Public opposition can increase costs through project delays. Development often necessitates the expansion of public infrastructure such as sewer, water, streets, schools, parks and services such as fire and police protection. Increased development can infringe on wetland and floodplain areas, destroy wildlife habitat, and increase runoff to streams and lakes.

To protect and enhance the natural resource base, communities should identify and protect environmental corridors found within the planning area. Environmental corridors are areas in the community that contain and connect natural areas, open space, and other resources. They often lie along streams, rivers, and other natural features. Environmental corridors provide a beneficial buffer between sensitive natural resources and human development. These areas can provide flood control and valuable wildlife habitat and can significantly benefit the aesthetic appeal of the community.

#### Land Supply

*The amount of land available for development within the Village of Coloma is finite.* Factors that limit the amount of developable land include environmental restrictions (floodplains, high groundwater, wetlands, steep slopes, and water quality), zoning (setbacks, conservancy and development easements, permitted uses), annexation and conflicts between uses.

#### Market Trends

The price of developable land varies depending on the surrounding land uses, location, access, services, and other subjective factors. Natural amenities such as water frontage, forests, and open space may increase the overall value. Land prices are subject to market demand and fluctuations. As such, land values show periodic variations. Housing affordability is dependent on land prices.

The Wisconsin Department of Revenue (DOR) annually reports equalized value as set by the department by real estate class per municipality in Wisconsin. Table 8-8 shows the equalized value of all classes of land in the Village of Coloma and Waushara County. Overall, both the Village and County experienced increases in land value between 1998 and 2008. *During this time period, the value of land in the Village of Coloma increased by 191 percent, while land values in the County went up by 103 percent.* Years of largest increases for Waushara County and the Village of Coloma occurred in 2001 and 2008. In 2001 and 2008, land values in the Waushara County increased by 22 percent and 13 percent respectively, while land values increased by 30 percent and 45 percent in the Village of Coloma. *As a result, from 2006 to 2008, the Village's land value (53.5%) increased at a noticeably greater rate than the County (19.8%), indicating that land in Coloma is appreciating more rapidly and in greater demand (Table 8-7).* 

	Village of Coloma	Percent	Waushara County	Percent
Year	Land Value	Increase	Land Value	Increase
1998	1,403,700	-	494,927,000	-
1999	1,421,900	1%	531,492,800	7%
2000	1,672,200	18%	532,430,300	0%
2001	2,182,100	30%	649,433,500	22%
2002	2,353,300	8%	684,983,500	5%
2003	2,424,500	3%	737,864,100	8%
2004	2,399,300	-1%	758,648,000	3%
2005	2,416,900	1%	774,526,900	2%
2006	2,666,300	10%	838,017,300	8%
2007	2,813,000	6%	890,245,700	6%
2008	4,091,500	45%	1,003,757,200	13%

Table 8-8.	Waushara County	y Home Sales,	1998 to 2008

	Number of	Median
Year	Home Sales	Sale Price
1998	176	\$81,800
1999	226	\$82,100
2000	235	\$86,600
2001	198	\$98,600
2002	234	\$95,700
2003	250	\$107,700
2004	314	\$97,100
2005	261	\$131,100
2006	296	\$121,800
2007	278	\$109,100
2008	198	\$105,000

Source: Wisconsin Realtor Association Consumer Resources Http://www.wra.org/Consumer\_Resources/about/housingstats.asp Note: Fourth quarter information note available for 1998 State of Wisconsin housing statistics supplied by the Wisconsin Realtors Association's provides information on the number of home sales and median price over a period of time. *Between 1998 and 2008 there were 2,666 home sales in Waushara County, with an average of 242 home sales per year* (Table 8-8). *During this time period the median sale price increased from \$81,800 in 1998 to \$105,000.* This represents a 28 percent increase.

## Energy demands

Development is dependant on the availability of a cost-effective, abundant, efficient energy supply. Industry needs to know that reliable energy will be available to run equipment and people rely on affordable energy to heat and power their homes. Not only is energy important for heating and power, but the cost and availability of gasoline may also impact development in Coloma. Tourism is a major revenue generator for the county, and many people within the county also regularly commute to work. Over half the people in the county regularly travel further than 27.1 minutes to work. An increase in gas prices may cause some residents to move closer to their place of employment and out of Waushara County or cause others to consider closer locations from home for their vacation destinations. Therefore, energy availability can have an impact on new and sustained development in the Village.

# FUTURE LAND USE PROJECTIONS

### Future Land Use Map

Future land use needs and the resulting land use map represents a compilation of the previous elements (Exhibit 8-2). This map was developed using:

- Existing land use maps and patterns;
- Demographics (population and housing);
- Natural resource areas with limiting conditions (wetlands, floodplains, water resources);
- Development limitations (quarries, abandoned landfills, atrazine prohibition and wellhead protection areas);
- Future land use projections;
- Results from public input including citizen questionnaire;
- Committee input including SWOT analysis and visioning exercise; and
- Village of Coloma Zoning Ordinance.

The following land use categories were used in the Future Land Use Map (Exhibit 8-2):

• **Future Residential:** Future residential land use is classified as land that will be used primarily for future human habitation. Future residential land uses include single family residential, farmsteads, individual mobile homes, duplexes and multi-family. This land use category can include mobile homes in communities that have not made a distinction between these uses. Besides development that would infill already established areas, the Village would like to see future residential development in the platted subdivision in the southeast corner, and unplatted areas in the northern part of the Village as shown on the future land use map. Per the Village's zoning ordinance the minimum lot size in this area would be 12,000 SF for single family development.

- **Future Commercial:** Commercial land uses represent the sale of goods and services and other general business practices. Highway commercial development is desired on along STH 21 and I-39, while neighborhood commercial is preferred near Front Street.
- **Future Industrial:** Future industrial land uses represent a broad category of activities not classified as future commercial. Future industrial uses are ideal in the future industrial/commercial business park on the west side of I-39.

### Future Land Use Projections

Wisconsin statutes require comprehensive plans to include five year projections for residential, commercial, industrial, and agricultural uses over the length of the plan.<sup>13</sup> A summary of future land use projections and criteria follows.

While projections can provide extremely valuable information for community planning, by nature, projections have limitations which must be recognized. First and foremost, projections are not predictions. Projections are typically based on historical growth patterns and the composition of the current base. Their reliability depends to a large extent on the continuation of those past growth trends. Second, projections for small communities are especially difficult and subject to more error, as even minor changes can significantly impact growth rates. Third, growth is also difficult to predict in areas which are heavily dependent on migration, as migration rates may vary considerably based on economic factors both within and outside of the area.

The actual rate of growth and amount of future growth communities experience can be influenced by local policies which can slow or increase the rate of growth. Regardless of whether communities prefer a no growth, low growth or high growth option, it is recommended they adequately prepare for future growth and changes to provide the most cost-effective services possible. Furthermore, individual communities can maximize the net benefits of their public infrastructure by encouraging denser growth patterns which maximize the use of land resources while minimizing the impact on the natural resource base.

Expected increases in residential and commercial acreage and resulting decreases in agricultural acreage can be estimated by analyzing and projecting historical data into the future. An anticipated range of population and housing growth and the amount of land that would be required to accommodate that increase in growth were made using past housing and population trends and future population and household projections.

In 2000, 461 permanent residents resided in the Village of Coloma. A total of 197 dwelling units (185 single family and 12 multi-family) existed in the Village.<sup>14</sup> Of these units, 185 dwelling units were occupied year round and 12 were vacant. Vacant units are comprised of seasonal units and other (for rent, for sale, other). Six units or fifty percent of the vacant units were considered seasonal in 2000. The 185 occupied dwelling units (households) had an average household size of 2.42 people. Based on ECWRPC projections, the population is expected to increase by 134 to 595 people by 2030; these people are expected to live in a total of 252 households. Due to a number of reasons including the aging population base and a decrease in the number of children that people are having, the average household size is expected to decrease to 2.29 people per

<sup>&</sup>lt;sup>13</sup> Wisconsin State Statutes 66.1001.

<sup>&</sup>lt;sup>14</sup> U.S. Census 2000.

housing unit. It is important to remember that the number of total dwelling units does not equal the total number of households. The total number of dwelling units in the Village is a combination of occupied units and vacant units (for sale, rent, seasonal and other), while the total households is equal to the number of occupied dwelling units. *Assuming a constant vacancy rate of 6.1 percent (vacancy rate from 2000 Census held constant), it is anticipated that there will be a total of 268 dwelling units in the Village of Coloma by 2030 or 71 new units (268-197).* Maintaining the current split between single family and multi-family, it is assumed that *there will be a total of 253 single family units or 68 additional (253-185) in 2030. The remaining 15 units will be multi-family (268-253). Since there are currently 12 multi-family units in the Village of Coloma, an additional three units of multi-family will be added in the Village by 2030. Over a 30 year period this assumes that an average of 2.4 dwelling units (71 units/30 years) will be added in the Village per year.* 

Historical building permit data from the DOA indicates that between 1990 and 2007, a net total of 38 units (Table 8-5) were added in the Village of Coloma (2.1 dwelling units per year, this includes one multi-family unit in 1991). According to U.S. Census data, a total of one additional dwelling unit was added in the Village between 1990 and 2000 (0.1 dwelling units per year). While historical building permit data from DOA and the U.S. Census indicates that Village averaged 0.1 to 2.4<sup>15</sup> dwelling units per year between 1990 and 2000, these trends may not continue.

Based on existing information, there are approximately 199<sup>16</sup> single/two-family residential units in the Village that occupied approximately 150 acres in 2009.<sup>17</sup> As a result, the average size of a single/two-family residential parcel in the Village of Coloma is approximately 0.75 acres. According to the 2000 U.S. Census and ECWRPC existing land use, there are twelve multi-family units in the Village that occupied about 1.8 acres. Per the Village of Coloma Zoning Ordinance, future single-family residential land use is to occur on a minimum lot size of 8,000 SF (moderate size lot) or 12,000 SF (large lot). *Therefore future single family residential land use was calculated utilizing 1.33 dwelling unit per acre (Table 8-9; existing density), 3.6 units per acre (Table 8-10; minimum lot size for a R-2 zone is 12,000 SF) and 5.4 units acre (Table 8-11; minimum lot size for a R-1 zone is 8,000 SF). This means that the Village of Coloma would likely experience an increase of about 13 to 55 acres of new single family residential growth depending on the density selected. This assumes a 15 percent infrastructure and 20 percent market factor.* 

Multi-family land use was calculated assuming that the three additional units of multi-family would be added at the same density as the existing (6.8 units per acres). Assuming a 15 percent infrastructure and 20 percent market factor 0.8 acres of multi-family development will be added over the life of the plan. Future commercial and industrial growth was estimated using a ratio of existing population to existing commercial and industrial land use and projecting it forward based on future population estimates. It is assumed that about 18.3 acres of commercial and 9.6 acres of industrial development will be added over the life of the plan. Future agricultural land use was calculated based on the assumption that the majority of future development would occur in areas that are currently wooded, farmed or open. The 2000 land use indicates that if

<sup>&</sup>lt;sup>15</sup> DOA, 24 net dwelling units added between 1990 and 2000.

<sup>&</sup>lt;sup>16</sup> 185 Single/two-family per the 2000 U.S. Census plus 14 net units from 2000 to 2007 per DOA.

<sup>&</sup>lt;sup>17</sup> ECWRPC existing land use 2009.

these three land use categories are compared, about 50 percent would be wooded, 30 percent would be agricultural and 20 percent would be open other land. *Based on these assumptions approximately 13 to 25 acres of agricultural land use will be lost over the life of the plan.*

#### Land Use Issues and Conflicts

The Village of Coloma is completely surrounded by the Town of Coloma. Due to the proximity of the two communities, the Village and Town of Coloma have developed a strong working relationship that is beneficial to both. To build upon this established relationship, the communities met together during this planning effort so that issues in common could be jointly discussed. However, *the Village and Town of Coloma may want to establish a more formal process to plan for areas adjacent to the Village.* 

The Village of Coloma, along with other Waushara County communities, sanitary districts, school districts, planning commissions and others should monitor and provide comments to communities and the County during the ongoing comprehensive planning process which is currently underway. Potential land use conflicts may arise as new development occurs. Local

officials and county employees will need to collaborate to ensure that the overall density of development within Waushara County communities is consistent with the overall land use visions.

While there are no wetlands, floodplains or water features within the Village of Coloma, the Village should be concerned about natural resource preservation and development in the Town of Coloma and other parts of Waushara County. Increased development near agricultural lands and natural resources could jeopardize the agricultural economy, and lead to displacement of wildlife; degradation of surface and groundwater; and loss of forest, farmland and other open lands and resources.

*Incompatibilities may arise between adjacent land uses as development continues.* Future land use maps designate specific areas for various uses. *To minimize these conflicts, other land use controls such as setbacks, screening, and buffering should be utilized to limit potential conflicts.* Many of these controls are detailed within the respective zoning ordinances.

#### Key Findings

#### Existing Land Use

- The Village of Coloma existing land use map was last updated by the Village in 2009.
- The land use categories are agricultural, residential, commercial, industrial, transportation, utilities/communications, institutional facilities, recreational facilities, water features, woodlands and other open land.
- The Village of Coloma encompasses approximately 939 acres. Approximately 49 percent (49.1%) of the total area is developed.
- As a share of the overall total land uses, woodlands (planted and unplanted) account for 26.9 percent, cropland (irrigated and non-irrigated) makes up another 16.3 percent.

#### Zoning

• The Village of Coloma has adopted its own zoning ordinance.

#### Development Trends

- The earliest inhabitants of Waushara County were Native Americans.
- By the late 1840's and early 1850's, farming communities centered around small villages and hamlets could be found in the county.
- In the 1880's, the county experienced a surge of activity with the coming of the railroad and the discovery of red granite.
- Today, agriculture and tourism has grown to become the county's major industries.
- Large portions of farm and woodlands are being converted to small parcel residential development.

#### Land Use Trends

• According to data collected by ECWRPC, increases were experienced in all land use categories between 1980 and 2009.

• According to data collected by the DOR, residential, commercial and industrial acreages are increasing, while agricultural acres are decreasing.

#### **Building Permits**

• According to the DOA, between 1990 and 2007, 38 net units were added within the Village of Coloma. This averages to about 2.1 units per year (units/yr).

#### Density and Intensity

- Between 1990 and 2000, residential densities increased throughout the county, state, and the Village of Coloma. Within the Village of Coloma, residential densities remained more stable, increasing from 184.91 units per square mile to 185.85 units per square mile during this time period.
- Utilizing U.S. Census and DOA data, single family intensity of 1.33 units per acre existed in the Village in 2009.
- Multi-family intensity was 6.52 units per acre in 2009.

#### Local Land Use Issues

- Development costs vary based on density, design, social, economical, political and environmental constraints.
- The amount of land available for development within the Village of Coloma is finite.
- Between 1998 and 2008, the value of land in the Village of Coloma increased by 191 percent, while land values in the County went up by 103 percent.
- More recently, from 2006 to 2008, the Village's land value (53.5%) increased at a noticeably greater rate than the County (19.8%), indicating that land in Coloma is appreciating more rapidly and in greater demand.
- Between 1998 and 2008 there were 2,666 home sales in Waushara County, with an average of 242 home sales per year. During this time period the median sale price increased from \$81,800 in 1998 to \$105,000 in 2008.
- Development is dependent on the availability of a cost-effective, abundant, efficient energy supply.
- An increase in gas prices may cause some residents to move closer to their place of employment and out of Waushara County or cause others to consider closer locations from home for their vacation destinations.

#### Future Land Use Projections

- In 2000, 461 permanent residents resided in the Village of Coloma. A total of 197 dwelling units (185 single family and 12 multi-family) existed in the Village.<sup>18</sup> Of these units, 185 dwelling units were occupied year round and 12 were vacant.
- The population is expected to increase by 134 to 595 people by 2030; these people are expected to live in a total of 252 households.
- Assuming a constant vacancy rate of 6.1 percent (vacancy rate from 2000 Census held constant), it is anticipated that there will be a total of 268 dwelling units in the Village of Coloma by 2030 or 71 new units (268-197).

<sup>&</sup>lt;sup>18</sup> U.S. Census 2000.

- There will be a total of 253 single family units or 68 additional (253-185) in 2030.
- The remaining 15 units will be multi-family (268-253). Since there are currently 12 multi-family units in the Village of Coloma, an additional three units of multi-family will be added in the Village by 2030.
- Over a 30 year period this assumes that an average of 2.4 dwelling units (71 units/30 years) will be added in the Village per year.
- Future single family residential land use was calculated utilizing 1.33 dwelling unit per acre (Table 8-9; existing density), 5.4 units acre (Table 8-10; minimum lot size for a R-1 zone is 8,000 SF) and 3.6 units per acre (Table 8-11; minimum lot size for a R-2 zone is 12,000 SF). This means that the Village of Coloma would likely experience an increase of about 13 to 55 acres of new single family residential growth depending on the density selected. This assumes a 15 percent infrastructure and 20 percent market factor.
- Multi-family land use was calculated assuming that the three additional units of multifamily would be added at the same density as the existing (6.8 units per acres). Assuming a 15 percent infrastructure and 20 percent market factor 0.8 acres of multifamily development will be added over the life of the plan.
- It is assumed that about 18.3 acres of commercial and 9.6 acres of industrial development will be added over the life of the plan.
- Approximately 13 to 25 acres of agricultural land use will be lost over the life of the plan.

#### Land Use Issues and Conflicts

- The Village and Town of Coloma may want to establish a more formal process to plan for areas adjacent to the Village.
- Incompatibilities may arise between adjacent land uses as development continues. To minimize these conflicts, other land use controls such as setbacks, screening, and buffering should be utilized to limit potential conflicts.

#### INTERRELATIONSHIPS WITH OTHER PLAN ELEMENTS

Land use cannot be considered in isolation from other elements. Economic development; housing; transportation; community and public facilities; and agricultural, natural and cultural resources all interact with one another. A vibrant economy brings people to the area in search of jobs and housing. Additional jobs may require the construction of more businesses, while additional people may demand other housing and services. Infrastructure such as roads and sewer and water extensions may be needed to serve these areas and people. This development may impact existing farm lands, forest areas, and other natural features.

#### Economic Development

Commercial and industrial land uses should be located in areas that are compatible with adjacent land uses, minimize environmental impacts, and utilize existing infrastructure. Additionally, industrial and concentrated commercial land uses should be situated in areas, if possible, where public sanitary sewer and water are available.

#### Housing

It is critical that an adequate supply of reasonably priced land be available for residential development. The amount of land that is required depends on the density, design, and placement of development. Residential development should be placed to minimize environmental impacts and utilize existing infrastructure. Scattered residential development increases the cost to provide public services such as fire, police and emergency protection; consumes and fractures large tracts of agricultural and forested areas; and increases conflicts between agricultural and residential uses.

Demand for property with access to natural resources has driven up land values and the cost of housing in Waushara County. New residential development may not be affordable to residents who depend on the area for jobs. The provision of a mix of residential units must be available for all income ranges. Affordable housing including smaller homes on smaller lots and reasonably priced rental properties must be provided for individuals on low or fixed incomes. These areas should be located within walking distance of schools, stores, and other services.

#### Transportation

A well planned transportation system provides access to housing, schools, work and through traffic. As part of this transportation system, bike and pedestrian facilities should be expanded in existing areas to provide safe access to schools and business. When new subdivisions or roads are built or existing roads are reconstructed, pedestrian and bike access should be incorporated into these new designs.

Communities should carefully consider the creation of a system of recreational trails for both non-motorized and motorized traffic. Bicycling and pedestrian trails provide alternative transportation methods for local residents and potential tourist attractions.

#### Utilities and Community Facilities

New development should occur in proximity to existing infrastructure. Unsewered development should not be allowed to occur in areas that can be cost effectively and readily served by public sewer. In rural areas, scattered residential development increases the cost or makes costs prohibitive for services such as fire, police and emergency protection and public transportation (school bus and elderly/disabled). The road network should provide easy access to all areas as valuable time is lost when emergency vehicles must travel on winding local roads.

#### Agricultural Resources

Agriculture not only supports the economy of the county, but also defines the rural character that resident's value. The county is experiencing a decrease in the number of farming operations as farmland is converted to other uses. Farmland areas are being fragmented by scattered residential development which often results in agriculture operational conflicts and limits farm expansion for farmers who wish to remain in farming.

#### Natural Resources

An abundance of natural resources including lakes, streams, woodlands, wetlands, wildlife habitat, agricultural land and other open spaces can be found in the area. People who visit and live in the Coloma area value these resources. Increased development can adversely affect these very resources that drew people to the area and cause them to remain. New development should be directed away from sensitive environmental areas including floodplains and wetlands. Care should be taken to minimize the effects of new construction on the existing environment by strictly enforcing erosion control practices. Older septic systems should be inspected regularly to minimize the consequences of failing systems on water quality.

#### **Cultural Resources**

The historical past of the Village and area helps to define the present. Care should be taken to preserve, protect, and enhance the cultural resources, historic areas, and buildings that remain. New development should be incorporated into existing development so that it enhances the historic components that are still in existence.

#### Intergovernmental Cooperation

Land use decisions that are made within one municipality often affect the decisions and land use of another. For example, the development of a heavy industrial activity near the border of one community has the potential to affect the land use, natural resources and economy of an adjacent community. In this example, a residential use may not be compatible with the heavy industrial use, the industry may pollute a stream that flows through another community, or the business may purchase raw products or supplies from a business in an adjacent community. To minimize conflicts, communities should solicit input and find an effective form of communication with neighboring communities and residents.

#### POLICIES AND PROGRAMS

#### **Regional, County and Local Policies**

#### Zoning Ordinances

The Wisconsin enabling legislation requires that zoning ordinances must be reviewed and modified if necessary to be consistent with a community's comprehensive plan.

Local municipalities and counties can enact wind energy zoning ordinances to proactively plan for siting future wind energy projects.<sup>19</sup> Wind energy zoning ordinances can establish setbacks from property lines, roads, communication and electricity transmission systems, and residential structures. Additionally, setbacks can be established for undeveloped residential properties. Although noise level effects may be difficult to determine due to differences between individuals, it is possible to establish maximum allowable decibel levels at residential dwellings and specific public facility sites. Height restrictions can be placed on individual turbines. Height restrictions must be used cautiously since a restriction could lead to an increased number of

<sup>&</sup>lt;sup>19</sup> Wisconsin State Statutes 66.0401.

turbines and decreased land use efficiencies. Several safety features can be incorporated into a zoning ordinance. For example, restrictions can be placed controlling the accessibility (lockable, non-climbable towers), electrical connection systems, and appropriate warning signage installation to cite a few examples. Ordinances can also include specific plans for site reclamation if a turbine is abandoned or its use is discontinued.

Other zoning tools can also be utilized to limit the number of potential sites for wind energy facilities. Extra-territorial airport zoning can restrict the maximum height of structures to a distance of three miles from a public airport facility. In addition, overlay zoning can be utilized to further protect significant natural or cultural resources by limiting the conditional uses within a specific area.

#### County Policies

**County Zoning.** The Waushara County Code of Ordinances regulates private on-site wastewater treatment systems, land divisions and land uses. A few of the chapters that relate to land use are summarized below.

**Waushara County Utilities Ordinance** is contained within Chapter 54 of the Waushara County Code of Ordinances. This ordinance regulates all private on-site wastewater treatment systems within the county. Although this ordinance does not directly determine land uses, it influences the location of future development according to soil suitability.

**Farmland Preservation Plan.** Waushara County adopted the county Farmland Preservation Plan on June 9, 1981.<sup>20</sup> The goal of the plan is to preserve productive and potentially productive agricultural land, forest land, and environmentally sensitive areas while providing other areas for well planned growth in other appropriate areas of the county. Agriculturally productive areas are defined as existing farms consisting of a minimum of 35 contiguous acres of productive farmland. This plan allows farmers in preservation areas to sign agreements on a voluntary basis under the state's Farmland Preservation Act for tax credits.

**Land and Water Resource Management (LWRM) Plan.** The Waushara County LWRM plan was written in 1999.<sup>21</sup> In 2005, it was revised in response to a legislative call to redesign Wisconsin's programs to reduce pollution from unknown sources. The revised plan was adopted in February 2006. The plan identifies long term goals and implementation strategies to reduce non-point source pollution into rivers, streams, and lakes in Waushara County. The four goals that were identified include: 1.) Reduce soil erosion and continue to protect natural resources; 2.) protect and enhance in-stream, riparian, wetland and upland habitat; 3.) protect surface waters from construction site erosion control & non-metallic mining; and 4.) implement the animal waste prohibition.

#### Local Policies

**Village of Coloma Zoning.** The Village of Coloma Zoning Ordinance is being updated in 2009.

<sup>&</sup>lt;sup>20</sup> WCZLC. 1980. *Waushara County Farmland Preservation Plan.* http://www.co.waushara.wi.us/more\_lcd.htm.

<sup>&</sup>lt;sup>21</sup> WCZLC. 2005. *Waushara County Land and Water Resource Management Plan.* http://www.co.waushara.wi.us/more\_lcd.htm.

**Village of Coloma Subdivision Ordinance**, **Section 4.** The ordinance facilitates division of larger parcels of land into smaller parcels of land.

**Official Map.** An official map is intended to implement a master plan for a city, village, or town. The master plan helps direct development by designating areas for streets, highways, parkways, floodplains, and other pertinent land uses. Official maps direct development away from sensitive areas which are designated for future public use. The Waushara County parcel map may serve as a basis for Mount Morris's official map.

**Existing Comprehensive/Land Management Plans.** A number of communities, within Waushara County either have or are in the process of developing comprehensive plans. The Town of Coloma, which totally surrounds the Village, is in the process of updating its community management plan to smart growth compliant. Waushara County is also in the process of developing a Comprehensive Plan that will be completed in 2009.

#### Federal, State and Regional Programs

#### State of Wisconsin

**Land and Water Resource Management Planning Program (LWRM).** The land and water resource management planning program (LWRM) was established in 1997 by Wisconsin Act 27 and further developed by Wisconsin Act 9 in 1999.<sup>22</sup> Although both Acts are designed to reduce non-point pollution, Wisconsin Act 27 regulates rural and agricultural sources while Wisconsin Act 9 regulates urban sources.<sup>23</sup> Counties are required to develop and periodically revise LWRM plans. Citizens and professionals in each county identify local needs and priorities in regards to conservation needs through watershed based planning. All LWRM plans must be approved by the Wisconsin Department of Agriculture, Trade, and Consumer Protection.

**Wisconsin Act 204.** Recent blackouts and other incidents throughout the United States have raised concerns regarding both the supply of energy and the adequacy of the transmission grid. Wisconsin Act 204 mandates that a portion of electricity generation facilities be from renewable resources. To ensure that the renewable energy goals set forth in Wisconsin Act 204 are not unduly hindered, the State passed additional legislation restricting the ability of local governments to prohibit or curtail the development of wind and solar energy systems.<sup>24</sup> Municipalities can only impose restrictions on the construction and operation of wind turbines to protect public health and safety. Furthermore, communities cannot impose regulations which increase construction/operation costs, decrease the efficiency of wind generation systems, or specifically prohibit installation of alternate energy systems.

Although traditional approaches such as coal and natural gas are still utilized, other options are being explored that include renewable resources. Under this mandate, other sources of energy such as wind are currently being proposed at several locations throughout Wisconsin. While there is an extensive review process for the placement of large electrical generation facilities, smaller facilities, such as wind turbines, often fall below the size limitation and bypass this review process. Thus, many communities find themselves unprepared to handle future wind turbine proposals.

(Page left blank intentionally)

#### LAND USE – Village of Coloma

## GOAL LU 1: Encourage a pattern of community development and growth that preserves and enhances the quality of life for the residents of the Village.

**STRATEGY LU 1.1: Reduce non-point nutrient runoff into lakes, streams and rivers.** Non-point pollution is caused by rain or snowmelt running over or through the ground. As runoff moves over or through the ground it picks up manmade or natural pollutants and deposits them in lakes, streams, rivers, wetlands and even under ground sources of drinking water.

- **RECOMMENDATION LU 1.1.1:** Control stormwater runoff from construction activities and impervious areas.
  - Develop an information fact sheet to describe new stormwater techniques.
  - Enforce mandatory construction site erosion control requirements.
  - Incorporate storm water runoff and detention techniques from impervious surfaces in the building permit application.
- **RECOMMENDATION LU 1.1.2:** Consult the future land use map for environmentally sensitive areas prior to approving proposed development.

**STRATEGY LU 1.2: Protect and preserve the areas groundwater supply.** The residents of the area depend exclusively on groundwater for a safe drinking water supply. Certain land use practices and activities can seriously threaten and/or degrade groundwater quality.

- RECOMMENDATION LU 1.2.1: Consider adopting a wellhead protection ordinance to protect the Village of Coloma's existing and future municipal wellhead locations from land uses that could potentially contaminate the groundwater.
- RECOMMENDATION LU 1.2.2: Encourage the Town of Coloma to adopt the County Groundwater Overlay District to protect the Village of Coloma's wellhead.
- RECOMMENDATION LU 1.2.3: Encourage the Town of Coloma to limit development near the Village's former landfill.
  - Encourage notification of landowners at the time of sale and prior to approval of a building permit if they are within 1,200 feet of an existing landfill property. Notification should specify that more information be attained before constructing a private well.

#### STRATEGY LU 1.3: Preserve the visual qualities of our landscape.

- **RECOMMENDATION LU 1.3.1:** Indentify historic properties or properties of local significance.
- RECOMMENDATION LU 1.3.2: Protect and promote the area's rich glacial heritage by supporting efforts to extend a spur trail from the Village of Coloma to the Ice Age Trail.

- **RECOMMENDATION LU 1.3.3: Establish a cell tower ordinance.** The cell tower ordinance should address issues of aesthetics.
- RECOMMENDATION LU 1.3.4: Discourage the placement of billboards within the Village of Coloma.
- RECOMMENDATION LU 1.3.5: Enforce existing nuisance/litter ordinances and building codes.
- RECOMMENDATION LU 1.3.6: Enact a light ordinance that would address shielding, light directing, and similar measures to control the direction, intensity and "leakage" of exterior lighting.
- RECOMMENDATION LU 1.3.7: Protect existing development from incompatible land uses.

**STRATEGY LU 1.4:** Promote economic growth and vitality while preserving the Village's natural amenities and historic and cultural heritage. The historical and cultural elements of the Village along with its natural amenities contribute to the community's character. While economic viability is important, the elements that make the Village of Coloma unique and are valued by its residents should not be compromised.

- **RECOMMENDATION LU 1.4.1:** Identify areas within the Village for future industrial and commercial growth that are compatible with existing land uses.
- RECOMMENDATION LU 1.4.2: Continue to develop and promote the Village of Coloma Business Park.
  - Emphasize development of businesses that support agriculture and the local economy.
- **RECOMMENDATION LU 1.4.3:** Develop a Downtown Economic Development Plan that encourages the enhancement of the historic significance of the area.
  - Build on community strengths and weaknesses.
- RECOMMENDATION LU 1.4.4: Continue to work with individual property owners in the Village TIF district near I-39 and STH 21 to develop this area in a logical and cost efficient manner.
- RECOMMENDATION LU 1.4.5: Develop criteria/design standards that future commercial and industrial proposals must meet in order to be approved by the community.
- **RECOMMENDATION LU 1.4.6:** When identifying future or expanding business/industrial sites, consider the environmental conditions of the area.
- **RECOMMENDATION LU 1.4.7:** Encourage a civic organization to adopt a village entrance.

**STRATEGY LU 1.5: Provide a sufficient supply of land for housing choices.** An adequate supply of housing choices is needed to meet the needs and preferences of a growing community. Providing areas for future residential development helps ensure that these needs will be met.

- **RECOMMENDATION LU 1.5.1:** Identify areas within the Village for residential development, including multi-family.
  - Consider the relationship between housing and other land uses.
- **RECOMMENDATION LU 1.5.2:** Maintain the ability to build a variety of types and sizes of housing within the Village.
- **RECOMMENDATION LU 1.5.3:** Consider the needs of the senior population in the area and support initiatives to meet those needs.

**STRATEGY LU 1.6: Ensure that the future transportation system is integrated with the existing and future land use plan.** A quality transportation system provides mobility to the different types of land uses within the Village. Additionally, these land use patterns are dependent upon the condition and effectiveness of the transportation system. This transportation system is part of a larger network that also provides mobility for the transfer of goods and people to different parts of the region and state.

- RECOMMENDATION LU 1.6.1: Work with the Village of Coloma Police Department, the Waushara County Sheriff's Department and the Wisconsin State Patrol to improve safety and enforce current traffic laws as a way to alleviate traffic crashes at the I-39 and STH 21 interchange.
- RECOMMENDATION LU 1.6.2: Contract and work with WisDOT to conduct a traffic study of the I-39 and STH 21 interchange prior to approving any additional development in this area.
- **RECOMMENDATION LU 1.6.3:** Continue to work with the Town of Coloma and WisDOT to improve traffic flow and address safety concerns at Industrial Drive.
- RECOMMENDATION LU 1.6.4: Work with the Town of Coloma and Waushara County Highway and Parks Departments to consider establishing a bike trail between the Village of Coloma and Pleasant Lake.
- RECOMMENDATION LU 1.6.5: Work with WisDOT and others to establish a strategic location for a "Park and Ride" lot near the corner of STH 21 and I-39.
- **RECOMMENDATION LU 1.6.6:** Collaborate with the Town of Coloma and others to explore the possibility of bringing scheduled intercity bus service to the Coloma area.
- **RECOMMENDATION LU 1.6.7:** In the future, support a passenger rail initiative that would link Madison with the Wausau area.

**STRATEGY LU 1.7: Encourage new development to utilize areas that can be conveniently and efficiently served by existing infrastructure and public services.** It is more cost effective to locate new development in areas where existing infrastructure (street and utility) exists or is readily available. Costs to provide garbage pickup, snow plowing and police, fire and emergency services are less when densities are higher and located closer to the origin of these services.

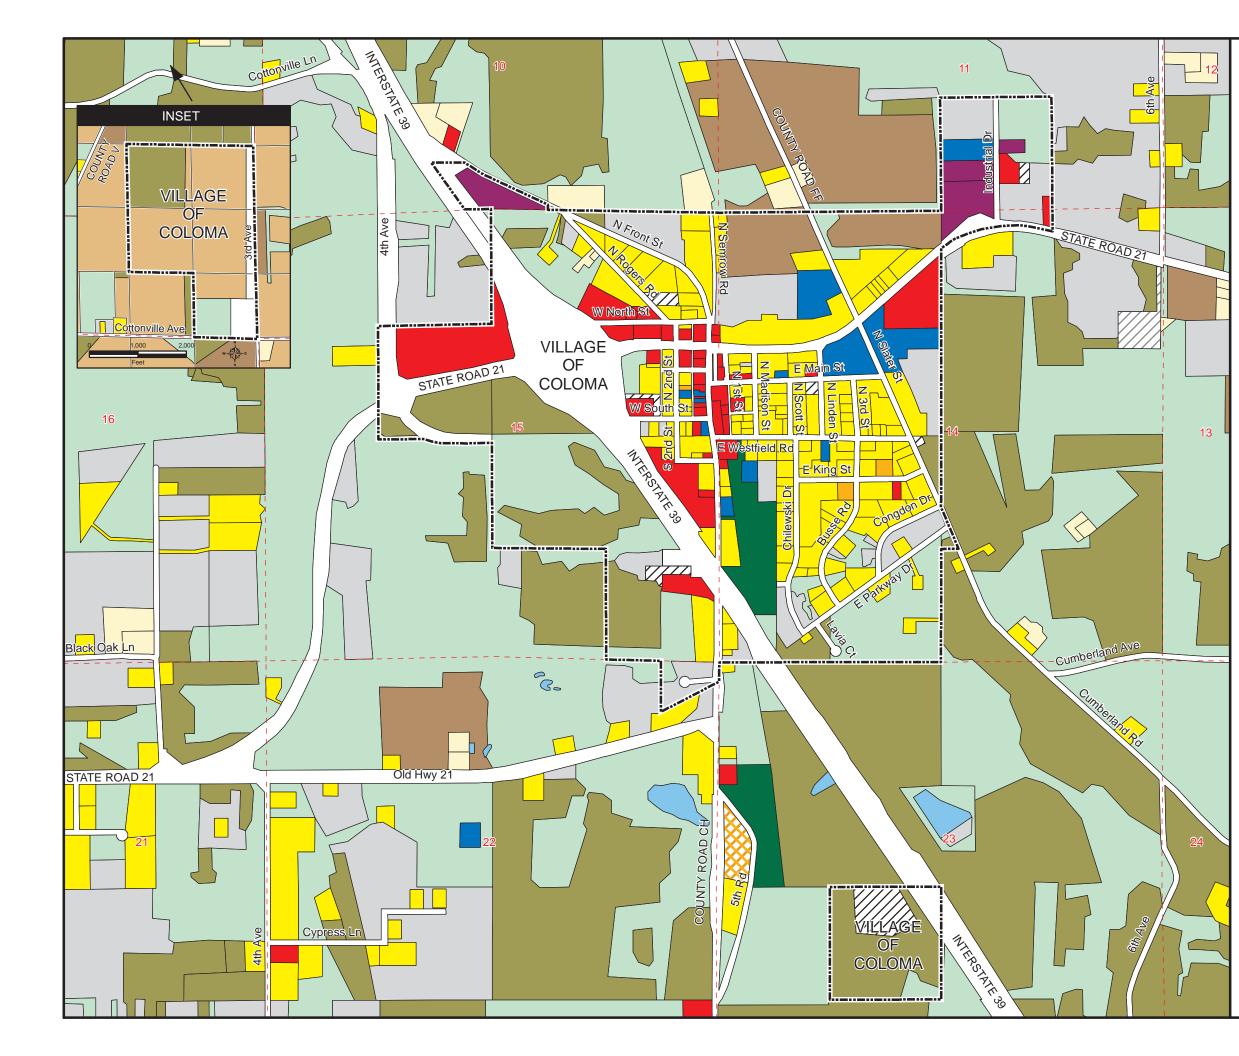

- RECOMMENDATION LU 1.7.1: When evaluating new proposals, give preference to developments immediately adjacent to existing infrastructure.
   Encourage infill and revitalization projects
  - Encourage infill and revitalization projects.

**STRATEGY LU 1.8: Provide adequate active and passive recreational opportunities for Village residents.** Parks and open space not only preserve and protect green areas for future generations, they also provide opportunities for residents to relax, exercise and socialize.

• **RECOMMENDATION LU 1.8.1:** Designate an area within the Village for sledding or other outdoor winter activities.

**STRATEGY LU 1.9: Collaborate with the Town of Coloma to ensure compatible land uses near common boundaries.** Growth must occur in a coordinated fashion not only within the community, but also on the edges. Often neighboring communities have similar or complementary goals for growth.

- RECOMMENDATION LU 1.9.1: Continue to collaborate with the Town of Coloma to ensure that new development within a half mile of the Village borders is compliant with the Village's land use vision and can be potentially served by public sewer and water in the future.
- RECOMMENDATION LU 1.9.2: Work with the Town of Coloma to steer higher density residential, commercial and manufacturing developments to areas within or adjacent to the Village.

#### CHAPTER 9: INTERGOVERNMENTAL COOPERATION

#### INTRODUCTION

The relationship a municipality has with school districts, neighboring communities, the county, the Regional Planning Commission, the state, and the federal government can impact residents in terms of taxation, planning, service provision, and siting of public facilities. An examination of these relationships and the identification of existing or potential conflicts can help a municipality address these situations in a productive manner.

#### Intergovernmental Cooperation Vision for 2030

In 2030, the Village of Coloma has been successful in forming strong relationships with the Town of Coloma and other neighboring municipalities. This spirit of cooperation has lead to more cost-effective delivery of municipal services by eliminating duplication and taking advantage of economies of scale. The Village has been successful in working with the Westfield School District, local churches and the many civic organizations in the community on a number of projects that have enhanced the lives of area residents. These partnerships have resulted in enhanced services for police and fire protection, recreation (Village Park) and library resources for area residents, to enhance the strong sense of community that is enjoyed by area residents. The Village and the Town of Coloma continue to work together to ensure that growth within close proximity to the Village is occurring in a cost effective and mutually agreeable manner.

#### INVENTORY AND ANALYSIS

#### **Governmental Units and Relationships to Communities**

#### Communities

*The Village of Coloma shares all of its borders with the Town of Coloma.* The Village has no boundary agreements with the Town of Coloma, nor does it exercise any of its extraterritorial rights. The Village and Town of Coloma enjoy a good working relationship and have collaborated on a number of activities in the past.

#### School Districts

*The Village is served by the Westfield School District.* While school districts are working with area communities, additional communication and cooperation can be done that will benefit both the school districts and the communities. This may include sharing recreational facilities, utilizing existing school facilities for after school meeting space, and working together to coordinate the siting and utilization of new school facilities. Communities, school districts and local businesses can also establish agreements to work together on other issues. This can include partnerships to construct local buildings (sheds, garages, houses) that not only give students valuable life and work skills but also benefit individuals within the local community.

Community service type projects by local students strengthen young people's senses of civic engagement and have life long implications. Local governments and school districts should establish a method of communication and explore ways in which they can work together. Joint cooperation between school districts will allow the goals of the comprehensive plan to be met while providing safe, efficient transportation, community services, and related amenities.

*The Westfield School District owns about 42 acres<sup>1</sup> in the Town of Coloma.* This former pasture has been transformed into a working pine plantation with a few acres of mature oaks. *This property provides residents in the area and school children the opportunity to study and enjoy the outdoors.* Cross-country skiing as well as hiking trails are available within the site.

The Village is served by the Fox Valley Technical College. However due to the proximity of the Village in relation to the local campuses, many residents attend classes at one of the Mid State Technical College campuses in either Adams, Marshfield, Stevens Point, or Wisconsin Rapids.

#### Community Facilities

Due to the rural nature of Waushara County, many facilities and services are shared jointly between neighboring communities as well as provided through agreement with the county. The Village of Coloma has its own police department. Hours of service vary and are coordinated with the Waushara County Sheriff's Department, who provides backup police protection, when needed. Service is also provided to the Town of Coloma for about 40 hours per month. The Coloma Volunteer Fire-Rescue-EMS Department provides service to the Village of Coloma and the towns of Coloma, Richford (partial) and Richfield. Mutual aid agreements are in place with Marguette, Adams and Waushara counties. In order to improve service times in the western part of the county, an ambulance, shared jointly between the Coloma Fire Department and the Village of Plainfield, resides half time in the Village of Coloma and half time in the Village of Plainfield in alternating months. Finally the Coloma Library, as are all libraries within Waushara County, is part of the Winnefox Federated Library System. The federated library system is designed to provide expanded library service to more people without making additional large expenditures. For this reason, libraries do not need to purchase the same collection materials or multiple copies since patrons are able to order materials from any library in the system.

*The Village and Town of Coloma share a community center, located on Front Street in the Village.* This facility was constructed in approximately 1997 and houses not only Village and town offices but also provides space for meetings and the Coloma Public Library.

**Both Village and Town residents utilize and share in the maintenance and upkeep of the Coloma Community Park** located in the south central portion of the Village off of Front Street. Park facilities include a playground, ball diamond, picnic tables, tennis court basketball hoops, and flush toilets.

Communication and coordination between communities and utility infrastructure providers (gas, electric, telephone, etc.), the WisDOT and the Waushara County Highway Department ensures that upcoming road construction and utility upgrades will run smoothly and that all work is done

<sup>&</sup>lt;sup>1</sup> <u>http://www.westfield.k12.wi.us/ces\_school\_forest.htm</u> 12/31/08.

before restoration is completed. This lessons the chance that new road surfaces and restored terraces will need to be excavated shortly after construction is completed. Likewise, local governments, school districts and businesses working together on technological upgrades, ensure that these upgrades are made in concert without duplication of efforts so that a common goal can be achieved.

As indicated above, the Village of Coloma has strong working relationship with the Town of Coloma. Various intergovernmental agreements, in regard to public services and facilities, have also been established. The Village of Coloma should continue to look for ways that limited resources can be shared. New intergovernmental agreements which involve senior citizens and other social services; park and recreational facilities; stormwater management; or other topics may be issues that could be explored in the future.

#### County

The Village of Coloma is located in Waushara County. *The Village has adopted its own zoning ordinance.* However, the Village of Coloma has given the County the authority to act as the permitting agent for on-site wastewater systems. *The Village should continue to work with the various county departments to coordinate road construction and maintenance; solid waste and recycling efforts; police and emergency services; senior citizen and other social services; and park and recreational facilities and programs.* The Village of Coloma and the County continue to maintain open communications with one another that work to foster good working relationships and mutual respect.

#### Region

*Waushara County is a member of the East Central Wisconsin Regional Planning Commission* (ECWRPC). ECWRPC provides planning and technical assistance to counties, communities, businesses, interest groups and individuals within its region. These services include environmental management, housing, demographics, economic development, transportation, community facilities, land use, contract planning, and others. ECWRPC has worked with the Village of Coloma on several projects over the years including the preparation of a Land Use, Open Space and Recreation Plan.

#### State of Wisconsin

**Wisconsin Department of Natural Resources (WDNR)**. The WDNR is responsible for the regulation, protection, and sustained management of natural resources within the state. The WDNR operates various programs in water and air quality management, habitat preservation, recreational trail development, and other programs. The WDNR helps local landowners successfully manage their woodlots for wildlife habitat and timber production throughout Waushara County. The WDNR also maintains environmental corridors which enhance surface water quality and stream habitat throughout the planning area. The WDNR maintains a service center in the Wautoma Industrial Park.

**Department of Agriculture, Trade, and Consumer Protection (DATCP).** The overall mission of DATCP is multi-fold. The agency oversees programs which ensure the safety and quality of food, fair business practices for buyers and sellers, consumer protection, efficient use of agricultural resources in a quality environment, healthy animal and plant populations, and the

vitality of Wisconsin agriculture and commerce. Since agriculture will continue to be an important economic industry within the area, many of the programs DATCP offers will benefit and help local citizens.

**Wisconsin Department of Transportation (WisDOT).** WisDOT deals with issues related to all transportation uses in the state. Within the Village's planning area, I-39 and STH 21 are highways operated and maintained by WisDOT. Bicycle and pedestrian accommodations along state highways are evaluated and determined by WisDOT as part of improvement projects. WisDOT usually solicits help from the local community(ies) when deciding on the type of accommodations.

#### Intergovernmental Comprehensive Planning Efforts

Periodically, representatives from various agencies (WisDOT, WDNR, DOA, CAP Services, WHEDA), businesses and Waushara County (Waushara Area Chamber of Commerce, Waushara County Economic Development Corporation, Tri-County Regional Economic Development Corporation, UW-Extension, County departments – highway, aging, EMS, human services, solid waste, zoning, veterans services and sheriff) should be invited to village board or plan commission meetings to talk and/or provide input into the implementation process.

#### Laws, Ordinances and Regulations

**Cooperative Boundary Plans and Agreements.** Cooperative boundary plans and agreements are joint planning efforts in which two or more municipalities establish a mutually agreeable plan to establish boundary lines, provide public services and facilities, share revenues, and establish land use criteria.<sup>2</sup> The majority of municipal boundary agreements are conducted between a town and an incorporated village or city. Cooperative boundary plans, which are subject to a minimum of a ten-year period, must be approved by the Wisconsin Department of Administration.

**Extraterritorial Subdivision Regulation.** Incorporated villages and cities can exercise plat review authority in unincorporated areas adjacent to their communities.<sup>3</sup> This allows incorporated areas the same authority to approve or reject a specific plat or CSM as if it were within its own jurisdiction. This authority extends to a distance of 1.5 miles from the incorporated boundary for villages and small cities and 3.0 miles for cities with population of greater than 10,000. The incorporated area must have a subdivision ordinance in place in order to exercise this authority.

Cities and villages can work to ensure that land use conflicts be minimized near the incorporated boundaries. If the incorporated area has more restrictive guidelines than the adjacent town, the city/village can require that the subdivisions meet the more restrictive regulations. A plat can be rejected if it conflicts with a city/village ordinance, fails to comply with state statutes, or fails to comply with the city/village master plan.

**Extraterritorial Zoning.** Incorporated villages and cities have been given authority to practice extraterritorial zoning authority if they have developed a zoning ordinance for the

<sup>&</sup>lt;sup>2</sup> Wisconsin State Statutes s.66.0307.

<sup>&</sup>lt;sup>3</sup> Wisconsin State Statutes s.236.10.

incorporated areas.<sup>4</sup> This authority extends to a distance of 1.5 miles from the incorporated boundary for villages and cities with populations less than 10,000 and 3.0 miles for cities if the population exceeds 10,000. Extraterritorial zoning allows for smooth transitions between suburban and rural areas, reduces conflicting land uses, and promotes intergovernmental cooperation in planning for future community needs. The Village of Coloma does not exercise extraterritorial zoning authority.

Three major steps are involved in the adoption of an extraterritorial zoning ordinance.<sup>5</sup> First, the incorporated area must adopt and publicize a resolution to establish its intent to exercise its zoning authority within the extraterritorial area. Second, a joint committee with members from both the incorporated municipality and town must develop the specific zoning ordinance. Finally, the final plan must be adopted through the joint committee. The joint committee consists of three members from the city or village and three members from each affected town. This ensures that zoning cannot happen unless everyone agrees.

#### Key Findings

#### Communities

• The Village of Coloma shares all of its borders with the Town of Coloma.

#### School Districts

- The Village is served by the Westfield School District.
- The Westfield School District owns about 42 acres in the Town of Coloma. This property provides residents in the area and school children the opportunity to study and enjoy the outdoors.

#### Community Facilities

- Due to the rural nature of Waushara County, many facilities and services are shared jointly between neighboring communities as well as provided through agreement with the county.
- The Village of Coloma has its own police department. Hours of service vary and are coordinated with the Waushara County Sheriff's Department, who provides backup police protection, when needed.
- The Coloma Volunteer Fire-Rescue-EMS Department provides service to the Village of Coloma and the towns of Coloma, Richford (partial) and Richfield.
- Coloma Library, as are all libraries within Waushara County, is part of the Winnefox Federated Library System.
- The Village and Town of Coloma share a community center, located on Front Street in the Village.
- Both Village and Town residents utilize and share in the maintenance and upkeep of the Coloma Community Park.

<sup>&</sup>lt;sup>4</sup> *Wisconsin State Statutes* s.62.23.

<sup>&</sup>lt;sup>5</sup> Ohm, B. 1999. *Guide to Community Planning in Wisconsin*.

#### County

- The Village has adopted its own zoning ordinance.
- The Village should continue to work with the various county departments to coordinate road construction and maintenance; solid waste and recycling efforts; police and emergency services; senior citizen and other social services; and park and recreational facilities and programs.

#### Region

• Waushara County is a member of the East Central Wisconsin Regional Planning Commission.

#### INTERRELATIONSHIPS WITH OTHER COMPREHENSIVE PLAN ELEMENTS

#### **Economic Development**

Communities should partner with community, county, and regional economic development groups; the local chamber of commerce; organizations such as CAP Services; state agencies such as Wisconsin Department of Commerce and UW-Extension; area school districts and technical schools; local businesses and others which promote economic development. Since the economy of the individual communities in western Waushara County is dependent on the economy of all the municipalities in the area, all communities within Waushara County and the Tri-County region must work together.

#### Housing

Housing choices that reflect the needs of individual households are an integral part of comprehensive planning. Economic development professionals, housing providers, local government officials, county departments and consumers should work together to promote the development of housing that meets the needs of all income levels within the area. Communities should continue to work with and forge new ties with agencies such as CAP Services, United Migrant Opportunity Services (UMOS), the Federal Department of Housing and Urban Development, and private entities to ensure that an adequate amount of affordable housing is present.

#### Transportation

Communities should work with WisDOT, Waushara County and ECWRPC to resolve local, regional and state transportation related issues. Roadway projects must be jointly coordinated with public utilities, local emergency rescue departments, community departments, school districts and others to ensure that repairs are made cost-effectively and on a timely basis.

#### Utilities and Community Facilities

Coordination of road construction projects and utility upgrades can save everyone time and money. If a community is aware of a needed utility upgrade on a local street, they may also decide that it would be cost-effective for them to resurface the roadway after construction has

occurred. Likewise, if a utility knows that a local road is going to be under construction, they may decide to upgrade their facilities at the same time.

Coordination of new school facilities is also vital. Communities need to plan for increased traffic, reuse of former buildings, and needed public infrastructure (roads, sewer, water, police and fire protection). Multi-use and extended use of buildings can also save the community money. A school facility is an ideal location to hold evening classes for adults, as well as recreational programs and public meetings. In some instances, school districts have worked with communities to construct joint library projects and recreational facilities (swimming, gym and weight room).

Communities and the County should work together on joint and regional park and recreational programs and facilities. Some of the larger facilities such as a ski or tubing hill, ice rink and swimming pool maybe too costly for one entity to tackle alone. Moreover, the use of these facilities is not limited to the residents of one community but is usually enjoyed by the residents and visitors of the entire area. Countywide recreational leagues may also be something that can be investigated. One community alone may not have enough participation to field a sufficient number of teams to support league play, but with input from a number of communities in the area, this may become feasible. Some things that could be investigated may include soccer (adult and youth), baseball (adult and youth), volleyball, or others.

#### Agricultural Resources

The economy and the character of the Coloma area are dependent on a viable agricultural community. Preserving productive agricultural land and maintaining a critical mass of farmers in the area to sustain the local agribusiness are tasks that can not be tackled alone. It will take input and support from communities, farmers, economic development groups, local agencies, and citizens alike.

#### Natural Resources

Preserving the natural resources of the area is a joint effort. Natural resources do not stop at municipal boundaries. The actions and policies of one community impact the resources of another.

#### **Cultural Resources**

The cultural and historical features of a community help define it. Preserving these resources that residents feel have made meaningful contributions to the community's heritage allows a connection to the past and an opportunity to pass this heritage onto future generations. Communities should work together to seek funding from the Wisconsin Historical Society to identify and evaluate historical, architectural and archeological resources in the area. Joint efforts should be made to ensure consistency between communities on planning related issues that affect cultural and historical resources. Finally, communities and the County should work together to educate citizens and elected officials about the importance of these resources and how they can be protected.

#### Land Use

Land use brings the other elements together. The future land use map illustrates existing and future development based on the goals, objectives and strategies that each community has established. Land use decisions of one community have a direct impact on other communities. Communities should work together to jointly develop visions of how land along common borders should be developed or preserved. When new development or land divisions occur in these areas, joint input should be obtained before decisions are made.

#### POLICIES

#### State, Regional and County Policies

#### State

The Wisconsin Department of Natural Resources (WDNR) and the Wisconsin Department of Transportation (WisDOT) routinely engage in master planning for natural resource management and transportation purposes. The University of Wisconsin Extension office located in Wautoma serves as an educational resource for County residents.

Waushara County is located within the Northeast Region of the WDNR. The Northeast Region has a regional office in Green Bay and a service center in Wautoma. A master plan is developed for each property that WDNR owns. This plan establishes goals and objectives for how the property will be managed and developed.<sup>6</sup> In addition, the master plan delineates adjacent lands or related parcels that should be acquired in the future to expand the property. The master plan discusses not only the proposed future of the property, but also the benefits it will provide to local communities. In order for the WDNR master planning process to be effective, local participation from the affected communities is needed. All citizens affected by the WDNR owned land should consider becoming involved in the planning process or attending meetings related to the projects.

Waushara County is located within the North Central Region of the Wisconsin Department of Transportation (WisDOT). The North Central Region has regional offices in Wisconsin Rapids and Rhinelander. WisDOT has prepared several master plans specifically for various modes of transportation as well as a highway improvement plan.<sup>7</sup> Although the plans are adequate to 2020, these plans will be periodically updated. Additionally, the Connections 2030 Plan, the new statewide transportation plan, is currently in draft form and expected to be approved in fall 2009. Within this plan, I-39 is identified as an intercity bus network connecting Madison, Stevens Point, and Wausau.<sup>8</sup> The Village of Coloma should take a proactive role in all transportation planning processes in the future to ensure that, as existing transportation facilities are expanded to meet the existing and future needs of the individual communities, the planning area, Waushara County, and the State of Wisconsin, other local concerns are addressed.

<sup>&</sup>lt;sup>6</sup> Wisconsin DNR. 2005. *Property Master Planning*. http://dnr.wi.gov/master\_planning/.

<sup>&</sup>lt;sup>7</sup> Wisconsin DOT. 2009. *Plans and Projects*. http://www.dot.state.wi.us/projects/mode.htm.

<sup>&</sup>lt;sup>8</sup> Wisconsin DOT. 2009. *Connections 2030 Plan, draft.* http://www.dot.wisconsin.gov/projects/state/connections2030.htm.

#### Regional

**East Central Wisconsin Regional Planning Commission.** East Central Wisconsin Regional Planning Commission has completed all milestones in their regional comprehensive planning process. Communities should use the information identified in the first two milestone reports and review the goals set in the third milestone report.

#### County

**Waushara County Comprehensive Plan.** Waushara County is currently in the process of creating and adopting a smart growth comprehensive plan in accordance with s.66.1001. It is the responsibility of the Village of Coloma to actively participate in the county-wide plan and to promote the incorporation of their land use planning decisions into the overall Waushara County plan.

**Waushara County Land and Water Management Plan.** Waushara County has adopted a County Land and Water Management Plan. This plan was developed by the County Land Conservation Committee with assistance from a citizen advisory committee that included representatives from the WDNR, USDA Natural Resources Conservation Service, Central Wisconsin Windshed Partners, and Watershed Lakes Council. It is the responsibility of Waushara County communities to review and implement this plan within their respective jurisdictions.

(Page left blank intentionally)

#### INTERGOVERNMENTAL COOPERATION – Village of Coloma

# GOAL IC 1: Work with neighboring municipalities, Waushara County, state and federal departments and agencies when opportunities and/or issues arise that can be more effectively addressed cooperatively.

**STRATEGY IC 1.1: Strengthen existing partnerships and build new relationships to promote economic growth in the village, area and county.** Many local and regional economic development organizations and groups are working to promote economic develop in the state, region and county. Since the Village of Coloma's economy is dependent on the economy of the municipalities in the area; the Village can benefit from these efforts and should be an active participant.

- RECOMMENDATION IC 1.1.1: Continue to participate in regular meetings with Tri-County Regional Economic Development Corporation and Waushara County Economic Development Corporation.
- **RECOMMENDATION IC 1.1.2:** Continue to maintain contact with Waushara County's representative to NEWREP.
- **RECOMMENDATION IC 1.1.3: Continue to work with the Waushara Area Chamber of Commence to market area tourism opportunities.** Tourism opportunities could include:
  - Farmers markets;
  - Community play or performance;
  - Community events;
  - The Ice Age Trail;

- Snowmobile trails;
- Bicycling facilities; and
- Unique shopping or dining experiences.
- **RECOMMENDATION IC 1.1.4:** Work with county and regional economic development groups to strengthen the agricultural economy of the area, by:
  - Promoting industry cluster development;

 Development of agricultural support industries; and

Specialty products;

- Promoting the use of locally grown products.
- **RECOMMENDATION IC 1.1.5:** Work with the county and regional economic development groups to promote the central statewide location of the area.
- RECOMMENDATION IC 1.1.6: Encourage the Westfield School District, FVTC, UW-Extension, CAP Services and the business community to work together to provide programs that strengthens the economy of the area and promote life long learning opportunities. Program areas could include:
  - Business
     Development
  - Financing
  - Financial Planning
  - Business Plan Development

- Job Skill Training
- Technical Curriculum
   Development
- Job Shadowing
- Career Direction
- "At Risk" Students

9-12

■ FFA

- Youth Apprenticeship
   Junior Achievement
- RECOMMENDATION IC 1.1.7: Work with the Waushara County Economic Development Corporation, the Tri-County Regional Economic Development Corporation, local businesses, public service departments, Fox Valley Technical College and others to increase educational opportunities in Waushara County and the Coloma area.
- RECOMMENDATION IC 1.1.8: Work with Waushara County Health and Human Services, Tri-County Economic Development Corporation, Waushara County Development Corporation, nearby communities, state representatives and others to increase medical services (dentist, chiropractor, hearing aide specialist, etc.) in the Coloma area.

STRATEGY IC 1.2: Improve communication within the Village and between utilities, the Westfield School District, neighboring municipalities, Waushara County and state and federal agencies.

- RECOMMENDATION IC 1.2.1: Establish periodic meetings with the Town of Coloma to discuss issues of common interest. Issues could include:
  - Police protection;
  - *Fire protection;*
  - Emergency services;
  - Park and recreational;

- Community events;
  Development proposals; and
- Others.
- RECOMMENDATION IC 1.2.2: Establish annual meetings with community partners (civic organizations, local government, churches, the Westfield School District and others) to discuss community needs. These meetings could be used to share and solicit information such as:
  - Identify community needs;
  - Sharing of facilities;
  - Educational and recreational programs; and

- Recruit manpower and funding.
- RECOMMENDATION IC 1.2.3: Identify methods to increase community involvement through public participation in all relevant policy decisions.
- RECOMMENDATION IC 1.2.4: Maintain the Village website and newsletter.
- RECOMMENDATION IC 1.2.5: Work with the Waushara County Highway Department to establish annual meetings between Waushara County communities, the Waushara County Highway Department, WisDOT and public and private utilities.
- **RECOMMENDATION IC 1.2.6:** Work with the Westfield School District, Waushara County and the state to plan new facilities when they are needed.

STRATEGY IC 1.3: Provide a unified voice to secure state and federal funding.

- **RECOMMENDATION IC 1.3.1:** Support efforts lead by others to pursue federal funding to meet the affordable housing needs of the very low income households.
- RECOMMENDATION IC 1.3.2: Work with the Town of Coloma, CAP Services and others to pursue the construction of federally assisted rental units, assisted living and other housing options for the elderly.
- **RECOMMENDATION IC 1.3.3**: Work with the Town of Coloma and Waushara County to prepare joint funding applications for subsidized housing.
- RECOMMENDATION IC 1.3.4: Collaborate with neighboring communities to apply for a grant from the Wisconsin Historical Society or other appropriate organization to complete a historical and cultural survey of the area.

STRATEGY IC 1.4: Encourage joint efforts to protect the natural resources.

• RECOMMENDATION IC 1.4.1: Support a countywide coordinated approach to deal with specific problem species on a countywide basis.

STRATEGY IC 1.5: Work with Waushara County, WisDOT and adjoining municipalities to insure that the transportation system is safe and fills the diverse needs of area residents.

- RECOMMENDATION IC 1.5.1: Work with the Village Coloma Police Department, the Town of Coloma, Waushara County Sheriff's Department and the Wisconsin State Patrol to improve safety and enforce current traffic laws as way to alleviate traffic crashes at the I-39 and STH 21 interchange.
- RECOMMENDATION IC 1.5.2: Work with the Town of Coloma and WisDOT to conduct a traffic study of the I-39 and STH 21 interchange prior to approving any additional development in this area.
- RECOMMENDATION IC 1.5.3: Continue to work with the Town of Coloma and WisDOT to improve traffic flow and address safety concerns at Industrial Drive and STH 21.
- RECOMMENDATION IC 1.5.4: Work with WisDOT, Waushara County and surrounding communities to coordinate short and long range transportation planning efforts.
- RECOMMENDATION IC 1.5.5: Work with WisDOT, ECWRPC, Waushara County Highway Department and others along the STH 21 corridor to ensure local involvement in any future planning of the corridor.

- RECOMMENDATION IC 1.5.6: Maintain contact with Waushara County Highway Department and WisDOT to ensure coordination on regional and statewide transportation issues that may affect the Village.
- **RECOMMENDATION IC** 1.5.7: Continue to work with neighboring communities to share road maintenance contracts and maintenance of common roads.
- RECOMMENDATION IC 1.5.8: Collaborate with the Town of Coloma and others to explore the possibility of bringing scheduled intercity bus service to the Coloma area.
- RECOMMENDATION IC 1.5.9: In the future, work with others to expand passenger rail opportunities to the Coloma area.
- RECOMMENDATION IC 1.5.10: Partner with area communities to establish a location for a park and ride lot near the I-39 and STH 21 interchange.
- RECOMMENDATION IC 1.5.11: Work with WisDOT to help keep STH 21 safe and operating sufficiently through the Village.
- RECOMMENDATION IC 1.5.12: Work with WisDOT to ensure the Village's short and long range plans for land uses along and in the vicinity of STH 21 are consistent with the State's short and long range plans for the highway.

**STRATEGY IC 1.6: Explore opportunities for cost efficiencies through shared** services.

- **RECOMMENDATION IC 1.6.1:** Continue to partner with the Town of Coloma for law enforcement, fire and emergency services.
- **RECOMMENDATION IC** 1.6.2: Continue to work with Waushara County and private collection companies to provide municipal solid waste and recycling collection to Village residents.
- RECOMMENDATION IC 1.6.3: Continue to work with Waushara County Department of Aging and Human Services to provide needed services (transportation, meals, etc.) to Village residents.

STRATEGY IC 1.7: Establish effective intergovernmental land use policies and cooperative agreements with adjoining municipalities.

- RECOMMENDATION IC 1.7.1: Create an advisory committee with the Town of Coloma to discuss planning issues within a half mile radius of the Village.
- RECOMMENDATION IC 1.7.2: Work with Waushara County to establish a policy to review development proposals within a half mile radius of the Village.

#### CHAPTER 10: IMPLEMENTATION

#### INTRODUCTION

A Smart Growth comprehensive planning document serves a community by establishing priorities for the future, evaluating available resources, and providing a means for dealing with change. The purpose of the planning effort is to develop a plan that will guide both public and private decisions. In order to follow the plan as described in the previous chapters, it is necessary to implement the goals, strategies, and recommendations as outlined. If a plan is to be successful it must be implemented.

This chapter prescribes a specific series of sequential actions to be completed by the Village of Coloma. Each goal serves as an identification of a priority based on committee discussions, and issue identification. The strategies define "why" the goal is important from a planning perspective. The recommendations discuss a specific action on how the goal can be achieved via regulations, ordinances, incentives, expenditures, information, and education.

#### Implementation Vision for 2030

In 2030, planning is recognized as the best and most consistent tool that the Village of Coloma has in ensuring that it continues to proceed in the direction that its citizens want. The Village relies heavily on its plan to steer development to appropriate locations, thus preventing incompatible land uses from occurring. Encouraging creative design solutions protects important community and natural man-made resources and promotes cost-effective design.

The Plan has proven to be a successful working document that continues to reflect the changing vision and viewpoints of Village residents. The Village values the opinions of its residents and business owners and respects the responsible efforts of landowners to their property and community interests.

#### ROLE OF THE PLAN

All land controls governing the Village must be consistent with the community's adopted comprehensive plan.<sup>1</sup> The planning commission is responsible for ensuring that current ordinances are in compliance with the plan. When the planning commission reviews any petitions for development, the plan should be reviewed; any recommendations for future development must be based on the identified goals, strategies, and recommendations, and proposed land use patterns within this plan. If the planning commission must ultimately make a decision that is inconsistent with the plan, the plan must be amended to reflect the change in policy.

<sup>&</sup>lt;sup>1</sup> Wisconsin State Statutes 66.1001.

#### RESPONSIBILITY

#### **Elected Officials**

Elected officials must make their decisions on criteria regarding how development will affect the entire community as well as how it will influence a specific site. As a result, elected officials make complex decisions based upon the comprehensive plan, the goals of the applicant, technical advice from staff, citizen input from advisory boards, and their own judgment on the specific development. The comprehensive plan provides much of the factual information an elected official will need for decision making. Elected officials must familiarize themselves with the contents and overall goals of the plan in order to ensure the plan remains viable.

#### **Community Plan Commission**

The powers and duties of the planning commission have been established by Wisconsin Statutes.<sup>2</sup> The plan commission is the primary entity responsible for implementing and updating the comprehensive plan. As such, the planning commission must promote good planning practices in its municipality. Commission members should be knowledgeable about the contents, visions, and goals of the comprehensive plan. Moreover, the commission must promote active citizen participation in future planning efforts. The commission must keep the citizens and elected officials informed of any technical issues and proceedings regarding the current planning issues. The planning commission is responsible for periodic amendments to the plan so that regulations and ordinances are in compliance with the plan. Likewise, the plan commission must review all new and existing ordinances to verify they are compliant with the goals and objectives of the plan.

#### INTERNAL CONSISTENCIES

The comprehensive plan was developed sequentially with supportive goals, strategies, and recommendations. Utilizing the community survey and vision session as a basis, key issues were identified within each of the nine elements of the plan. Using these issues along with factual information regarding natural features; past population and housing data; population and housing projections; and an analysis of existing infrastructure, a desired vision was created. The identified vision, goals, and strategies expressed in this plan were used to prepare the Future Land Use Map as well as the recommendations and implementation actions which the community needs to employ throughout the lifespan of the plan. In several instances strategies and recommendations pertain to more than one element and are therefore listed more than once. To maintain internal consistency, any amendment to the plan should be accompanied with an overall review of all nine elements and their associated goals, strategies, and recommendations.

Beginning January 1, 2010, if a local governmental unit engages in any of the following actions, those actions should be consistent with that local governmental unit's comprehensive plan<sup>3</sup>: official mapping, local subdivision regulation, town, city, village and county zoning ordinances, and zoning of shorelands or wetlands in shoreland areas.

<sup>&</sup>lt;sup>2</sup> Wisconsin State Statutes 62.23 and 60.62.

<sup>&</sup>lt;sup>3</sup> Wisconsin State Statutes 66.1001.

#### EXTERNAL CONSISTENCIES

Not only is it important to maintain internal consistencies but communities should also be aware of state and other planning documents and their relevance to their individual comprehensive plan. An attempt should also be made to maintain consistencies with these plans if possible. Some examples of these plans include:

State Plans:

- Wisconsin State Airport System Plan 2020
- Wisconsin State Bicycle Transportation Plan 2020
- Wisconsin State Highway Plan 2020
- Connections 2030: Wisconsin Long-Range Transportation Plan (adoption pending; will replace "2020" plans)

**Regional Plans:** 

- East Central Wisconsin Regional Planning Commission Comprehensive Plan, 2030
- NorthEast Wisconsin (NEW) Economic Opportunity Study

County Plans:

- Waushara County Outdoor Recreation Plan, adopted 2006
- Waushara County Solid Waste Plan Update
- Waushara County Comprehensive Plan (when adopted)
- Waushara County Farmland Preservation Plan, adopted 1981
- Waushara County Land and Water Resource Management (LWRM) Plan, adopted 2006
- The State of the Upper Fox River Basin Report, adopted 2001

Local Plans:

• Town of Coloma Comprehensive Plan (when adopted)

#### MONITORING PROGRESS

It is the community planning commission's responsibility to monitor the progress of implementation, utilizing the schedules that are found at the end of this chapter. The progress of plan implementation should periodically be reported to the Village Board. Additionally, the planning commission should annually review the goals, strategies and recommendations and address any conflicts which may arise between the elements of the plan. While it is the plan commission's and elected officials' responsibility to monitor progress, others may also check progress, including community staff persons, zoning administrators, planners and citizen groups.

#### UPDATING THE COMPREHENSIVE PLAN

A comprehensive plan must be updated at least once every ten years.<sup>4</sup> However, it is strongly recommended that the plan commission annually review both the implementation schedule and

<sup>&</sup>lt;sup>4</sup> Wisconsin Statutes 66.1001

current planning processes to ensure compliance with the overall goals and strategies of the plan and continued consistency with the overall vision of the community. This annual review should also be used to determine if a "major" plan amendment is required.

The comprehensive plan is a dynamic document. The plan should be updated when new demographic, economic, and housing data are released by the U.S. Census Bureau. It is anticipated that the land use element will likely require updating over the course of the plan due to growth and change that most communities are likely to experience. Other elements are less likely to need updates. Furthermore as community values change, some goals, strategies and recommendations may no longer be relevant. The update to a plan should take less time than the comprehensive planning process, but should include public participation. A recommended review timeline is presented for the elements of this comprehensive plan (Table 10-1).

The first "major" update of the plan should be completed by 2019. The 2019 update should involve a review of the inventory and goals, strategies and recommendations presented in each chapter, a revised future land use map, and a timetable of updated implementation strategies.

#### ADOPTION OF THE PLAN OR UPDATE

As directed by s.66.1001(4), any Plan Commission or other body of a local governmental unit authorized to prepare or amend a comprehensive plan shall adopt written public participation procedures that foster public participation, and adopt a resolution to recommend the plan by a majority vote of the entire commission or governmental unit. (The vote shall be recorded in the official minutes of the plan commission; the resolution shall refer to maps and other descriptive materials that relate to one or more elements of the comprehensive plan). One copy of the recommended plan shall be sent to the following:

- Every governmental body that is located in whole or part within the boundaries of the local governmental unit (county, utility districts, school districts, sanitary districts, drainage districts).
- The clerk of every local governmental unit that is adjacent to the local governmental unit that is the subject of the plan or update.
- The Wisconsin Department of Administration.
- East Central Wisconsin Regional Planning Commission.
- The public library that serves the area in which the local government unit is located.
- Others identified in the adopted public participation procedures.

The elected officials may spend time reviewing, revising and requesting the plan commission make revisions to the recommended plan. The governing body shall draft an ordinance adopting the plan. A class 1 public notice shall be published 30 days prior to the hearing on the proposed ordinance to adopt the final "recommended plan". The local governing body must provide an opportunity for written comments by the public and must respond to those comments. A public hearing must be held on the ordinance. By majority vote, the governing body must approve the ordinance. Finally, the adopted plan and the ordinance must be distributed to the list above.

Table 10.1. Recommended Review Timeline

## LAND USE PLANNING CONTROLS

Although zoning and subdivision ordinances are the two most commonly utilized land use planning tools, there are several innovative tools which can be utilized to ensure that new development occurs in an organized and desired fashion. Local communities and counties can choose to utilize a few or several of these implementation tools. The communities may want to establish local ordinances which regulate new development. Furthermore, the communities may want to collaborate with Waushara County to adopt uniform county-wide development tools.

## Zoning

Land use plans and zoning perform differently. Land use plans provide a vision for 10 to 20 years, while zoning ordinances have an immediate impact on land use decisions. In order to rectify this difference, re-zoning is completed on an on-going basis in a manner that is consistent with the overall vision of the plan. The timing of re-zoning is dependent on market forces, political climate, and the accuracy of the plan's predictions.

As the Village of Coloma maintains its own zoning regulations, its Plan Commission and Village Board must continually ensure that any future zoning changes are consistent with the local comprehensive plan as well as the future Waushara County Comprehensive Plan. Several actions can be taken to ensure that zoning, and other community decisions are made that accommodate the preferred future land uses as indicated on the Future Land Use Map, as well as the goals, strategies & recommendations of the plan.

- Compare intended future land uses with existing village zoning. Amend current zoning to reflect the intended future uses.
- Encourage local citizens and elected officials to actively participate in ongoing Village and Waushara County meetings regarding all zoning and planning issues.
- Amend existing ordinances and develop new ordinances which are reflective of the goals, strategies and recommendations of all elements in the comprehensive plan.

## Official Maps

Cities, villages, and towns which have adopted village powers have the authority to develop an official map.<sup>5</sup> An official map is a diagram which delineates the current and future roadways such as local streets, highways, historic districts, parkways, and parks. Additionally, an official map may delineate railroad right-of-ways, waterways (only if included on a comprehensive surface water drainage plan) and public transit facilities. Furthermore the map may establish exterior lines of future streets, highways, historic districts, parks, parks, parkways, public transit facilities, waterways, and playgrounds. Once an official map is adopted by ordinance, no building permits may be issued to construct or enlarge any building within the limits of the features listed above.

Official maps serve several important functions which ensure that future land use decisions will remain compliant with the comprehensive plan.

- Future costs for land acquisitions for city/village/town streets and other delineated features are lowered or minimized because the land will remain vacant.
- Future subdivisions of land will be streamlined because future streets have already been established; developers will be required to adhere to guidelines set forth within the official map unless it is amended by an ordinance.
- Potential home and land buyers can be readily informed that land has been designated for specific public uses.

<sup>&</sup>lt;sup>5</sup> Wisconsin Statutes 62.23(6).

• Acceptable route(s) for a potential by-pass for a major state highway can be delineated. Local governments can preserve sensitive environmental features (i.e. trout streams) while establishing a preferred corridor for a by-pass.

## Sign Regulations

Many communities are interested in regulating signage for local business in order to preserve a rural atmosphere and "community character." Restrictions are especially important in major transportation corridors, historic downtowns or neighborhoods, or other culturally or environmentally significant areas. As signs have become increasingly larger and bolder due to illumination, roadways have become more cluttered and communities have become less distinctive.

## Erosion and Stormwater Control Ordinances

Local communities may adopt a construction site erosion control and stormwater management ordinance. The purpose of these ordinances is to protect surface water quality and minimize the amount of sediment and other pollutants in stormwater runoff from construction sites to lakes, streams, and wetlands.

## Historic Preservation Ordinance

As development continues to modernize the appearance of an area, the use of an historic preservation ordinance can help a community protect and enhance key cultural and historical features. A historic preservation ordinance can designate local landmarks and protect these properties by regulating new construction, alterations or demolitions that affect them.

## Design Review Ordinance

Design review can accompany many different development aspects and will assist communities in achieving an identified look and character expressed within the individual vision statements. These ordinances, however, need to be based upon well defined sets of criteria. Signage, lighting, exterior building material types, structural guidelines, colors, and other aspects will have to be specifically identified within any ordinance.

## Building/Housing Codes

Waushara County enforces the Uniform Dwelling Code in the Village of Coloma, along with the towns of Aurora, Bloomfield, Coloma, Dakota, Deerfield, Hancock, Leon, Marion, Mt. Morris, Oasis, Plainfield, Poy Sippi, Richford, Rose, Saxeville, Springwater, Wautoma, and the villages of Lohrville, Hancock, Plainfield and Redgranite. The Uniform Dwelling Code promotes health, safety, and general welfare; protects property values; and provides for orderly, appropriate development and growth in the communities. The enforcement of the uniform dwelling code along with enforcement of other local codes can help ensure properties are adequately maintained and that property values are protected.

## Floodplain Ordinance

Waushara County regulates development within FEMA designated floodplain areas in unincorporated areas of the county through a Floodplain ordinance. In some instances, it may be important to readjust the floodplain boundaries in specific areas. In order to do so, local communities must follow these steps:

- 1) Contract with an engineering firm to conduct hydrologic and hydraulic engineering studies and modeling to calculate the floodplain for the specified area. It is recommended that 2 foot contour intervals be utilized.
- 2) Submit the recalculated floodplain boundaries to the WDNR and FEMA for review.
- 3) If approved, amend existing zoning maps to reflect the re-calculated floodplain boundaries.

The Village of Coloma has no areas that lie within a floodplain, and has therefore not adopted a floodplain ordinance.

## Sanitary Systems

Waushara County regulates private on-site wastewater treatment systems within the Village of Coloma. Groundwater and surface water protection is of great importance to not only the immediate planning area, but also areas downstream of the numerous headwater streams. Uncontrolled waste can have detrimental and wide ranging impacts on health and property values. Communities will want to periodically review codes to ensure that current efforts are effective and to keep abreast of changes to new minimum code standards.

## Subdivision Ordinances

*Wisconsin State Statutes* regulate the division of raw land into lots for the purpose of sale for building development. A subdivision ordinance is related to the zoning ordinance in that it regulates the platting, or mapping, or newly created lots, streets, easements, and open areas. A subdivision ordinance can help implement the comprehensive plan and must be consistent with and conform to the local comprehensive plan goals. Furthermore, subdivision ordinances can incorporate construction standards and timelines for completion of community facilities such as transportation networks or curb and gutter systems. Communities can also require dedication of parks, playgrounds, or open space or a fee-in-lieu of dedication as a condition of approval of a subdivision.

## Lighting Controls/Ordinances

As development pressures occur, communities discover that not only are the natural features being altered, but also the scenic views of the night sky are being diminished. Both yard lighting and signage can change the character of a community as significantly as new development. This is especially true in areas where new lighting has become over-excessive in new commercial or industrial districts or residential subdivisions which have incorporated street lights. Newly developed lakefronts may also become over-lighted at night. Direct lighting or glare can and should be regulated in order to maintain the community character of rural and historic areas.

Currently, lighting and its evening glare is one of the chief complaints residents have in many communities across this state and nation. Many light manufactures have responded positively to complaints about the increased amounts of light pollution in rural areas. There are many examples of development and lighting structures which have reduced scatter light through new non-glare technologies. Many light manufactures have light cutoff shields that will remove glare, thus increasing the light's effectiveness and reducing its overall energy consumption. Other lights may direct light at ground height only. Since non-glare lighting and other similar technologies are similarly priced to current lighting practices, communities should consider developing lighting ordinances which not only reduce light pollution, but also improve energy consumption and costs.

## IMPLEMENTATION SCHEDULE

The goals established in the implementation schedule (Table 10-2) should be applied over the planning period which begins in 2009 with the adoption of the comprehensive plan and runs through the planning period. They represent priorities for the Village of Coloma. Strategies provide more detailed and readily measurable steps toward reaching each goal, while recommendations are specific actions used to ensure plan implementation.

As seen in previous chapters, the goals, strategies and recommendations of each particular element are interrelated. To ensure that implementation of the plan is achieved in a timely fashion, landmark dates have been set for each recommendation. During periodic reviews, the plan commission should verify that these deadlines have been met and consider additional recommendations to better achieve the stated goal, if necessary. Specific landmark dates have been established to ensure that individual recommendations complement one another in their implementation. The landmark dates have been reviewed by the public, the Smart Growth Committee, plan commission and village board to assure that they are feasible expectations.

The primary responsibility for implementing the plan recommendations contained in the implementation schedule lies with the Village Board. Secondary responsibility for performing the recommendations in the plan lies with the plan commission which is appointed by the elected officials, along with other key partners.

The following implementation tables indicate the comprehensive plan goals, strategies, and recommendations by element; primary and secondary responsibility for implementation; and a milestone date for completion. An abbreviation list precedes the tables; the list should be used to interpret the responsible parties involved with implementation of specific recommendations.

10-10

(Page left blank intentionally)

## IMPLEMENTATION – Village of Coloma

## GOAL I 1: Implement to the extent possible recommendations contained within the Smart Growth Comprehensive Plan.

## **STRATEGY I 1.1:** Closely monitor the implementation of plan recommendations to ensure they are followed.

- Recommendation I 1.1.1: The Village Plan Commission should periodically review the implementation schedule to ensure that deadlines are being met. These reviews should be done at least quarterly to ensure that progress is being made to implement all aspects of the plan. After a majority of recommendations have been implemented, the Plan Commission may be able to lengthen the time between reviews.
- Recommendation I 1.1.2: The Village Plan Commission should periodically update the Village Board as to the progress that is being made to implement the plan. These updates should be done annually.
- Recommendation I 1.1.3: The Village Plan Commission should annually review the goals, strategies and recommendations and address conflicts which may arise between the elements of the plan. During this review process, the plan commission should actively seek input from village board members, local citizens and others to gauge the effectiveness of the plan. This should include an assessment of the implementation success as well as a consideration of additional objectives and strategies.
- Recommendation I 1.1.4: The Village Plan Commission should prepare a brief annual report. This report should summarize how the comprehensive plan was used to direct major spending, regulatory, and construction decisions, how development has or has not coincided with the recommendations of the plan, and any comprehensive plan amendments that need to be made and why.
- Recommendation I 1.1.5: The Village Board should periodically include an agenda item for "implementation" progress. To ensure implementation of the plan and to monitor the progress, the board should initially include an implementation agenda item on at least a quarterly basis.
- Recommendation I 1.1.6: The Village should solicit involvement from local residents to implement the plan.

## STRATEGY I 1.2: The Village of Coloma should update the plan as necessary.

 Recommendation I 1.2.1: The Village Plan Commission, if necessary, should recommend modifications that will better meet the intent of the plan. As the plan is implemented, the village may discover that the recommend strategies may not be achieving the desired goal. Additionally, as community values change, some goals, strategies and recommendations may no longer be relevant. They should be changed to best accomplish the changing vision of the village.

- Recommendation I 1.2.2: The village should update the plan within a maximum of every 10 years to meet the standards of Smart Growth legislation.
- Recommendation I 1.2.3: As available, provide updated information to supplement the plan information. This information could include new statistical information, population projections, updated census information, updated zoning map, existing land use map, etc.

STRATEGY I 1.3: Emphasize the need for intergovernmental cooperation throughout the implementation process.

 Recommendation I 1.3.1: Solicit input from neighboring communities, Waushara County, governmental agencies and others regarding how their activities relate to the recommendations in the Village of Coloma's comprehensive plan. It is important to coordinate and communicate with others to ensure that the village's comprehensive plan is consistent with the activities of others.

## Implementation Village of Coloma Overall Goals

GOAL I 1: Implement to the extent possible recommendations contained within the Smart Growth Comprehensive Plan.					
Related		Required	Responsibility		Priority/
Strategy	Recommendation	Action	Primary	Secondary	Timeline
I 1.1	1.1.1: The Village Plan Commission should periodically review the implementation schedule to ensure that deadlines are being met.	PC to initially quarterly review implementation schedule	VPC	VB	1X
I 1.1	1.1.2: The Village Plan Commission should periodically update the Village Board as to the progress that is being made to implement the plan.	VPC to annually update VB	VPC	VB	1X
I 1.1	1.1.3: The Village Plan Commission should annually review the goals, strategies and recommendations and address conflicts which may arise between the elements of the plan.	Obtain input from VB, Village depts. & others	VPC	VB	1Х
I 1.1	1.1.4: The Village Plan Commission should prepare a brief annual report.	Prepare annual report for VB	VPC	VB	1X
I 1.1	1.1.5: The Village Board should periodically include an agenda item for "implementation" progress.	Include agenda item	VB		1X
I 1.1	1.1.6: The Village should solicit involvement from local residents to implement the plan.	Encourage resident involvement	VB		1X
I 1.2	1.2.1: The Village Plan Commission, if necessary, should recommend modifications that will better meet the intent of the plan.	Update plan as necessary	VPC	VB	Х
I 1.2	1.2.2: The village should update the plan within a maximum of every 10 years to meet the standards of Smart Growth legislation.	Update plan before 2020	VB	VPC	Х
I 1.2	1.2.3: As available, provide updated information to supplement the plan information.	Update plan as necessary	VB	VPC	Х
I 1.3	1.3.1: Solicit input from neighboring communities, Waushara County, governmental agencies and others regarding how their activities relate to the recommendations in the Village of Coloma's comprehensive plan.	Solicit input from others	VB	VPC	Х

APPENDICES

APPENDIX A

## VILLAGE OF COLOMA **CITIZEN'S QUESTIONNAIRE**

#### PLEASE RETURN BY OCTOBER 17, 2008 to Brenda Ratajczak, Village Clerk or East Central Wisconsin RPC, 400 Ahnalp St., Suite 100, Menasha WI 54952

#### **GENERAL INFORMATION**

- 1. Please identify your age group: (Check One)

f) \_\_\_\_\_ 65 and older

- 2. Which best describes you? (Check One)
  - a) Year-round (full time) resident of the Village of Coloma
  - b) Seasonal (part time) resident of the Village
  - c)\_\_\_\_ Property owner only (do not reside here) (If you checked this line, go to #6)
- 3. If a full-time or part time resident, how long have you lived in the Village of Coloma? (Check One)
  - a)\_\_\_\_0 2 years b)\_\_\_\_3 5 vears c)\_\_\_\_ 6 – 10 years e) More than 20 years
    - d) 11 20 years
- 4. Do you a) own or b) rent your current place of residence? (Check one)

### 5. What best describes your place of residence? (Check one)

- a) Village lot less than  $\frac{1}{2}$  acre
- b) Village lot less than 1 acre but greater than 1/2 acre
- c) Single family residence over 1 acre in size
- d)\_\_\_\_\_Two-family dwelling
- e) Multi-family dwelling
- f) Other (Please describe)
- 6. If you own non-residential property in the Village of Coloma, what best describes its present use?

## (Check all that apply)

- a) Undeveloped parcel
- b) Business/Commercial use
- c)\_\_\_\_ Agricultural land
- d)\_\_\_\_ Other (Please describe)
- 7. What is the size of the largest property you currently own in the Village (including your residence)? (Check one)
  - a) Less than 1 acre c) 5 9.99 acres e) 40 79.99 acres b) 1 4.99 acres d) 10 39.99 acres

#### **EXISTING DEVELOPMENT**

8. Which one of the following statements best expresses how you feel about: (Check one for each item listed)

		IN THE VILLAGE OF COLOMA: (Check one for each item)					WITHIN THE OVERALL AREA: (Check one for each item)				
	Too Much	About Right	Not Enough	NA	Too Much	About Right	Not Enough	NA			
Residential Development											
Commercial Development

Snowmobile Trails				

10. Please indicate your preference regarding the following development issues in the Village of Coloma or surrounding area: (Check one for each item listed)

	Support	Do Not Support, But Accept	Do Not Support	No Opinion
Single Family Housing				
Multi-Family Housing				
Elderly Housing				
Mobile Homes				
Hunting Cabins				
Small Business Opportunities				
Large Livestock Operations				
Natural Resource Extraction				

# 11. How would you rate the facilities and public services available to Village residents: (Check one for each item listed)

	Above Average	Acceptable	Not Acceptable	Not Used
Local Roads, Maintenance and				
Condition				
Local Roads, snow removal				
Parks and Other Public Recreational				
Land				
Garbage/Recycling				
State Highways/County Roads				
Fire Protection				
Law Enforcement				
Emergency Medical Services				
(Ambulance)				

## **12.** Please rate the relative importance of the following land use issues in the Village of Coloma or surrounding area. **(Check one for each land use issue)**

Land Use Issues	Not Important	Somewhat Important	Very Important
	Important	Important	important
Protection of environmentally sensitive resources, such as			
wetlands, floodplains, steep slopes, natural springs & wildlife			
habitat.			
Preservation of farmland and avoidance of conflict between			
agricultural and residential uses.			
Preservation of natural areas and open spaces.			
Promotion of compact residential growth by discouraging			
scattered subdivision & scattered lots.			
Promotion of compatible land use patterns by discouraging			
the location of conflicting land uses adjacent to each other,			
such as residential and industrial.			
Cooperation between the town, village and Waushara			
County when making land use decisions.			

#### LOCAL COMPREHENSIVE PLANNING GOALS

13. To enable your planning committee to more effectively focus on issues most critical to your community, please indicate how important you feel that the Village of Coloma plan address each of the goals listed below. (Circle the number that best applies - See following number code)

1 Very Important 2 Important 3 Not Important

- a.) 1 2 3 Promote the redevelopment of lands with existing infrastructure and public services and the maintenance and rehabilitation of existing residential, commercial, and industrial structures.
- b.) 1 2 3 Encourage neighborhood designs that support a range of transportation choices.
- c.) 1 2 3 Protect natural areas, including wetlands, wildlife habitats, lakes. woodlands, open spaces and groundwater resources.
- d.) 1 2 3 Protect economically productive areas, including farmland and forests.
- e.) 1 2 3 Encourage land uses, densities and regulations that promote efficient development patterns and relatively low municipal, state governmental and utility costs.
- f.) 1 2 3 Preserve cultural, historic and archaeological sites.
- g.) 1 2 3 Encourage coordination and cooperation among nearby units of government.
- h.) 1 2 3 Build community identity by revitalizing main streets and enforcing design standards.
- i.) 1 2 3 Provide an adequate supply of affordable housing for individuals of all income levels throughout each community.
- j.) 1 2 3 Provide adequate infrastructure and public services and an adequate supply of developable land to meet existing and future market demand for residential, commercial and industrial uses.
- k.) 1 2 3 Promote the expansion or stabilization of the current economic base and the creation of a range of employment opportunities at the state, regional and local levels.
- I.) 1 2 3 Balance individual property rights with community interests and goals.
- m.) 1 2 3 Planning and development of land uses that create or preserve varied and unique urban and rural communities.
- n.) 1 2 3 Provide an integrated, efficient and economical transportation system that affords mobility, convenience and safety and that meets the needs of all citizens, including transportation-dependent and disabled citizens.

#### What else would you like to tell us?

14. What do you like best about the Village of Coloma?

15. What would you like to see changed in the Village of Coloma?

### Village and Town of Coloma Questionnaire Results

A questionnaire was conducted for the Village of Coloma and the Town of Coloma to gather opinions from residents and landowners regarding land use and development issues. Questionnaires for the Village of Coloma were sent to all utility customers, while questionnaires for the Town of Coloma were sent home with elementary students in their take home folders. Additional questionnaires were available at key locations throughout the Village of Coloma for people who did not receive a questionnaire in another manner. Approximately 247 questionnaires were sent out with the Village of Coloma utility bill. Thirty-seven of these questionnaires were returned for a response rate of about 15 percent. Around 50 questionnaires were included in the take home folders that went home to parents and guardians of students in the Coloma Elementary School. Twenty-two questionnaires were returned. Since questionnaires for the Town of Coloma were available to determine a true response rate.

The questionnaire contained 15 questions. There were two open-ended questions in which written input was solicited. Some respondents did not answer all the questions.

### SUMMARY OF FINDINGS

General Information

- About three-quarters (73%) of the people responding to the Village of Coloma's questionnaire were 55 years in age or older. While the majority of the respondents for the Town of Coloma fell into one of two age groups 25 to 34 (27%) and 65 years and older (36%).
- Majority of respondents indicated that they were full-time residents in the Village (84%) and the Town (91%).
- Over forty percent (43%) of the respondents have lived in the Village in excess of 20 years, while over sixty percent (64%) of respondents in the Town have made Coloma their home for between 6 and 20 years.
- Over forty percent (43%) of respondents in the Village reside on a single family lot that is greater than one acre in size. Although, over a third (36%) of respondents in the Town live on a single family lot in excess of five acres, another quarter (27%) live on a single family lot less than five acres in size.
- Seven people in the Town indicated that they owned non-residential land; 29 percent of these owners possess recreational/hunting land.

### Existing Development

- Respondents in the Village specified that there was about the right amount of agricultural activities (54%) in the Village. However, they were divided when it came to residential development (51% about right, 43% not enough) and recreational opportunities (46% about right, 41% not enough). On the other hand, most people indicated that they would like to see more commercial (68%) and industrial (78%) development in the Village.
- Residents in the Town of Coloma pointed out that there was about the right amount of residential (82%), agricultural (82%) and recreational opportunities (73%) in the Town.

Again when it came commercial (55%) and industrial (50%) people said that they would like to see more.

- Around three-quarters of Village residents either support or accept managed forest law (76%), farmland preservation (78%), wetland preservation (73%), forestland preservation (76%), Ice Age Trail (76%), historic/cultural site preservation (78%), snowmobile trails (76%), park & open space (87%) and public hunting lands (81%).
- Over eighty percent of Town residents either support or accept managed forest law (86%), public hunting lands (86%) and snowmobile trails (82%). Support and acceptance for farmland preservation (96%), wetland preservation (96%), forestland preservation (96%), park and open space (91%), Ice Age Trail (91%0 and historic/cultural preservation (91%) was in excess of ninety percent.
- Respondents in the Village strongly support single-family housing (81%), elderly housing (92%) and small business opportunities (89%). Less support exists for multi-family development (43%). While some people are willing to accept the following development issues, the majority do not support mobile homes (78%), hunting cabins (70%), large livestock operations (70%) and natural resource extraction (57%).
- Similar to the Village, Town residents strongly support single-family housing (86%), elderly housing (82%) and small business opportunities (77%). While some people are willing to accept the following development issues, most do not support them: multi-family housing (73%), mobile homes (68%), large livestock operations (68%), and natural resource extraction (77%). People are divided over hunting cabins (27% support, 46% do not support, but accept, and 23% do not support).
- Within the Village, over ninety percent consider garbage/recycling, state highways/county roads, fire protection to be above average or acceptable. In excess of eighty percent of people rate the parks and other public recreational land, law enforcement and emergency medical services in the same category. However, when it comes to local roads people are less supportive of maintenance and conditions (65%) and snow removal (76%).
- In the Town, over ninety percent consider fire protection and emergency medical services to be above average or acceptable. More than eighty percent believe that local roads – maintenance, condition and snow removal, parks and other recreational land, state highways/county roads and law enforcement are also above average to average. While a fewer share of people feel that garbage/recycling was acceptable or better, a quarter of the respondents either did not use this service or did not answer the question.
- People in the Village and Town of Coloma rate cooperation between the town, village and Waushara County when making land use decisions as the most important land use issue. The least important land use issue was the promotion of compact residential growth by discouraging scattered subdivision & scattered lots.

Local Comprehensive Goals

• The three most important local comprehensive goals according to Village respondents are (1) Promote the redevelopment of lands with existing infrastructure and public services and the maintenance and rehabilitation of existing, commercial, and industrial structures; (2) Protect natural areas, including wetlands, wildlife habitats, lakes, woodlands, open spaces and groundwater resources; and (3) Protect economically productive areas, including farmland and forests.

Town residents indicated that the most important local comprehensive goals were (1)
Protect natural areas, including wetlands, wildlife habitats, lakes, woodlands, open
spaces and groundwater resources; (2) Protect economically productive areas, including
farmland and forests; and (3) Encourage land uses, densities and regulation that
promote efficient development patterns and relatively low municipal, state governmental
and utility costs.

What do you like best?

- Respondents in the Village of Coloma value the small town atmosphere, new businesses, safety/security, peacefulness, recreational opportunities within the village and nearby, caring people, good school system, community center, emergency medical services, and location.
- Town residents like the small town, rural atmosphere of the community, its location and its government, roads, fire and police protection and cooperation between the town, village and county.

What would you like to see changed?

- Village residents would like to see more community involvement, quieter summer nights, more police presence, more businesses, increased services for seniors, more youth programs, monthly newsletter, and infrastructure maintenance, repair and expansion.
- Town residents indicated that they would like to see more activities for youth, enforcement of zoning in regard to neglected properties, a newsletter, more pedestrian/bicycling friendly options (especially in the village), improved access to Pleasant Lake, more businesses/industries employing skilled labor, a Main Street Plan for downtown, protection of farm and residential properties, no scattered subdivisions or random mobile homes, and improved snow removal.

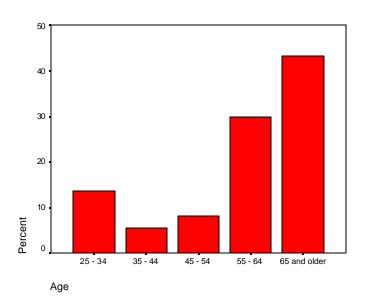

## VILLAGE OF COLOMA CITIZEN'S QUESTIONNAIRE

<u>Analysis</u>

Questionnaires Received: 37

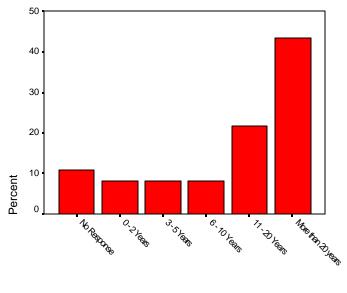

## **GENERAL INFORMATION**

**1.** Please identify your age group:

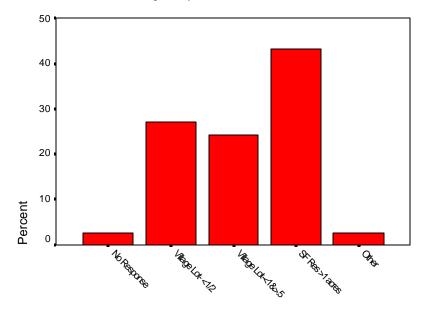

**2**. Which best describes you?

- a) 83.8% Year-round (full time) resident of the Village of Coloma
- b) <u>13.5%</u> Seasonal (part time) resident of the Village
- c) <u>2.7%</u> Property owner only (do not reside here)
- 3. If a full-time or part time resident, how long have you lived in the Village of Coloma?

Resident

4. Do you a) 91.9% own or b) 0% rent (8.1% no response) your current place of residence?

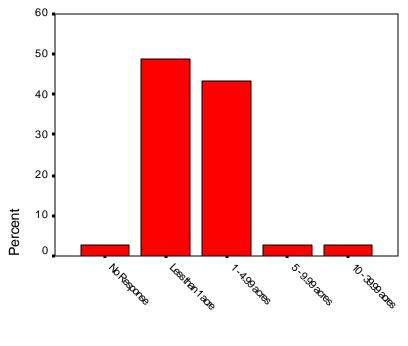

5. What best describes your place of residence?

Description of place of residence

6. If you own non-residential property in the Village of Coloma, what best describes its present use?

**Undeveloped – 16.2% of respondents** Business/Commercial – 2.7% of respondents Agriculture – 2.7% of respondents Other (vacant lot used for gardening) – 2.7% of respondents

7. What is the size of the largest property you currently own (including your residence)?

Size of Property

## EXISTING DEVELOPMENT

## What else would you like to tell us?

**14.** What do you like best about the Village of Coloma?

## ID Response

- 1. \*Small town; this is why most people moved here, or they would be in the big cities! \*Feeling.
- 2. Its small (Rural) town feel it keeps property taxes low. If you expand development residential or commercial taxes will go up!
- 3. I like the fact that the community has a new car dealership, hardware store, bank, gas stations, and library. I also like the people.
- 4. Coloma is a quiet peaceful, safe place to live. There are nice activities to keep more than busy if you wish to participate.
- 5. Hunting and fishing opportunities real close by!
- 6. It's a small town.
- 7. Everyone cares about each other.
- 9. This is a safe place to raise a family. Also everyone is a neighbor and a friend and will be there to help you.
- 12. The people.
- 14. Village President who has the best interest for the Village by being honest and knowledgeable, Knows right from wrong.
- 15. That it is small & Friendly. It seems very safe for children.
- 16. The size & "folksy" atmosphere, the wonderful village park & facilities available to the residents. The folks who plan & maintain all of the flowers & landscaping do a great job.
- 17. Size, friendly.
- 18. The serenity.
- 20. Good school system churches People who care friendly.
- 21. We have ambulance service police patrol relatively clean vacant lots concerned village, great community center for use.
- 22. Large lots.
- 23. Location, size, potential & security.
- 24. The friendly and helpful people.
- 26. The quietness.
- 29. The citizen's, the park.
- 30. Small, friendly and safe.
- 32. I like its smallness, some growth but not too much.

15. What would you like to see changed in the Village of Coloma?

## ID Response

- 1. More involvement of Village residents. Approach these people they feel ruled by a few, and need a push. They live here for the small town environment!
- 2. Its fine now, keep it the way it is. Keep Coloma a small town.

- 3. The village if awfully noisy late at night in the summer. Some people light off fireworks weeks before and after July 4<sup>th</sup>, and there are too many motorcycles racing around late. I wish people wouldn't stop their care in the middle of Main Street to carry on conversations. Control roadside Poison Ivy and get it out of the school forest.
- 5. To have Paul Miller take back & run/own the hardware store & restock it 2! To have Bob Martin take back & run the grocery store.
- 6. More police presence.
- 9. To have a \$1.00 store or general store with everything in it, like food, clothes, hardware, etc. So you wouldn't have to travel to near by towns. It would bring in more business from other towns and travelers. People are shopping at these stores more than any others now!
- 12. Village Board.
- 13. Parkway Dr. Paved ASP.
- 14. Bring Coloma to the standards of other local communities. We want to be proud of our town. A lot of our homes are embarrassing.
- 15. The cost of water & taxes, those are both outrageous!!!
- 16. More economic expansion preferably in the Coloma business park.
- 17. A village board that works together brings business to empty buildings downtown.
- 18. Pave Parkway & Busse Street. No need for sewer trailer & Campers belong in campground.
- 20. More young people interested in Village politics.
- 21. Go along with elected officer's plans if feasible.
- 22. Services for seniors dr. dentist, when is Walgreens coming?
- 23. Maintain, repair & complete the infrastructure.
- 24. Lower the water and sewer rates!!!
- 26. That our boards not burden us with a lot of nit-picky rules unless there is an obvious constant problem. The majority always gets "punished" for the discrepancies of a few.
- 27. Local police to do their job, i.e. Truck (semi) speed & enforce engine brake use and loud exhaust instead of riding around doing nothing.
- 29. Lower property taxes, more law enforcement protection.
- 32. I'm satisfied with it.
- *33.* Youth programs, community service opportunities, lower taxes, police actually writing citations for traffic violations!
- 36. It would be nice to have a monthly newsletter mailed out to let us know what is new and happening. Board members new residence, help everyone feel a sense of community.

Summary of Village of Coloma S.W.O.T. Exercises October 8, 2008

#### **Overall Strengths**

Location Public safety Local elementary school Public sewer and water

Participants felt that the greatest strengths fell in the Utilities and Community Facilities area (9) followed by economic development (location - 6). Other areas that received recognition included Natural Resources (Pleasant Lake and Chaffee Creek) and Government (intergovernmental cooperation).

#### <u>Weaknesses</u>

Lack of employment opportunities Lack of high paying jobs Lack and distance to medical facilities Aging sewer and water system Incomplete sewer and water coverage High property taxes

Participants felt that the greatest weaknesses were in Utilities and Community facilities (10), followed by economic development (6). Other areas that received recognition included government (high taxes).

#### **Opportunities**

Development west of I-39 TIF 1 and TIF 2 Additional TIF district in Village

Participants felt the greatest opportunities were in economic development (16).

#### Threats

Narrow minded people Economy Loss of retail businesses Threat of Coloma loosing school

Participants felt that the greatest threats were in Economic Development (9). Other areas that received recognition included Sense of Community (narrow mindedness) and Utilities and Community Facilities (energy costs and possibility of loosing grade school).

- Table E-3Amish Settlements in Wisconsin: Households, Population,Type of Occupation

#### Rare, Threatened, and Endangered Species and Natural Communities

The Wisconsin Department of Natural Resources Natural Heritage Inventory (NHI) is an on-line database which provides statewide inventory of KNOWN locations and conditions of rare and endangered species. The NHI records data base is updated continually with the last update completed July 22, 2008. The NHI records for Waushara County can be found at, (http://dnr.wi.gov/org/land/er/nhi/CountyData/index.htm).

In most cases, locations for species and natural communities surveyed and listed in the NHI are available down to the town level. The exception are those species whose locations are considered to be sensitive (particularly vulnerable to collection or disturbance). Locations of these species or natural communities are generalized down to the county level in order to minimize impacts to them.

The absence of a species within this database does not indicate that particular species or communities are not present within the listed towns. Nor does the presence of one element imply that other elements were surveyed for but not found. Despite these limitations, the NHI is the state's most comprehensive database on biodiversity and is widely used. Species are listed by their type, scientific name, common name; State status; and the last observed record is indicated. Specific information for the Village of Coloma was not included in the data base, therefore Town of Coloma information is presented below.

Community or Species Type	Scientific Name	State Status*	Common Name	Observation Date
Community	Dry Prairie	NA	Dry Prairie	1979
Community	Oak Barrens	NA	Oak Barrens	1979
Community	Springs and springs runs, hard	NA	Springs and Springs Runs, Hard	2006
Community	Calcareous fen	NA	Calcareous Fen	2000
Plant	Deschampsia cespitosa	SC	Tufted Hairgrass	2001
Butterfly	Lycaeides melissa samuelis	SC	Karner Blue	2006
Butterfly	Calephelis muticum	END	Swamp Metalmark	2001

APPENDIX G

#### Joint Meeting of the Village of Coloma Smart Growth Committee and the Town of Coloma Comprehensive Planning Committee

#### **Comprehensive Plan Kick-Off Meeting**

Anna Follet Memorial Community Center Wednesday, September 3, 2008 at 6:30 P.M.

Members Present: Steve Rodger, Jon Schubert, Tina Shultis, Margaret Nigbor, Ted Lewko, Dennis Apps, Carl Lietz, George Wilson, Cheryl Flyte, Mike Mayr, Patricia Pintar, Thomas Pintar Members Absent: Bob Martin, Ed Bagley, John Rought, Amy Hunt, Jim Lietz, Dick Meyer, Mike Derricks Others Present: Kathy Thunes, Jack Schwanke, Arden Brant, Jim Miller, Patrick Nehring

- I. Welcome and Introductions: Committee members introduced themselves to the group. Planning notebooks were distributed to everyone present, regardless of if they were on one of the two committees. The contact lists were reviewed and corrections were noted. Committee chairpersons were established and are as follows:
  - a. Village of Coloma Bob Martin and Steve Rodgers
  - b. Town of Coloma George Wilson

Action Item: Kathy Thunes to update contact list and redistribute to group at next meeting.

Action Item: Kathy Thunes to send handouts and bring additional notebooks to next meeting for members who are missing.

- **II.** Summary of the Comprehensive Planning Process and the Role of the Planning Committees: The following material was distributed. Committee members were asked to review the material on their own.
  - a. Key Points About Wisconsin's New Comprehensive Planning and "Smart Growth" Law
  - b. Comprehensive Planning Fundamentals
  - c. Comprehensive Planning Law Fact Sheet
  - d. Required Elements of a Local Comprehensive Plan

Kathy Thunes presented a basic overview of the fundamentals of planning and the Wisconsin comprehensive planning law. She explained that the Village and Town of Coloma will be looking at 9 elements as part of this planning effort. These elements are required by state law and are as follows: Issues and Opportunities; Housing; Transportation; Utilities and Community Facilities; Agriculture, Natural and Cultural Resources; Economic Development; Land Use; Intergovernmental Cooperation and Implementation.

Kathy Thunes explained the role of the Village of Coloma Smart Growth Committee, the Town of Coloma Comprehensive Planning Committee, the plan commissions, and the village and town boards in the comprehensive planning process. A copy of the Public Participation Plan were distributed and reviewed.

**III. Review of Citizen Questionnaire:** Citizen Questionnaires were distributed to both Village and Town members. Minor changes were suggested for both of the individual questionnaires. The Village of Coloma would be sending out questionnaires to village residents in their utility bills at the end of September. Cheryl Flyte suggested that the Town questionnaires be sent home in the Grade School Friday take home folders. Questionnaires for both the Village and Town would be available around the Village at the following locations: Library, Bank, Village Office, Coffee Shop, Grocery Store (note it was decided after the meeting to use the Hardware store instead), ECWRPC website and at the Community Vision Session.

Action Item: Kathy Thunes to update questionnaires and distribute as stated above. Kathy to coordinate distribution and collection with Brenda and George. Kathy to write article for inclusion in the village newsletter to highlight community vision session and citizen's questionnaire.

Action Item: Cheryl Flyte to investigate the possibility of utilizing the take home folders and get back to Kathy Thunes

IV. Group Discussion Regarding General Community Values and Trends (i.e. what do you want/expect to get out of this effort): A good discussion by committee members ensured. Highlights of this discussion are outlined below.

Village of Coloma:

- a. We are looking to get our money's worth out of this planning effort as well as comply with existing laws.
- b. Traffic count in the area is increasing.
- c. Utilize STH 21 in the plan.
- d. Highlight access to STH 21 and downtown Coloma
- e. The Village of Coloma is a vibrant center pulling people from around the area. It is a cultural, social and business center. It is a focal point. The Village is far enough from other areas that the focus by residents is more internal versus external when looking for services.
- f. Economic Development Coloma Business Association is made up of all the businesses in the village.
- g. A selling point for the village is the elementary school.

Town of Coloma:

- a. Look for development in the Northwest corner of the Town.
- b. Economic Development Great "Location" insure that that plan utilizes the location. Keep rural area of town.
- c. Residents value the rural nature of the Town of Coloma and potential business opportunities in the Town.

Other:

- a. The County should be looking at the big picture. There should be more support for events, etc. in the county from not just the immediate area, but from other areas in the county as well.
- b. There is a need to begin planning cooperatively, changing the mindset. It should be more than just Coloma.

- V. Review and Discussion of Existing Land Use Map: Enlarged copies of the existing land use maps were handed out to committee members. Committee members to coordinate and work together to update the maps for the next meeting.
- VI. Tentative Schedule for Future Meetings and Activities: Kathy Thunes handed out and went over the tentative schedule for the planning effort. The schedule has been revised to better fit with SAA schedule and needs.
- VII. Set date and time for Community Vision Session and next meeting: The following dates were set:

Community Vision Session: October 8, 2008 at Anna Follet Memorial Community Center at 6:30 P.M. Next Joint Committee Meeting: October 29, 2008 at Anna Follet Memorial Community Center at 6:30 P.M.

Action Item: Kathy Thunes to contact Brenda to check room availability.

VIII. Adjourn

#### SUMMARY OF PROCEEDINGS

#### Joint Meeting of the Village of Coloma Smart Growth Committee and the Town of Coloma Comprehensive Planning Committee

Anna Follet Memorial Community Center Wednesday, October 29, 2008 at 6:30 P.M.

Members Present: Bob Martin, Ed Bagley, Dennis Apps, Carl Lietz, Ray Burrows, George Wilson, Cheryl Flyte, Mike Mayr Members Absent: Steve Rodger, Jon Schubert, John Rought, Tina Shultis, Amy Hunt, Margaret Nigbor, Ted Lewko, Jim Lietz, Patricia Pintar, Thomas Pintar, Mike Derricks Others Present: Kathy Thunes, Jack Schwanke, Arden Brant, Patrick Nehring

I. Welcome & Introductions: Committee members introduced themselves to the group. Planning notebooks were distributed to everyone present who did not receive one at the last meeting.

Action Item: Kathy to send material to Ed Bagley (Village Report and contact list), Dennis Apps (contact list), George Wilson (contact list) who did not receive packet.

- II. Approval of October 29, 2008 Summary of Proceedings: SOP approved as submitted.
- **III. Meeting Purpose and Objective:** The purpose of the meeting was to review the community vision session results and to discuss the draft vision statements. The previous land use plans that were developed for both communities were also reviewed for direction in the development of the comprehensive plans.
- IV. Report of Community Vision Session: Kathy Thunes presented a summary of the community vision session. A total of nine people signed in for the Village and four people represented the Town. Overall both communities listed location as a common strength. The Village also included, as strengths, public safety, the availability of public sewer and water and the local grade school. The Town, on the other hand, felt that the rural atmosphere, library, community center, Pleasant Lake, Ice Age Trail, hiking and hunting were definite strengths. The working relationship between the Village and Town was also mentioned. Identified weaknesses for both communities included economic development and distance to health care facilities. While both communities. Common threats included the economy and loss of the population base.
- V. Discussion of Draft Vision Statements (Committees will meet separately): The Committees met separately to discuss the draft vision statements. Minor revisions have been made and are included in the meeting packet.
- VI. Review of existing community plan as it relates to housing and transportation (Committees will meet separately): The committees met separately to discuss their previous plans. This discussion include an identification of what should be brought

forward into the new plan and what had already been completed or was no longer relevant.

VII. Set date and time for next meeting: The next Joint Committee Meeting was set for November 19, 2008 at Anna Follet Memorial Community Center at 6:30 P.M.

Action Item: Kathy Thunes to contact Brenda Ratajcak regarding room availability (committees would like two rooms).

Action Item: Kathy Thunes to invite Tom Dahlke, Waushara County Highway Commissioner; Dave Meurett, WisDOT and Chuck Johnson, Village of Coloma to the next meeting.

VIII. Adjourn: 8:00 P.M.

#### Joint Meeting of the Village of Coloma Smart Growth Committee and the Town of Coloma Comprehensive Planning Committee

Anna Follett Memorial Community Center Wednesday, November 19, 2008 at 6:30 P.M.

Members Present: Bob Martin, Steve Rodger, Carl Lietz, Ted Lewko, Margaret Nigbor, George Wilson, Cheryl Flyte, Mike Mayr, Thomas Pintar Members Absent: Jon Schubert, John Rought, Tina Shultis, Amy Hunt, , Jim Lietz, Patricia Pintar, Mike Derricks, Ed Bagley, Dennis Apps, Ray Burrows Others Present: Kathy Thunes, Tom Baron, Jack Schwanke, Arden Brant, Tom Congdon, Tom Dahlke Others Absent: Patrick Nehring

- I. Welcome & Introductions: Committee members introduced themselves to the group.
- II. Statement of compliance with Wis. Stats. Ch. 19, Subchapter V, Sec. 19.84 regarding Open Meetings: Meeting notice and agenda published per Wis. Stats. Ch. 19.
- III. Public Comment: None
- IV. Approval of October 29, 2008 Summary of Proceedings: SOP approved as submitted.
- V. Meeting Purpose and Objective: The purpose of the meeting was to introduce and review the background information and draft goals, strategies and recommendations for the Issues and Opportunities (Chapter 2); Housing (Chapter 3); and Transportation (Chapter 4) elements.
- VI. Citizen Questionnaire: Not discussed.
- VII. Background presentation of Issues and Opportunities, Housing and Transportation Chapters: A brief presentation highlighting important facts for the first three chapters was given.
- VIII. Approval of Draft Vision Statements (Committees will meet separately): The Committees met separately to discuss the revisions to the draft vision statements. Minor revisions have been made and are included in the meeting packet.
- IX. Review of Goals, Strategies and Recommendations for Housing and Transportation Chapters: The Committees met jointly to discuss the Transportation element and separately to talk about the Housing element. Revisions to the draft goals, strategies and recommendations have been made and are included in the meeting packet.
- X. Set date and time for next meeting: The next Joint Committee Meeting was set for January 14, 2009 at Anna Follett Memorial Community Center at 6:30 P.M.

Action Item: Kathy Thunes to contact Brenda Ratajcak regarding room availability (committees would like two rooms).

**XI. Adjourn:** 8:00 P.M.

#### Joint Meeting of the Village of Coloma Smart Growth Committee and the Town of Coloma Comprehensive Planning Committee

Anna Follett Memorial Community Center Wednesday, January 28, 2009 at 6:30 P.M.

Members Present: Bob Martin, Steve Rodger, Ted Lewko, George Wilson, Cheryl Flyte, Mike Mayr, Thomas Pintar, Rav Burrows Members Absent: Jon Schubert, John Rought, Tina Shultis, Amy Hunt, , Jim Lietz, Patricia Pintar, Mike Derricks, Ed Bagley, Dennis Apps, Carl Lietz, Margaret Nigbor, Others Present: Kathy Thunes, Tom Baron, Jim Miller, Arlene Scalzo, Arden Brant, Ronald Bohn?, Robert Bohn Others Absent: Patrick Nehring

- Ι. Welcome & Introductions: Committee members introduced themselves to the group.
- П. Statement of compliance with Wis. Stats. Ch. 19, Subchapter V, Sec. 19.84 regarding Open Meetings: Meeting notice and agenda published per Wis. Stats. Ch. 19.
- III. Public Comment: None
- IV. Approval of November 19, 2008 Summary of Proceedings: SOP approved as submitted.
- V. Meeting Purpose and Objective: The purpose of the meeting was to review the Citizen Questionnaire; finalize the housing and transportation elements; and introduce and review the background information and draft goals, strategies and recommendations for the Utilities and Community Facilities (Chapter 5); Agricultural, Natural and Cultural Resources (Chapter 6); and Economic Development (Chapter 7) elements.
- VI. Citizen Questionnaire: A brief analysis of the Citizen Questionnaires was presented to the committees. A total of 37 people from the Village of Coloma and 22 people from the Town of Coloma filled out the guestionnaire. The guestionnaires for the Village of Coloma were sent out with the utility bill while the questionnaires for the Town of Coloma were given to students in the grade school. Both questionnaires were made available to local residents in key locations throughout the village. A summary of the guestionnaire results are included with this summary of proceedings.

#### Action Item: Kathy to send out questionnaire results to anyone who missed this meeting.

VII. Background presentation of Utilities and Community Facilities (blue); Agricultural, Natural and Cultural Resources (green); and Economic Development (yellow) - Chapters 5-7: Since a representative from Wheda was present at the meeting, the discussion revolved around the economic development element. A brief presentation highlighting important facts for the economic development chapter was given. Key points included the following:

- In 2000, the Town of Coloma had the highest unemployment rate in the County (29.3%), followed by the Village of Coloma (12.5%). About a quarter (25.5%) of the females in the Town was unemployed, compared to a third (33.3%) of the males.
- The top industries employing workers in the Village and Town of Coloma were: Manufacturing (Village – 29.8%, Town – 19.0%); Education, health and social services (Village – 9.6%, Town – 11.7%); Public Administration (Village – 10.6%); Retail trade (Village – 9.2%, Town – 11.7%) and Transportation and warehousing and utilities (Town – 11.4%).
- Top occupations for workers in the Village and Town of Coloma were: Production, transportation and material moving (Village 31.7%, Town 27.8%); Sales and office (Town 20.9%); Service occupations (Village 27.1%); Management, professional, and related (Village 15.1%, Town 19.4%).
- Top five workplace destinations for workers in the Village and Town of Coloma were: Village of Coloma (Village 27.1%, Town 6.0%); Town of Coloma (Village 8.1%, Town 25.3%); Town of Westfield, Marquette County (Village 14.3%, Town 9.4%); City of Wautoma (Village 14.3%, Town 9.1%); City of Stevens Point, Portage County (Village 6.2%, Town 8.3%).
- Village of Coloma Economic Strengths: Access to STH 21 and the I-39 corridor; proximity to natural areas, open space and recreational opportunities; location in prime agricultural area; strong agricultural economy; strong community involvement; public water and sewer; high speed internet access; elementary school; low mill rate; fire and police protection; outstanding library facility and; statewide central location.
- Town of Coloma Economic Strengths: Access to STH 21 and the I-39 corridor; Natural areas, open space and recreational opportunities; location in prime agricultural area; strong agricultural economy; strong community involvement; high speed internet access; proximity to elementary school; outstanding library facility and; low crime.

Action Item: Please bring the background chapters for Utilities and Community Facilities (blue), Agricultural, Natural and Cultural Resources (green) and Economic Development (yellow) to the next meeting.

# VIII. Approval of Goals, Strategies and Recommendations for Housing and Transportation: Not discussed

Action Item: Please bring revised goals, strategies and recommendations for Housing and Transportation to the next meeting (this information was sent out with the last packet).

IX. Review of Goals, Strategies and Recommendations for Chapter 5-7: The first goal for Chapter 7, Economic Development was discussed jointly. While the committees worked separately on the remaining goals.

Action Item: Please bring goals, strategies and recommendations for Utilities and Community Facilities (blue) and Agriculture, Natural and Cultural Resources (green) (this information was sent with the last packet).

- X. Set date and time for next meeting: The next meeting will be as follows:
  - Village of Coloma February 18, 2009 at Anna Follett Memorial Community Center at 6:30 P.M.
  - **Town of Coloma** February 25, 2009 at Anna Follett Memorial Community Center at 6:30 P.M.

Action Item: Kathy Thunes to contact Brenda Ratajcak regarding room availability.

**XI. Adjourn:** 8:30 P.M.

#### SUMMARY OF PROCEEDINGS

#### Village of Coloma Smart Growth Committee

Anna Follett Memorial Community Center Wednesday, February 18, 2009 at 6:30 P.M.

Members Present: Bob Martin, Steve Rodger, Ray Burrows, Margaret Nigbor, Dennis Apps Members Absent: Jon Schubert, John Rought, Tina Shultis, Amy Hunt, Jim Lietz, Ed Bagley, Carl Lietz, Ted Lewko Others Present: Kathy Thunes, Arden Brant, Tom Congdon

Others Absent: Patrick Nehring, Tom Baron

- I. Welcome & Introductions: Meeting started at 6:30 PM.
- Statement of compliance with Wis. Stats. Ch. 19, Subchapter V, Sec. 19.84 regarding Open Meetings: Meeting notice and agenda published per Wis. Stats. Ch. 19.
- III. Public Comment: None
- IV. Approval of January 28, 2009 Summary of Proceedings: SOP approved as submitted.
- V. Meeting Purpose and Objective: The purpose of the meeting was to approve the draft vision statements and the draft goals, strategies and recommendations for housing and transportation; complete the discussion on draft goals, strategies and recommendations for economic development; and introduce and review the background information and draft goals, strategies and recommendations for the Utilities and Community Facilities (Chapter 5) and the Agricultural, Natural and Cultural Resources (Chapter 6).
- VI. Background presentation of Utilities and Community Facilities (blue); and Agricultural, Natural and Cultural Resources (green) - Chapters 5-6: The committee discussed the sub-elements for the utilities and community facilities chapter. A number of changes were suggested. Kathy Thunes presented highlights from the agricultural, natural and cultural resource chapter.

Action Item: Kathy Thunes to revise the text for Utilities and Community Facilities to reflect the changes suggested by the Village Smart Growth Committee.

- VII. Approval of draft vision statements: The draft vision statements were approved as presented.
- VIII. Approval of Goals, Strategies and Recommendations for Housing and Transportation: Changes were briefly discussed and the committee approved the changes as presented.

IX. Review of Goals, Strategies and Recommendations for Chapter 5-7: The committee spent some time discussing the remaining goals for economic development. The draft goals were approved as revised from comments made at the last meeting. The committee then tackled the draft goals for Utilities and Community Facilities. Minor changes were suggest and will be revised and sent out in the next packet. Next the draft goals for agricultural, natural and cultural resources were reviewed. Minor changes were noted for the natural and cultural resource elements.

#### Action Item: Kathy Thunes to bring copy of Wellhead Protection Ordinance and County Groundwater Protection Ordinance to the next meeting.

- X. Set date and time for next meeting: The next meeting will be as follows:
  - Village of Coloma March 17, 2009 at Anna Follett Memorial Community Center at 6:30 P.M.

Action Item: Kathy Thunes to contact Brenda Ratajcak regarding room availability.

**XI. Adjourn:** 9:30 P.M.

#### SUMMARY OF PROCEEDINGS

#### Village of Coloma Smart Growth Committee

Anna Follett Memorial Community Center Tuesday, March 17, 2009 at 6:30 P.M.

Members Present: Bob Martin, Steve Rodger, Margaret Nigbor, Dennis Apps Members Absent: Jon Schubert, John Rought, Tina Shultis, Amy Hunt, Jim Lietz, Ed Bagley, Carl Lietz, Ted Lewko, Ray Burrows Others Present: Kathy Thunes, Arden Brant, Tom Congdon, Jack Schwanke, Mike Patza Others Absent: Patrick Nehring, Tom Baron

- I. Welcome & Introductions: Meeting started at 6:30 PM.
- Statement of compliance with Wis. Stats. Ch. 19, Subchapter V, Sec. 19.84 regarding Open Meetings: Meeting notice and agenda published per Wis. Stats. Ch. 19.
- III. Public Comment: None
- IV. Approval of February 18, 2009 Summary of Proceedings: SOP approved as submitted.
- V. Meeting Purpose and Objective: The purpose of the meeting was to approve the draft goals, strategies and recommendations for natural and cultural resources and Utilities and Community Facilities; review the existing land use map; and introduce the land use chapter.
- VI. Review revisions to the Natural and Cultural Resource Goals, Strategies and Recommendations (agenda item inserted with consensus): Approved as revised.
- VII. Approve Utilities and Community Facilities Chapter and Goals, Strategies and Recommendations: Minor revisions to the chapter and goals, strategies and recommendations were suggested by the committee.

Action Item: Kathy Thunes to revise the text for Utilities and Community Facilities and goals, strategies and recommendations to reflect the changes suggested by the Village Smart Growth Committee.

- VIII. Introduce land use background chapter: Kathy Thunes handed out a power point presentation and discussed the material in the background chapter. She spent time going over the rational for the land use projections.
- IX. Discuss existing land use map (included in packet): Since East Central had not updated the existing land use map, the committee worked with Mike Patza, from EC, on changes that the committee would like to see.

Action Item: Mike Patza to revise the existing land use map and acreage for the next meeting. Kathy Thunes will revise the land use projections to reflect changes due to revisions made to the existing land use map.

X. Mental Mapping Exercise Results and future land use discussion: The group worked with East Central to develop a future land use map.

#### Action Item: East Central to compile future land use map for next meeting.

- XI. Set date and time for next meeting: The next meeting is scheduled for Tuesday, April 14, 2009 at the Coloma Fire Department, 383 Industrial Drive, Coloma at 6:30 P.M.
- XII. Adjourn: 8:30 P.M.

#### SUMMARY OF PROCEEDINGS

#### Joint Meeting of the Village of Coloma Smart Growth Committee and the Town of Coloma Comprehensive Planning Committee

Coloma Fire Department, 383 Industrial Drive, Coloma Tuesday, April 14, 2009 at 6:30 P.M.

Members Present: Bob Martin, Steve Rodger, Ted Lewko, George Wilson, Cheryl Flyte, Mike Mayr, Thomas Pintar, Dennis Apps, Tina Shultis Members Absent: Jon Schubert, John Rought, Amy Hunt, Jim Lietz, Patricia Pintar, Mike Derricks, Ed Bagley, , Carl Lietz, Margaret Nigbor, Ray Burrows Others Present: Kathy Thunes, Tom Baron, Arden Brant, Steve Diercks, Tom Congdon, Jack Schwanke Others Absent: Patrick Nehring

- I. Welcome & Introductions: Committee members introduced themselves to the group.
- Statement of compliance with Wis. Stats. Ch. 19, Subchapter V, Sec. 19.84 regarding Open Meetings: Meeting notice and agenda published per Wis. Stats. Ch. 19.
- III. Public Comment: None
- IV. Approval of March 17 and 23, 2009 Summary of Proceedings:
  - March 17<sup>th</sup> SOP, first Arden Brant, second Tom Congdon. Minutes approved as submitted.
  - March 23<sup>rd</sup> SOP, first George Wilson, second Mike Mayr. Minutes approved as submitted.
- V. Meeting Purpose and Objective: The purpose of the meeting was to review the future land use maps that had been developed by both the Village and Town of Coloma respective committees; approve changes in the goals, strategies and recommendations for the past elements and complete the land use element. If time permits the Intergovernmental Cooperation element will be introduced.
- VI. Group discussion of future land use maps: A spokes person for each committee discussed the future land use maps that the respective committees had developed. No changes had been made to the maps; however a concern was raised that the future land use maps varied for parts of the half mile radius around the Village. While it seemed that both communities were in agreement, a discussion will have to take place as to the display of this information so that both maps are consistent.

# ACTION ITEM: The Village and Town of Coloma should review their future land use maps and discuss any inconsistencies between the two.

- VII. Break into individual committees to finalize revisions to previous elements:
  - Village of Coloma Utilities and Community Facilities and Land Use Chapter & Projections: No changes made to the Utilities and Communities Facilities Chapter or goals. The Village is looking for a copy of the Wellhead Protection Ordinance and Plan. Revisions to the goals may be made in the future if needed.
  - Town of Coloma Transportation, Economic Development, Utilities and Community Facilities, Agriculture and Natural Resources: Minor edits were requested for the goals, strategies and recommendations for the above elements. Minor revisions were requested for the Utilities and Community Facilities background chapter. The strategies and recommendations regarding the recharge area and capture zone may be revised in future when more information is available.

ACTION ITEM: Village of Coloma to continue to look for the Wellhead Protection Plan and ordinance information. Both the Village of Coloma and the Town of Coloma to revisit groundwater protection recommendations in the future.

- VIII. Individual committee discussions of new material:
  - Village of Coloma Land Use Goals, Strategies and Recommendations; Intergovernmental Cooperation: Minor changes were requested for the Intergovernmental Cooperation Background Chapter. No changes were made to the land use goals, strategies and recommendations.
  - Town of Coloma \_ Cultural Resources, Land Use and Intergovernmental Cooperation: Cultural Resources and Intergovernmental Cooperation not discussed. The land use background chapter and future land use projections were discussed, however time did not allow for a conversation about the accompanying goals.
- IX. Set date and time for next meeting: The next meeting will be as follows:
  - Wednesday, May 13, 2009 at 6:30 p.m. (Completion of all draft background chapters and goals through Intergovernmental Cooperation).
  - Wednesday, June 10, 2009 at 6:30 p.m. (Intergovernmental/Public Information Meeting)

# Action Item: Kathy Thunes to contact Brenda Ratajcak regarding room availability.

Note: After the meeting it was decided that the Village would not meet on May 13, 2009. It was felt that the Village could have a quick meeting before the Intergovernmental/Public Informational Meeting to discuss Intergovernmental Cooperation. The Town of Coloma is scheduled to meet on May 13, 2009.

X. Adjourn: 8:00 p.m. – Village of Coloma 9:00 p.m. – Town of Coloma

#### SUMMARY OF PROCEEDINGS

#### Meeting of the Village of Coloma Smart Growth Committee

Anna Follett Memorial Community Center Wednesday, June 10, 2009 at 6:00 P.M.

Members Present: Carl Lietz, Steve Rodger, Margaret Nigbor Members Absent: Bob Martin, Ted Lewko, Dennis Apps, Tina Shultis, Jon Schubert, John Rought, Amy Hunt, Jim Lietz, Mike Derricks, Ed Bagley, Ray Burrows Others Present: Patrick Nehring, Tom Congdon, Tom Baron

#### I. Welcome & Introductions:

- Statement of compliance with Wis. Stats. Ch. 19, Subchapter V, Sec. 19.84 regarding Open Meetings: Meeting notice and agenda published per Wis. Stats. Ch. 19.
- III. Public Comment: None
- IV. Approval of April 14, 2009 Summary of Proceedings: Minutes approved as submitted.
- V. Meeting Purpose and Objective: The purpose of the meeting was to discuss the intergovernmental goals prior to the intergovernmental meeting which follows this on.
- VI. Discussion of Intergovernmental goals, strategies and recommendations: The goals were discussed and the committee approved the goals as written
- VII. Set date and time for next meeting: The next meeting will be as follows:
  - Wednesday, June 10, 2009 at 6:30 p.m. (Intergovernmental/Public Information Meeting)
- VIII. Adjourn: Meeting adjourned at 6:30 p.m.

#### SUMMARY OF PROCEEDINGS

#### Village and Town of Coloma Comprehensive Plan Community/Intergovernmental Input Session

Anna Follett Memorial Community Center Wednesday, June 10, 2009 at 6:30 P.M.

Members Present: Carl Lietz, Steve Rodger, George Wilson, Margaret Nigbor, Mike Mayr, Thomas Pintar, Members Absent: Jon Schubert, John Rought, Amy Hunt, Jim Lietz, Patricia Pintar, Mike Derricks, Ed Bagley, Ray Burrows, Bob Martin, Dennis Apps, Tina Shultis, Ted Lewko, Cheryl Flyte, Dennis Apps Others Present: Kathy Thunes, Tom Baron, Patrick Nehring, Arden Brant, Tom Congdon, Jack Schwanke, Warren Waala, Jared Miller, Arlene Scalzo, David Peterson

Welcome & Introductions: Everyone was welcomed to the meeting and introductions were made.

I. Informal Review & Comment on Plan Components -- "Open House" Period: Existing and proposed land use maps were displayed in the room. Participants were free to take copies of the goals, strategies and recommendations that have been developed for the Economic Development; Housing; Transportation; Utilities and Community Facilities; Agricultural, Natural and Cultural Resources; Land Use and Intergovernmental Cooperation.

#### II. Overview of Planning Process & Progress:

a. Questions from community and/or intergovernmental attendees: The planning process to date was briefly reviewed.

The following comments were received from the group for the Town of Coloma:

- Change future commercial/industrial to mixed use on future land use map. This is the area that may be annexed to the Village in the future. Discuss in land use chapter.
- Add light rail to the future land use map.

The following comments were received from the group for the Village of Coloma:

 Change future residential land use to commercial/industrial for parcel along CTH FF.

The following comments were received from the group that pertained to both the Village and the Town of Coloma:

 Discussed traffic flow issues west of the STH 21 and I39 intersection. Suggestions were made to bring the concerns to the Waushara County Highway Traffic and Safety Commission. Sheriff Peterson creates the agenda, so the Village and Town should request that it be included on the next meeting agenda. The commission meets quarterly. Items to be requested included the addition of a "Truck Entrance" sign west of North 4<sup>th</sup> Avenue and to move the speed limit sign east of its location on the east side of the Village.

#### III. Intergovernmental Review and Discussion of Plan Goals & Future Land Use Map

- a. Factual Content
- b. Additional Information Needed/Omissions
- c. Opportunities for Collaboration, Communication & Coordination

The intergovernmental goals were reviewed by the group. The following comments were made:

- The "New Market Tax Credit (7 year program) should be referenced in the Economic Development Background chapter and intergovernmental cooperation goals.
- Add WHEDA as a support agency for recommendation IC 1.3.1, IC 1.3.2, IC 1.3.3 (T. Coloma)
- Add recommendation to Town and Village plan to work with the Waushara County Highway and Safety Commission (see comment above).
- Add Town recommendation IC 1.5.1 to Village plan.
- Add Village recommendation IC 1.5.9 to Town plan.
- Add Waushara County Sheriff's Department as partner department to Town and Village recommendation IC 1.6.1.
- Consider USDA-Rural Development as source for funding for water and sewer expansion in Village of Coloma.
- IV. Next Steps in the Process: It was explained that the communities would be discussing wellhead protection, the implementation chapter and finalizing the land use maps at the next meeting on July 22, 2009. The project is on track for a fall adoption.
- V. Adjourn: Meeting adjourned at 8:00 p.m.

#### Joint Meeting of the Village of Coloma Smart Growth Committee and the Town of Coloma Comprehensive Planning Committee

Anna Follett Memorial Community Center, Coloma, WI Wednesday, July 22, 2009 at 6:30 P.M.

Members Present: Bob Martin, Steve Rodger, Margaret Nigbor, George Wilson, Cheryl Flyte, Mike Mayr, Thomas Pintar, Carl Lietz Members Absent: Jon Schubert, John Rought, Amy Hunt, Jim Lietz, Patricia Pintar, Mike Derricks, Ed Bagley, Dennis Apps, Tina Shultis, Ray Burrows, Ted Lewko, Others Present: Kathy Thunes, Patrick Nehring, Tom Baron, Steve Diercks, Tom Congdon, Jack Schwanke, Ron Selenske Others Absent: Arden Brant

#### I. Welcome & Introductions

- Statement of compliance with Wis. Stats. Ch. 19, Subchapter V, Sec. 19.84 regarding Open Meetings: Meeting notice and agenda published per Wis. Stats. Ch. 19.
- III. Public Comment: None
- IV. Approval of May 13, 2009 Summary of Proceedings (Town of Coloma):
  - First George Wilson, second Mike Mayr. Minutes approved as submitted.

# V. Approval of June 10, 2009 Summary of Proceedings (Village & Open House/Intergovernmental):

- Minutes for Village approved as submitted.
- Minutes for Open House/Intergovernmental: First George Wilson, second Mike Mayr. Minutes approved as submitted.
- VI. Meeting Purpose and Objective: The purpose of the meeting was to discuss protection of the Village's wellheads; the implementation chapter and the implementation tables.
- VII. Group discussion of future land use maps/wellhead protection and implementation chapter: The future land use maps for the Village and Town of Coloma was displayed. East Central led a discussion on how to display the wellhead protection area, referencing the Village's wellhead protection report. The committees decided to display this information on the map for both municipal wells. The implementation background chapter was introduced and discussed jointly with both committees.

- VIII. Break into individual committees to discuss implementation: The committees broke into two groups to go over the implementation tables. Changes were made and will be incorporated into the final draft documents.
- **IX.** Set date and time for next meeting: The next meeting will be to distribute the completed draft documents and to discuss the next steps toward adoption of the comprehensive plans:
  - Village of Coloma Wednesday, September 23, 2009 at 7:30 p.m.
  - Town of Coloma Wednesday, September 23, 2009 at 6:30 p.m.

# Action Item: Kathy Thunes to contact Brenda Ratajcak regarding room availability.

X. Adjourn: 9:00 p.m. – Village of Coloma 9:30 p.m. – Town of Coloma

#### SPECIAL MEETING OF COLOMA VILLAGE BOARD September 23, 2009

President Diercks called the meeting to order at 730pm. Trustee's present were, Diercks, Congdon, Martin and Rodger. Schubert was excused. Others present were: Kathy Thunes, ECWRP, Gary Shultis, Tina Shultis, Arden Bandt, Dennis Apps, Patrick Nehring, UWEX, Margaret Nigbor, Ray Burrows and Brenda Ratajczak.

Rodger made a motion to approve the agenda. Martin seconded the motion. Motion carried.

Congdon made a motion to approve the minutes from the previous meeting. Martin seconded the motion. Motion carried.

A copy of the Draft Comprehensive Plan 2030 was distributed. Kathy Thunes reviewed the procedure for proceeding with the adoption of this plan. A Public hearing of the Plan Commission was scheduled for Oct 29, 2009 at 6pm, with a Public Informational meeting prior at 5:30pm. A notice will need to be posted 30 days prior to this meeting. An additional notice will be placed in the Waushara Argus on Sept 30, 2009. The Plan Commission, by resolution, will make their recommendation to the Village Board, for their meeting also on Oct 29, 2009. An ordinance will need to be passed by the Village Board to adopt the Plan. The first reading of the ordinance could be also completed at the October 29, 2009 Village Board meeting.

Copies of the Draft Comprehensive Plan 2030 are available for review in the Coloma Public Library, Wautoma Public Library, UWEX office at Waushara County Courthouse, Village office, and on East Central's website at <a href="http://www.eastcentralrpc.org/PlanVillageColoma/">http://www.eastcentralrpc.org/PlanVillageColoma/</a>

All changes prior to adoption need to be sent to Kathy. Any future changes need to follow the procedure as outlined in the statutes.

Congdon made a motion to adjourn the meeting. Martin seconded the motion. Motion Carried, meeting adjourned.

Brenda Ratajczak Village of Coloma Clerk/Treasurer

#### G-22 PUBLIC HEARING Comprehensive Plan 2030 October 29, 2009 – 5:30pm

Gary Shultis made a motion to open the Public Hearing. Carl Lietz seconded the motion. Motion carried.

No questions were asked during the public hearing.

Lietz made a motion to close the hearing. Schwanke seconded the motion. Motion carried.

#### PLAN COMMISSION Public Hearing on Comprehensive Plan 2030 October 29, 2009 - 6pm

Chairman Bob Martin called the meeting to order. Members in attendance were: Martin, Lietz, Shultis, Schwanke, and Burrows. Rodger and Chilewski were excused. Others in attendance were Kathy Thunes, ECWRP, Patrick Nehring, UW Extension, and Brenda Ratajczak.

Brenda read the resolution to approve the Comp Plan 2030. There were some corrections to the Plan that need to be added to the resolution. Arden Bandt's name is mispelled, table of contents shows Village of Lohrville, not Village of Coloma; and the Existing zoning referred to on the blue sheet in Chapter 8 should be changed to Future Land Use. These corrections were incorporated into the resolution.

Lietz made a motion to approve the resolution. Schwanke seconded the motion. A roll call vote was used: Martin-aye, Lietz-aye, Schwanke-aye, Burrows-aye and Shultis-aye. Rodger and Chilewski were absent. Motion carried.

Schwanke made a motion to adjourn the Plan Commission. Shultis seconded the motion. Motion carried.

Brenda Ratajczak Village of Coloma Clerk/Treasurer

## VILLAGE OF COLOMA MEETING NOTICES 155 N. FRONT STREET, COLOMA, WI

Final Agenda

#### Plan Commisson October 29, 2009 6:00 P.M.

- 1. Call to order; roll call
- 2. Discussion on Comprehensive Plan 2030
- 3. Resolution to recommend approval to Village Board
- 4. Adjourn

Requests from persons with hearing or sight disabilities who need assistance to participate in this meeting should be made to the Village Clerk's Office at (715)228-2871 with as much advance notice as possible

AGENDA POSTING INFORMATION DATE / / 2009 POSTED BY

It is possible that members of, and possibly a quorum of, members of other governmental bodies of the municipality may be in attendance at the above stated meeting to gather information. No action will be taken by any governmental body at the above stated meeting other than the governmental body specifically referred to above in this notice

## Village and Town of Coloma begin comprehensive planning effort

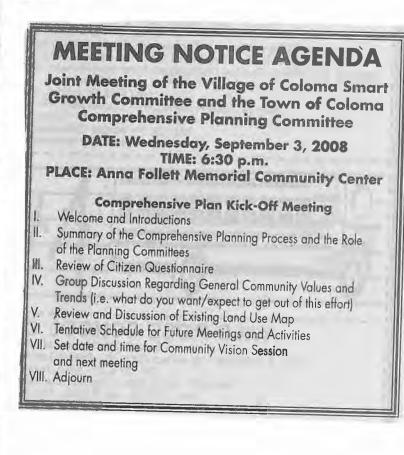

The Village of Coloma Smart Growth Committee along with the Town of Coloma Compre- hensive Planning Committee will be meeting on Wednesday, Sept. 3 at the Anna Follet Memorial Community Center in Coloma at 6:30 p.m. to formally begin the Village of Coloma and Town of Coloma Comprehensive Planning efforts.

The Village of Coloma Smart Growth Committee and the Town of Coloma Comprehensive Planning Committee, along with UW-Extension, County staff and local officials will be working with East Central Wisconsin Regional Planning Commission (ECWRPC) to develop a land use plan that will provide guidance to elected officials as the Village and Town move into the future. The planning process will run concurrently with the other planning efforts in the county and is expected to be completed at the end of 2009.

Following introductions, a summary overview of the planning process and the role of the planning committees in the process will be provided by ECWRPC planning staff. This will be followed by a group discussion regarding general community values and trends in which committee members will be encouraged to share their expectations for the plan and its process. A map of the existing land use will be used to facilitate a discussion identifying future opportunities. planning issues and challenges that will need to be addressed in the plan.

Public input and participation is important. Citizens are welcome to attend meetings which will be posted at a number of locations in the area and on ECWRPC (website). Interested residents can also be involved or follow the process by checking the ECWRPC website at www.eastcentralrpc.org/planvillagecoloma or www.eastcentralrpc.org/plantowncoloma.

A communitywide vision session will be held in early fall to gather input from local residents. For more information please contact Kathleen Thunes at East Central Wisconsin Regional Planning Commission, 132 Main St., Menasha W1 54952; (920)751-4770; or kthunes@eastcentralrpc.org.

## Village of Coloma Comprehensive Plan continues to progress

Steady progress has been made on the Village of Coloma's Comprehensive Plan since the kick-off meeting in September 2008. Following the initial meeting with the Village of Coloma Smart Growth Committee, a community wide vision session was held to gather input from interested residents.

Overall strengths that were indentified included the village's prime location at the crossroads of STH 21 and 1-39, its police department, elementary school, and the availability of public sewer and water and the accessibility of land for development near the intersection of STH 21 and 1-39. While economic development concerns remained high in people's minds, the consensus was that the Village of Coloma is poised to move forward.

Draft visions statements have been developed by the Village of Coloma's Smart Growth Committee for each of the nine elements. The housing and transportation elements have been discussed and the draft goals have been composed. The next meeting of the Village Smart Growth Committee is scheduled for Wednesday, Feb. 18. At this meeting East Central Wisconsin Regional Planning Commission (ECWRPC) staff will continue to lead a discussion on economic and present development background chapters and draft goals for Utilities and Community Facilities and Agricultural, Natural and Cultural Resources.

Citizen input and participation is important. Citizens are welcome to attend meetings which will be posted at various locations around the village. Interested residents can also be involved or follow the process by checking the ECWRPC website at www.eastcentralrpc. org/planVillageColoma.

For more information please contact Kathleen Thunes at East Central Wisconsin Regional Planning Commission, 400 Ahnaip St., Suite 100, Menasha WI 54952; (920)751-4770; or kthunes@eastcentralrpc.org.

# Public input sought in Coloma as comprehensive plan nears completion

The Village and Town of Coloma are nearing completion of their respective "Smart Growth" Comprehensive Plans and are seeking public and intergovernmental input. In cooperation with East Central Wisconsin Regional Planning Commission, a joint Community/ Intergovernmental Input Session will be held at the Anna Follett Memorial Community Center in Coloma on Wednesday, June 10 at 6:30 p.m.

Interested community members, as well as representatives from neighboring communities, government and non-profit agencies are invited to review and comment on the Village and Town of Coloma's preliminary future land-use maps, along with goals, strategies and recommendations for economic development, transportation, housing, utilities and community facilities, agriculture, natural and cultural resources, and intergovernmental cooperation.

From 6:30 to 7 p.m., an 'open house' will be held with materials displayed in a manner that will allow for review and interaction with East Central staff and the Smart Growth and Comprehensive Planning Committee members.

Beginning at 7 p.m., a discussion on intergovernmental cooperation will take place; community members are encouraged to actively participate in this portion of the session as well. In addition to this meeting, citizens are welcome to attend all meetings related to the development of the Comprehensive Plans for the Village of Coloma and the Town of Coloma. Meeting notices are posted on 'the ECWRPC website at: www.eastcentralrpc. org/PlanVillageColoma (Village of Coloma) or www.eastcentralrpc. org/PlanTownColoma (Town of Coloma), and at various locations throughout the village.

For more information please check **out** the websites indicated above or contact Kathleen Thunes at East Central Wisconsin Regional Planning Commission, 400 Ahnaip St., Suite 100, Menasha WI 54952; 920-751-4770; or kthunes@eastcentralrpc.org.

# Community/Intergovernmental

## Anna Follett Memorial Community Center 6:30 to 8:00 PM

6:30 PM: Community "Open House" 7:00 PM: Intergovernmental Forum

## The session will allow you to:

- Learn more about "smart growth" comprehensive planning and the planning process;
- See the proposed future land use for the Village and Town;
- Review goals and recommendations that will help the Village and Town achieve its vision; and
- Talk to Smart Growth and Comprehensive Planning Committee members, planning staff, and others regarding your thoughts on the plan's progress.

### **\* \* \* \* \***

Your input is important and will play a key role in the plan!

Check out the project websites at: <u>www.eastcentralrpc.org/PlanVillageColoma</u> and <u>www.eastcentralrpc.org/PlanTownColoma</u>

This planning process is made possible by funding from the State of Wisconsin, Waushara County, and the Village and Town of Coloma In cooperation with the East Central Wisconsin Regional Planning Commission

#### VILLAGE OF COLOMA NOTICE OF PUBLIC INFORMATIONAL MEETING & PUBLIC HEARING COMPREHENSIVE PLAN 2030

**PLEASE TAKE NOTICE THAT** the Village of Coloma Plan Commission will hold a public informational meeting and public hearing on the proposed adoption of the Village of Coloma Comprehensive Plan 2030. The public informational meeting will be held on **October 29, 2009 at 5:30pm** at the Anna Follett Memorial Center located at 155 N Front St, Coloma WI; public hearing to follow at **6pm**. The Village of Coloma Board will take action following the public hearing on the proposed adoption of the Village of Coloma Comprehensive Plan 2030 at the monthly village board meeting on **October 29, 2009**.

The Comprehensive Plan is a statement of public policy concerning the conservation and development of the Village. The plan provides a guide to where future growth and development should occur within and around the Village over the next 20 years. When the Village makes future decisions concerning land use development, the plan will be consulted. The plan inventories and analyzes the Village's physical setting, natural features, land use, population figures, economics, housing stock, transportation, and community facilities. Using these inventories and the plan's goals and objectives, a preferred land use plan for the Village of Coloma was developed.

In anyone would like additional information, please contact Brenda Ratajczak, Village Clerk at (715) 228-2871 or Kathy Thunes at East Central Wisconsin Regional Planning Commission (920) 751-4770 or email <u>kthunes@eastcentralrpc.org</u>.

Copies of the proposed Village of Coloma Comprehensive Plan 2030 are available for review at the following locations:

- Village of Coloma Clerk's Office, 155 N Front St, Coloma, during regular business hours
- Coloma Public Library, 155 N Front St Coloma
- Wautoma Public Library, 410 W Main St Wautoma
- University of Wisconsin Extension Offices (Room 34 in Waushara County Courthouse), 209 S St. Marie St, Wautoma
- East Central Wisconsin Regional Planning Commission, 132 Main St, Menasha or www.eastcentralrpc.org

If special arrangements are necessary to accommodate individuals with disabilities, please contact Brenda Ratajczak, Village Clerk-Treasurer (715) 228-2871 at least 2 days prior to the hearing.

# Public Informational Meeting and Public Hearing to be held on the Village of Comprehensive Plan 2030

The Village of Coloma is pleased to announce that the draft Village of Coloma Comprehensive Plan 2030 is available for public review. Working with East Central Wisconsin Regional Planning Commission (ECWRPC), the Village of Coloma Smart Growth Committee, along with elected commission officials, plan members and interested citizens developed a Comprehensive Plan that will provide guidance to elected officials as the Village moves into the future.

The Village of Coloma Plan Commission will be holding a public informational meeting and public hearing on the proposed adoption of the plan on Oct. 29 at the Anna Follett Memorial Center at 155 N. Front Street, Coloma. The public informational meeting will be held at 5:30 p.m.; public hearing to follow at 6 p.m. The Village of Coloma Board will take action following the public hearing on the proposed adoption of the Village of Coloma Comprehensive Plan 2030 at the monthly village board meeting on Oct. 29.

Comments on the comprehensive plan will be

accepted in person at the public hearing or in writing no later than the public hearing date. Written comments can be submitted to Brenda Ratajczak, Village Clerk at P.O. Box 353, Coloma, WI 54930. For additional information, please contact Brenda Ratajczak, Village Clerk at 715-228-2871 or Kathy Thunes at East Central Wisconsin Regional Planning Commission at 920-751-4770 or email kthunes@ eastcentralrpc.org. Copies of the proposed plan are available at the Village of Coloma Clerk's Office; Coloma and Wautoma public libraries; UW-Extension Office, Waushara County Courthouse; and at East Central Wisconsin Regional Planning Commission, 400 Ahnaip St., Suite 100, Menasha WI or www.eastcentralrpc.org.

### Managing Rural Residential Development

By Anna L. Haines, Ph.D. Assistant Professor, UW-Stevens Point and Extension Specialist, Center for Land Use Education

As many communities begin to prepare their comprehensive plans and consider the various elements required under the comprehensive planning law, the relationship between agricultural or open space preservation with housing can be both confusing and contentious. Especially for those communities that are experiencing growth pressure struggling to manage rural residential development along with other community concerns can be difficult. One primary goal of many communities is to balance residential development with agricultural needs, open space, and natural resources while trying to retain a sense of place. Several plan implementation tools are available that local governments can use including, but not limited to: Large minimum lot size, purchase of and transfer of development rights, overlay zones for shorelands, hillsides, and other environmentally sensitive areas, and conservation subdivisions.

This is the first of two articles addressing rural residential development. In this article, I provide a brief definition of each tool, how each tools works, potential benefits, limitations, and references. In the following article, we will provide a more in-depth look at one of these tools – conservation subdivisions.

#### Which Tool is "Right" for Our Community?

Each community should decide on the types of tools they want to use. Recognize that your community can use these tools together – they are not mutually exclusive. It

is reasonable, for example, to have a purchase of development rights program in place along with overlay zones and a conservation subdivision ordinance. Below is a list of criteria to consider when choosing plan implementation tools:

- Does your community have an accepted plan that identifies rural residential development or at least sprawl as an issue?
- Does the plan specify goals and objectives that address how your community will contend with rural residential development?
- Will the tool accomplish any of your community's goals and objectives?
- Is the tool politically acceptable?
- Can the local government or some other organization administer the new tool given current personnel or is another position or committee necessary?
- Are there any enforcement issues the local government personnel would need to contend with?
- To be effective, would the same tool need to be used by adjoining communities and is a cooperative effort possible?

Answering the above questions will give you a better idea which tools are appropriate to use in your community. Avoid choosing to use any plan implementation tool before you have done your homework and understand how that tool works and the implications for administering and enforcing it.

Tool	Definition	How it Works	Potential Benefits	Limitations
Large minimum lot size	A common type of agricultural zoning that says that a farm cannot be broken into parcels below a certain size for farming purposes. Daniels and Bowers 1997: 117.	Designate minimum lot size within an agricultural zone. Determined by legal and political acceptance balanced with effective land protection. Examples: some Oregon counties – 80-acre minimum; McHenry County, IL – 40-acre	Can be changed over time as circumstances change. Keep farmland in large blocks to maintain economic viability. Easy to administer.	Can be ineffective if lot size is reduced to a size that makes farming impossible.
		minimum; Pennsylvania – 50- acre minimum.		
Purchase of development rights	A landowner agrees to sell the rights to develop his/her property to a local government, land trust or DNR. The development rights to a piece of property can be separated from the bundle of rights that go with the land. With the sale of that development right, a conservation easement is put into effect which restricts development in perpetuity. The value of the development right is determined by the difference between the market value and agricultural value of the farmland.	Local government or land trust must determine how to buy	Seller gets sale price and possibly property and estate tax reduction. Voluntary and permanent means of land use control. Avoids property rights outcry that zoning can elicit.Equitable method of containing sprawl, protecting valuable farmland and openspace. Property is retained on tax rolls and is privately owned and managed.Can separate funding and managing conservation easements from administration of program.	Substantial acquisition costs involved. Can result in scattered preservation if only some landowners participate. Property owners may not donate development rights if they know they can be paid. Can undermine the power of regulation by creating incentive-based expectations. A challenge to administer and find funds.

### **Tools for Managing Rural Residential Development**

### **Tools for Managing Rural Residential Development (continued)**

Similar to a DDD program in	Must have a comprehensive	Drovidoo oortoipty about where	Look of community willnessor to

development rights from the bundle of rights that go with the land and a conservation easement is put into effect. Rather than the local government purchasing the development rights to a property, a TDR program transfer the "rights to develop" from one area to another. The property owner still sells his/her development rights, but those rights are bought by a developer. In turn, the developer can use those development rights to create a denser subdivision, for example. Daniels and Bowers 1997.	Transfer the "rights to develop" from one area – a "sending" or preservation area - to another – "receiving" or development area. The costs of purchasing the easements are recovered from developers who receive the building bonus. Buying development rights is similar to a PDR program, but more controlled than PDR. Designate sending and receiving areas. The components of a TDR program include a preservation zone, a growth area, a pool of development rights, and a procedure for transferring development rights.	Creates incentive for developers to buy development rights rather than the local government needing to find a source of funds to purchase them. Allows higher density (developer incentive) than zoning ordinance might allow. Creates a competitive market between sellers and buyers.	Misconceptions about the concept of density and meaning of "higher" density. Program depends on a stable and predictable real estate environment. A consensus is necessary to place conservation easements on agricultural areas while allowing for an increase in development densities or "bonuses" in other areas. Can be a challenge to administer.
A set of zoning requirements that is described in the ordinance text, is mapped, and is imposed in addition to those of the underlying district. It is a technique for imposing more restrictive standards for a certain area than those specified under basic zoning. Development within the overlay zone must conform to the requirements of both zones or the more restrictive of the two. It usually is employed to deal with special physical or cultural characteristics present in the underlying zone, such as flood plains, fragile environments, or historical areas. Schiffman 1999.	onto usually already zoned areas, such as a residential zone around a lake. The ordinance must specify and map the area that is within the overlay zone. Other types of overlay zones include: Hazards overlay zones, such as floodplains; Hillside/slope overlay zones; Historic preservation overlay	Communities can provide additional protection to environmentally sensitive areas without changing underlying zoning. Straightforward to administer.	Property owners, developers and other may not understand with which regulations they need to work. Like zoning, variances are possible and can dilute the power and usefulness of this type of zoning.
	to separate his/her development rights from the bundle of rights that go with the land and a conservation easement is put into effect. ### An Innovative Tool for Managing Rural Residential Development: A Look at Conservation Subdivisions

by Anna Haines, Ph.D.

This is the second of two articles addressing rural residential development. The <u>previous article on rural residential development</u> provided a definition of four related management tools (large minimum lot size, purchase of and transfer of development rights, and conservation subdivisions), and explained briefly how each tool worked, its potential benefits and limitations, and provided a list of references. In this article, I will provide a more in-depth look at conservation subdivisions.

The comprehensive planning law (or "Smart Growth" law) specifies nine elements that must be in the comprehensive plan. Among them is the implementation element that needs to outline the types of plan implementation tools a community will use to implement its plan. One primary goal of many communities is to balance residential development with agricultural needs, open space, and natural resources while trying to retain a sense of place. This kind of goal can make an important link between the housing, and agriculture, cultural and natural resources element of the comprehensive plan. Consideration of the goals and objectives within the comprehensive plan is necessary as the community considers the types of tools it will use to achieve its plan. One potentially useful tool to achieve the above goal is to describe conservation subdivisions as a *floating* zoning district or a conditional use in residential districts in the local zoning or land division code.

A model conservation subdivision ordinance was prepared by UW Extension. Local governments are not required to adopt this ordinance (see Ohm 2000), but may find it useful in crafting their own conservation subdivision ordinance.

#### **Conservation Subdivisions: A Definition**

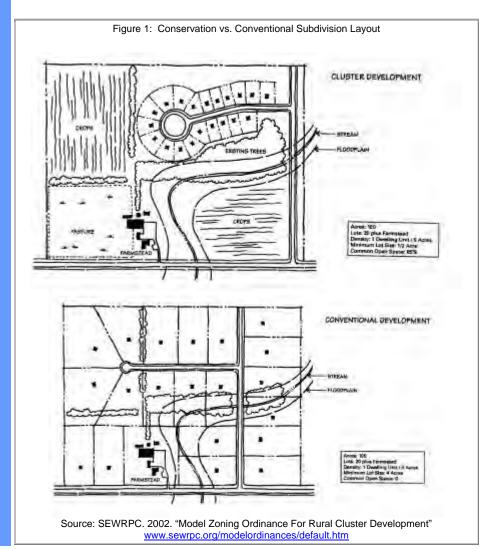

Conservation subdivisions are characterized by common open space and clustered compact lots. The purpose of a conservation subdivision is to protect farmland and/or natural resources while allowing for the maximum number of residences under current community zoning and subdivision regulations. In

some cases a greater density (density bonus) may be offered in the local ordinance to encourage this approach to residential development planning. Generally, this tool is used for parcels 40 acres or larger.

#### **Development Density**

One interesting feature of conservation subdivisions is that they are density neutral (except where a density bonus is offered). What does density neutral mean? Many people assume that a conservation subdivision automatically implies a reduction in the number of lots allowed on a parcel of land. Actually, the same numbers of lots are built in a conservation subdivision as would be built in a conventional subdivision. Thus, a conservation subdivision maintains the same level of density as a conventional subdivision. Conventional lot-by-lot subdivisions spread development evenly throughout a parcel without consideration to environmental or cultural features (Ohm 2000).

The primary difference between conservation subdivisions and conventional ones involves the location of the homes on one part of the parcel, i.e., the homes are clustered. Other changes involve management and ownership of the land that has been left for preservation.

#### **Open Space Design, Use and Ownership Options**

Conservation subdivision ordinances generally require permanent dedication of 40% or more of the total development parcel as open space. Open space design requirements often include contiguity and connection to other open space or conservation areas. Open space uses may include agriculture, forestry or outdoor recreation and in some cases has included use for waste water disposal or sports facilities in urbanizing areas. There are a variety of ownership choices for the open space (individual residential lots are owned as in conventional subdivisions): The original landowner can retain ownership of the land and continue to use it as a farm, for example (usually agricultural use is limited; a confined animal feed lot is an inappropriate use, while a vegetable farm is appropriate); a homeowner's association could manage it, it can be held as individual outlots for each of the building lots, or a local government or a land trust can manage the property for conservation purposes or outdoor recreation.

#### Consolidated infrastructure and reduced development costs

Clustering homes reduces the amount of infrastructure. For example, the linear miles of road are reduced; thus, the associated costs of construction, operations and maintenance are also reduced. As well it is possible to share wells and septic systems in these clustered developments. However, placement of wells and septic systems must be carefully designed to prevent unwanted uptake of wastewater into private wells.

#### **Marketing amenities**

Conservation subdivisions are desirable from a developer/realtor perspective. They appeal to potential homeowners who want easy access to open space for the views and/or for a range of outdoor activities, i.e., a "golf course" development without the golf course.

#### How it works

One of the more popular methods is advocated by Randall Arendt who has outlined a four step process. The process begins with the community identifying the cultural and natural resources that are valued on a specific parcel earmarked for development. This communication results in (i) identifying primary and secondary conservation areas, (ii) designing open space to protect them, (iii) arranging houses outside of those protected areas, and (iv) finally laying out streets, lots and infrastructure. Often between 40% to 80% of the site is permanently set aside for open space (Arndt 1992, Minnesota Land Trust 2000, Natural Lands Trust).

#### **Potential Benefits**

Conservation development or subdivisions **potentially** can benefit a community in a variety of ways:

- Achieves a community goal of preserving open space at the same density standard as is outlined in current ordinances.
- Establishes an open space network, if done within the context of a comprehensive plan and these types of developments/subdivisions are purposefully linked together. Continuous open space (farmland, forest or other natural resources) allows for greater benefits for the environment, i.e., habitat preservation for wildlife, and for a local economy if

dependent on agriculture and/or tourism. This open space network also can extend and join recreational trails.

- None of the land is taken for public use unless the developer/owners want it to be.
- Does not require public expenditure of funds.
- Does not depend on landowner charity.
- Does not involve complicated regulations for shifting rights to other parcels.
- Does not depend upon the cooperation of two or more adjoining landowners to make it work.
- Provides a quality residential and recreational environment.

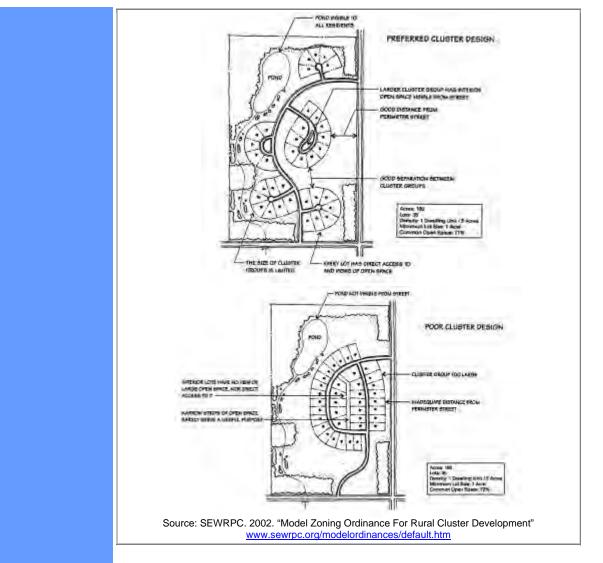

Source: Better Designs for Development in Michigan and Minnesota Land Trust and University of Minnesota 2001.

#### Limitations

While conservation subdivisions can achieve a variety of benefits, there are a number of limitations to consider:

- Conservation subdivisions are not a panacea. Used alone they cannot fully accomplish goals related to establishing and preserving open space or managing residential development.
- These subdivisions should connect to a broader network of conservation areas, if not a community will have a chopped up landscape.
- Conservations subdivisions not attached to already developed areas and not connected to services can result in poor land use practices.
- If one goal of your community is to create affordable housing, conservation subdivisions may not provide this housing option. Many conservation subdivisions are expensive, and are marketed to "high end consumers." On the other hand, there is no reason why these types of subdivisions cannot include more affordable housing.
- If a goal of the community is to promote development that is less dependent on the automobile, conservation subdivisions may not help.
- Technical assistance is important. Poorly designed conservation subdivisions may not achieve open space goals of the community.

Figure 2: Good vs. Poor Cluster Design

#### Guidelines for conservation subdivision development and design:

- Conservation design is not a panacea
- Setting goals in the community's planning framework is critical.
- It is important to have good resource information
- Think big and plan for a large open space network
- Ordinances should create incentives and reduce barriers
- Open space should be diligently designed, not just set aside
- Water quality and quantity is paramount
- The management of the protected areas is critical
- Conservation development must be profitable
  - Many of the barriers to change are not technical, but institutional

#### Is This Tool "Right" for Our Community?

Each community should decide on the types of land management tools they

want to use. Recognize that your community should choose a number of tools rather than rely on one exclusively. The reason to choose a group of tools is to bring strength where one tool is weak and to send consistent signals to the development community and property owners regarding appropriate and planned uses for particular parcels. It is reasonable, for example, to have a purchase of development rights program in place along with overlay zones and a conservation subdivision ordinance. Below is a list of criteria to consider when choosing plan implementation tools, including conservation subdivisions:

- Does your community have an accepted plan that identifies rural residential development, open space, or sprawl as an issue?
- Does the plan specify goals and objectives that address how your community will contend with rural residential development?
- Will the tool accomplish any of your community's goals and objectives?

Is the tool politically acceptable? Can the local government or some other organization administer the new tool given current personnel or is another position or committee necessary?

Are there any enforcement issues local government personnel would need to contend with?

To be effective, would the same tool need to be used by adjoining communities and/or is a cooperative effort possible?

Answering the above questions will give you a better idea which tools are appropriate to use in your community. Avoid choosing any plan implementation tool before you have done your homework. Understand how that tool works and the implications for administering and enforcing it.

# Better Designs for Development in Michigan

### PUTTING CONSERVATION INTO LOCAL LAND USE REGULATIONS

ocal communities can take control of their destinies so that conservation goals will be achieved simultaneously with development objectives, in a manner that is fair to all parties concerned. This "bird's-eye" perspective shows a new way of designing residential developments which differ dramatically from the current land consumptive approach typical of most Michigan communities. In the subdivision shown above, the developer can build the maximum number of homes permitted under the community's zoning, while at the same time permanently protecting over half of the property, adding it to an interconnected network of conservation lands. The property illustrated above has been used elsewhere in this booklet to demonstrate the principles of "conservation planning/ design." If you would prefer to see new development create more livable communities and in the process conserve irreplaceable natural resources such as prime farmlands, forest land and wildlife habitat, this approach may be right for your community. I-15

# THE CONSERVATION PLANNING/DESIGN CONCEPT

Each time a property is developed (especially for residential purposes), an opportunity exists for adding land to a community-wide network of conservation lands. Although such opportunities are seldom taken in most communities, this situation could be reversed fairly easily by making several small but significant changes to a community's land use plan and regulations

Simply stated, Conservation Planning/Design rearranges the development on each parcel as it is

being planned so that only half (or less) of the buildable land is consumed by lots and streets. Without controversial "down zoning," the same number of lots can be developed, but in a less land consumptive manner, allowing the balance of the property to be permanently protected and added to an interconnected network of conservation lands. This "density neutral" approach provides a fair and equitable way to balance conservation and development objectives.

# FOUR KEY CONSERVATION TOOLS

Experience around the country has shown communities which are likely to be successful at conserving significant amounts of land on an on-going basis incorporate the following techniques into their community planning:

#### **1** Envisioning the Future: Performing "Community Audits"

Successful communities have a realistic understanding of their future. The audit projects past and current development trends into the future so that officials and residents may easily see the longterm results of continuing with current land use regulations. Communities use this knowledge to periodically review and adjust their goals and strategies for conservation and development.

## **2**Identifying Networks of Conservation Lands

Successful communities have a good understanding of their important natural, scenic and historic resources. They establish reasonable goals for conservation and development that reflect their special resources, existing land use patterns and anticipated growth. Their Land Use Plans document these resources, goals and policies. The plan contains language about the kinds of ordinance updating and conservation programs necessary for those goals to be realized. A key part of the Land Use plan is a Map of Potential Conservation Landshat is intended to identify the location of potential conservation lands in each development as it is being laid out.

#### **3** Conservation Zoning: A "Menu of Choices"

Successful communities have legally defensible, well-written zoning regulations that meet their "fair share" of future growth and provide for a logical balance between community goals and private landowner interests. They incorporate resource suitabilities, flexibility, and incentives to require the inclusion of permanent conservation lands into new development. The four zoning options summarized in this publication, and described in detail in the Better Designs for Developmenthanual, respect the property rights of landowners and developers without unduly impacting the remaining natural areas that make our communities such special places in which to live, work and recreate.

#### **4** Conservation Design: A Four Step Process

Successful communities recognize that both design standards and the design process play an important part in conserving a community's natural and scenic resources. Such communities adopt land use regulations which require site planning while identifying the special features of each property, and introduce a simple methodology showing how to lay out new development, so that the majority of those special features will be permanently protected in designated conservation areas or preserves. To a considerable extent, these areas can be pre-identified in the Land Use Plans' Map of Potential Conser-vation Landsso that as each area is developed it will form an integral part of a community-wide network of protected conservation lands, as noted above.

# ENVISIONING THE FUTURE

PERFORMING "COMMUNITY AUDITS"

The future that faces most communities in Michigan under current zoning practices is the systematic conversion of every unprotected acre of buildable land into developed uses. Most local ordinances allow, encourage and in many cases mandate standardized layouts of "wall-to-wall lots." Over a period of time this process produces a broader pattern of "wall-to-wall sprawl" (see Figure 1). The "community audit" visioning process helps local officials and residents see the ultimate result of continuing to implement current land-use policies. The process helps start discussions about how current trends can be modified so that a more desirable future is ensured.

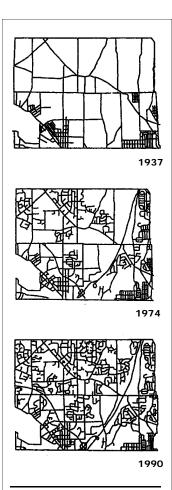

Figure 1 The pattern of "wall-towall subdivisions" that evolves over time with zoning and subdivision ordinances which require developers to provide nothing more than houselots and streets.

No community actively plans to become a bland expanse of suburban-type "sprawl." However, most zoning codes program exactly this outcome. Communities can perform audits to see the future before it happens, so that they will be able to judge whether a mid-course correction is needed. A community audit entails:

#### Numerical Analysis

The first step involves a numerical analysis of growth projections, both in terms of the number of dwelling units and the number of acres that will probably be converted into houselots and streets under present codes.

#### Written Evaluation

The second step consists of a written evaluation of the land-use regulations that are currently on the books, identifying their strengths and weaknesses and offering constructive recommendations about how they can incorporate the conservation techniques described in this booklet. It should also include a realistic appraisal of the extent to which private conservation efforts are likely to succeed in protecting lands from development through various nonregulatory approaches such as purchases or donations of conservation easements or fee title interests.

#### "Build-Out" Maps

The third step entails mapping future development patterns on a map of the entire community (see Figure 2). Alternatively, the "build-out map" could focus only on selected areas in the community where development is of the greatest immediate interest, perhaps due to the presence of special features identified in the Land Use Plan or vulnerability due to development pressures.

Figure 2 A matching pair of graphics, taken from an actual "build-out map," showing existing conditions (mostly undeveloped land) contrasted with the potential development pattern of "checkerboard suburbia" created through conventional zoning and subdivision regulations.

The following parts of this booklet describe practical ways in which communities can take control of their destinies so that conservation goals will be achieved simultaneously with development objectives, in a manner that is fair to all parties concerned. I-17

# IDENTIFYING NETWORKS OF CONSERVATION LANDS

Ithough many communities in Michigan have adopted Land Use Plans which outline the need to protect their natural, aesthetic and historic resources, very few have taken the next logical step of identifying these areas and creating a Map of Potential Conservation Lands

Such a map is the first step for any community interested in conserving natural and aesthetic resources in an interconnected network. The Map of Potential Conservation Landsserves as the tool which guides decisions regarding which land to protect in order for the network to eventually take form and have substance.

A Map of Potential Conservation Landsually starts with information contained in the community's existing planning documents. The next task is to identify two kinds of resource areas. Primary Conservation As comprise only the most severely constrained lands, where development is typically restricted under current codes and laws (such as wetlands, flood plains, and areas where slopes exceeding 20-25% predominate). Secondary Conservation Areas include all other locally noteworthy or significant features of the natural or cultural landscape. This may include features such as mature woodlands, wildlife habi-

Figure 3 Part of a Map of Potential Conservation Lands showing roads, parcel lines, historic structures (large dots), and the following resource areas: wetlands/floodplains (dark gray), woodlands (medium gray), open fields and pastures (white), and prime farming soils (diagonal hatched lines).

tats and scenic roadways, prime and unique farmlands, prime timberlands, groundwater recharge areas, greenways and trails, river and stream corridors, historic sites and buildings, and scenic viewsheds. These Second-ary Conservation Aras are often best understood by the local residents who may be directly involved in their identification. Usually under most community land use regulations these resource areas are totally unprotected and are simply zoned for one kind of development or another.

A base map is then prepared on which the Primary Conservation Anas have been added to an inventory of lands which are already protected (such as parks, land trust preserves, and properties under conservation easement).Clear acetate sheets (or GIS Data Layer) showing each kind of Secondary Conservation Arare then laid on top of the base map in an order reflecting the community's preservation priorities (as determined through public discussion).

This "sieve mapping" process will reveal certain situations where two or more conservation features appear together (such as woodlands and wildlife habitats, or farmland and scenic viewsheds). It will also reveal gaps where no features appear.

Although this exercise is not an exact science, it frequently helps local officials and residents visualize how various kinds of resource areas are spatially related to one another, and enables them to tentatively identify both broad swaths and narrow corridors of resource land that could be protected in a variety of ways. Figure 3 illustrates a portion of a township map which has followed this approach.

The planning techniques which can best implement the community-wide Map of Potential Conservation Lands are **Conservation Zoning** and **Conservation Design**. These techniques, which work hand in hand, are described in detail below. Briefly stated, **Conservation Zoning** expands the range of development choices available to landowners and developers. And just as importantly, it also eliminates the option of creating full-density suburban sprawl layouts that convert all land within new developments into new lots and streets.

The second technique, **Conservation Design**, devotes half or more of the buildable land area within a development as undivided permanent conservation lands. Not surprisingly, the most important step in designing a new development using this approach is to identify the land that is to be preserved. By using the community-wide Map of Potential Conservation Lands a template for the layout and design of conservation areas within new developments, an interconnected network of conservation lands spanning the entire community is eventually created.

Figure 4 shows how the conservation lands in three adjoining developments has been designed to connect, and illustrates the way in which the Map of Potential Conservation Landsan become a reality.

Figure 5 provides a bird's-eye view of a landscape where an interconnected network of conservation lands has been gradually protected through the steady application of conservation zoning techniques and conservation design standards.

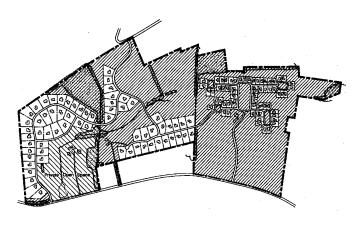

Figure 4 The conservation lands (shown in gray) were deliberately laid out to form part of an interconnected network of open space in these three adjoining subdivisions.

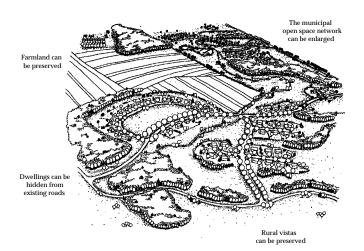

Figure 5 The end-result of applying the techniques described in this booklet is illustrated in this perspective sketch prepared by the Montgomery County Planning Commission.

# CONSERVATION ZONING

A "MENU" OF CHOICES

s mentioned previously the main reason that most new development in Michigan consists of nothing more than new lots and streets is that most communities have adopted a very limited planning model whose sole purpose is to convert natural lands into developed properties. Little if anything is asked in respect to conserving natural resources or providing neighborhood amenities (see Figure 9).

Communities wishing to discourage this type of development pattern need to consider modifying their zoning to require new development to set aside at least 50 percent of the buildable land as permanently protected conservation lands. The development potential that could normally be realized in this area is "transferred" to the remaining 50 percent of the buildable lands on the property.

Following this approach, a municipality would first calculate a site's yield using traditional zoning. A developer would then be permitted full density only if at least 50 percent (or more) of the buildable land is maintained as undivided conservation lands (illustrated in Figure 6: "Option 1"). Under certain conditions communities might also consider offering as much as a 100 percent density bonus for protecting 70 percent of the land (Figure 7: "Option 2").

It is noteworthy that the 36 village-like lots in Option 2 occupy less land than the 18 lots in Option 1, and that Option 2 therefore contributes more significantly to the goal of creating community-wide networks of conservation lands. The village-scale lots in Option 2 are based on traditional neighborhood design principles and are modeled after historic hamlet and village layouts. This type of development has proven to be particularly popular with empty nesters, single-parent households, and couples with young children.

Developers wishing to serve the large lot market have a "country properties" option (Figure 8: "Option 3"). Under this option up to 20 percent of the properties gross area (10 acres in this case) may be split into small lots. The average size of these small lots may be no less than two acres. The remainder of the property may remain as a single contiguous parcel or if area allows this parcel may be split into large lots a minimum of 25 acres in area..

Under conservation zoning, absent from this menu of choices is the conventional full-density development providing no conservation lands (Figure 9). Because that kind of development causes the largest loss of resource lands and poses the greatest obstacle to conservation efforts, it is not included as an option under this approach.

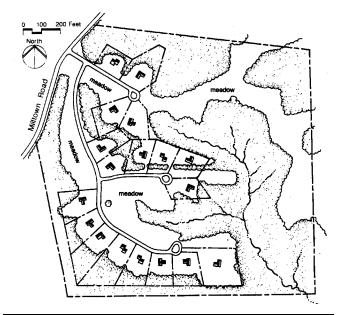

Figure 6

Option 1 Density-neutral with Pre-existing Zoning 18 Lots Lot Size Range: 20,000 to 40,000 sq. ft. 50% undivided open space

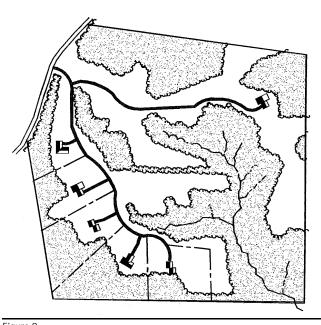

Figure 8

Option 3 County Properties A maximum of 5 lots may be created on 10 acres

The remainder of the land remains as a single parcel or may be divided into lots 25 acres or greater in area

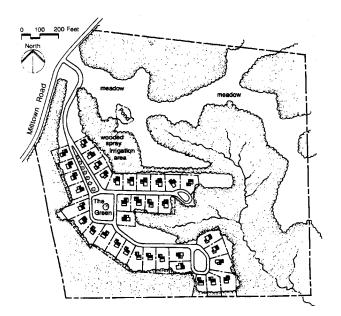

Figure 7 Option 2 Hamlet or Village 36 Lots Lot Size Range: 6,000 to 12,000 sq. ft. 70% undivided open space

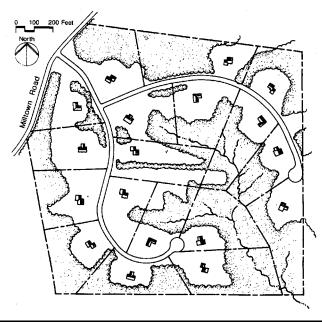

Figure 9 The kind of subdivision most frequently created in Michigan is the type which blankets the development parcel with houselots, and which pays little if any attention to designing around the special features of the property. However, such a sketch can provide a useful estimate of a site's capacity to accommodate new houses at the base density allowed under zoning—and is therefore known as a "Yield Plan."

# CONSERVATION DESIGN, A FOUR-STEP PROCESS

esigning developments around the central organizing principle of land conservation is not difficult. However, it is essential that ordinances contain clear standards to guide the conservation design process. The four-step approach described below has been proven to be effective in laying out new full-density developments where all the significant natural and cultural features have been preserved.

Step One consists of identifying the land that should be permanently protected. The developer incorporates areas pre-identified on the community-wide Map of Potential Conservation Landsand then performs a site analysis in order to precisely locate features to be conserved. The developer first identifies all the Primary Conservation Amas(Figure 10). He then identifies Secondary Conservation Amas(Figure 11) which comprise noteworthy features of the property that are typically unprotected under current codes. These include: mature woodlands, greenways and trails, river and stream corridors, prime farmland, hedgerows and individual free-standing trees or tree groups, wildlife habitats and travel corridors, historic sites and structures, scenic viewsheds, etc. After "greenlining" these conservation elements, the remaining

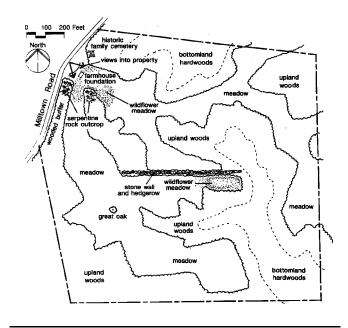

Figure 11 Step One, Part Two Identifying Secondary Conservation Areas

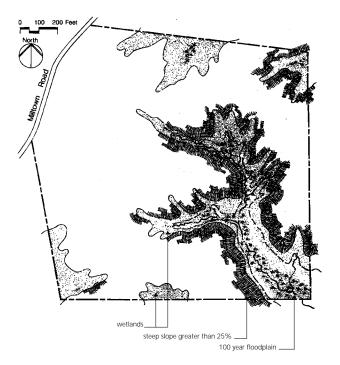

Figure 10 Step One, Part One Identifying Primary Conservation Areas

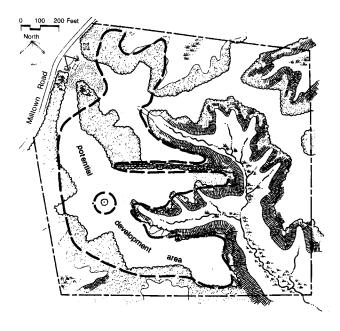

Figure 12 Outline Potential Development Areas for Options 1 & 2

part of the property becomes the Potential Development Area(Figure 13).

*Step Two* involves locating sites of individual building envelopes within the Potential Development **Aa** so that their views of the conservation lands are maximized (Figure 13). The number of building envelopes is a function of the density permitted within the zoning district, as shown on a Yield Plan (Figure 9).

*Step Three* simply involves "connecting the dots" with streets and informal trails (Figure 14), while *Step Four* consists of drawing in the lot lines (Figure 15).

This approach reverses the sequence of steps in laying out conventional developments, where the street system is the first thing to be identified, followed by lot lines fanning out to encompass every square foot of ground into new lots. When communities require nothing more than "new lots and streets," that is all they receive. By setting community standards higher and requiring 50 to 70 percent conservation lands as a precondition for achieving full density, officials can effectively encourage the conservation of natural and scenic resources in their community. The protected conservation lands in each new development become building blocks that add new acreage to a community-wide network of interconnected conservation lands each time a property is developed.

#### I-22

## FREQUENTLY ASKED QUESTIONS

ABOUT CONSERVATION DEVELOPMENT DESIGN

**Q.** Does conservation planning/design involve a "takings"? A. No. People who do not fully understand this conservation-based approach to development may mistakenly believe that it constitutes "a taking of land without compensation." This misunderstanding may stem from the fact that conservation developments, as described in this booklet, involve either large percentages of undivided conservation lands or lower overall building densities.

There are two reasons why this approach does not constitute a "takings."

First, no density is taken away. Conservation zoning is fundamentally fair because it allows landowners and developers to achieve full density under the municipality's current zoning and, in some cases even to increase that density significantly through several different "as-of-right" options. Of the three options previously described, two provide for either full or enhanced densities. The other option offers the developer the choice to lower densities and increased lot sizes. Although conservation zoning precludes full density layouts that do not include conservation

lands, this is legal because there is no constitutional "right to sprawl."

Second, no land is taken for public use. None of the land which is required to be designated for conservation purposes becomes public (or even publicly accessible) unless the landowner or developer wants it to be. In the vast majority of situations, communities themselves have no desire to own and manage such conservation land, which they generally feel should be a neighborhood responsibility. In cases where local officials wish to provide community recreational facilities (such as ballfields or trails) within conservation developments, the community must negotiate with the developer for the purchase of that land on a "willing seller/willing buyer" basis. To facilitate such negotiations, conservation zoning ordinances can be written to include density incentives to persuade developers to designate specific parts of their conservation land for public ownership or for public access and use.

**Q.** How can a community ensure permanent protection for conservation lands?

**A.** The most effective way to ensure that the conservation of land in a new development will

remain undeveloped forever is to place a permanent conservation easement on it. Such easements run with the chain of title, in perpetuity, and specify the various uses that may occur on the property. These restrictions supersede zoning ordinances and continue in force even if legal densities rise in future years. Easements are typically held by land trusts and units of government. Sometimes adjacent property owners are also easement co-holder in conjunction with the local unit of government or land trust. Deed restrictions and covenants are, by comparison, not as effective as easements. and are not recommended for this purpose. Easements can be modified only within the spirit of the original agreement, and only if all the co-holders agree.

Q. What are the ownership, maintenance, tax and liability issues? A. Among the most commonly expressed concerns about developments with permanently protected conservation lands are questions about who will own and maintain the conservation land, and who will be responsible for the potential liability and payment of property taxes. The short answer is that whoever owns the conservation land is responsible for the above.

# **Q.** But who owns this land?

A. Ownership Choices

There are basically four options, which may be combined within the same development where that makes the most sense.

1. Individual Landowner

At its simplest level, the original landowner (a farmer, for example) can retain ownership of 70 to 100 percent of the conservation land to keep it in the family. (In these cases up to 30 percent of the conservation lands could be reserved for common neighborhood use by development residents.) That landowner can also pass this property on to sons or daughters, or sell it to other individual landowners, with permanent conservation easements running with the land and protecting it from development under future owners.

#### 2. Homeowners' Associations

Most conservation land within developments is owned and managed by homeowners' associations (HOAs). A few basic ground rules encourage a good performance record. First, membership must be automatic, a precondition of property purchase in the development. Second, zoning should require that bylaws give such associations the legal right to place liens on properties of members who fail to pay their dues. Third. facilities should be minimal (ballfields and trails rather than clubhouses and swimming pools) to keep annual dues low. And fourth, detailed maintenance plans for conservation areas should be required by the community as a condition of approval. The community should have enforcement rights and may place a lien on the property should the HOA fail to perform their obligations to maintain the conservation land.

#### 3. Land Trusts

Although homeowners' associations are generally the most logical recipients of conservation land within developments, occasionally situations arise where such ownership most appropriately resides with a land trust (such as when a particularly rare or significant natural area is involved). Land trusts are private, charitable groups whose principal purpose is to protect land under its stewardship from inappropriate change. Their most common role is to hold easements or fee

simple title on conservation lands within new developments and elsewhere in the community.

To cover their costs in maintaining land they own or in monitoring land they hold easements on, land trusts typically require some endowment funding. When conservation zoning offers a density bonus, developers can donate the proceeds from the additional "endowment lots" to such trusts for maintenance or monitoring.

#### 4. Municipality or Other Public Agency

In special situations a local government might desire to own part of the conservation land within a new development, such as when that land has been identified in a Land Use Plan as a good location for a neighborhood park or for a link in a community trail network. Developers can be encouraged to sell or donate certain acreage to communities through additional density incentives, although the final decision would remain the developer's.

## 5. Combinations of the Above

As illustrated in Figure 18, the conservation land within new developments could involve multiple ownerships, including (1) "non-common" conservation lands such as cropland retained by the original farmer, (2) common conservation lands such as ballfields owned by an HOA, and (3) a trail corridor owned by either a land trust or by the community.

#### Tax Concerns

Property tax assessments on conservation developments should not differ, in total, from those on conventional developments. This is because the same number of houses and acres of land are involved in both cases (except when part of the conservation lands is owned by a public entity, which is uncommon). Although the conservation lands in conservation developments is usually taxed at a lower rate because easements prevent it from being developed, the adjacent lots usually are taxed at a higher rate since their location next to permanently protected conservation lands usually result in them being more desirable.

**Q.** How does this conservation approach differ tion zoning can protect from "clustering"?

**A.** The conservation approach described in the previous pages differs dramatically from the kind of "clustering" that has occurred in many communities throughout Michigan over the past several decades. The principal points of difference are as follows: *Higher Percentage and Quality of Conservation lands* 

In contrast with typical cluster codes, conservation

zoning establishes higher standards for both the quantity and quality of conservation lands that is to be preserved. Under conservation zoning, 50 to 70 percent of the unconstrained land is permanently set aside. This compares with cluster provisions that frequently require only 25 to 30 of the gross land area be conserved. That minimal land area usually ends up including all of the most unusable land as conservation lands, and sometimes also includes undesirable, left-over areas such as stormwater management facilities and land under high-tension power lines.

#### Conservation lands Pre-Determined to Form Community-wide Conservation Network

Although clustering has at best typically produced a few small "green islands" here and there in any community, conservation zoning can protect

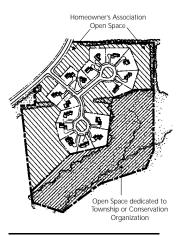

Figure 16 Various private and public entities can own different parts of the open space within conservation subdivisions, as illustrated above.

blocks and corridors of permanent conservation lands. These areas can be pre-identified on in the community's Map of Potential Conservation Lands so that each new development will add to rather than subtract from the community's conservation lands acreage.

#### Eliminates the Standard Practice of Full-Density with No Conservation lands

Under this new system, full density is only achievable for layouts in which 50 percent or more of the unconstrained land is conserved as permanent, undivided conservation lands. By contrast, cluster zoning provisions are typically only optional alternatives within ordinances that permit full density, by right, for standard "cookie-cutter" designs with no conservation lands.

**Q.** How do esidential values in conservation developments compare to conventional developments?

**A.** Another concern of many people is that homes in conservation developments will differ in value from those in the rest of the community. Some believe that because so much land is set aside as conservation lands, the homes in a conservation developments will be prohibitively priced and the community will become a series of elitist enclaves. Other people take the opposite view, fearing that these homes will be smaller and less expensive than their own because of the

more compact lot sizes offered in conservation developments.

Both concerns are understandable but they miss the mark. Developers will build what the market is seeking at any given time, and they often base their decision about selling price on the character of surrounding neighborhoods and the amount they must pay for the land.

In conservation developments with substantial open space, there is little or no correlation between lot size and price. These developments have sometimes been described as "golf course communities without the golf course," underscoring the idea that a house on a small lot with a great view is frequently worth as much or more than the same house on a larger lot which is boxed in on all sides by other houses.

It is a well-established fact of real estate that people pay more for park-like settings, which offset their tendency to pay less for smaller lots. Successful developers know how to market homes in conservation developments by emphasizing the conservation lands. Rather than describing a house on a half-acre lot as such, the product is described as a house with 20 and onehalf acres, the larger figure reflecting the area of conservation land that has been protected in the development. When that conservation area abuts other similar land, as in the township-wide conservation lands network, a further marketing advantage exists.

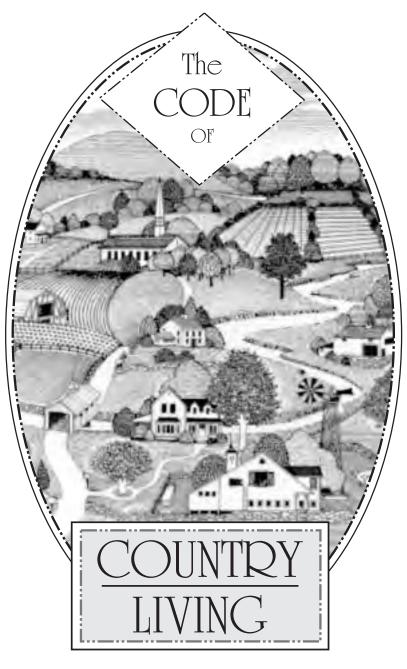

# RELATIONSHIP OF THE BETTER DESIGNS

Successful communities employ a wide array of conservation planning techniques simultaneously, over an extended period of time. Communities should continue their efforts to preserve special properties in their entirety whenever possible, such as by working with landowners interested in donating easements or fee title to a local conservation group, purchasing development rights or fee title with county, state or federal grant money, and transferring development rights to certain "receiving areas" with increased density. While these techniques can be effective, their potential for influencing the "big picture" is limited. The conservation approach outlined above offers great potential because it:

- 1. does not equie public expenditure of funds
- 2. does not depend upon landowner charity
- 3. does not involve complicated regulations for shifting rights to other parcels
- 4. does not depend upon the cooperation of two or more adjoining landowners to make it work

The conservation planning/design approach offers communities a practical way of protecting large acreages of land in a methodical and coordinated manner.

### The Code of Country Living

Settlers on the Illinois prairie lived by a code suited to their own livelihood and lifestyle in the rural countryside. Though that way of life has evolved over two centuries, there remains a code, a way of living, that rural Illinois residents still honor.

Living in the country can be a wonderful way of life—if your expectations are in-line with reality. Reality seldom measures up to the romanticized version of almost any idea or ideal—as is frequently discovered by those who move from an urban setting to the country. People often intend to get away from it all and enjoy the serenity of an agrarian countryside. What they'll likely find, however, is that they are only trading the benefits and drawbacks of city living for those of the country.

In rural Illinois, you'll find working farms. You'll also find a level of infrastructure and services generally below that provided through the collective wealth of an urban community. Many other factors, too, make the country living experience very different from what may be found in the city.

This booklet is provided to help you make an informed lifestyle decision about purchasing a home or a homesite in rural Illinois. Though it cannot convey the entirety of the understanding borne from a lifetime of rural living, it can give you a glimpse of what it takes to live by what might be called the Code of Country Living.

Access

You'll enjoy the lower traffic volumes on rural roads. That makes walking more enjoyable and allows you to observe the growing crops and the beautiful sunrises. The major purpose of the road—to provide a way

to get to and from your rural property—will vary with road types. Changing conditions and generally lower design level roads mean that you, your guests and emergency service vehicles will not necessarily have easy access at all times.

#### **Rural Roads**

Don't expect rural roads to be maintained at the same level as city streets. Counties, townships and road districts have primary responsibility for road maintenance in rural areas. Some roads may be privately owned requiring private maintenance funding. Seldom do rural roads include the amenities found in urban settings such as: wide lanes, curb and gutter, striping and lighting. And, the funds to maintain those roads will come primarily from the property taxes you and your neighbors pay.

Narrow roads and bridge weight limits often restrict travel. Large construction vehicles cannot navigate in some areas. If you plan to build, it's best to check out construction access well in advance.

Gravel roads generate dust and dings. Some road jurisdictions treat gravel roads to suppress the dust when traffic levels reach specific volumes, but dust is still a fact of life for many rural residents. Loose gravel on these roads regularly chips vehicle paint, at times may crack windshields and can pose dangerous travel conditions. If your homesite is located along a gravel road, know that dust will invade your home and your vehicles. Whatever the design of your road, don't expect that it will be improved in the foreseeable future. Check carefully with officials of the road jurisdiction to verify any claim that a road will be paved, bridges replaced, or other improvements made in the near term.

#### Weather Impacts

Illinois' fluctuating weather conditions can destroy roads. Midwestern spring freeze/thaw cycles leave low-grade roads subject to heavy damage and can even temporarily close some roads. Vehicle weights are often severely limited during the spring thaw period. In the summer, the hot sun can soften oil and chip road surfaces leaving them subject to damage by traffic and causing oil splatters on vehicles.

In extreme winter weather, rural roads can become impassable. The Illinois prairie is subject to drifting snow that closes roads, causes delays and creates serious travel hazards. Depending on the degree of drifting, it could be days before roads are cleared. Freezing rain, too, can create extremely dangerous travel conditions. Few rural road jurisdictions can afford the widespread use of salt to fight icy conditions.

Roadway flooding is not uncommon. Illinois' abundance of rivers, creeks and waterways makes its rural areas prone to roadway flooding. Heavy rains in flatland areas can easily cover roads with water, blocking or even destroying them.

#### **Private Drives**

Access to or from public roads is regulated by the state, county or road district jurisdiction responsible for the road. If planning to build, be sure to check in advance with the proper officials about authorization and placement of private drives and culverts.

#### **Emergency Service Access**

Response times of emergency service providers (sheriff, fire fighters,

ROAD

medical care, etc.) will likely be longer than in the city. Distances traveled and the volunteer nature of most rural services can add to that response time. Under some extreme conditions, you may find that emergency response is slow and expensive. A 9-1-1 emergency call-in service may not be available in all areas.

A few rural areas are not covered by fire protection or ambulance services. Besides the obvious problems that could create, your property insurance premiums might also be higher because of it.

#### Easements

The legal aspects of access can cause problems, especially if you gain access across property belonging to others. Get legal advice prior to purchasing and understand the easements that may be necessary when these questions arise.

#### **Pickups & Deliveries**

Building a residence in a rural area may be more expensive and time consuming due to delivery fees and the time required for contractors and construction workers to reach your building site.

School buses generally can reach most rural homes, though long private lanes or rural subdivision settings may force school children to walk to the pickup site. And those trips to school can be long. Consolidation of school districts in rural areas means your children's school could be half a county from your home. Learn which school district serves your area.

Mail delivery is generally available in all rural areas though timing may suffer in some locations.

Direct, daily newspaper delivery is not always available in rural areas. US Postal delivery of newspapers is an option but generally causes a oneday delay. Check with the newspaper of your choice before assuming you can get same-day delivery.

Standard parcel and overnight package delivery in the country may vary from city standards. Check with the carrier to find what service level can be expected.

# Utilities

The fresh air and sunshine in the country is plentiful and free. And, when utilities are functioning properly, they help to make life in the country as comfortable and modern as anywhere else. But, water, sewer, electric, telephone and other utilities may be unavailable or operate at lower than urban standards – and they can often cost you more

#### **Locating Utilities**

In order to get electric power or other utilities to your home site, it may be necessary to cross property owned by others. It is important to make sure that the proper easements are in place or can be secured to allow lines to be built to your own property.

Electrical power lines, telephone lines and pipelines may cross over, under, or nearby your property. Be aware of easements to the property and those nearby and what they allow the utility providers to do in the way of access, maintenance and expansion.

At least 48 hours prior to doing any digging, call *JULIE* (Joint Utilities Locating Information for Excavators) in order to locate underground utility lines. You can reach JULIE 24 hours a day, seven days a week at 800-892-0123.

#### Water Supply

You will have to locate a supply of potable water adequate to serve your needs. The most common method is through the use of a water well. Permits for wells may be required by the county health department or a local water authority serving your area. The cost for drilling and pumping can be considerable. Be sure to use a licensed well driller. The quality and quantity of well water can vary significantly from location to location and from season to season. Mineral, bacterial and other quality issues should be measured and then determine whether practical solutions exist for all of the problems you might discover.

> In some areas of the state water wells are wholly impractical or unreliable. Because of your absolute reliance on a good supply of water, it is strongly advised that you research this issue carefully before purchasing!

Most often well water will require some form of treatment. Having a water softening system is almost always advisable. In extreme cases, some form of chemical treatment may be required to deal with high levels of bacteria.

Some areas of the state are served by water districts. These districts supply potable water through a rural network of supply lines. In these areas, certain additional taxes and/or fees may be required. Expect to pay a tapping fee. You may also find that your monthly cost of service can be more expensive when compared to urban systems.

As a last resort, your potable water may need to be trucked to your property and stored in a tank or cistern. Depending on the supplier and their distance from your property, buying and trucking water could prove to be the most expensive and least reliable method in the long run.

#### Sewer & Septic

Sewer service is rarely available. If it is, it may be relatively expensive to connect to the system and routine fees could be relatively high compared to city rates.

If sewer service is not available, you will need to use an approved septic system or other waste treatment process. These can add substantial cost to establishing your homesite. The type of soil you have available for a leach field will be very important in determining the cost and function of your system. Ask for planning assistance from the County Health Department if one exists and have existing systems checked—or a new system installed—by a reliable installer.

Septic system requirements vary. Some counties may have significant regulations stipulating the type and size of the septic or treatment system you must have. Conditions could dictate that a sand filter system be installed – an expensive addition to the cost of the home. In some cluster housing settings or on certain soil types, septic systems may not be allowed at all.

Locating the septic system requires careful planning. Sufficient area will be needed for locating the septic tank and drain field a suitable distance from the residence. Floodplains, wetlands, trees and manmade structures may limit where the septic system can be placed. Also, access will be needed to the septic tank for future clean out operations. Location of the septic system in relation to wells is also an important consideration.

#### Telephone

Telephone communications can pose certain problems. Small, local area phone service suppliers may not provide the most modern telecommunications equipment limiting your options. It could be difficult to obtain a second line for phone, FAX or computer modem uses. Even cellular phones will not work well in all rural areas because of the often greater distances to cell phone towers.

Links to Internet provider services via phone line may require a long-distance phone connection. Often older rural telecommunications systems restrict computer modems to operating at less than top speeds. Not all rural communities have a local Internet access provider, though many school systems and libraries do offer some connection options.

#### Electricity

Electric service is generally available to all rural areas. However, a power company asked to serve some remote areas may demand a share of the infrastructure cost be borne by the user. It is important to determine the proximity of an electrical power supply. It can be very expensive to extend power lines to remote areas.

> Electric power may not be available in a three–phase service configuration. If you have special power requirements, it is important to know what level of service can be provided and at what cost.

In addition to a monthly charge for energy consumed, the cost of electric service usually includes a fee to hook into the system. Some utilities charge further for the cost of establishing

service lines and poles on your property. Check to see what supplier provides power to the area then consider all costs before making a decision to purchase property in the country.

Power outages can occur with more frequency in rural areas than in urban settings. A loss of electric power can interrupt your well, furnace, and other appliances dependant on electrical power. If you live in the country, it is important to be prepared to survive for several days or longer in severe cold without electrical power. Depending on the duration of the outage, you might also lose food in freezers or refrigerators. Such outages or current spikes can cause problems with computers and other home electronics.

#### Gas

Natural gas may not be available. You could, instead, rely on electric power which is often more expensive (for heat-producing appliances.) The common alternative is having Liquid Propane Gas or heating oil delivered by truck and stored in a tank on your property. The cost of such fuel is often higher on a BTU basis than is natural gas. If relying on gas deliveries,

you must be certain that your supply is adequate to get you through winter's periodic snow storms when access for replenishing supplies may be limited.

Gas appliances may need to be converted. If you choose to use Liquid Propane Gas as your energy source, all appliances set up to operate on natural gas will need to be converted to operate on the Liquid Propane Gas.

#### Trash & Recycling

Routine trash removal may not be available in all rural areas. Where it is, it most often requires a separate fee. Trash pickup is seldom provided as a government service in rural areas and is not covered by the taxes you pay. It is illegal to create your own trash dump, even on your own land. Burning of trash may be prohibited and risks fire damage to mature crops and nearby buildings. In some cases, your only option may be to haul your trash to the landfill yourself.

Recycling may be difficult in rural areas. Recycling pick-up is not likely available and rural areas generally have few recycling centers.

## Property

Property ownership is a treasured right in rural areas. The wide open expanses there generally allow you to own a larger tract than you might otherwise be able to in urban areas. And the open space can give you a sense of freedom not available in a crowded city

setting. However your rural property can be impacted by a myriad of issues—some commonly shared in urban areas, and some quite different.

## Zoning

Building a home may not be possible on all sites. The area may not be suitable for building or may not be zoned residential. Where there is zoning you must check with the county or township zoning, planning and/ or building department(s) to know whether a parcel of land may be developed. A building permit may be required. In those counties that are zoned, that requirement is likely for all structures and improvements. Check with the county or township zoning, planning and/or building department(s) for additional information.

Zoning can be a mixed bag. Only about half the counties in Illinois are zoned. In some unzoned counties, townships have established zoning. While zoning imposes limitations, it also provides some safeguards against undesirable use of neighboring property. In those counties or townships which are not zoned, there may be virtually no local restriction on what your adjoining neighbors may do on their property—regardless of its impact on you and the value of your property.

The view from your property may change. Nearby properties will probably not remain as they are indefinitely. Check with the county or township zoning, planning and/or building department(s) to find out how

the properties are zoned and to see what future developments may be planned.

City zoning may apply in rural areas. In un-zoned counties, a municipality that is zoned may generally impose its zoning regulations for up to one and one half miles outside its corporate limits.

#### Easements

Easements should be considered. These could limit how you can use your property and may require you to allow construction rights-of-way across your land. Roads, railroads, habitat protection, view sheds, power lines, gas lines, water lines, and sewer lines are a few of the things for which easements can be established.

Be aware of easements on nearby parcels, too. Learn what the easement allows the easement owner to do in the way of access, maintenance and expansion and check for limits the easement may imposed on the use of your own property. Not all contracts are in writing. There may be verbal commitments to easements that are not of record.

#### **Mineral Rights**

The mineral rights under your property may be owned by someone else. Owners of mineral rights generally have the ability to change the surface characteristics in order to extract their minerals. It is very important to know what minerals may be located under the land and who owns them. Much of the rural land in Illinois can be used for coal or aggregate mining or for oil drilling—however, a special review by the county board is usually required.

#### **Property Lines & Fences**

Respect private property rights. Many people are unaware of property boundaries when first arriving in the area. It is your responsibility to know who's land you are on – whether or not it is fenced.

You may be provided with a plat of your property, but unless the land

has been surveyed and pins placed by a licensed surveyor, you should not assume that the plat is accurately reflected by your current boundary markings.

What appear to be boundary fences are not necessarily accurately placed. Some merely approximate those boundaries. A survey of the land is the only way to confirm the location of your property lines. The Illinois law of "Adverse Possession" could actually cause you to loose some land to an adjacent owner over a period of years if property boundaries are not properly determined and defended.

What you think of as your neighbor's fence may cost you money. Illinois' fence law requires that adjoining landowners share in a "just proportion" of the cost of constructing and maintaining a property line fence. That applies despite the fact that you may have no use for nor desire for the fence.

#### Local Covenants

Many rural subdivisions have covenants that limit the use of the property. It is important to obtain a copy of the covenants (or confirm there are none) and make sure you can live with those rules. Not having a covenant doesn't eliminate all problems, it simply means you'll lack a powerful tool that could be used to settle disputes between neighbors.

Homeowners' Associations (HOAs) in some rural subdivisions are required to take care of common elements, private roads, open space, etc. A dysfunctional homeowners' association or poor covenants can cause problems for you and even involve you in expensive litigation. Dues are almost always a requirement for those residing in areas served by an HOA. The by-laws of the HOA should tell you how the organization operates and how the dues are set.

#### Floodplains & Drainage

Watch for areas designated as "floodplains." Local, state and federal regulations may prohibit or limit the types of structures built in floodplains. If allowed at all, certain—often expensive—modifications to the design may be required. Also, your mortgage lender could require you to purchase government flood insurance.

Your drainage practices must conform with the Illinois Drainage Code. Generally, landowners must accept the natural flow of water onto their property and discharge it from their property at its natural point and rate of flow. Contact your county Soil and Water Conservation District for information.

Maintenance of others' drainage structures could impact you. If there is a drainage ditch or underground drainage tile crossing your property there is a good possibility that the owners have the right to come onto your property to maintain it. Heavy equipment might be used leaving considerable damage. While Illinois law generally requires compensation, you may have to negotiate settlement for damages. On the other hand, if you disturb the drainage ditch or tile during construction or otherwise you could be held responsible for damages that result to crops and property.

Your property may be situated within a drainage district. If so, your property would be subject to the taxes levied by the district for maintenance of local drainage systems.

## **Fire Protection**

Fire protection is a serious property issue. Though most rural areas of the state are served by a volunteer fire protection unit, some pockets remain without any coverage. Buildings and other structures on property that is not within a fire protection district may be subject to higher insurance rates and be at greater risk in the event of fire than those within a district. As a general rule, property protected by a volunteer fire protection unit is subject to higher insurance rates than that served by a full-time professional force.

# Nature

The country is prized for giving its residents the ability to witness the flora and fauna of nature firsthand. But, when the elements and earth turn unfriendly, rural residents can experience more problems than their city cousins.

## Soils

Illinois soils vary from deep, rich silt loam to shallow, rocky clay. Each requires special building considerations. Some may hinder the construction of basements due to drainage restrictions. Building in many areas requires an engineered foundation. You can learn the soil conditions on your property if you have a soil test performed. Check with a qualified contractor for foundation needs which will influence building design.

## Storms & Wind

Tornadoes and other severe storms are not unique to rural areas, but you will find that few rural areas are provided with the advanced warning systems found in many urban communities.

The predominant wind direction in Illinois is from southwest to northeast. Situate and plan your homesite accordingly.

## Flooding

The lay of the land can tell you where the water will flow. However, runoff from the flat prairie lands of Illinois is often difficult to predict. "Sheet" drainage over flat land may cause stormwater to spread over wide areas. The lack of significant slope also makes the area slow to drain. Property owners who want to fill in low areas may first be required to obtain proper local, state, and federal permits and provide for wetland mitigation.

Flash flooding can occur during the heavy rains of the spring or summer months, turning a dry low-lying area into a lake. Spring run-off can cause a small creek to become a fast-flowing river. Consider this before planning your building site.

Residents sometimes use sand bags to protect their homes. Local governments are not generally obligated to provide sand bags, equipment or people to protect private property from flooding.

#### Animals

Wild animals can make wonderful neighbors. However, even the most attractive of such animals can cause serious problems. Rural development encroaches on the traditional habitat of coyotes, deer, ticks, raccoon, opossum and other animals that can be dangerous and you need to learn how to deal with them. In general, it is best to enjoy wildlife from a distance.

Wild animals can pose serious threats to pets, livestock, vegetation, and vehicles. Waterfowl can be particularly damaging to vegetation along flyways. Deer are ubiquitous in Illinois. They damage vegetation and often bolt across a road unexpectedly causing traffic accidents. Fox and coyote can be serious threats to livestock and pets. Raccoon have little fear of human surroundings and are insistent visitors to anything that resembles food — no matter how close to your home or well protected. Snakes, opossum, field mice, groundhogs and skunks are some of nature's other inhabitants in rural Illinois.

Dog packs pose a threat to pets, livestock, and potentially to humans. These are often formed by free roaming pets, stray dogs or even coydogs (the offspring of coyotes and domesticated dogs). The packs roam freely through the countryside looking for food. Where dog pack problems can be identified, counties may offer some form of assistance in eradication or monetary compensation for damages.

# Agriculture

Through hard work and perseverance of the early settlers, the Illinois prairie has become one of the richest food-producing areas on earth. Its rich soils and abundant rainfall are unique to the Midwest making this a vital agricultural region on a global scale. Illinois farmers make their living from the land—making their good stewardship of the land an integral part of their livelihood. Owning rural land means learning how to care for it. It also means your neighbors may be farmers. There are a few things you need to know about Illinois agriculture.

## This is Farm Country

Agriculture is an integral part of Illinois. If you choose to live in the country, you choose to live among the farms of our rural countryside. Do not expect government to intervene in the normal day-to-day operations of your agri-business neighbors. In fact, Illinois has *"Right to Farm"* legislation that helps to protect established farm operations using good management practices from nuisance and liable suits. It helps enable them to responsibly continue producing food and fiber for the nation and the world.

Having a rural residence means you're part of farm country. Here, farmers sometimes work around the clock. Often that work involves the use of large farm implements. Your daytime and night-time peace and quiet can be disturbed by common agricultural practices, especially during the spring and fall field work seasons.

## Sights, Smells and Sounds

Tillage, harvesting, haying and other operations can result in dust, especially during windy and dry weather. That dust can easily invade your home and vehicles.

Some farmers occasionally burn their ditches and grassy areas to keep them free of weeds or to promote growth of plants native to the Illinois prairie. This burning may create smoke that you could find objectionable.

Crop production and protection products are used in growing Illinois' abundant and healthy crops. These products are applied by licensed applicators who take precautions to properly handle and apply them. Learning more about the safety of these products can be as simple as contacting the University of Illinois Extension Service.

Animals and their manure can cause objectionable odors. Farmers use best management practices to limit that odor and follow government guidelines during field application to minimize odor impacts. Manure serves as a valuable source of organic fertilizer and its use lowers dependency on synthetic nutrients. Still, the uninitiated nose may find it disagreeable. Check carefully before buying a rural homesite to be sure it is located a reasonable distance from livestock operations. Keep in mind prevailing winds.

## Weed Control

Before buying land you should know whether it has noxious weeds that you may be required to control. Some plants are even poisonous to livestock, pets or humans. Illinois' "Noxious Weed Law" requires the land owner to control or eradicate certain weeds on their own property.

## **Slow Moving Vehicles**

Farm equipment may slow your travel on rural roads. These large, slow-moving pieces of machinery help to make Illinois one of the leading food producing areas of the world. Farm tractors generally move at top speeds of from 15 to 20 miles per hour so you can over take them quickly from the rear. Watch for them and be patient—farmers will let you pass as soon as it's safe for them to pull over.

Look for the Slow Moving Vehicle (SMV) emblem displayed on the rear of farm equipment. The SMV emblem has a red-orange fluorescent triangle at its center surounded by a highly reflective red border. That's a sign you need to know when driving rural roads. Farm equipment and certain other slow moving vehicles are required to display the SMV emblem when they share the road with other traffic. It warns you to slow down. Learn to recognize it and heed its warning.

To protect the meaning and significance of the SMV emblem for traffic safety, Illinois law prohibits the use of that emblem for other purposes. For instance, it is illegal to use the SMV emblem as a lane marker or gate sign.

# Government

Illinois has more than 6,600 units of local government—far more than any other state in the nation. In rural areas, your home may be found to be in a dozen or more taxing districts—each one providing some service and taxing your property to fund it. That fact generates a number of things you should consider.

## **Property Taxes**

Illinois is a high property tax state—in part, due to its reliance on local government. Local government relies heavily on the property tax for its revenue—especially where sales taxes and other revenue sources are not available to special purpose governmental units. That means rural property owners often incur a large share of the cost of providing local government services, especially in the less-densely populated areas.

## **Keeping Track**

Illinois counties most often encompass dozens of local governmental units. It is sometimes difficult to know which unit to turn to for a particular service or to address a particular problem. Unlike urban areas in which the city is the primary provider of most services, in rural areas, different services may each be provided by a separate unit of government. Exercising your civic duty to keep an eye on all those units can be a daunting task.

#### **Service Levels**

Few rural governmental units have the financial resources of their urban counterparts. Generally, fewer services can be offered and the level of service may be less than that found in cities.

# Neighbors

Illinois' rural residents are generally very friendly and open. Neighborliness is practiced and expected in return. They do ask, however, that privacy and private property rights be respected.

#### Interact

Get to know your new neighbors. Don't wait—meet those folks living near your new home as soon as you decide to buy in the country, or even before. Knowing your neighbors and letting them get to know you will speed your acceptance as a new arrival in the neighborhood and boost your own comfort level.

Learn to wave to your neighbors—it's the country thing to do. Whether you meet them on the road or driving by their home, be sure to give a friendly wave. You'll come to recognize and appreciate each neighbor's individual style.

#### Be a Good Neighbor

Keep your property neat. The vast majority of farmers and rural residents take pride in keeping their homesites presentable. Be a good neighbor and do your share.

Become a part of the neighborhood. Don't merely keep a house in the country while spending your time and money in some distant urban or commercial center. Get involved in local community events and organizations and patronize the local businesses.

# Information

Where do you turn for more information about the considerations noted in this booklet? Here

are some very general suggestions. Of course,

resources will differ by locale so you may need to do a little research on your own.

Not all services listed are available in all counties. When in doubt, start with the county Farm Bureau or the University of Illinois Extension Service for general information about rural areas.

## Local Government

- County (or Township) Office of Zoning, Planning and/or Building
- County Recorder of Deeds
- County Highway Department
- Township (or Road District) Highway Commissioner
- Local Drainage District
- County Health Department
- County Animal Control Unit
- County Sheriff's Office
- County Emergency Services and Disaster Agency/Officer
- County & Township Assessors
- Soil and Water Conservation District

## Businesses

- Utilities
- Fuel contractors
- Refuse/waste haulers
- Building contractors
- Realtors

## Other

- University of Illinois Extension Service
- Local Postmaster

## Associations

- County Farm Bureau®
- Local Chamber of Commerce
